The Graduate School 17

Introduction to the University of Maryland 18

Programs 20

- Accounting (BMAC) 25
  - Accounting, Master of Science (M.S.) 26
- Additive Manufacturing (PMAM) 26
  - Additive Manufacturing, Master of Engineering (M.Eng.) 27
- Additive Manufacturing (Z115) 27
  - Additive Manufacturing, Post-Baccalaureate Certificate (P.B.C.) 28
- Administration, Supervision & Curriculum (Z900) 28
  - Administration, Supervision & Curriculum, Certificate of Advanced Study (C.A.S.) 28
- Aerospace Engineering (ENAE) 28
  - Aerospace Engineering, Master of Science (M.S.) 30
  - Aerospace Engineering, Doctor of Philosophy (Ph.D.) 30
- Aerospace Engineering (PMAE) 30
  - Aerospace Engineering, Master of Engineering (M.Eng.) 31
- Aerospace Engineering (Z053) 31
  - Aerospace Engineering, Post-Baccalaureate Certificate (P.B.C.) 32
- African American Studies (Z096) 33
  - African American Studies, Post-Baccalaureate Certificate (P.B.C.) 33
- Agricultural and Resource Economics (AREC) 33
  - Agricultural and Resource Economics, Master of Science (M.S.) 35
  - Agricultural and Resource Economics, Doctor of Philosophy (Ph.D.) 36
- Air Quality Science and Technology (Z047) 36
  - Air Quality Science and Technology, Post-Baccalaureate Certificate (P.B.C.) 37
- American Studies (AMST) 37
  - American Studies, Master of Arts (M.A.) 38
  - American Studies, Doctor of Philosophy (Ph.D.) 38
- Animal Sciences (ANSC) 38
  - Animal Sciences, Master of Science (M.S.) 40
  - Animal Sciences, Doctor of Philosophy (Ph.D.) 40
- Anthropology (ANTH) 41
  - Anthropology, Master of Applied Anthropology (M.A.A.) 42
  - Anthropology, Doctor of Philosophy (Ph.D.) 43
- Applied Anthropology and Historic Preservation (AAHP) 43
  - Anthropology and Historic Preservation, Master of Applied Anthropology and Master of Historic Preservation (dual degree) (M.A.A. and M.H.P.) 44
  - Anthropology and Historic Preservation, Master of Applied Anthropology and Master of Historic Preservation (dual degree) (M.A.A. and M.H.P.) 45
- Applied Counseling and Human Services (Z069) 46
  - Applied Counseling and Human Services, Post-Baccalaureate Certificate (P.B.C.) 46
- Applied Economics (on-campus) (MPEM) 46
  - Applied Economics, Master of Professional Studies (M.P.S.) 47
- Applied Economics (off-campus) (MPEC) 47
  - Applied Economics, Master of Professional Studies (M.P.S.) 47
- Applied Entomology (MPAE) 47
  - Applied Entomology, Master of Professional Studies (M.P.S.) 49
- Applied Mathematics & Statistics, and Scientific Computation (AMSC) 49
  - Applied Mathematics & Statistics, and Scientific Computation, Master of Science (M.S.) 50
  - Applied Mathematics & Statistics, and Scientific Computation, Doctor of Philosophy (Ph.D.) 51
- Architecture (ARCH) 52
  - Architecture, Master of Architecture (M.Arch.) 53
  - Architecture, Master of Science (M.S.) 54
- Architecture and Community Planning (ARCP) 54
  - Architecture and Community Planning, Master of Architecture and Master of Community Planning (dual degree) (M.Arch. and M.C.P.) 55
- Architecture and Historic Preservation (ARHP) 56
  - Architecture and Historic Preservation,Master of Architecture and Master of Historic Preservation (dual degree) (M.Arch. and M.H.P.) 57
- Architecture and Real Estate Development (ARDV) 58
  - Architecture and Real Estate Development, Master of Architecture and Master of Real Estate Development (dual degree) (M.Arch. and M.R.E.D.) 60
- Art History and Archaeology (ARTH) 60
  - Art History and Archaeology, Master of Arts (M.A.) 62
  - Art History and Archaeology, Doctor of Philosophy (Ph.D.) 62
- Art Studio (ARTT) 62
  - Art Studio, Master of Fine Arts (M.F.A.) 63
- Astronomy (ASTR) 64

Astronomy, Master of Science (M.S.) 65
Astronomy, Doctor of Philosophy (Ph.D.) 66
Atmospheric and Oceanic Science (AOSC) 66
Atmospheric and Oceanic Science, Master of Science (M.S.) 68
Atmospheric and Oceanic Science, Doctor of Philosophy (Ph.D.) 68
Atmospheric and Oceanic Science Technology (MPAO) 69
Atmospheric and Oceanic Science Technology, Master of Professional Studies (M.P.S.) 69
Atmospheric & Oceanic Science (Z046) 70
Atmospheric and Oceanic Science, Post-Baccalaureate Certificate (P.B.C.) 70
Beekeeping (Z088) 70
Beekeeping, Post-Baccalaureate Certificate (P.B.C.) 71
Behavioral and Community Health (BCHL) 71
Behavioral and Community Health, Doctor of Philosophy (Ph.D.) 73
Behavioral and Community Health (MBCH) 73
Behavioral and Community Health, Master of Public Health (M.P.H.) 75
Biochemistry (BCHM) 75
Biochemistry, Master of Science (M.S.) 76
Biochemistry, Doctor of Philosophy (Ph.D.) 77
Bioengineering, Doctor of Medicine and Master of Science (dual degree) (M.D. and M.S.) 77
Bioengineering, Doctor of Medicine and Doctor of Philosophy (dual degree) (M.D. and Ph.D.) 77
Bioengineering (BIOE) 77
Bioengineering, Master of Science (M.S.) 78
Bioengineering, Doctor of Philosophy (Ph.D.) 79
Bioengineering (online) (MEBI) 79
Bioengineering, Master of Engineering (M.Eng.) 80
Bioengineering (online) (Z083) 80
Bioengineering, Post-Baccalaureate Certificate (P.B.C.) 81
Bioengineering (PMBI) 82
Bioengineering, Master of Engineering (M.Eng.) 82
Bioengineering (Z054) 83
Bioengineering, Post-Baccalaureate Certificate (P.B.C.) 84
Biological Resources Engineering (ENBE) 84
Biological Resources Engineering, Master of Science (M.S.) 84
Biological Resource Engineering, Doctor of Philosophy (Ph.D.) 85
Biological Sciences (BISI) 85
Biological Sciences, Master of Science (M.S.) 86
Biological Sciences, Doctor of Philosophy (Ph.D.) 87
Biophysics (BIPH) 87
Biophysics, Master of Science (M.S.) 89
Biophysics, Doctor of Philosophy (Ph.D.) 89
Biostatistics (BIOS) 89
Biostatistics, Master of Public Health (M.P.H.) 90
Business Administration and Accounting (BAAC) 90
Business Administration and Accounting, Master of Business Administration and Master of Science (Dual Degree) (M.B.A. and M.S.) 91
Business Administration (BMBA) 92
Business Administration, Master of Business Administration (M.B.A.) 92
Business Administration (Executive) (CMBA) 93
Business Administration Executive, Master of Business Administration (M.B.A.) 93
Business Administration (Executive) (EMBA) 94
Business Administration Executive, Master of Business Administration (M.B.A.) 94
Business Administration and Finance (BAFN) 95
Business Administration and Finance, Master of Business Administration and Master of Science (Dual Degree) (M.B.A. and M.Fin.) 95
Business Administration and Information Systems (BAIS) 96
Business Administration and Information Systems, Master of Business Administration and Master of Science (Dual Degree) (M.B.A. and M.S.) 96
Business Administration and Marketing Analytics (BAMA) 97
Business Administration and Marketing Analytics, Master of Business Administration and Master of Science (Dual Degree) (M.B.A. and M.S.) 98
Business Administration and Nursing (BNRS) 98
Business Administration and Nursing, Master of Business Administration and Master of Science (dual degree) (M.B.A. and M.S.) 99
Business Administration and Nursing, Master of Business Administration and Doctor of Philosophy (dual degree) (M.B.A. and Ph.D.) 99
Business Administration (online) (OMBA) 99
Business Administration (Online), Master of Business Administration (M.B.A.) 100
Business Administration and Pharmacy (BPHR) 100
Business Administration and Pharmacy, Master of Business Administration and Doctor of Pharmacy (Dual Degree) (M.B.A. and Pharm.D.) 101
Business Administration and Public Policy (BMPO) 102

Business Administration and Public Policy, Master of Business Administration and Master of Public Policy (Dual Degree) (M.B.A. and M.P.P.) 103
Business Administration and Real Estate Development (MBRE) 103
Business Administration and Real Estate Development, Master of Business Administration and Master of Real Estate Development (Dual Degree) (M.B.A. and M.R.E.D.) 104
Business Administration and Social Work (BMSW) 104
Business Administration and Social Work, Master of Business Administration and Master of Social Work (Dual Degree) (M.B.A. and M.S.W.) 105
Business Administration and Supply Chain Management (BASC) 105
Business Administration and Supply Chain Management 106
Business Analytics (BMAN) 107
Business Analytics, Master of Science (M.S.) 107
Business and Management (BMSB) 107
Business and Management, Master of Science (M.S.) 108
Business and Management (BPHD) 108
Business and Management, Doctor of Philosophy (Ph.D.) 109
Business Management and Law (LMBA) 110
Business Management and Law, Master of Business Administration and Juris Doctorate (Dual Degree) (M.B.A. and J.D.) 111
Chemical and Biomolecular Engineering (PMCH) 111
Chemical and Biomolecular Engineering, Master of Engineering (M.Eng.) 112
Chemical and Biomolecular Engineering (Z055) 112
Chemical and Biomolecular Engineering, Post-Baccalaureate Certificate (P.B.C.) 113
Chemical Engineering (ENCH) 113
Chemical Engineering, Master of Science (M.S.) 114
Chemical Engineering, Doctor of Philosophy (Ph.D.) 114
Chemical and Life Sciences (CLFS) 114
Chemical and Life Sciences, Master of Chemical and Life Sciences (M.C.L.F.S.) 115
Chemical Physics (CHPH) 116
Chemical Physics, Master of Science (M.S.) 117
Chemical Physics, Doctor of Philosophy (Ph.D.) 117
Chemistry (CHEM) 118
Chemistry, Master of Science (M.S.) 119
Chemistry, Doctor of Philosophy (Ph.D.) 119
Civil and Environmental Engineering (ENCE) 119
Civil and Environmental Engineering, Master of Science (M.S.) 120
Civil and Environmental Engineering, Doctor of Philosophy (Ph.D.) 121
Civil and Environmental Engineering (PMCE) 121
Civil and Environmental Engineering, Master of Engineering (M.Eng.) 122
Civil and Environmental Engineering (Z056) 123
Civil and Environmental Engineering, Post-Baccalaureate Certificate (P.B.C.) 124
Classics (CLAS) 124
Classics, Master of Arts (M.A.) 125
Clinical Audiology (CAUD) 126
Clinical Audiology, Doctor of Audiology (Au.D.) 127
Clinical Audiology, Combined Doctor of Audiology and Doctor of Philosophy (Au.D./Ph.D.) 128
Clinical Psychological Science (MPPS) 128
Clinical Psychological Science, Master of Professional Studies (M.P.S.) 129
Communication (COMM) 129
Communication, Master of Arts (M.A.) 130
Communication, Doctor of Philosophy (Ph.D.) 130
Communication Management (Z045) 131
Communication Management, Post-Baccalaureate Certificate (P.B.C.) 131
Community Counseling (COCM) 131
Community Counseling, Master of Arts (M.A.) 132
Community Counseling, Master of Education (M.Ed.) 132
Community Planning (CMPL) 132
Community Planning, Master of Community Planning (M.C.P.) 133
Community Planning and Historic Preservation (CPHP) 133
Community Planning and Historic Preservation, Master of Community Planning and Master of Historic Preservation (dual degree) (M.C.P. and M.H.P.) 135
Community Planning and Law (LCPL) 135
Community Planning and Law, Master of Community Planning and Juris Doctorate (Dual Degree) (M.C.P. and J.D.) 136
Comparative Literature (CMLT) 136
Comparative Literature, Doctor of Philosophy (Ph.D.) 137
Computational Harmonic Analysis (Z023) 137
Computational Harmonic Analysis, Post-Baccalaureate Certificate (P.B.C.) 138
Computational Methods in Atmospheric & Oceanic Science (Z048) 138
Computational Methods in Atmospheric & Oceanic Science, Post-Baccalaureate Certificate (P.B.C.) 138
Computer Networking (Z117) 138

Computer Networking, Post-Baccalaureate Certificate (P.B.C.) 139
Computer Science (CMSC) 139
Computer Science, Master of Science (M.S.) 140
Computer Science, Doctor of Philosophy (Ph.D.) 140
Computing Systems (Z118) 140
Computing Systems, Post-Baccalaureate Certificate (P.B.C.) 141
Consecutive Interpreting (Z080) 141
Consecutive Interpreting, Post-Baccalaureate Certificate (P.B.C.) 141
Corporate Innovation (MPCI) 142
Corporate Innovation, Master of Professional Studies (M.P.S.) 143
Counseling & Personnel Services (Z901) 143
Counseling & Personnel Services, Certificate of Advanced Study (C.A.S.) 143
Counseling Psychology (COCP) 143
Counseling Psychology, Master of Arts (M.A.) 145
Counseling Psychology, Doctor of Philosophy (Ph.D.) 145
Couple and Family Therapy (FCFT) 146
Couple and Family Therapy, Master of Science (M.S.) 147
Creative Writing (CRWR) 147
Creative Writing, Master of Fine Arts (M.F.A.) 149
Criminology and Criminal Justice (CJCH) 149
Criminology and Criminal Justice, Master of Arts (M.A.) 149
Criminology and Criminal Justice (CRIM) 150
Criminology and Criminal Justice, Master of Arts (M.A.) 151
Criminology and Criminal Justice, Doctor of Philosophy (Ph.D.) 151
Critical Theory (Z017) 151
Critical Theory, Post-Baccalaureate Certificate (P.B.C.) 152
Cultural and Heritage Resource Management (MPCH) 152
Cultural and Heritage Resource Management, Master of Professional Studies (M.P.S.) 153
Cultural and Heritage Resource Management (Z121) 153
Cultural and Heritage Resource Management, Post-Baccalaureate Certificate (P.B.C.) 153
Curation and Management of Digital Assets (online) (Z093) 154
Curation and Management of Digital Assets, Post-Masters Certificate (P.M.C.) 154
Curriculum and Instruction (EDCI) 155
Curriculum and Instruction, Master of Arts (M.A.) 156
Curriculum and Instruction, Master of Education (M.Ed.) 156
Curriculum and Instruction (Z902) 157
Curriculum and Instruction, Post-Baccalaureate Certificate (P.B.C.) 157
Curriculum and Instruction, Certificate of Advanced Study (C.A.S.) 157
Cybersecurity Engineering (online) (Z092) 157
Cybersecurity Engineering, Post-Baccalaureate Certificate (P.B.C.) 158
Cybersecurity Engineering (PMCY) 158
Cybersecurity Engineering, Master of Engineering (M.Eng.) 159
Cybersecurity Engineering (Z073) 159
Cybersecurity Engineering, Post-Baccalaureate Certificate (P.B.C.) 160
Cybersecurity Leadership (Z077) 161
Cybersecurity Leadership, Post-Baccalaureate Certificate (P.B.C.) 161
Cybersecurity (online) (MECY) 161
Cybersecurity, Master of Engineering (M.Eng.) 162
Dance (DANC) 162
Dance, Master of Fine Arts (M.F.A.) 163
Data Science (Z104) 164
Data Science, Post-Baccalaureate Certificate (P.B.C.) 165
Digital Studies (Z110) 165
Digital Studies, Post-Baccalaureate Certificate (P.B.C.) 165
Ecological Economics (Z009) 166
Ecological Economics, Post-Baccalaureate Certificate (P.B.C.) 166
Economic Analysis (off-campus) (Z074) 166
Economic Analysis, Post-Baccalaureate Certificate (P.B.C.) 167
Economic Analysis (on-campus) (Z098) 167
Economic Analysis, Post-Baccalaureate Certificate (P.B.C.) 168
Economics (ECON) 168
Economics, Master of Arts (M.A.) 169
Economics, Doctor of Philosophy (Ph.D.) 169
Ecosystems Restoration (Z041) 170
Ecosystems Restoration, Post-Baccalaureate Certificate (P.B.C.) 170
Electrical and Computer Engineering (ENEE) 170
Electrical and Computer Engineering, Master of Science (M.S.) 171
Electrical and Computer Engineering, Doctor of Philosophy (Ph.D.) 171
Electrical and Computer Engineering (PMEE) 172

Electrical and Computer Engineering, Master of Engineering (M.Eng.) 173
Electrical and Computer Engineering (Z057) 174
Electrical and Computer Engineering, Post-Baccalaureate Certificate (P.B.C.) 174
Electronic Packaging (online) (Z111) 175
Electronic Packaging, Post-Baccalaureate Certificate (P.B.C.) 176
Electronic Packaging (Z112) 176
Electronic Packaging, Post-Baccalaureate Certificate (P.B.C.) 177
Elementary & Middle School Science Education (Z051) 177
Elementary and Middle School Science Education, Post-Baccalaureate Certificate (P.B.C.) 177
Energetic Concepts Engineering (online) (MEEC) 177
Energetic Concepts Engineering, Master of Engineering (M.Eng.) 177
Energetic Concepts Engineering (online) (Z072) 177
Energetic Concepts Engineering, Post-Baccalaureate Certificate (P.B.C.) 177
Energy Systems Engineering (online) (MEEE) 177
Energy Systems Engineering, Master of Engineering (M.Eng.) 178
Energy Systems Engineering (online) (Z082) 179
Energy Systems Engineering, Post-Baccalaureate Certificate (P.B.C.) 180
Energy Systems Engineering (PMSU) 180
Energy Systems Engineering, Master of Engineering (M.Eng.) 181
Energy Systems Engineering (Z066) 181
Energy Systems Engineering, Post-Baccalaureate Certificate (P.B.C.) 182
Energy Systems Management and Policy (Z107) 182
Energy Systems Management and Policy, Post-Baccalaureate Certificate (P.B.C.) 182
Engineering and Public Policy (MEPP) 182
Engineering and Public Policy, Master of Engineering and Public Policy (M.Eng.Pub.Pol.) 183
English Language and Literature (ENGL) 183
English Language and Literature, Master of Arts (M.A.) 184
English Language and Literature, Doctor of Philosophy (Ph.D.) 184
Entomology (ENTM) 184
Entomology, Master of Science (M.S.) 186
Entomology, Doctor of Philosophy (Ph.D.) 187
Environmental Engineering (PMEN) 187
Environmental Engineering, Master of Engineering (M.Eng.) 188
Environmental Engineering (Z058) 188
Environmental Engineering, Post-Baccalaureate Certificate (P.B.C.) 189
Environmental Health Sciences (ENVH) 189
Environmental Health Sciences, Master of Science (M.S.) 191
Environmental Health Sciences, Doctor of Philosophy (Ph.D.) 191
Environmental Health Sciences (MIEH) 191
Environmental Health Sciences, Master of Public Health (M.P.H.) 193
Environmental Policy (EPOL) 193
Environmental Policy, Post-Baccalaureate Certificate (P.B.C.) 193
Environmental Policy (Z008) 193
Environmental Policy, Post-Baccalaureate Certificate (P.B.C.) 194
Environmental Science and Technology (ENST) 194
Environmental Science and Technology, Master of Science (M.S.) 195
Environmental Science and Technology, Doctor of Philosophy (Ph.D.) 195
Epidemiology (EPDM) 196
Epidemiology, Master of Public Health (M.P.H.) 197
Epidemiology (EPID) 197
Epidemiology, Doctor of Philosophy (Ph.D.) 199
Ethnomusicology (MUET) 199
Ethnomusicology, Master of Arts (M.A.) 200
Ethnomusicology, Doctor of Philosophy (Ph.D.) 200
Executive Public Policy (EXPM) 201
Executive Public Policy, Master of Public Management (M.P.M.) 201
Family Science (FMSC) 202
Family Science, Master of Science (M.S.) 203
Family Science, Doctor of Philosophy (Ph.D.) 203
Finance (BMFN) 204
Finance, Master of Finance (M.Fin.) 204
Fire Protection Engineering (ENFP) 205
Fire Protection Engineering, Master of Science (M.S.) 206
Fire Protection Engineering (online) (ENGF) 206
Fire Protection Engineering, Master of Engineering (M.Eng.) 207
Fire Protection Engineering (online) (Z049) 207

Fire Protection Engineering, Post-Baccalaureate Certificate (P.B.C.) 208
Fire Protection Engineering (PMFP) 208
Fire Protection Engineering, Master of Engineering (M.Eng.) 209
Fire Protection Engineering (Z059) 210
Fire Protection Engineering, Post-Baccalaureate Certificate (P.B.C.) 210
Food Safety Risk Assessment (Z027) 211
Food Safety Risk Assessment, Post-Baccalaureate Certificate (P.B.C.) 211
Modern French Studies (FRMS) 211
French Modern Studies, Doctor of Philosophy (Ph.D.) 212
French Studies (FRIT) 212
French Studies, Master of Arts (M.A.) 213
Geographical Sciences (GEOG) 213
Geographical Science, Master of Science (M.S.) 215
Geographical Sciences, Doctor of Philosophy (Ph.D.) 215
Geology (GEOL) 216
Geology, Master of Science (M.S.) 217
Geology, Doctor of Philosophy (Ph.D.) 217
Geospatial Information Science (MPGC) 218
Geospatial Information Science, Master of Professional Studies (M.P.S.) 218
Geospatial Information Sciences (MPGS) 218
Geospatial Information Sciences, Master of Professional Studies (M.P.S.) 218
Geospatial Information Sciences (Z035) 218
Geospatial Information Sciences, Post-Baccalaureate Certificate (P.B.C.) 219
Geospatial Intelligence (MPGI) 219
Geospatial Intelligence, Master of Professional Studies (M.P.S.) 219
Geospatial Intelligence (Z109) 220
Geospatial Intelligence, Post-Baccalaureate Certificate (P.B.C.) 221
German Literature and Language (GERS) 221
German Literature and Language, Master of Arts (M.A.) 222
German Literature and Language, Doctor of Philosophy (Ph.D.) 222
Gerontology (doctoral level) (Z101) 222
Gerontology, Post-Baccalaureate Certificate (P.B.C.) 223
Gerontology (master's level) (Z100) 223
Gerontology, Post-Baccalaureate Certificate (P.B.C.) 223
Global Health (Z070) 224
Global Health, Post-Baccalaureate Certificate (P.B.C.) 224
Government and Politics (GVPT) 225
Government and Politics, Master of Arts (M.A.) 226
Government and Politics, Doctor of Philosophy (Ph.D.) 226
Government & The Private Economy (Z002) 226
Government and the Private Economy, Post-Baccalaureate Certificate (P.B.C.) 227
Health Administration (HLSA) 227
Health Administration, Master of Health Administration (M.H.A.) 227
Health Equity (HLEQ) 227
Health Equity, Master of Public Health (M.P.H.) 229
Health Policy Analysis and Evaluation (HPAE) 229
Health Policy Analysis and Evaluation, Master of Public Health (M.P.H.) 230
Health Services (PHHS) 231
Health Services, Doctor of Philosophy (Ph.D.) 232
Hearing and Speech Sciences (HESP) 232
Hearing and Speech Sciences, Master of Arts (M.A.) 233
Hearing and Speech Sciences, Doctor of Audiology (Au.D.) 234
Hearing and Speech Sciences, Doctor of Philosophy (Ph.D.) 234
Higher Education (HIED) 234
Higher Education, Master of Arts (M.A.) 236
Higher Education, Doctor of Philosophy (Ph.D.) 236
Historic Preservation (HISP) 236
Historic Preservation, Master of Historic Preservation (M.H.P.) 238
Historic Preservation and Real Estate Development (HPDV) 238
Historic Preservation and Real Estate Development, Master of Historic Preservation and Master of Real Estate Development (dual degree) (M.H.P. and M.R.E.D.) 240
Historic Preservation (Z005) 241
Historic Preservation, Post-Baccalaureate Certificate (P.B.C.) 241
History (HIST) 241
History, Master of Arts (M.A.) 243
History, Doctor of Philosophy (Ph.D.) 244
History and Library & Information Science (HILS) 244
History and Library & Information Science, Master of Arts and Master of Library and Information Science (dual degree) (M.A. and M.L.I.S.) 245
Housing, Finance & Development (Z007) 246

Housing, Finance & Development, Post-Baccalaureate Certificate (P.B.C.) 246
Human-Computer Interaction (HCIM) 246
Human-Computer Interaction, Master of Science (M.S.) 247
Human Development (EDHD) 248
Human Development, Master of Arts (M.A.) 249
Human Development, Master of Education (M.Ed.) 250
Human Development, Doctor of Philosophy (Ph.D.) 250
Human Development Education (Z903) 250
Human Development Education, Certificate of Advanced Study (C.A.S.) 251
Industrial/Organizational Psychology (MPIO) 251
Industrial/Organizational Psychology, Master of Professional Studies (M.P.S.) 252
Information Assurance Management (Z026) 252
Information Assurance Management, Post-Baccalaureate Certificate (P.B.C.) 252
Information Management (INFM) 252
Information Management, Master of Information Management (M.I.M.) 254
Information Management (online) (MIMO) 254
Information Management, Master of Information Management (M.I.M.) 255
Information Studies (INFS) 255
Information Studies, Doctor of Philosophy (Ph.D.) 256
Information Systems (BMIS) 257
Information Systems, Master of Science (M.S.) 257
Integrated Pest Management (Z089) 257
Integrated Pest Management, Post-Baccalaureate Certificate (P.B.C.) 258
Intelligence Analysis (Z021) 258
Intelligence Analysis, Post-Baccalaureate Certificate (P.B.C.) 259
Intermediate Survey Methodology (Z011) 259
Intermediate Survey Methodology, Post-Baccalaureate Certificate in Intermediate Survey Methodology (P.B.C.) 259
International Education Policy (HIEP) 259
International Education Policy, Master of Arts (M.A.) 261
International Education Policy, Doctor of Philosophy (Ph.D.) 261
Interpreting (MPIN) 261
Interpreting, Master of Professional Studies (M.P.S.) 261
Jewish Studies (JWST) 262
Jewish Studies, Master of Arts (M.A.) 262
Jewish Studies (Z018) 263
Jewish Studies, Post-Baccalaureate Certificate (P.B.C.) 263
Journalism (JOMJ) 263
Journalism, Master of Journalism (M.J.) 264
Journalism (JOST) 265
Journalism, Doctor of Philosophy (Ph.D.) 266
Journalism (JOUR) 266
Journalism, Master of Arts (M.A.) 267
Justice Leadership (MPJL) 267
Justice Leadership, Master of Professional Studies (M.P.S.) 268
Kinesiology (KNES) 268
Kinesiology, Master of Arts (M.A.) 270
Kinesiology, Doctor of Philosophy (Ph.D.) 270
Landscape Architecture and Community Planning (LACP) 270
Landscape Architecture and Community Planning, Master of Landscape Architecture and Master of Community Planning (dual degree) (M.L.A. and M.C.P.) 271
Landscape Architecture (LARC) 272
Landscape Architecture, Master of Landscape Architecture (M.L.A.) 274
Leadership Education & Development (MPLD) 274
Leadership Education & Development, Master of Professional Studies (M.P.S.) 274
Library and Information Science (LBSC) 274
Library and Information Science, Master of Library and Information Science (M.L.I.S.) 275
Library and Information Science (online) (LBSO) 276
Library and Information Science, Master of Library and Information Science (M.L.I.S.) 277
Linguistics (LING) 278
Linguistics, Master of Arts (M.A.) 279
Linguistics, Doctor of Philosophy (Ph.D.) 279
Literacy Coaching (Z038) 280
Literacy Coaching, Post-Baccalaureate Certificate (P.B.C.) 281
Marine, Estuarine, and Environmental Sciences (MEES) 281

HOME

The University of Maryland, College Park is the state's flagship university and one of the nation's preeminent public research universities. A global leader in research, entrepreneurship and innovation, the university is home to more than 40,700 students, 14,000 faculty and staff, and nearly 400,000 alumni all dedicated to the pursuit of Fearless Ideas. Located just outside Washington, D.C., we discover and share new knowledge every day through our renowned research enterprise and programs in academics, the arts and athletics. And we are committed to social entrepreneurship as the nation’s first “Do Good” campus.

GRADUATE CATALOG

The Graduate Catalog is the official listing of the policies governing graduate education at the University of Maryland, College Park.

This Catalog documents policies and procedures set by the Graduate Council and the Graduate School, and is updated each academic semester to reflect changes and updates to policy. Information on admissions policies, academic policies (including degree requirements), registration policies, and financial aid and student support policies are contained in the Catalog. Abstracts and information on academic degree and certificate programs, a list of graduate-level courses by program, and a roster of graduate faculty members are also included in each edition of the Catalog.

The University of Maryland, the flagship institution of the University System of Maryland, originated in 1856 as the Maryland Agricultural College and became one of the country's first land-grant institutions in 1867. The state assumed authority over the College in 1920 and formed the University of Maryland by joining the College with long-established professional schools in Baltimore. In 1988, the General Assembly of Maryland designated the College Park campus as the flagship institution for the University System of Maryland, which comprises 13 institutions across the state. The College Park campus is built around a central mall, anchored by McKeldin Library and the Main Administration Building. Fanning out from the mall are thirteen academic colleges. The University's mission is to provide graduate and undergraduate education of the highest quality, to pursue advanced research, and to serve the needs of the State of Maryland.

The University of Maryland and its surrounding area provide boundless opportunities for conducting research. The University's dynamic research environment allows students from all disciplines to undertake scholarly exploration of their special interests and to gain valuable practical experience. It also enables faculty members to advance their own areas of expertise and bring their research insights into the classroom. On campus, special facilities and a number of organized research centers, bureaus, and institutes promote the acquisition and analysis of new knowledge in the arts, sciences, and applied fields.

Steve Fetter
Associate Provost and Dean of the Graduate School

Brent Hernandez, General Editor
August 2022

THE GRADUATE SCHOOL

The University of Maryland Board of Regents mandates that a Graduate Faculty and a Graduate Council provide the organization by which the Graduate Faculty discharge its responsibilities for graduate education. The Graduate Council, appointed by the Dean of the Graduate School, includes faculty representatives elected by the Graduate Faculty, and graduate students. The Graduate Council recommends to the Dean, the Provost and the President policies that affect all aspects of graduate education at the University. A list of the current Graduate Council members can be found on our Graduate School website (https://gradschool.umd.edu/).

The Graduate School, under the leadership of its Dean, establishes and oversees procedures to enact these policies and serves as an advocate for excellence in all aspects of graduate education.

The Graduate School, on behalf of its Dean, officially admits all students into graduate degree programs and acts as the conferring body for all graduate degrees.

In conjunction with the Graduate Council, the Graduate School:

- Administers all University policies that affect graduate education.
- Sets academic and admissions standards for graduate programs.
- Reviews applications for admission to the Graduate School for compliance with academic standards.
- Admits graduate students to all programs.
- Administers the processes for graduate students' grievances
- Admits and oversees the academic progress of non-degree seeking students.
- Reviews and approves all new graduate programs.
- Allocates annual fellowship funding to the colleges, sets minimum stipend levels, and monitors the application and academic impact of awards.
- Recommends annual minimum stipend levels for fellowships and teaching and research assistantships.
- Sets policy for and awards tuition remission as a component of University fellowship awards, external fellowships, and training grants.
- Establishes qualifications for and approves membership in the Graduate Faculty.
- Establishes qualifications necessary for graduate faculty to serve on and to chair thesis and dissertation examining committees.
- Sets policy that governs the composition of the thesis and dissertation examining committees and the conduct of the examinations.
- By appointment of a Dean's representative, oversees dissertation examinations to assure quality and uniformity of standards across academic units.
- Oversees the process of submitting approved dissertations and theses preservation of and access to the documents are the responsibilities of the University Library.
- Sets University-wide requirements for awarding graduate degrees.
- Recommends to the President that students who meet established requirements be awarded graduate degrees.
- Reviews and approves as appropriate requests for exceptions to University policies on graduate matters.
- Ensures that the University maintains official graduate student records are kept in the Office of the Registrar.
- Approves and oversees programs created by interdisciplinary Field Committees.
- Approves the programs for the Master's degree and graduate certificate in Professional Studies.
- Prepares and disseminates an annual report on graduate education.
- Administers the General Research Board, the Creative and Performing Arts Awards, the Goldhaber Travel Grants, and other programs.
- Assumes leadership in the recruitment and retention of graduate students with special emphasis on students from under-represented groups.
- Provides orientation programs, advising, and other support services that contribute to the successful matriculation, retention, and graduation of a diverse population of graduate students .
- Supports the Graduate Student Government, graduate student groups, and the Office of Graduate Student Life.

The policies and procedures that are found in this document have been approved by the Graduate Council, the Dean of the Graduate School, the Provost, and the President.

INTRODUCTION TO THE UNIVERSITY OF MARYLAND

Location of Campus and Nearby Academic Resources

Situated on 1,300 acres in the suburban town of College Park, the University is centrally located in the Baltimore-Washington corridor. This unique location, just nine miles from downtown Washington, D.C., and approximately 30 miles from both Baltimore and Annapolis, enhances research opportunities for faculty and students by providing access to some of the finest libraries and research centers in the country.

The University Libraries (https://www.lib.umd.edu/mckeldin/) support the mission of the university and work to ensure students and faculty of all disciplines achieve their academic goals. Seven libraries on campus serve the diverse needs of graduate students, and a helpful team of librarians provides subject-specific expertise and support. You can find your librarian by searching https://www.lib.umd.edu/directory/specialists (https://www.lib.umd.edu/directory/specialists/). Collections range in format from online books and journals to archival manuscripts, photos and recordings. Thanks to the Big Ten Academic Alliance, researchers have easy access to the 100+ million books in the combined collections of the libraries of the Big Ten.

The University's main library is Theodore R. McKeldin Library (https://www.lib.umd.edu/mckeldin/). Its collections are especially strong in humanities, social sciences and the life sciences. Among its 1.2 million volumes is one of the best collections of Judaica in the region. The U.S. Congress has designated the library a federal depository for U.S. government documents and contains materials including legislative hearings, Congressional reports, federal regulations and census records, available to all Maryland residents.

Of particular interest to graduate students, the Research Commons (https://www.lib.umd.edu/rc/) in McKeldin Library offers services and programs to support high-level researchers under one umbrella. Among them: the highly popular IRRoC (https://irroc.umd.edu/) website, which integrates research resources on campus to help researchers compete for funding, manage projects and disseminate findings. The GIS and Geospatial Center located within the Research Commons offers computers and software to support a broad range of geographic, GIS and visualization needs. Graduate students can attend workshops, consult experts in statistics or data mining, or seek assistance from Research Commons partners such as the Graduate School Writing Center.

The Research Commons also offers a “Common Quandaries” Workshops series each semester—a sequence of workshops and panels addressing frequent concerns and questions that arise in graduate-level research. Our workshop series in the past have included topics on creating data management plans, creating a professional online presence, using citation managers, and navigating the world of publishing and conferencing.

The Terrapin Learning Commons (https://www.lib.umd.edu/tlc/home/), also in McKeldin Library, accommodates collaborative work by providing group study rooms, configurable furnishings, and equipment to borrow. The John and Stella Graves MakerSpace, located within the Terrapin Learning Commons, is open to all students regardless of major and offers visitors the opportunity to experiment with new technologies including 3-D scanners and printers, virtual reality and more.

The concept of the Research Commons extends to the STEM Library (https://www.lib.umd.edu/stem/), which contains not only a makerspace and GIS consulting lab, but also materials in physics, chemistry, engineering, mathematics, and geology with other significant collections in computer science, environmental sciences, water resources, and aerospace science. The STEM Library is a U.S. patent and trademark depository library.

The Architecture Library (https://www.lib.umd.edu/architecture/)contains materials on architectural design, theory and history, urban design, landscape architecture, and building technology. This library's collections include architecture books dating as far back as the 17th century, with materials on world expositions from 1851 to 1937. It is open to the public M-F from 11:00 AM to 4:00 PM. All students enrolled in programs within the School of Architecture, Planning and Preservation have 24/7 swipe access with their ID cards.

The Art Library (https://www.lib.umd.edu/art/)collects materials in art history, studio art, art education, photography, graphic arts, interior design, and textiles. Collections include art reproductions and art exhibition catalogs.

Part of the Clarice Smith Performing Arts Center, the Michelle Smith Performing Arts Library (https://www.lib.umd.edu/mspal/)is the central location on the College Park campus for music, theatre, and dance materials. Included in the Performing Arts Library is the International Piano Archives at Maryland (IPAM), which houses one of the world's most extensive concentrations of piano recordings.

Hornbake Library (https://www.lib.umd.edu/hornbake/)houses many of the University's special collections as well as the University Archives. Distinguished by their rarity or format, special collections are particularly strong in labor history, mass media and culture, the state of Maryland, literature and rare books, post-War Japan, historic preservation, and women’s history. Library Media Services (https://www.lib.umd.edu/lms/), located within Hornbake Library, supports access to and the creation of audio/visual media. It hosts media-centric learning and teaching spaces and multimedia production labs and studio.

Ten minutes from campus, Severn Library (https://www.lib.umd.edu/severn/) is a high-density shelving facility that houses unique and semi-rare research collections. Deliveries from Severn Library arrive at McKeldin Library daily.

Home to information managers, programmers, systems analysts, and digitization experts, the University Libraries are uniquely positioned to offer technology-based solutions for specific research needs. Digital Scholarship and Publishing (https://www.lib.umd.edu/publish/), for example, offers a wide range of services, tools and consultation to members of the University community to aid in the dissemination and long-term preservation of their scholarly work. The Digital Repository at UMD (DRUM) collects, preserves, and provides public access to the scholarly output of the university. Faculty and researchers can upload research products for rapid dissemination, global visibility and impact, and long-term preservation. Librarians also provide expert guidance and consultation in data management planning and data sharing and publishing.

Accreditation

The University of Maryland is accredited by the Middle States Association of Colleges and Secondary Schools and is a member of the prestigious Association of American Universities. Individual graduate programs may be accredited by their appropriate agencies. Students should check with their graduate program of interest for particular accreditations.

Non-Discrimination Statement

The University of Maryland is committed to the elimination of discrimination on the basis of race, color, creed, sex, sexual orientation, marital status, personal appearance, age, national origin, political affiliation, physical or mental disability, or on the basis of the exercise of rights secured by the First Amendment of the United States Constitution. The Human Relations Code is established to prevent or eradicate such discrimination in accordance with due process within the University community. In doing so, the University recognizes that it must strive actively and creatively to build a community in which opportunity is equalized.

Every effort will be made to make students and potential students, employees and potential employees, faculty members and potential faculty members aware of the opportunities that the University provides for every individual to develop and utilize his or her talents and skills. It is the intent of the University to observe and promote respect for each member of the community's own race, ethnic background, sex, or sexual orientation. The Human Relations Code is accessible in its entirety online (https://www.umd.edu/).

Under advice of the Maryland Attorney General's Office, the University may interpret the Code to include both gender identity and gender expression.

Disclaimer

The provisions of this publication are not to be regarded as an irrevocable contract between the student and the University of Maryland. Changes are effected from time to time in the general regulations and in the academic requirements. There are established procedures for making changes that protect the institution's integrity and the individual student's interest and welfare. A curriculum or graduation requirement, when altered, is not normally made retroactive unless the alterations are to the student's advantage and can be accommodated within the span of years normally required for graduation. When a competent authority judges the actions of a student, using established procedures, to be detrimental to the interests of the University community, that person may be required to withdraw from the university.

Accounting (BMAC)

Graduate Degree Program
R.H. Smith School of Business

Abstract

The MS in Accounting from the University of Maryland's Robert H. Smith School of Business is the perfect complement to your career. With specializations, you can choose which path your career takes. Smith's top-ranked faculty, reputation for being the among the best business schools in the Washington, D.C., region, scholarships and busy-season internships make this accounting program truly valuable.

The MS in Accounting program produces highly trained accounting professionals who are prepared for heightened accountability and the expanded role accounting plays in consulting, information management and strategic planning. You'll learn to carry out the rigorous internal auditing required to meet today's strict accounting and auditing standards.

Financial Assistance

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

Admissions

GENERAL REQUIREMENTS

- Essay
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letter of Recommendation (1)
- Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE) - both optional
- CV/Resume

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	August 1, 2023
International Applicants	
F (student) or J (exchange visitor) visas,E,G,H,I and L visas and immigrants	March 15, 2023

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Accounting, Master of Science (M.S.) (p. 26)

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Visit our website at http://www.rhsmith.umd.edu for more specific information.

Accounting, Master of Science (M.S.)

Non-thesis only: 30 credits required

Participants in the Master of Science in Accounting program gain the leading-edge knowledge and skills they need to bring exceptional value to their firms in today's high-stakes accounting arena - and earn an advanced accounting degree from one of the world's leading business schools. The curriculum is relevant, practical and applicable from day one, focusing on such key issues as: internal audit application and practice, current trends in corporate governance, the role of managerial accounting in overall management planning and control structure, fraud prevention, deterrence, detection, and control, and IT security, IT controls and IT auditing.

Course	Title	Credits
Core Requirements		
BUAC706	Business Ethics for Accountants and Auditors	2
BUAC707	Financial Statement Analysis for Accountants and Auditors	2
BUAC710	Advanced Managerial Accounting and Control Systems	2
BUAC712	Business Communications for Accountants and Auditors	2
BUAC714	Forensic Accounting/Auditing	2
BUAC740	Data Driven Decision Making (Data Driven Decision Making)	2
Electives		18
Total Credits		**30**

Additive Manufacturing (PMAM)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our graduate programs in Additive Manufacturing give students unique access to hands-on training in various methods of design, production systems, and fabrication from world-class experts. Students will also benefit from university resources like the Makerbot Innovation Center, a 3D printing space available to all UMD students.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

FINANCIAL ASSISTANCE

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Requirements

- Additive Manufacturing, Master of Engineering (M.Eng.) (p. 27)

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus. In addition to in-person courses, you may have the option to take some course requirements in an online format. Course format offerings are subject to change.

Additive Manufacturing, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://advancedengineering.umd.edu/degree-planning-sheets (https://advancedengineering.umd.edu/degree-planning-sheets/)

Course	Title	Credits
Core Requirements		
Required course:		3
ENME744	Additive Manufacturing	
Select four of the following core courses:		12
ENME600	Engineering Design Methods	
ENME607	Engineering Decision Making and Risk Management	
or ENRE671	Risk Assessment in Engineering	
ENME808	Advanced Topics in Mechanical Engineering (ENME808E Applied Machine Learning for Engineering and Design)	
ENME610	Engineering Optimization	
ENPM671	Advanced Mechanics of Materials	
Select five of the following pre-approved technical electives:		15
ENME647	Multiphase Flow and Heat Transfer	
ENME672	Composite Materials	
ENME770	Life Cycle Cost and System Sustainment Analysis	
ENPM641		
ENPM808	Advanced Topics in Engineering (ENPM808G Additive Manufacturing for Aerospace, Energy and Water Applications)	
ENPM808	Advanced Topics in Engineering (ENPM808E Applied Topology Optimization)	
ENPM809	Special Topics in Engineering (ENPM809C Applied Statistics)	
Total Credits		**30**

Additive Manufacturing (Z115)

Graduate Certificate Program

Aerospace Engineering (ENAE)

Graduate Degree Program
College: Engineering

Abstract

The Aerospace Engineering Department offers a broad program in graduate studies leading to the degrees of Master of Science (thesis and non-thesis) and Doctor of Philosophy. Graduate students can choose from the following areas of specialization: aerodynamics and propulsion; structural mechanics and composites; rotorcraft; space systems; and flight dynamics, stability and control. Within these disciplines, the student can tailor programs in areas such as computational fluid dynamics, aeroelasticity, hypersonics, composites, smart structures, finite elements, space propulsion, robotics, and human factors.

Financial Assistance

A number of graduate assistantships and fellowships are available for financial assistance. Graduate teaching and research assistantships are available beginning at $20,000 per year plus tuition and health benefits. In addition, a number of fellowships are available, such as Minta Martin Fellowships, Rotorcraft Fellowships, the Hokenson Fellowship, ARCS Fellowships, and various departmental fellowships and scholarships. These fellowships cover tuition in addition to a stipend. All full-time applicants are automatically considered for these fellowships.

Contact

Department of Aerospace Engineering

Website: http://www.aero.umd.edu

Courses: ENAE (https://academiccatalog.umd.edu/graduate/courses/enae/)

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume
- Writing Sample (optional)
- Description of Research/Work Experience
- Portfolio PDF Upload (optional for Ph.D., not required for M.S.)
- GPA: 3.2 for M.S. and 3.5 for Ph.D.

Applicants should have a B.S. degree in Aerospace Engineering (or in a closely related field) with a recommended minimum GPA of 3.2/4.0 from an accredited institution. Applicants with a marginal academic record may be conditionally approved for admission to the M.S. program if other evidence of accomplishment is provided (i.e. publications or exceptional letters of recommendation). Admission to the Ph.D. program requires an academic record indicating promise of the high level of accomplishment required for the degree. The Graduate Record Examination (GRE) is required for international applicants, and strongly encouraged for applicants seeking financial support.

APPLICATION DEADLINES

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants:		
US Citizens and Permanent Residents	M.S. - April 14, 2023	M.S. - November 1, 2022
	Ph.D. - April 14, 2023	Ph.D. - November 1, 2022
International Applicants:		
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants.	M.S. - March 15, 2023	M.S. - September 29, 2022
	Ph.D. - March 15, 2023	Ph.D. - September 29, 2022

Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Aerospace Engineering, Doctor of Philosophy (Ph.D.) (p. 30)
- Aerospace Engineering, Master of Science (M.S.) (p. 30)

Facilities and Special Resources

The departmental facilities for experimental research include the Glenn L. Martin Wind Tunnel, the Composites Research Laboratory, the Space Systems Laboratory, and the facilities of the Center for Rotorcraft Education and Research. The Glenn L. Martin Wind Tunnel, with its 8-foot high by 11-foot wide test section, has a maximum operating speed of 330 feet per second. It is used extensively for development testing by industry as well as for research. There are also two smaller subsonic tunnels and a supersonic tunnel that are used in support of departmental research programs.

The Composites Research Laboratory is located in the Manufacturing Building. Its facilities include a microprocessor-controlled autoclave, a vacuum hot press, a two-axis filament winding machine, an MTS 220 Kip uniaxial testing machine, an x-ray machine and an environmental conditioning chamber. The laboratory provides for a full spectrum of specimen and component manufacture, preparation and instrumentation, inspection, and testing. The Space Systems Laboratory performs world-class research on space operations, with particular emphasis on neutral buoyancy simulation of space robotics and human factors. The Neutral Buoyancy Research Facility is a multi-million dollar laboratory built around a 50-foot diameter by 25-foot deep water tank for simulating the microgravity environment of space. Six different telerobotic systems are currently under test in this facility, which is one of only two operating in the United States and the only neutral buoyancy facility in the world to be located at a university. The facilities of the Alfred Gessow Rotorcraft Center include two experimental rotor rigs to test articulated and bearingless rotors in hovering and in forward flight. The hover test facility

can accommodate up to a 6-foot diameter rotor. In addition, the facilities include a 10-foot diameter vacuum chamber to study the structural dynamic characteristics of spinning rotors in the absence of aerodynamic loads and a three-component laser Doppler anemometer for flowfield measurements. A new 20-foot by 20-foot by 30-foot anechoic acoustic test chamber is used to carry out impulsive noise studies of rotorcraft in hover. Dynamic scaled rotor blades are built using composite facility

Aerospace Engineering, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option: 30 credits

At least 12 of the 30 credits are to be in the main discipline. No more than 9 credits may be at the 400 level of which no more than 6 credits may be from department courses. For the thesis option, 6 credits of ENAE799 are required as well as the successful defense of the M.S. thesis. For the non-thesis option, students must write a scholarly paper.

Course	Title	Credits
Core requirement		
Select 24 credits of coursework [1]		24
Thesis or Non-thesis option		**6**
Thesis:		
ENAE799	Master's Thesis Research	
Non-thesis:		
Six additional credits of coursework		
Scholarly paper is required		
Specialization Options		
Aerodynamics and Propulsion		
Structural Mechanics and Composites		
Rotocraft		
Space Systems		
Flight Dynamics, Stability and Control		
Total Credits		**30**

[1] Minimum of 12 credits (four courses) in main study discipline (600 level or above). Maximum of nine credits (3 courses) at the 400 level, of which not more than six credits may be department courses.

Aerospace Engineering, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 36 credits beyond the Bachelor's degree, in addition to 12 credits of ENAE899. Required coursework should include not less than 18 hours within one departmental area of specialization, at least 6 hours from among the other areas of specialization in the Department, and not less than 9 hours in courses that emphasize the physical sciences or mathematics.

Advance to Candidacy: In addition to the course requirements below, students must pass a written qualifying and an oral comprehensive examination in order to advance to candidacy.

Post-Candidacy: Students must complete at least 12 credits of ENAE899 Doctoral Dissertation Research as well as successfully defend and submit an original dissertation.

Course	Title	Credits
Major Area Requirement		
Select a minimum of 18 credits within one of the following departmental core area of specializations:		18
Aerodynamics and Propulsion		
Flight Dynamics Stability and Control		
Rotocraft		
Space Systems		
Structural Mechanics and Composites		
Minor Area Requirement		
Select minimum of 6 credits are required within one of the other departmental core areas of specialization, or from another department		6
Math/Science Requirement		
Select a minimum of nine credits of coursework must emphasize mathematics, physical sciences, life sciences, or computer sciences [1]		9
Dissertation Research Requirements		
ENAE899	Doctoral Dissertation Research	12

[1] No more than 3 credits can be from the College of Engineering. The one engineering course that can count toward this requirement must not be a course that could apply to either the major or minor concentration area. At least 3 credits must be at the 600 level or higher.

Aerospace Engineering (PMAE)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Aerospace program prepares graduates to design, develop, and test aircraft, spacecraft, and missiles and supervise their manufacture. Students earning a Masters of Engineering degree will also gain the expertise needed to develop new technologies in areas such as structures, propulsion systems, vehicle movement and control, communications, and overall vehicle design for use in aviation, defense systems, and space exploration.
For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. Tuition and fees are subject to change.

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and

permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Agricultural and Resource Economics (AREC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Department offers both M.S. and Ph.D. degrees from one of the nation's premier graduate programs in agricultural and resource economics. Both programs focus on the application of advanced microeconomic theory and econometrics to issues in environmental and resource economics, agricultural economics, and development economics. Courses are taught by leading researchers in those fields, who combine rigorous scholarship with extensive policy experience.

The Department's faculty includes internationally prominent scholars in environmental and resource economics, agricultural economics, and development economics. In recognition of their research, Department faculty members have received such international awards as Germany's Alexander von Humboldt Prize, the American Economic Association's John Bates Clark Medal, and the Agricultural and Applied Economics Association's Quality of Research Discovery and Publication of Enduring Quality Awards, among others. Several have been elected fellows of such professional associations as the Agricultural and Applied Economics Association (formerly the American Agricultural Economics Association), the Association of Environmental and Resource Economics, the Econometric Society, and the American Statistical Association. Department faculty members have served as presidents of the American Agricultural Economics Association and Association of Environmental and Resource Economists and as editors and associate editors of the Journal of Environmental Economics and Management, the American Journal of Agricultural Economics, the Journal of Public Economics, and Environment and Development Economics, among others. One faculty member is currently a research fellow of the National Bureau of Economic Research. For additional Department highlights, please visit www.arec.umd.edu/graduate/prospective-students (http://www.arec.umd.edu/graduate/prospective-students/).

The policy experience of the Department's faculty is equal to its scholarship in both quality and extent. Three have served on the staff of the President's Council of Economic Advisers. Other policy experience includes service as consultants to agencies and organizations like the U.S. Department of Justice, the U.S. Department of Agriculture, the Environmental Protection Agency, the World Bank, and the Inter-American Development Bank. The University's location in the Washington, D.C., area provides numerous opportunities for interaction with the World Bank, International Food Policy Research Institute, Resources

for the Future, International Monetary Fund, U.S. Department of Agriculture, U.S. Environmental Protection Agency, U.S. Agency for International Development, Food and Drug Administration, Inter-American Development Bank, Census Bureau, and a host of other such institutions and organizations. Questions about the Department's graduate programs should be directed to the Graduate Program Coordinator at arecgradpgm@umd.edu or 301-405-1820.

Financial Assistance

Graduate assistantships are offered to qualified applicants on the basis of past academic performance, research potential, and availability of funds. Many full-time students in the Department hold assistantships or some other form of financial aid. Part- time and summer work are sometimes available for students who do not have assistantships. Graduate fellowships are also available on a competitive basis.
The Department offers financial assistance in the form of graduate assistantships and fellowships. All applications are consideration for financial assistance.

Graduate Assistantships

Many of our students are supported by graduate assistantships with responsibilities for either research or teaching. Graduate assistants are expected to work an average of 20 hours a week on their research or teaching duties. They must maintain at least a B average. They are considered employees of the University and are thus covered by health insurance. In addition to a competitive salary, graduate assistants receive tuition remission for up to 10 credits in the fall and spring semesters and up to 8 credits each summer semester.

Fellowships

The Department awards a number of fellowships each year to highly qualified applicants. Annual fellowship stipends are highly competitive. Fellowship awards also include tuition remission of up to twelve credits per semester. Fellowships are awarded to Ph.D. students for two (2) years. After the expiration of the fellowship, the Department expects to provide Ph.D. fellowship recipients with an additional two years of support as a graduate assistant subject to satisfactory academic progress. All applicants for financial aid are automatically considered for fellowships as well as assistantships.

Financial assistance in the form of loans and work study may also be available. Interested students should contact the University's Office of Student Financial Aid.

Contact

The AREC Graduate Program website at http://www.arec.umd.edu/graduate (http://www.arec.umd.edu/graduate/) provides course requirements, examination procedures, and descriptive material for the M.S. and Ph.D. programs.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationarec2021.pdf)
- Description of Research/Work Experience (optional)
- Publications/Presentations (optional)

At a minimum, students entering either the Department's M.S. or Ph.D. program are expected to have the following preparation:

1. Knowledge of macroeconomic theory at the intermediate level and microeconomic theory at the advanced level.
2. Knowledge of multivariate calculus and linear algebra.
3. Knowledge of elementary statistical methods.

Additional coursework in mathematics is desirable--for example, analysis, probability, advanced statistics, or differential equations.

Students are normally admitted to the MS and PhD programs only for the fall semester, because the first year program consists of course sequences that begin only in the fall.

TRANSFER FROM M.S. TO PH.D. PROGRAM

Students enrolled in the Department's M.S. program may apply for admission to the Department's Ph.D. program by submitting a new Graduate School application, supplemental transcripts, and three letters of recommendation. The Graduate School application fee is waived if the student applies for the Ph.D. program in or before the semester in which the M.S. degree will be completed. Students within the Department's M.S. program need not submit GRE's when applying for the Ph.D. program.

The University of Maryland's Graduate School accepts applications here (https://gradapply.umd.edu). Before completing the application, applicants are asked to check the Admissions Requirements (link is external) site for specific instructions.

As required by the Graduate School, all application materials are to be submitted electronically.

The electronic submission of application materials helps expedite the review of an application. Completed applications are reviewed by an admissions committee in each graduate degree program. The recommendations of the committees are submitted to the Dean of the Graduate School, who will make the final admission decision. Students

seeking to complete graduate work at the University of Maryland for degree purposes must be formally admitted to the Graduate School by the Dean.

INFORMATION FOR INTERNATIONAL GRADUATE STUDENTS

The University of Maryland is dedicated to maintaining a vibrant international graduate student community. The office of International Students and Scholars Services (http://globalmaryland.umd.edu/) (link is external) (ISSS) is a valuable resource of information and assistance for prospective and current international students. International applicants are encouraged to explore the services they offer, and contact them with related questions. The University of Maryland Graduate School offers admission to international students based on academic information; it is not a guarantee of attendance. Admitted international students will then receive instructions about obtaining the appropriate visa to study at the University of Maryland which will require submission of additional documents. Please see the Graduate Admissions Process for International applicants (https://www.gradschool.umd.edu/admissions/international-admissions/) (link is external) for more information.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

APPLICATION DEADLINES

Type of Applicant	Fall Deadline

Requirements

- Agricultural and Resource Economics, Doctor of Philosophy (Ph.D.) (p. 36)
- Agricultural and Resource Economics, Master of Science (M.S.) (p. 35)

Facilities and Special Resources

The AREC Department provides a 15-seat computer lab for the exclusive use of our graduate students. The lab is available 24 hours a day, 365 days a year. Another 25-seat lab is available by reservation for classes, presentations, and research (e.g., experimental economics sessions). These labs are equipped with thin client devices that connect end users to desktop virtual desktops. This solution allows graduate students to remotely access a virtual desktop with all the applications listed below, as well as their files stored on the network servers. The following applications are available at this time: ArcInfo, Fortran, Mathematica, Matlab, Mozilla Firefox, MS Office, R, SAS, Stata, StatTransfer,TextPad, Lyx and WinEdt. Graduate students can access the AREC network and Internet from home via several remote access methods. A multifunction printer/scanner/copier is available in the graduate student computer lab. Wireless access is available to the campus network.

The Department offers close proximity to an incomparable array of government agencies, international institutions, and non-governmental organizations devoted to environmental issues, agricultural policy, natural resource management, and international development. Opportunities for attending stimulating seminars abound. Many students find useful work experience, access to data, and cutting-edge thesis topics as well as future employment through these organizations. These include (all within approximately 10 miles) the U.S. Environmental Protection Agency, the U.S. Department of Agriculture and U.S. Economic Research Service, the U.S. Food and Drug Administration, Resources for the Future, the Joint Institute for Food Science and Nutrition, the Joint Global Change Research Institute, the National Center for Smart Growth Research and Education, the National Oceanic and Atmospheric Administration, the World Bank, the Inter-American Development Bank, the International Food Policy Research Institute, the Beltsville Agricultural Research Center with its National Agricultural Library, as well as the U.S. Capitol, Senate, and House of Representatives.

Agricultural and Resource Economics, Master of Science (M.S.)

Non-thesis only (scholarly paper required): 33 credits

Course	Title	Credits
Required courses:		
ECON603	Microeconomic Analysis I	3
AREC623	Applied Econometrics I	4
AREC624	Applied Econometrics II	4
AREC620	Optimization in Agricultural and Resource Economics	3
AREC610	Microeconomic Applications in Agricultural and Resource Markets	3
Select 16 credits of electives [1]		16
Defense of a scholarly paper		
Total Credits		**33**

[1] Elective courses are normally selected from M.S. level courses (600 level or above) in AREC or ECON but may be taken in other disciplines with adviser approval

The M.S. program trains students to conduct economic research in the fields of environmental and resource economics, agricultural economics, and development economics. It provides rigorous training in microeconomic theory and econometrics and in the application of microeconomics and econometrics to policy issues. Students completing their MS degrees go on to work in U.S. government agencies and international organizations.

Required courses for the M.S. program consist of basic coursework in microeconomic theory and econometrics:

- The first semester of the sequence in microeconomic theory (ECON603).

- A two-semester sequence in applied econometrics (AREC623 and AREC624).
- A one-semester course on mathematical optimization (AREC620).
- A one-semester course on applications of microeconomic theory to agricultural and resource economics (AREC610).

The first-year coursework normally includes these 17 credits (3 credits each for ECON603, AREC620, AREC610 plus 4 credits each for AREC623 and AREC624).

M.S. students fulfill additional coursework requirements by taking electives to suit their own interests during their second year. Elective courses are normally selected from M.S. level courses (600 level or above) in AREC or ECON but may be taken in other disciplines with adviser approval. For detailed information on the scholarly paper, see the 'MS Scholarly Paper Requirement' at http://www.arec.umd.edu/graduate/ms/ms-scholarly-paper-requirement (http://www.arec.umd.edu/graduate/ms/ms-scholarly-paper-requirement/)

Agricultural and Resource Economics, Doctor of Philosophy (Ph.D.)

Requirements for the Ph.D. degree include a minimum of 42 credits of coursework, completion of a four-course field, 12 credits of Ph.D. dissertation research (AREC899), development of a research paper worthy of submission to a well-regarded journal, development and defense of a dissertation prospectus, and successful defense of a Ph.D. dissertation.

The Ph.D. program trains students to design, perform, lead, and implement economic research projects in the fields of environmental and resource economics, agricultural economics, and development economics. It also trains students in how to disseminate research results in the major professional media including journals, reports, conferences, and seminars. It provides rigorous training in microeconomic theory and econometrics and in the application of microeconomics and econometrics to policy issues. Students completing their Ph.D. degrees find employment in academia, U.S. government agencies, international organizations, and consulting firms.

Students must earn a 'B-' or better in each of these courses and a B (3.0) average or better in graduate coursework. First-year students are also expected to complete self-directed instruction regarding econometric software during August and January, attend additional instruction and develop qualifying paper topics during January, and participate in a paper-writing workshop in June at the end of the first year. The June workshop helps students develop their research for publication in academic journals as well as oral presentation. This workshop is useful for fostering the completion of the required research paper.

Advancement to Candidacy: In addition to the course requirements below, students are required to submit and pass the Qualifying Paper, develop a research paper worthy of submission to a well-regarded journal, and pass the Ph.D. dissertation prospectus in order to advance to doctoral candidacy.

Course	Title	Credits
Required courses:		
ECON603	Microeconomic Analysis I	3
AREC623	Applied Econometrics I	4
AREC624	Applied Econometrics II	4
AREC620	Optimization in Agricultural and Resource Economics	3
AREC610	Microeconomic Applications in Agricultural and Resource Markets	3
ECON604	Microeconomic Analysis II	3
Select six elective courses, at least four of which must be chosen from the following:		18
AREC784	Energy Economics, Empirical Industrial Organization, and Public Policy	
AREC829	Policy Design and Causal Inference for Social Science	
AREC847	Networks, Social Learning and Technology Adoption	
AREC783	Environmental Taxation and Regulation	
AREC785	Advanced Economics of Natural Resources	
AREC815	Experimental and Behavioral Economics	
AREC825	Advanced Economic Welfare Analysis	
AREC832	Agricultural Policy Analysis	
AREC846	Development Microeconomics	
ECON781	Valuing Environmental Benefits	
AREC891	Introduction to Prospectus Development [1]	1
AREC892	Dissertation Prospectus Development [2]	3
Dissertation Research Requirements		
AREC899	Doctoral Dissertation Research (minimum of 12 research credits)	12
Total Credits		**54**

1 During the spring semester of their second-year, students are also required to take a 1-credit course intended to help students develop a dissertation topic.

2 This requirement is waived for any student who has completed a dissertation prospectus and passed a prospectus examination before the fall semester of the third year.

American Studies (AMST)

Graduate Degree Program
College: Arts and Humanities

Abstract

American Studies offers an interdisciplinary program of study leading to the Masters of Arts and the Doctor of Philosophy degrees. Research and teaching in the Department focus on two intellectual themes: the cultures of everyday life, and cultural constructions of identity and difference. These themes drive our examinations of multiple cultures within the U.S., across the Americas, and transnationally. They also embrace numerous cultural studies approaches, including material and visual culture, ethnography and life history, popular culture and media studies, queer studies, studies of the body and sexualities, gender studies, food studies, digital cultures, critical race studies, and cultural landscapes and geography. Students develop expertise in multiple methodologies and take courses in many departments across the University. The Department benefits from a large and diverse affiliate faculty, strong relationships with cultural institutions such as the Smithsonian museums, and ready access to many other museums in the Baltimore-Washington corridor, government agencies, archives and historical societies, and multiple local communities. Students may also take advantage of graduate certificate programs for which our courses apply, including Museum Scholarship and Material Culture, Critical Theory, Historic Preservation, and Women's Studies. The program in U.S. Latina/o Studies is contained within the Department, and we have a leadership role in developing Native American Studies.

Financial Assistance

A limited number of teaching assistantships are available in addition to graduate fellowships. Students who hold assistantships typically teach two sections undergraduate AMST courses.

Contact

Additional information on program offerings, degree requirements, and financial aid can be obtained on the department's Web site (http://www.amst.umd.edu) and by writing to out contact address.

Department of American Studies
1328 Tawes Hall
7751 Alumni Drive

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Writing Samples (2)
- Description of Research/Work Experience
- Graduate Record Examination (GRE)

Many admitted students have previously majored in American Studies, History, English, Ethnic Studies, Women's Studies, Anthropology, Art or Architectural History, Journalism, and Communications. However, applicants with broad backgrounds in arts and humanities and/or the behavioral and social sciences are also given serious consideration if interdisciplinary, American Studies-related subject matter or theories have been emphasized. Application requirements for both M.A. and Ph.D. programs include:

International applicants must also submit TOEFL scores. Applicants who do not yet have M.A. degrees and who desire to obtain the Ph.D. degree at Maryland should apply directly to the Ph.D. program.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 15, 2022
International Applicants	

F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	December 15, 2022

Requirements

- American Studies, Doctor of Philosophy (Ph.D.) (p. 38)
- American Studies, Master of Arts (M.A.) (p. 38)

Facilities and Special Resources

The Washington, D.C. and Baltimore areas offer extraordinary research facilities for the study of past and present Americans$rsquo; experiences and culture, including the Library of Congress, the National Archives, the Smithsonian's many institutions, the National Park Service, the Maryland Historical Society, and the Walters Art Museum and National Gallery, and other cultural institutions. The National Archives II, National Trust Library and Library of American Broadcasting are all located on the College Park campus. There are also numerous local and regional-focused museums, collections, archives, libraries, and "think tanks" that can support students' interests in issues and topics related to identity and difference and the cultures of everyday lfe. Through consortia arrangements with universities in the area, including George Washington University and Georgetown University, students may augment their programs with courses otherwise unavailable at the University of Maryland.

American Studies, Master of Arts (M.A.)

Thesis option: 30 credits required
Non-thesis option: 30 credits required

Students take a total of 30 credits of coursework in American Studies and related disciplines and demonstrate the ability to conduct independent research by submitting an acceptable thesis or a scholarly paper in lieu of a thesis.

Course	Title	Credits
Core Requirements		
AMST601	Introductory Theories and History in American Studies	3
Select one Methods Seminar course		3
Select AMST designated seminar courses		9
Thesis or Non-Thesis Requirements		
Select one of the following options:		15
Thesis:		
AMST799	Master's Thesis Research	
Select nine additional course credits		
Non-Thesis:		
Select 15 additional course credits and completion of a scholarly paper		
Total Credits		**30**

American Studies, Doctor of Philosophy (Ph.D.)

Doctoral students entering with a Bachelor's degree must complete a minimum of 42 credits of coursework. Doctoral students entering with a Master's degree must complete a minimum of 30 credits of coursework.

Advance to Candidacy: In addition to the coursework requirements below, all doctoral students must pass two comprehensive exams, as well as submit a Dissertation Prospectus. The first Comprehensive exam is on History, Theory, and Methods. The second exam is an Interdisciplinary Synthesis Paper.

Post-Candidacy: Complete at least 12 credits of AMST899 and write and defend an interdisciplinary dissertation that answers significant questions about American culture(s) and experiences, past or present.

Students entering with a Bachelor's degree

Minimum of 42 credits required

Animal Sciences (ANSC)

Graduate Degree Program

College: Agriculture and Natural Resources

Abstract

The Graduate Program in the Animal Sciences offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. The master's degree program does not offer a non-thesis option. Faculty research interests include:

1. Cell, molecular and developmental biology studies, gene expression of the neuroendocrine system during growth and development, molecular genetics of metal and heme homeostasis in animals, developmental potency and cell fate decisions during mammary gland development, maintenance of pluripotency and cell lineage determination in early embryos and stem cells, regulation of gene expression during embryonic patterning, neuro- and reproductive endocrinology in avian species, and virology, immunology and microbial pathogenesis of significance to animal agriculture;
2. Nutrition and intermediary metabolism of ruminants and non-ruminants, modeling for nutrient management, nutrient management in avian and other monogastric species, including forage utilization in horses; nutritional immunology, nutrient sensing, metabolic homeostasis, companion and exotic animal nutrition;
3. Aquaculture related fish physiology and genetics, and;
4. Application of computational and systems biology to quantitative genetics, genomics, epigenetics, selection theory and breeding for the improvement of domestic animals and conservation genetics.

Financial Assistance

A number of graduate combined research/teaching assistantships are available and awarded to students who present strong academic records and a capability and motivation to perform well in teaching or in research assignments. These assistantships are awarded on a competitive basis. Appointments are on an annual basis, with reappointment contingent on demonstration of successful progress towards the degree. Assistantships are available for up to two years for the M.S. degree and four years for the Ph.D. degree. As assistantships are generally awarded for Fall admittance, applications should be completed by the January 12 deadline for consideration.

Contact

For specific information on the program, admission procedures, or financial aid, see the ANSC website (https://ansc.umd.edu/graduate/) or contact the ANSC graduate program office as listed below.

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume
- Description of Research/Work Experience (optional)

The Program requires applicants to submit an application online, and to submit official academic transcripts, statement of goals and research interests, at least three letters of recommendation, and official Graduate Record Examination scores (optional Spring/Fall 2022) to the Enrollment Services Operations Office. Applicants with degrees from non-English speaking countries and who have not received a degree from the list of approved English-speaking universities must also submit results of the Test of English as a Foreign Language (TOEFL). To be considered for an assistantship, submit your application by the preferred deadline.

- Animal Sciences, Master of Science (M.S.) (p. 40)

Facilities and Special Resources

The Department of Animal and Avian Sciences and the nearby Gudelsky Veterinary Center housing the Virginia-Maryland Regional College of Veterinary Medicine, have extensive facilities consisting of faculty research laboratories, animal holding areas, a campus farm, aquaculture facility and outlying research farms. Additionally, the department maintains a teaching computer laboratory with 30 computers.

The research laboratories comprise nearly 28,000 square feet for bench work, averaging over 1000 square feet per faculty member. Over 2800 square feet of cold room and 2000 square feet of freezer rooms are integral components of the research laboratories. The laboratories are fully equipped with state-of-the-art modern instrumentation and equipment for the entire range of research carried out by the faculty, e.g. research in biochemistry, cell-molecular biology, physiology, nutrition, behavior, virology, immunology, microbial pathogenesis, etc. Individual laboratories are fully self-standing units, yet there is free exchange between laboratories having shared and collaborative interests. All the laboratories and offices are networked to the campus server for direct Internet access.

Nearly 15,000 square feet of space is dedicated for animal holding in the Animal Wing of the Animal Sciences Center. This facility is capable of handling all kinds of animals such as rodents, birds, fish and large animals for research in separate rooms. An aquaculture facility, adjoining the Gudelsky Center, is also available. The Animal Wing is under the care of trained staff and is supervised by a professional veterinarian.

Other facilities, such as the Laboratory for Biological Ultrastructure, the Visual Imaging Center, the DNA Sequencing Laboratory, the Proteomics Core Facility, etc., are available to the faculty and students as part of the Central Core Facilities on the campus.

Off Campus Research Facilities include:

1. Central Maryland Research and Education Center, Clarksville, MD
   This 925-acre dairy research center, located ~25 miles from the campus, houses 200 head of Holstein dairy cattle including 110 milking cows and 90 head of young stock. ANSC faculty engaged in nutrition, reproduction, physiology, herd health, behavior and management research, conduct their experiments at this facility.
2. Applied Poultry Research Laboratory, Upper Marlboro, MD
   This 202-acre facility is located approximately 20 miles from the campus. It is used for conducting research in nutrition, physiology and behavior.
3. Wye Beef Cattle Research Center
   This 450-acre facility is located on Maryland's Eastern Shore near Queenstown. It has 250 registered Angus beef cows plus young stock and bulls which are direct descendants of the Wye Angus herd. The facility is used to support research associated with beef cow-calf management, pasture management and growth physiology.

Animal Sciences, Master of Science (M.S.)

Thesis only: 30 credits

Course	Title	Credits
Core Requirements		
ANSC graduate courses chosen with advisor		12
Course in Biometrics or Research Ethics		4
ANSC624	Recent Advances in Animal and Avian Sciences	1
or ANSC625	Developing Presentation Skills	
Research Ethics (training can be completed online for 0 credit)		
Additional graduate courses chosen with advisor		7
Thesis Research Requirement		
ANSC799	Master's Thesis Research	6
Total Credits		**30**

Students are required to complete 24 credits of coursework with at least 12 credits in ANSC designated courses, and a minimum of 12 credits in courses numbered 600 or above. The plan of study should include courses in Biochemistry, Biometrics, and a course in Research Ethics.

During the first semester, the student selects an Adviser and an Advisory Committee (AC) with the approval of the Program Graduate Education Committee. By the end of the second semester, with the AC's advice, students file a proposed schedule of courses (plan of study). Committees may require that students take remedial courses if they enter with inadequate prerequisites or deficiencies in undergraduate programs. Also, by the end of the second semester a thesis research proposal must be approved by the student's AC.

Course requirements comprise at least one semester of Biometrics (4 credits; typically BIOM601), one credit of ANSC624 or ANSC625 and a course in Research Ethics. Additional credits of graduate coursework should result in a total of 24 credits, of which no more than 12 credits can be at the 400 level. Furthermore, a minimum of six hours of thesis research credit (ANSC799) is required. Towards the end of their graduate studies, students must present the results and conclusions of their research in a public seminar and successfully defend their written thesis in a final oral examination, which is given by the AC. A final copy of the thesis must be submitted to the Program Office. Students with adequate undergraduate training usually complete the master's degree within two years.

Animal Sciences, Doctor of Philosophy (Ph.D.)

The M.S. degree is not a prerequisite but is advantageous for admission to the Ph.D. program. All PhD students must meet the MS coursework requirements either through a completed MS degree in Animal Sciences (US accredited university) and/or by taking additional coursework during their PhD program. PhD candidates must also satisfactory complete a graduate level course in Statistics, typically BIOM 601, and either a course in Research Bioethics or completion of the Responsible Conduct of Research (RCR) – CITI Program provided through the Division of Research.

At least two credits of Seminar (with at least one in **ANSC624**) and one semester of teaching experience (8-10 hours per week) are required during study for the Ph.D. degree. ANSC624 is required of Ph.D. students even if it was taken while in the MS program. The ANSC seminars will be taken in non-consecutive semesters. In addition, a minimum of 12 research (ANSC899) credits is required.

Advancement to Candidacy: A plan of study must be filed with the approval of the student's Adviser and Advisory Committee (AC) by the end of the second semester and a research proposal by the end of the third semester. After no more than five semesters, the student must pass the Admission to Candidacy Examination, which consists of both written and oral components and is administered by the AC. At the time

of advancement, students should have completed at least 80% of their Plan of Study.

Post-Candidacy: Towards the end of their studies, the candidates present the results and conclusions of their graduate research in a public seminar and defend their research in an oral examination, which is adjudicated by the student's AC. In addition to successful defense of the dissertation, it is expected that the student will publish at least one paper in a refereed scientific journal, based on the dissertation research. A final copy of the dissertation must be submitted to the Program Office. The Ph.D. degree is usually completed within four to six years.

Course	Title	Credits
Core Requirements		
Two credits of Seminar		2
ANSC624	Recent Advances in Animal and Avian Sciences	
Dissertation Research Requirements		
ANSC899	Doctoral Dissertation Research	12
Total Credits		**14**

Anthropology (ANTH)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Department of Anthropology at the University of Maryland offers graduate study leading to the Master of Applied Anthropology (M.A.A.), the Master of Applied Anthropology and Master of Historic Preservation (M.A.A./M.H.P. Dual Degree), the Masters of Professional Studies in Cultural and Heritage Resource Management (M.P.S. (CHRM)), and the Doctor of Philosophy (Ph.D.) degrees. Our graduate degrees reflect the department's interest and expertise in applied anthropology—the application of anthropological knowledge, anthropology-in-use, and practicing anthropology— in a variety of institutional and community settings.

Current faculty members represent two subfields of the discipline (archaeology and socio-cultural anthropology). Drawing their intellectual and applied orientations from training and application of the above subdisciplines, the department's faculty also recognize the need to identify topics or problems where the expertise of individual faculty members can be applied in a manner that integrates the subdisciplines. In this ongoing effort, the faculty has identified three areas of research concentration: Anthropology of Health, Anthropology of Environment, and Anthropology of Heritage. The areas can be thought to contain and generate research problems of interest to the faculty's experience and expertise within the subdisciplines. These problems can be addressed individually through socio-cultural anthropology and archaeology. However, the anthropological contribution to addressing these problems is enhanced by collaboration across subdiscipline interests and expertise.

The Master of Applied Anthropology (MAA) is a program designed both for students interested in an anthropology career outside of academia and for those who plan on continuing to a PhD. The program has been offered at the University of Maryland since 1984, and graduates have successfully secured employment or pursued doctoral work in a variety of fields, such as working in the areas of medical and health practice, urban and regional planning and development, community development, conservation and heritage resource development, cultural resource management, and historical archaeology. The focus of the MAA program has been to participate in the building of anthropological practice.

The dual degree Master's Program in Applied Anthropology and Historic Preservation is a holistic, comprehensive primer for a professional career in the research, understanding and preservation of cultural resources and heritage. The first of its kind in the United States, the new degree prepares students for the challenges—and increasing demand—of understanding, documenting and saving a wide range buildings, landscapes, sites and communities.

The graduate program in Cultural and Heritage Resource Management (CHRM) provides rigorous interdisciplinary training in the skills necessary to advance a career in cultural heritage resource management. CHRM graduate programs include a Master of Professional Studies or a Graduate Certificate. Built on a broad foundation including research methods, critical thinking, ethics, communication and technical writing, management techniques, and leadership skills, this program prepares professionals for employment or advancement with private contracting firms, governmental agencies, and non-profit organizations.

A major focus of the Doctor of Philosophy (PhD) program is to direct research scholarship and to encourage theoretical and methodological advancement in such a way as to reflect upon the specific practices of anthropology, with the aim of improving those practices and thereby increasing the value and usefulness of the discipline. Doctoral students are typically prepared for research and development careers outside of academic settings, as well as for academic careers in anthropology departments and other disciplinary settings.

Financial Assistance

A limited number of Departmental Fellowships and Teaching Assistantships are available to qualified graduate students. Part-time employment related to department research is occasionally available.

Doctoral students have the option of applying for Fellowships in Support of Diversity and Inclusion (https://anth.umd.edu/content/graduate-admissions/). If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences, please be sure to upload your materials under "Supplementary Application" when submitting your online admissions application.

- Anthropology, Master of Applied Anthropology (M.A.A.) (p. 42)
- Cultural and Heritage Resource Management, Master of Professional Studies (M.P.S.) (p. 153)

Facilities and Special Resources

The Department has three archaeology labs (Archaeology in Annapolis, Archaeology of the Irish Diaspora and Modern Ireland, and the Center for Heritage Research Study) in addition to a Zooarchaeology Lab, an Ecological-Environmental Anthropology Lab, and Environmental Sensory Lab. Other research centers and programs include the Center for Research and Collaboration in the Indigenous Americas, Chesapeake Bay Environment Program, and the Deal Island Peninsula Project. Advanced computer software & hardware, such as scanners, graphic programs, and digitizing tablets are located in computer labs. UM is a Carnegie Class I research institution with opportunities for students to participate in research projects. The university is also part of the CIC.

Anthropology, Master of Applied Anthropology (M.A.A.)

Non-thesis only: 42 credits

Course	Title	Credits
Core Requirements		
Core Courses:		
ANTH601	Applied Anthropology	3
ANTH606	Qualitative Methods in Applied Anthropology	3
ANTH760	Development of Social/Cultural Theory	3
ANTH722	Ecological Anthropology	3
ANTH630	Quantification and Statistics in Applied Anthropology	3
ANTH740	Theories of the Past and Accomplishments of Archaeology	3
Internship Sequence:		
ANTH701	Anthropology Internship Preparation	3
ANTH789	Internship	6
ANTH712	Anthropology Internship Analysis	3
Supporting Coursework		12
Total Credits		**42**

The program requires 42 credit hours of coursework, including a core sequence (18 credit hours), an internship sequence (12 credit hours), and a sequence of individually approved courses that are related to a chosen domain of application (12 credit hours). MAA students must satisfactorily complete an internship proposal review with their advisory committee before beginning the internship, which is normally completed during the summer term between the first and second years of the program. Students are also required to present the results of their internship in a departmental colloquium prior to graduation. There is no thesis requirement.

Anthropology, Doctor of Philosophy (Ph.D.)

Advancement to Candidacy: In addition to coursework requirements stated below, students admitted to the PhD program advance to candidacy upon passing three written area exams, as well as passing an oral defense of their dissertation proposal.

Post-Candidacy: Students are required to complete 12 credits of ANTH899 Doctoral Dissertation Research and pass an oral defense upon completion of the dissertation.

Students Entering the Doctoral Program with a Bachelor's Degree

72 credits required

Students entering the PhD from a Bachelor's degree must normally complete all the requirements for the MAA degree indicated above, although the internship sequence can be substituted with additional coursework under approved circumstances. An additional minimum of 30 credit hours of advanced coursework is required, to include at least 12 credit hours of dissertation research. Additional supportive coursework may be required on a case-by-case basis depending on the qualifications of the student. In such cases, these expectations will be specified upon admission to the PhD program.

Students Entering the Doctoral Program with a Master's Degree

60 credits required

For students entering the PhD program from the MAA, an additional minimum of 30 credit hours of advanced coursework is required, to include at least 12 credit hours of dissertation research. Students entering the PhD program with a master's degree from another institution are minimally required to complete the 18 credit-hour core sequence of the MAA program and an additional minimum of 30 credit hours of advanced coursework, to include at least 12 credit hours of dissertation research. These students are not normally required to complete the internship sequence, although in some cases their doctoral committee may decide that an internship may be appropriate to enhance a student's professional experience prior to graduation. Additional supportive coursework may be required on a case-by-case basis depending on the qualifications of the student. In such cases, these expectations will be specified upon admission to the PhD program.

Applied Anthropology and Historic Preservation (AAHP)

Graduate Degree Program
College of Behavioral and Social Sciences / School of Architecture, Planning and Preservation

Abstract

The University of Maryland's Dual degree Master's Program in Applied Anthropology and Historic Preservation is a holistic, comprehensive primer for a professional career in the research, understanding and preservation of cultural resources and heritage. The first of its kind in the United States, the new degree prepares students for the challenges—and increasing demand—of understanding, documenting and saving a wide range buildings, landscapes, sites and communities.

Why a Dual Degree?

Despite many overlapping themes, applied anthropology and historic preservation are very specific in their scope. Yet, as issues related to global heritage grow more complex, there is an increased demand for professionals who can transcend the multiple aspects of preservation and heritage. The new degree program positions students interested in pursuing a career in cultural heritage with a unique and competitive advantage; a comprehensive insight into both tangible heritage, such as architecture, artifacts and natural forms; and the intangible resources of society and culture. The experiential foundation offered by the two programs—including regional and international field studies, excavations

and the use of LiDAR technology—offers the practical knowledge needed to succeed in an increasingly competitive and changing global market.

The Applied Anthropology and Historic Preservation dual degree takes full advantage of the diverse coursework offered at the University's School of Architecture, Planning and Preservation and the Department of Anthropology, bringing together expertise in archaeology, vernacular architecture, ethnography, cultural resource management, heritage studies and social/cultural anthropology. The establishment of the dual degree forwards the University's mission of continued educational development that fosters innovation and entrepreneurship, and addresses its commitment to reducing student debt through more affordable degree options.

Financial Assistance

The principal form of financial aid for students in this program consists of graduate assistantships related to research and outreach activities. Assistantships are offered by both Anthropology and Historic Preservation, and consist of tuition remission as well as a stipend. In addition, the HISP Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample
- Description of Research/Work Experience (optional)
- Portfolio PDF Upload (optional)
- Faculty of Interest

Because this is a joint program, the application is through the School of Architecture, Planning and Preservation. To apply, choose > Architecture/Planning/Preservation > Applied Anthropology and Historic Preservation (AAHP)

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 4, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 4, 2023

Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Anthropology and Historic Preservation, Master of Applied Anthropology and Master of Historic Preservation (dual degree) (M.A.A. and M.H.P.) (p. 45)

Anthropology and Historic Preservation, Master of Applied Anthropology and Master of Historic Preservation (dual degree) (M.A.A. and M.H.P.)

Non-thesis only (internship required): 66 credits

Requirements below are effective for students entering Spring 2020 or later

The Applied Anthropology and Historic Preservation dual degree takes full advantage of the diverse coursework offered at the University's School of Architecture, Planning and Preservation and the Department of Anthropology, bringing together expertise in archaeology, vernacular architecture, ethnography, cultural resource management, heritage studies and social/cultural anthropology. A total of 66 credit hours are required for the MAA/MHP dual degree.

Course	Title	Credits
Anthropology courses		
ANTH601	Applied Anthropology	3
ANTH606	Qualitative Methods in Applied Anthropology	3
ANTH630	Quantification and Statistics in Applied Anthropology	3
ANTH649	Advanced Developments in Archaeology	3
or ANTH449	Advanced Special Topics in Archaeology	
or ANTH664	Anthropology of Cultural Heritage	
or ANTH464	Anthropology of Cultural Heritage	
or ANTH635	Archaeological Ethnography and Heritage Ethnography

Applied Counseling and Human Services (Z069)

Graduate Certificate Program
College: Education

Abstract

The Department of Counseling, Higher Education, and Special Education at the University of Maryland offers an Online Graduate Certificate in Applied Counseling and Human Services with an emphasis on Career Planning and Placement for Youth in Transition (12 credits).

Contact

For additional information see information at the Department of Counseling, Higher Education, and Special Education http://www.education.umd.edu/CHSE/academics/degree_programs/YIT.html

Applied Economics (on-campus) (MPEM)

The on-campus Master of Professional Studies in Applied Economics (MPEM) program is no longer offered. Please see the on-campus Master of Science in Applied Economics (https://academiccatalog.umd.edu/graduate/programs/applied-economics-on-campus-ecam/) program page.

Admissions

The on-campus Master of Professional Studies in Applied Economics (MPEM) program is no longer offered. Please see the on-campus Master

of Science in Applied Economics (https://academiccatalog.umd.edu/graduate/programs/applied-economics-on-campus-ecam/) program page.

Requirements

- Applied Economics, Master of Professional Studies (M.P.S.) (p. 47)

Applied Economics, Master of Professional Studies (M.P.S.)

Non-thesis only: 30 credits

Course	Title	Credits
Core Requirements		
Core Courses:		15
ECON641	Microeconomic Analysis	
ECON642	Topics in Applied Macroeconomics	
ECON643	Empirical Analysis I: Foundations of Empirical Research	
ECON644	Empirical Analysis II: Introduction to Economic Models	
ECON645	Empirical Analysis III: Econometric Modeling and Forecasting	
Select five of the following field courses:		15
ECON670	Financial Economics	
ECON671	Economics of Health Care	
ECON672	Program Analysis and Evaluation	
ECON673	Information, Game Theory and Market Design	
ECON674	Economic Analysis of Law	
ECON675	Environmental Economics	
ECON676	Economic Development	
ECON683	International Macroeconomics and Finance	
ECON684	Applied Time Series Analysis and Forecasting	
Total Credits		**30**

The MPEM program emphasizes quantitative applied analysis. The curriculum includes all aspects of econometric modeling (including data collection, management and analysis) and incorporates hands-on STATA exercises into instruction. Courses provide students with rigorous training in economic reasoning, and the formulation and estimation of empirical economic models, with particular emphasis on using quantitative methods to evaluate policy proposals and programs. The 10-course program includes 5 'core courses' and 5 'field courses'. The 5 core courses include 2 applied theory courses (micro and macro) and a 3-course empirical analysis sequence. The field courses allow students to apply the tools learned in the core courses to specific fields of economics and public policy analysis.

Applied Economics (off-campus) (MPEC)

The off-campus Master of Professional Studies in Applied Economics (MPEC) program is no longer offered. Please see the off-campus Master of Science in Applied Economics (https://academiccatalog.umd.edu/graduate/programs/applied-economics-off-campus-ecao/) program page.

Admissions

Courses provide students with rigorous training in economic reasoning, and the formulation and estimation of empirical economic models, with particular emphasis on using quantitative methods to evaluate policy proposals and programs. The 10-course program includes 5 'core courses' and 5 'field courses'. The 5 core courses include 2 applied theory courses (micro and macro) and a 3-course empirical analysis sequence. The field courses allow students to apply the tools learned in the core courses to specific fields of economics and public policy analysis.

Applied Entomology (MPAE)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Master of Professional Studies in Applied Entomology, a 30-credit, 10-course graduate program may be completed in as little as 15 months. Offered through the convenience and flexibility of the online learning environment, students enroll in two 3-credit courses per 12-week term.

In addition to the MPS in Applied Entomology, the Department of Entomology developed several fully online graduate certificate programs. Designed to offer flexibility to complete coursework in areas specific to your needs and interests (as well as to gain a valuable credential), successful completion of one or more of these programs may be used to fulfill requirements for the MPS. Each 12-credit program may be completed in one year by taking one 3-credit course per 12-week term.The Graduate Certificate programs are as follows:

- Graduate Certificate in Professional Studies in Beekeeping
- Graduate Certificate in Professional Studies in Integrated Pest Management (IPM)
- Graduate Certificate in Professional Studies in Organic and Sustainable Agriculture
- Graduate Certificate in Professional Studies in Urban Agriculture

Applied Mathematics & Statistics, and Scientific Computation (AMSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The interdisciplinary program in Applied Mathematics & Statistics, and Scientific Computation (AMSC) offers graduate study leading to Master of Science and Doctor of Philosophy degrees with concentrations in applied mathematics, applied statistics, and scientific computation. It also offers a Certificate in Scientific Computation to graduate students enrolled in other university Ph.D. programs. The faculty is drawn from departments throughout the university. Possible areas of application include the physical, chemical, biological, and social sciences, and engineering. The program receives substantial support from the Department of Mathematics (MATH), the Center for Scientific Computation and Mathematical Modeling (CSCAMM), and the Institute for Physical Science and Technology (IPST). AMSC offers a spectrum of courses at the forefront of computation and applications, as well as state-of-the-art computational, visualization and networking facilities.

The Concentration in Applied Mathematics trains individuals who are able to enhance their understanding of a wide spectrum of scientific phenomena through the application of rigorous mathematical analysis. At least half of the required work is expected to be in courses with primarily mathematical content; the remaining courses must apply to a field outside of the usual mathematics curriculum in the student's chosen area of application. Graduate students currently pursue studies in the applications areas such as meteorology, fluid dynamics, algorithm development, pattern recognition, operations research, mathematical finance, computational dynamics, structural mechanics, mathematical biology, and systems and control theory. Other areas of study are available through participating departments. All students must include numerical analysis or scientific computing courses in their program of study.

The Concentration in Applied Statistics emphasizes acquisition of advanced training in the area of statistical application along with statistical topics and development of mathematical and computing skills necessary for the modern applied statistician. Students are required to take a series of core statistical and computational courses with more emphasis on data analytics and presentation skills. In addition, students will take a minimum of six credits in an outside application area.

The Concentration in Scientific Computation emphasizes the application of computation to the physical sciences, life sciences, engineering, business, and social sciences. Students will receive training in the use of computational techniques and technology with correspondingly less emphasis on formal mathematical methods in comparison to the Concentration in Applied Mathematics. Every Scientific Computation student is required to apply the training in computation to a problem in a specific scientific discipline.

A master's degree program in all concentrations with an emphasis on numerical analysis, computational methods, probability and statistics is excellent preparation for industrial or government employment.

Financial Assistance

The program offers teaching assistantships in the Department of Mathematics as a source of support for graduate students. These assistantships carry a stipend with remission of tuition of up to 10 credit hours each semester. Research assistantships are also available through participating departments and other sources, especially for students that have acquired advanced training. Assistantships are usually available only to incoming Ph.D. students; applications including letters of recommendation should be completed by December 15 for full consideration.

Courses: AMSC (https://academiccatalog.umd.edu/graduate/courses/amsc/)

Relationships: Aerospace Engineering (ENAE) (p. 28), Animal Sciences (ANSC) (p. 38), Astronomy (ASTR) (p. 64), Atmospheric and Oceanic Science (AOSC) (p. 66), Biological Sciences (BISI) (p. 85), Business and Management (BPHD) (p. 108), Chemical Engineering (ENCH) (p. 113), Civil and Environmental Engineering (ENCE) (p. 119), Computer Science (CMSC) (p. 139), Economics (ECON) (p. 168), Electrical and Computer Engineering (ENEE) (p. 170), Geology (GEOL) (p. 216), Government and Politics (GVPT) (p. 225), Mechanical Engineering (ENME) (p. 298), Physics (PHYS) (p. 325)

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- GRE Subject (optional but recommended)
- CV/Resume
- Description of Research/Work Experience (optional)

In addition to the Graduate School requirements, applicants are required to take the GRE general examination. The applicants are encouraged to take the GRE subject examination in either mathematics or another scientific topic. Applicants should have at least a "B" average (3.0 on a 4.0 scale) and should have completed an undergraduate program of study that includes a strong emphasis on rigorous mathematics, preferably through the level of advanced calculus and linear algebra.

Admission will be based on the applicant's ability to do graduate work in either applied mathematics, applied statistics, or scientific computation as demonstrated by the letters of recommendation, grades in coursework, and program of study. In some circumstances, a provisional admission may be given to applicants whose mathematical training is not sufficiently advanced. Previous education in an application area such as physics, biology, economics or one of the engineering disciplines, and a basic competence in computational techniques will be favorably considered in a student's application, although this is not a prerequisite.

When a student has decided upon an area of specialization, an advisory committee is formed and approved by the AMSC Graduate Committee. The advisory committee is responsible for formulating with the student a course of study that leads toward the degree sought. This course of study must constitute a unified, coherent program in an acceptable field of specialization of applied mathematics, applied statistics, or scientific computation.

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 15, 2022
International Applicants

Program Website: amsc.umd.edu (https://www.amsc.umd.edu)
Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Applied Mathematics & Statistics, and Scientific Computation, Doctor of Philosophy (Ph.D.) (p. 51)
- Applied Mathematics & Statistics, and Scientific Computation, Master of Science (M.S.) (p. 50)

Facilities and Special Resources

There are over 25 participating departments and institutes on the College Park campus, including units in the College of Computer, Mathematical, and Natural Sciences and the School of Engineering. The university has an engineering technical library as well as a network of high performance workstations for faculty and graduate students. In addition, there are collaborations with various area research institutes such as NASA Goddard Space Flight Center, National Institutes of Health, National Institute of Standards and Technology, Naval Research Laboratory, and National Oceanic and Atmospheric Administration.

Applied Mathematics & Statistics, and Scientific Computation, Master of Science (M.S.)

Students must complete 30 credits of coursework in one of the three areas of concentration. All three concentrations offer both thesis and non-thesis options.

Students choose from one of the following concentrations:

APPLIED MATHEMATICS

Course	Title	Credits
Thesis Option - 30 credits		
Courses with primarily math content		12
Six credits in 600-800 level courses		
Numerical Analysis course (course options below; other courses must be approved by advisor)		
AMSC660	Scientific Computing I	
AMSC661	Scientific Computing II	
AMSC662	Computer Organization and Programming for Scientific Computing	
AMSC663	Advanced Scientific Computing I	
AMSC664	Advanced Scientific Computing II	
AMSC666	Numerical Analysis I	
AMSC714	Numerical Methods For Stationary PDEs	
AMSC715	Numerical Methods for Evolution Partial Differential Equations	
AMSC763	Advanced Linear Numerical Analysis	
AMSC764	Advanced Numerical Optimization	
AMSC799	Master's Thesis Research	6
Application Area courses (chosen with advisor)		6
Applied Math or appropriate seminar (chosen with advsior)		1
Additional coursework chosen with advisor		5
Non-thesis Option - 30 credits		
Courses with primarily math content		15
Nine credits in 600-800 level courses		

Numerical Analysis course (course options below; other courses must be approved by advisor)		
AMSC660	Scientific Computing I	
AMSC661	Scientific Computing II	
AMSC662	Computer Organization and Programming for Scientific Computing	
AMSC663	Advanced Scientific Computing I	
AMSC664	Advanced Scientific Computing II	
AMSC666	Numerical Analysis I	
AMSC714	Numerical Methods For Stationary PDEs	
AMSC715	Numerical Methods for Evolution Partial Differential Equations	
AMSC763	Advanced Linear Numerical Analysis	
AMSC764	Advanced Numerical Optimization	
Application Area courses (chosen with advisor)		6
Applied Math or appropriate seminar (chosen with advsior)		1
Additional coursework chosen with advisor		8
Pass the Qualifying Exam requirement		
Submit a Scholarly Paper		

Applied Statistics

Thesis option requires 25 credits of coursework including 18 credits of statistics core courses, six credits in an application area, and one credit of seminar. Students are also required to complete six credits of AMSC799.

Non-thesis option requires 33 credits of coursework including 18 credits of statistics core courses, six credits in an application area, six credits of electives, two credits of seminar, and one credit of AMSC762. Students are also required to pass three qualifying exams, and submit a scholarly paper.

Scientific Computation

Thesis option requires 24 credits of coursework including nine credits of scientific computing core courses, six credits of core science courses, and three credits of scientific computing application courses, and 6 credits of electives. Students must also complete six credits of AMSC799.

Non-thesis option requires 30 credits of coursework including 15 credits of scientific computing core courses, six credits of core science courses, three credits of scientific computing application courses, and six credits of electives. Students must also submit a scholarly paper.

Applied Mathematics & Statistics, and Scientific Computation, Doctor of Philosophy (Ph.D.)

Doctoral students must fulfill the coursework and pre-candidacy requirements of the corresponding concentration and/or pass a set of comprehensive written examinations at the Ph.D. level.

Details on the level and distribution of coursework and examinations in mathematics and in the applications area are given on the program web site: http://www.amsc.umd.edu/programs/index.html (http://www.amsc.umd.edu/programs/)

Students choose from one of the following concentrations:

Applied Mathematics

Students are required to complete 18 credits of courses with mathematical content with at least nine credits at the 600-898 level, and three credits in Numerical Analysis. Additional course requirements include six credits in an application area, nine credits of electives, two credits of approved seminars, and 12 credits of AMSC899.

Advancement to Candidacy: Students are also required to pass three written qualifying exams, and one oral exam

1. Mathematics Written Qualifying Exam
2. Application Area Written Qualifying Exam
3. Second Mathematics Written Qualifying Exam or coursework equivalents
4. Oral Candidacy Exam

Course	Title	Credits
Core Requirements		
Select 18 credits of courses with mathematical content with at least nine credits at the 600-898 level and three credits in Numerical Analysis		18
Select six credits in an application area		6
Select nine credits of electives		9
Select two credits of approved seminars		2
Dissertation Research Requirements		
AMSC899	Doctoral Dissertation Research	12
Total Credits		**47**

Applied Statistics

Students are required to complete 18 credits of statistics core courses, six credits of application courses, three credits of electives, three credits of AMSC760, two approved seminar or RIT courses, a one credit data project, and 12 credits of AMSC899.

Advancement to Candidacy: Students are also required to pass two written qualifying exams, and one oral exam

1. Mathematical Statistical Written Qualifying Exam
2. Application Statistics Written Qualifying Exam
3. Oral Candidacy Exam

Course	Title	Credits
Core Courses		
Select 18 credits of statistics core courses		18
Select six credits of application courses		6
Select three credits of electives		3
AMSC760	Applied Statistics Practicum	3
Select two approved seminar or RIT courses		2
Select a one credit data project		1
Dissertation Research Requirements		
AMSC899	Doctoral Dissertation Research	12
Total Credits		**45**

Scientific Computation

Students are required to complete 15 credits of scientific computing core courses, six credits of core science courses, six credits of scientific

computing application courses, nine credits of electives, and 12 credits of AMSC899.

Advancement to Candidacy: Students are also required to pass an oral candidacy exam.

Course	Title	Credits

Architecture (ARCH)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The School of Architecture, Planning and Preservation offers a graduate program leading to the National Architectural Accrediting Board (NAAB) accredited Master of Architecture degree. The Architecture Program (ARCH) seeks to change the world through innovative architectural and urban design pedagogies, research, and practice that transforms place at all scales and improves the quality of life. In the course of our mission, we instigate change through teaching, experience, and scholarly activity, which prepares the next generation of broadly educated, highly-skilled architects and designers to be problem seekers/solvers in collaborative learning and professional environments. The Program offers a rich and demanding mix of architectural and urban design studios, architectural history and theory, and architectural science and technology. Electives in architecture and related fields are available in the curriculum.

NAAB Required Statement on Accreditation:

In the United States, most registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit professional degree programs in architecture offered by institutions with U.S. regional accreditation, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted an eight-year, three-year, or two-year term of accreditation, depending on the extent of its conformance with established educational standards.

Doctor of Architecture and Master of Architecture degree programs may require a pre-professional undergraduate degree in architecture for admission. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

The School is a member of the Association of Collegiate Schools of Architecture (ACSA) and the Architectural Research Centers Consortium (ARCC).

Financial Assistance

The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission.

Contact

Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Website (www.arch.umd.edu (http://www.arch.umd.edu)). Schedule a visit and tour online at: http://arch.umd.edu/arch/prospective-students-arch (http://arch.umd.edu/arch/prospective-students-arch/). Sign up to receive an invitation to our Graduate Open House and receive more information online at: http://arch.umd.edu/mapp/graduate-inquiry-form (http://arch.umd.edu/mapp/graduate-inquiry-form/).

For further information on admissions and degree requirements, please contact Brian Kelly, AIA, Architecture Program Director, archadvise@umd.edu, 301-405-8000.

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Portfolio PDF Upload (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationportfoliorequirementsarchardvarhparcp.pdf)
- Writing Sample

Admission to the graduate program is competitive. In addition to the Graduate School requirements, candidates must submit a portfolio. The portfolio should show evidence of creative ability in the form of a portfolio containing reproductions of creative work, which may include drawings, paintings, photographs, sculpture, sketches, and/or

architectural designs. Details concerning format and content may be obtained from the School of Architecture, Planning and Preservation website

Applications from four categories will be considered for admission:

1. candidates with a four-year Bachelor of Science in architecture degree;
2. candidates with four-year baccalaureate (B.A.) in architecture, environmental design (B.A. or B.S.), or relevant discipline; and
3. candidates with four-year baccalaureate (B.A. or B.S.) in a major other than architecture who have successfully completed specified undergraduate prerequisites outlined by the School of Architecture, Planning, and Preservation[1]; and
4. candidates with an accredited professional degree in architecture. Students are expected to enroll on a full-time basis. For complete information on curricula requirements for these categories, visit the School of Architecture, Planning and Preservation website (http://www.arch.umd.edu./).

[1] Additional requirements include:
- one (1) semester of college level calculus or successful high school advanced placement (AP) calculus; and
- one (1) semester of college level physics with lab, or successful high school advanced placement (AP) in physics
- One (1) course in freehand figurative drawing is recommended but not required.

Facilities and Special Resources

The School of Architecture, Planning, and Preservation is ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for environmental design study is unsurpassed. The School's resources include design workstations for each student, a model shop, a digital fabrication lab, and computer labs. The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The slide collection includes approximately 430,000 slides on architecture, landscape architecture, planning, and technical subjects. The interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning.

The Architecture Program benefits from the strong support of the professional community, including practitioners who bring expertise into the architectural design studios as instructors, consultants, and critics. Many alumni are leaders in regional firms, while others practice as far away as New York, Los Angeles, Puerto Rico, Vancouver, London, and Shanghai.

The University of Maryland's team has won the ULI/Hines Competition several times, with each member of the team being awarded $10,000.

The award-winning Comprehensive Design Studio and Advanced Technology sequence (an integral component of the M. Arch curriculum) offers an innovative teaching-learning environment where students work with an array of consultants from practice, exploring relationships between conceptual and technical aspects of architectural form and its assembly.

Embracing the importance of context as an integral component of the design process and advocating urban design as an essential component of architectural education, the Program has gained national and international recognition for its work in urban design, through awards and competition performance. Interdisciplinary competitions like the Urban Land Institute (ULI) Hines Urban Design Competition give architecture students opportunities to team up with fellow graduate students in planning, historic preservation, and real estate development to address urban issues in a work environment that prepares them for the collaborative experience of professional practice. In both 2014 and 2015 the University of Maryland's ULI-Hines competition team took first place in international competition bringing back over $50,000 in scholarship monies each time. The Urban Design Studio explores relationships between individual buildings, urban spaces, and the contexts in which they reside. Studios engage projects ranging from conceptual urban interventions to projects that help communities to envision future growth.

Study abroad opportunities augment the course of study offered in College Park. Summer and Winter study abroad programs are offered to a variety of locations including Rome, Paris, Scandinavia, Great Britain, Turkey, St. Petersburg, Egypt, Peru, and Sri Lanka. Summer and winter study opportunities are also available in conjunction with the Historic Preservation, Urban Studies & Planning, and Real Estate Development programs. A Spring Semester study abroad program is available in Florence.

Students entering the program with a four-year Bachelor of Science degree in Architecture from an accredited college or university normally require two years of graduate study to complete the requirements for the professional Master of Architecture degree. The established curriculum requires four semesters of academic work encompassing a total of 60 credits. Additional credits may be required depending upon the admissions committee's evaluation of the individual's academic and architectural experience. Information on required courses and curriculum may be obtained from the School of Architecture, Planning and Preservation website at http://www.arch.umd.edu.

Students who enter the professional program with a B.A. or B.S. in a discipline other than architecture will normally require seven semesters of design studio and other prerequisite courses encompassing a total of 105 credits. Students may be granted advanced standing if they have completed the appropriate prerequisites. Information on required courses and curriculum may be obtained from the School of Architecture, Planning and Preservation website at http://www.arch.umd.edu.

A Graduate Certificate in Historic Preservation (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?Z005) is available to M. Arch and M.S. in Arch candidates. The course of study includes 16 credits of required courses.

A Graduate Certificate in Urban Design (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?Z012) is available to M. Arch and M.S. in Arch candidates. The course of study includes 15 credits of required courses.

Architecture, Master of Science (M.S.)

Total Credits		**30**

A special option leading to the Master of Science in Architecture degree is available for those students who already possess an accredited NAAB professional degree in architecture (B.Arch. or M. Arch.) or its foreign equivalent. This option is designed to accommodate the needs of students who wish to do advanced work beyond that required for the professional degree. Applicants must specify in detail the nature of the proposed course of study for review and approval by the admissions committee prior to their admission. The School currently provides resources for advanced work in architectural design and urban design.

Architecture and Community Planning (ARCP)

Graduate Certificate Program
School of Architecture, Planning and Preservation

Abstract

The dual degree combines course work from the Architecture and Urban Studies and Planning programs to enable a student to complete both the Master of Architecture (http://arch.umd.edu/arch/degree/master-architecture/) and Master of Community Planning (http://arch.umd.edu/ursp/degree/master-community-planning/) degrees with fewer credits than it would take to complete the two separately.

Students of the dual-degree program acquire specialized knowledge tailored to understanding the urban environment from several perspectives. Students learn how social, economic and political forces have led to the development of human habitats. The emphasis on urban design in the dual-degree program yields an education that is particularly

applicable for persons interested in the revitalization of metropolitan areas and their center cities.

Applicants for the dual degree in Architecture and Community Planning should use the following four-letter code on the online application: ARCP

The dual degree combines course work from the Architecture and Historic Preservation programs to enable a student to complete both the Master of Architecture and Master of Historic Preservation degrees with fewer credits than it would take to complete the two separately.

Architecture and Real Estate Development (ARDV)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

There are several paths, depending on prior education and experience for applicants to consider for Architecture as well as for Real Estate Development. Students applying for the dual degree program will complete fewer courses (permitted overlap of courses) than if they took each degree program separately. The total number of credits for the dual degree is 75 credits for Path A architecture/real estate development dual degree students (those with undergraduate degree credits fully accepted) and is 127 credits for Path B architecture/real estate development dual degree students (those without an undergraduate degree in architecture). For the most complete information on the architecture program, also consult the catalog entry for ARCH. For the most complete information on the real estate development program, also consult the catalog entry for RDEV.

Financial Assistance

The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission.

The Colvin Institute provides scholarship funds to a number of highly qualified students, who may be dual degree students each term. Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply to the entire program, subject to academic performance. Periodically there are named scholarships provided by various real estate organizations or development companies.

In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. However, students in the dual degree program may find it impossible to complete their degree requirements timely if they are working off campus, or more than 10 hours per week. However, the MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty and sponsors.

Applicants should inquire as to the availability of funding for the term they are starting. Colvin Institute scholarships are typically for a portion of tuition only, and are paid on a per course basis as students progress through the program.

Contact

Find additional information on program offerings, degree requirements, admissions, and financial aid on the School's Web site (www.arch.umd.edu (http://www.arch.umd.edu)).

Schedule a visit and tour online at: http://arch.umd.edu/arch/prospective-students-arch (http://arch.umd.edu/arch/prospective-students-arch/). Be sure to contact the Program Director for Real Estate Development, Maria Day-Marshall, (mdaymars@umd.edu) if you wish to attend a sampling of RDEV classes while here.

For further information about the Architecture Program, please contact Brian Kelly, AIA, Director, arch-admissions@umd.edu (https://academiccatalog.umd.edu/graduate/programs/architecture-real-estate-development-ardv/arch-admissions@umd.edu), 301.405.8000.

For further information about the Real Estate Development Program and the Colvin Institute, please contact Maria Day-Marshall, JD, LLM, Director, mdaymars@umd.edu, 301.405.8000.

GENERAL REQUIREMENTS

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Portfolio PDF Upload (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationportfoliorequirementsarchardvarhparcp.pdf)

- Writing Sample
- Must be admitted by both programs to pursue dual degree.

The application process consists of the following:

- First, fill out the online application for the University of Maryland Graduate School. The administrative code for the dual degree in Master of Architecture degree and Master of Real Estate Development is "ARDV."
- Second, submit all transcripts, three professional letters of recommendation, statement of purpose, resume, official test scores, portfolio, and writing sample as part of the application.

All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicant's previous field of study, and indeed we encourage diversity in all senses.

Domestic Applicants		
US Citizens and Permanent Residents	January 13, 2023	N/A
International Applicants		
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 13, 2023	N/A

RESOURCES AND LINKS:

Program Website: arch.umd.edu (http://www.arch.umd.edu/)
Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Architecture and Real Estate Development, Master of Architecture and Master of Real Estate Development (dual degree) (M.Arch. and M.R.E.D.) (p. 60)

Facilities and Special Resources

The School of Architecture, Planning and Preservation and the Colvin Institute of Real Estate Development are ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for real estate development and environmental design study is unsurpassed.

The School's resources include design workstations for each architecture student, a model shop, a digital fabrication lab, and both PC and MAC computer labs with REVIT, ARGUS, GIS, Maptitude and other design programs available. The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI. The interdisciplinary National Center for Smart Growth Research and Education, based in the School, offers perspectives and opportunities to engage important issues facing urban and regional planning.

Both the Real Estate Development and Architecture Programs benefit from the strong support of the professional community, including practitioners who bring expertise into the architectural design studios as instructors, consultants, and critics. The RDEV courses are all taught by working or retired real estate professionals giving unparalleled access for students to make connections with current practice in the industry. Many architecture alumni are leaders in regional firms, while others practice as far away as New York, Los Angeles, Puerto Rico, Vancouver, London, and Shanghai.

The ULI Hines competition is open to graduate students who are pursuing real estate-related studies at universities in the United States and Canada, including programs in real estate development, urban planning, urban design, architecture and landscape architecture. In the past six years, the University of Maryland has reached the ULI Hines finals four times, won twice (2014 & 2015) and received one honorable mention.

The award-winning Comprehensive Design Studio and Advanced Technology sequence (an integral component of the M. Arch curriculum) offers an innovative teaching-learning environment where students work with an array of consultants, exploring relationships between conceptual and technical aspects of architectural form and its assembly.

Embracing the importance of context as an integral component of the design process and advocating urban design as an essential component of architectural education, the Program has gained national and international recognition for its work in urban design, through awards and competition performance. Dual degree students are prime candidates for selection to participate in the interdisciplinary competitions supported by the School, including the national ULI Hines, the regional REIDO development competition, and the local capital area competition sponsored by NAIOP which gives the team the opportunity to present a urban (re)development solution to a large professional audience of real estate and design professions.

Study abroad opportunities augment the course of study offered in College Park. Summer study abroad programs are offered to a variety of locations including Rome, Paris, Scandinavia, Great Britain, Turkey, St. Petersburg, Egypt, Peru, and Sri Lanka. Summer and winter study opportunities are also available in conjunction with the Historic Preservation, Urban Studies & Planning, and Real Estate Development programs. A Spring Semester study abroad program is based at Kiplin Hall in Great Britain.

Dual degree students have the option to do their M.Arch thesis and MRED Capstone project in a combined fashion, with a design and development proposition supported by a committee of design and development instructors and professional advisors. These are very challenging and rewarding for students and faculty alike, but require a fair amount of advance planning on the part of both the student and faculty.

Architecture and Real Estate Development, Master of Architecture and Master of Real Estate Development (dual degree) (M.Arch. and M.R.E.D.)

Students entering the program with a four-year Bachelor of Science degree in Architecture from an accredited college or university normally require two years of graduate study to complete the requirements for the professional Master of Architecture degree (Path A). The dual degree curriculum requires 75 credits which can be completed in five semesters plus one Summer and one Winter term course. Additional credits may be required depending upon the architectural admissions committee's evaluation of the individual's academic and architectural experience. Information on required courses and curriculum may be found on the School of Architecture, Planning, and Preservation website at http://www.arch.umd.edu.

Students who enter the professional program with a B.A. or B.S. in a discipline other than architecture (Path B) will normally require eight semesters plus course work in 2 summer and two winter terms in order to complete the 126 credits required for the dual degree in architecture and real estate development. Students may be granted advanced standing if they have completed certain of the required architecture prerequisites. Information on required courses and curriculum may be found on the School of Architecture, Planning, and Preservation website at http://www.arch.umd.edu.

Art History and Archaeology (ARTH)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of Art History and Archaeology offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees in Art History. The Program is committed to the advanced study and scholarly interpretation of works of art from the prehistoric era to the present and is grounded in the concept of art as a humanistic experience. The faculty offers expertise in all phases of the history of Western art as well as the arts of Africa, the Americas, and East Asia.

Financial Assistance

Fellowships are awarded on the basis of merit by the College of Arts and Humanities and by the Graduate School. Several graduate assistantships are awarded by the Department. Also, up to four Museum Fellowships are awarded each year by the Department of Art History and Archaeology for research at major museums in the Washington-Baltimore area. In

honor of its late founding chairman, the Department has established the George Levitine Art History Endowment, in support of research activities of graduate students as well as faculty. The Jenny Rhee Fellowship supports research, travel, and other educational expenses. The Department has recently received a generous gift from the Robert H. Smith family which includes three graduate fellowships. Additional fellowships are available, including travel and dissertation research awards.

Contact

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample (could be a research paper)
- Description of Research/Work Experience

For admission to the Master's program, students should have an undergraduate degree from an accredited college or university, or its equivalent. Although the applicant must demonstrate a general knowledge of art history, an undergraduate major in art history is not required. Students are required to submit the Graduate Record Examination scores for admission.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Art History and Archaeology, Doctor of Philosophy (Ph.D.) (p. 62)
- Art History and Archaeology, Master of Arts (M.A.) (p. 62)

Facilities and Special Resources

The Michelle Smith Collaboratory for Visual Culture, part of the Department of Art History and Archaeology, is designed to foster innovation in teaching and research by combining cutting-edge visual technology with an environment that encourages collaboration among faculty, students, and external scholars. The Collaboratory combines space for work and for meetings with advanced technology and helpful staff to provide a venue in which teachers and students can gather to work, share ideas, and find the resources necessary to explore new technologies and pursue intellectual interests, as well as to promote the department's teaching curriculum. The Department maintains its own Lloyd and Jeanne Raport study collection of some 130 objects from ancient Egypt, Greece, Rome, and the Ancient Americas.

The University Art Gallery, also located in the Parren J. Mitchell Art-Sociology Building, maintains a lively and varied exhibition schedule and has a permanent collection of twentieth-century American prints, drawings and paintings, collections of Japanese prints, and African objects.

The Art Library houses approximately 100,000 volumes as well as a vast body of auxiliary material, including about 70,000 sheets of microfiche. In addition to the University's library resources, graduate students have access to the Library of Congress, the Archives of American Art, the libraries of Dumbarton Oaks, and other research facilities in Washington.

The University of Maryland is located in the suburbs of Washington, D.C., and is 30 minutes from the National Gallery of Art and the National Gallery's Center for Advanced Study in the Visual Arts, the Corcoran Gallery, the Phillips Collection, the Hirshhorn Museum and Sculpture Garden, the Smithsonian American Art Museum, the Museum of African Art, the Freer and Arthur M. Sackler Galleries, which are devoted to the art of East Asia, the National Museum of Women in the Arts, and many other major art museums. The campus is a 40-minute drive from such Baltimore institutions as the Walters Art Gallery and the Baltimore Museum of Art.

In order to enhance the student's curricular choices, the Department maintains an arrangement for course exchange with the Art History department of the Johns Hopkins University in Baltimore. To similar effect, the Department is a member of the Washington Area Art History Consortium, which unites the graduate art history departments of the greater Washington area.

The Department organizes a variety of liaison activities with leading cultural institutions in the Washington-Baltimore area. The Middle Atlantic Symposium in the History of Art is sponsored jointly by the Department and the National Gallery of Art; this annual event provides the opportunity for advanced graduate students from universities in the Middle Atlantic region to present their research at a professional forum. Special seminars are frequently given by curators of such local collections as the National Gallery of Art, the Freer Gallery, or the Department of Prints and Photographs at the Library of Congress.

Art History and Archaeology, Master of Arts (M.A.)

Thesis only: 30 credits

For the Master's degree, the student will: complete 30 credit hours at the 600 and 700 levels (at least 9 of these credits must be 700 level seminars; 6 are for thesis research; and one course must be ARTH692); pass an advisor-approved language exam appropriate to the area studied (such as Japanese); complete a thesis that demonstrates competency in research and in original investigation; and successfully defend the thesis. Please consult the department's web site for information regarding course distributional requirements. A minimum grade of "B-" is required for all courses approved for graduate credit. Two grades below "B-" result in automatic dismissal from the program.

Course	Title	Credits
Core Requirements		
ARTH692	Methods of Art History	3
ARTH799	Master's Thesis Research	6
Select seven graduate colloquia or seminars (3 credits each) including one course from each of the following four topic areas: [1]		21
Art before 1800 (Chronological area)		
Art after 1800 (Chronological area)		
Art outside Europe and the USA (Geographical area)		
Art from Europe and/or the USA (Geographical area)		
Total Credits		**30**

[1] A single course may fulfill one of the chronological areas as well as one of the geographic areas. No one course, however, can fulfill both of the chronological topic areas or both of the geographic areas.

Art History and Archaeology, Doctor of Philosophy (Ph.D.)

A total of thirty-three credit hours, after the M.A. degree, is required for the Ph.D. program. For the direct Ph.D.--in which the M.A. degree is bypassed--the student must complete a total of fifty-seven credit hours. For coursework distributional requirements, see the department's web page. A minimum grade of "B-" is required for all courses approved for graduate credit. Two grades below "B-" result in dismissal from the program.

Advance to Candidacy: In addition to the below course requirements, all doctoral students must pass two advisor-approved, field-specific foreign language exams (one of these could have been taken as an M.A. student), submit a successful request for approval of doctoral exam topics, pass both the written and oral doctoral exams, and successfully defend a dissertation proposal, and

Post-candidacy: Students must successfully defend a dissertation.

Requirements after the M.A. Degree

Course	Title	Credits
Core Requirements		
Select 18 credits of coursework		18
ARTH692	Methods of Art History (if not previously taken)	3
Dissertation Research Requirements		
ARTH899	Doctoral Dissertation Research	12
Total Credits		**33**

Requirements for Students Who Bypass the M.A. and Enter Directly into the Doctoral Program

Course	Title	Credits
Core Requirements		
Select 42 credits of coursework [1]		42
ARTH692	Methods of Art History	3
Dissertation Research Requirements		
ARTH899	Doctoral Dissertation Research	12
Total Credits		**57**

[1] For coursework distributional requirements, please see the M.A. core requirements.

Art Studio (ARTT)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of Art offers a program of graduate study leading to the Master of Fine Arts degree. The program emphasizes independent and interdisciplinary work. The Graduate Faculty consists of 15 active professional artists specializing in a range of studio and post-studio practices, including painting/drawing, sculpture/installation, printmaking, digital and time-based media. The program is small and competitive, and most students receive support in the form of graduate fellowships and assistantships, which include teaching and after-hours studio monitoring.

Financial Assistance

The Department offers eight teaching assistantships and one fellowship. A number of Graduate School Fellowships are also available. Applications should be submitted by January 16 for consideration for a graduate assistantship or fellowship.

Contact

The Department of Art website, www.art.umd.edu provides a lot of information for prospective students. For further information, contact:

Courses: ARTT (https://academiccatalog.umd.edu/graduate/courses/artt/)

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (2)
- CV/Resume
- Digital Submission: 15-20 digital images, website/software or videos/videos documentation indicative of current artistic practice, uploaded to umdart.slideroom.com (https://umdart.slideroom.com/#/Login), $10 supplemental application fee

To apply to the MFA Program applicants are encouraged to complete the Graduate School application available online (https://gradapply.umd.edu). Applicants are also required to pay the requisite application fee.

For admission to the graduate program, The Department of Art requires an undergraduate degree with a major in art from an accredited college or university, or its equivalent. A minimum of 30 credit hours of undergraduate work in studio courses and 12 credit hours in art history courses is recommended.

The MFA Degree is the final degree in studio art. Only the highest level of undergraduate artistic achievement is appropriate for graduate application. The Department of Art seeks students who have developed coherent bodies of work that are personal and focused. This body of art work, as professionally documented on CD's, Videos or websites is the primary basis for admittance.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	February 2, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	February 2, 2023

Other Deadlines: Please visit the program website at http://www.art.umd.edu

Requirements

- Art Studio, Master of Fine Arts (M.F.A.) (p. 63)

Facilities and Special Resources

Each MFA student is provided with 24-hour access to an individual studio. Each studio is approximately 400 sq. ft. The studios are adequately ventilated and meet industry standards in safety. General sculpture facilities include: Approximately 2200 sq. ft. wood shop; approx. 2200 sq.ft. steel fabrication studio; approx. 1500 sq. ft. foundry w/indoor furnace plus outdoor furnace for iron casting. There is space within the building, and outside on the grounds, for sculpture and installations. The printmaking studio (screen, intaglio, relief/litho, digital) is approximately 3000 sq. ft. There are also approx. 8000 sq. ft. of undergraduate painting and drawing studios. Digital media features up to date Macs, large format printers, a CNC router, laser cutter/engraver, and two maker-bot 3D printers. The department encourages multi-media and interdisciplinary approaches to technology.

Within the building housing the Department of Art, there are two galleries and two libraries. The University of Maryland Art Gallery, an independent unit that works closely with the Department of Art, features national and international contemporary and historical exhibitions as well as faculty and annual MFA Thesis shows. The Herman Maril Art Gallery is a student organized gallery that features student exhibitions, lectures, special projects and a space for social activities. The Art Library, separate from the large research libraries on campus, has an outstanding collection of books, catalogues, periodicals and reproductions, all indexed on computer and CD ROM systems.

Art Studio, Master of Fine Arts (M.F.A.)

Thesis option only: 60 credits required

Course	Title	Credits
Core Requirements		
ARTT698	Directed Graduate Studies in Studio Art (ARTT698A)	5

ARTT698	Directed Graduate Studies in Studio Art (ARTT698B)	6
ARTT699	Directed Graduate Studies in Studio Art (ARTT699A)	7
ARTT699	Directed Graduate Studies in Studio Art (ARTT699B)	4
ARTT768	Graduate Colloquium	12
ARTT798	Directed Graduate Studies in Studio Art (ARTT798A)	5
ARTT798	Directed Graduate Studies in Studio Art (ARTT798B)	6
ARTT799	Master's Thesis Research	9
Art History or Art Theory electives		6
Total Credits		**60**

Candidates for the Master of Fine Arts Degree must complete a program that consists of 60 credit hours. These 60 credit hours are distributed as follows:

- 30-33 credits in Studio;
- 0-3 credits Teaching Internships;
- 6 credits in Art History/Art Theory;
- 12 credits in Graduate Colloquium; and
- 9 credits in Masters Thesis Research.

Graduate Reviews, with committees made up of Graduate faculty members, take place at the end of each semester. Each MFA candidate in his/her final semester must select a thesis advisor and a thesis committee. Students must present their artwork in a Thesis Exhibition, usually installed in the Art Gallery at a designated time near the end of the spring semester. Students must also develop a written component to the Thesis (These have varied in length from five to 50 pages), and present an oral defense of the Thesis to the Thesis committee.

Astronomy (ASTR)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Department of Astronomy offers a program of study leading to a Doctor of Philosophy degree. Students typically earn a Master of Science after completing the program's second year. A full schedule of courses covering most fields of astronomy is offered. Some areas in which the faculty focus their research efforts are comets, interplanetary dust, planetary dynamics, extrasolar planets, star and planet formation, mm wavelength astronomy, the interstellar medium, black holes, active galaxies, time-domain astronomy, galaxy formation and evolution, plasma astrophysics, high energy astrophysics, theoretical and computational astrophysics, and cosmology.

FINANCIAL ASSISTANCE

The Department of Astronomy offers both teaching and research assistantships. Students making adequate progress toward degree completion will receive up to six years of funding through teaching and/or research assistantships. Research assistantships are either with faculty in the Department or with staff members at the NASA/Goddard Space Flight Center or other local astronomical research centers.

Website: http://www.astro.umd.edu

Courses: ASTR (p. 631)

Relationships: Physics (PHYS) (p. 325)

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- GRE Subject (Physics) (optional)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationastr.pdf)
- Description of Research/Work Experience: 1-2 page description of research and relevant work experience. It should include the topic of research, where it took place and who supervised it, the description of the actual activity (for example, “data reduction for a ground-based optical FTS instrument, wrote reduction software in Python”), whether there were resulting publications, what you learned from pursuing this activity, and what motivated you to pursue it. Note: Please do not upload documents for the Writing Samples. (The admissions committee will not read these.)
- Faculty of Interest: applicants are asked to select a minimum of 3 tenured/tenure-track faculty members (http://www.astro.umd.edu/people/directory.html#Tenured/Tenure-Track%20Faculty).

Because of the large number of qualified applicants, the Department of Astronomy has had to restrict formal admission to the Graduate School to those who have shown particularly outstanding work in their undergraduate records.Students who enter the graduate program are normally expected to have strong backgrounds in astronomy, physics, and mathematics (equivalent to a B.S. in Astronomy or Physics). A student with deficiencies in one of these areas may be admitted but will be expected to remedy such deficiencies as soon as possible.

- In our admission process, we are looking for students who will thrive and succeed in our program, and who will be productive and active members of our graduate student community. To evaluate this we take into account all of the information you include in the application.

Good academic preparation is needed for success in any graduate program; this can be demonstrated in a number of ways, such as good grades especially in appropriate-level physics and math classes, or with the Physics GRE test (which is an optional component of the application package and will not count against you if not submitted). As you work on your application materials, consider that we are very interested in understanding not only what you have done, but also what you have learned as part of your classes and research experience.

Note that the Department of Astronomy accepts applications for the Ph.D. program only. (Admitted students typically receive an M.S. degree after their second year in the program.) For full details, see http://www.astro.umd.edu/graduate/admissions.html

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Astronomy, Doctor of Philosophy (Ph.D.) (p. 66)
- Astronomy, Master of Science (M.S.) (p. 65)

Facilities and Special Resources

The Department has guaranteed observing time on the 4.3-meter Discovery Channel Telescope through a partnership with Lowell Observatory. We have strong interactions with other major observatories, where many students and faculty maintain observing programs, and with neighboring scientific institutes, including the Naval Observatory, the Naval Research Lab, and other government agencies. We have joined with Caltech and other partners in the Zwicky Transient Facility, a time-domain survey for studying rare and exotic transient phenomena which will see first light at Palomar Observatory in 2017. Our planetary science team is heavily involved with space missions visiting solar system bodies, such as NASA's Deep Impact, EPOXI, and Rosetta missions to study comets.

The Center for Research and Exploration in Space Science & Technology II (CRESST II) is the most visible of our many interactions with NASA's Goddard Space Flight Center, located only 5 miles away. UMD researchers work together with Goddard scientists on many topics, ranging from the study of neutron stars, black holes, and extremely hot gas throughout the universe to the study of planets in our Solar System. This partnership offers an exciting array of opportunities for graduate students to work with Goddard scientists and facilities on their Ph.D. theses.

U. Maryland and NASA's Goddard Space Flight Center formed the Joint Space-Science Institute (JSI), a close collaboration between the Departments of Astronomy and Physics and NASA/Goddard. JSI's areas of investigation include black hole physics, high-energy astrophysics, and cosmology.

The Department has also established a partnership with Pontificia Universidad Catolica de Chile (PUC). PUC, one of the top two institutions for astronomy in Chile, signed an agreement with UMD in 2010 that enables astronomy graduate students at both institutions to participate in a joint Ph.D. program starting in their third year. These students split their time between both locations and conduct their thesis research under the supervision of UMD and PUC co-advisors. UMD students gain improved access to Chilean observatories, which include many of the best telescopes in the world.

The Center for Theory and Computation (CTC), a strong group of theoretical astrophysicists within the department, built and maintains a Beowulf cluster to perform computational analyses and simulations across a range of research areas. We also have access to three larger university clusters, including the world-class "DeepThought2" and "MARCC/Bluecrab", which have been invaluable to our students in completing computationally-intensive thesis projects.

In 2014, much of the Department moved to the new Physical Sciences Complex (PSC). Highlights of the building include beautiful architecture, windowed office space for grad students, a grad student lounge, and a state-of-the-art visualization lab for state-of-the-art simulations and displays of large datasets.

This Department is associated with the following research units and facilities:

- Center for Research and Exploration in Space Science and Technology II (CRESST II) (http://cresst.umd.edu/): Partnership between UMCP, UMBC, USRA, and NASA/Goddard, with an emphasis on high-energy astrophysics.
- Joint Space Science Institute (JSI) (https://jsi.astro.umd.edu/): Partnership between Astronomy, Physics, and NASA/Goddard, with an initial emphasis on high energy astrophysics, especially black holes. Established 2010.
- Laboratory for Millimeter Wave Astronomy (LMA) (http://www.astro.umd.edu/rareas/lma/)
- Center for Theory and Computation (CTC) (http://www.astro.umd.edu/rareas/ctc/): Astronomy Dept. center for theory- and computation-related research programs.
- Discovery Channel Telescope (DCT) (http://www.astro.umd.edu/facilities/dct.html)
- Zwicky Transient Facility (ZTF) (https://www.ptf.caltech.edu/ztf/)
- PDS Small Bodies Node (https://pds-smallbodies.astro.umd.edu/) (https://www.ptf.caltech.edu/ztf/)

Astronomy, Master of Science (M.S.)

Thesis or Non-thesis option: 30 credits

Course	Title	Credits
Complete six of the nine principal courses:		18
ASTR601	Radiative Processes	

ASTR606	Stellar Structure and Evolution	
ASTR610	Astronomical Instrumentation and Techniques	
ASTR615	Computational Astrophysics	
ASTR620	Galaxies	
ASTR622	Cosmology	
ASTR630	Planetary Science	
ASTR670	Interstellar Medium and Gas Dynamics	
ASTR680	High Energy Astrophysics	
Thesis or non-thesis option		**12**
Thesis:		
ASTR799		
Electives approved with advisor		
Non-thesis:		
Electives approved with advisor		
Scholarly Paper		
Total Credits		**30**

Non-thesis Option

30 credits. Non-thesis option requires 30 credits of coursework including six of the nine principal Astronomy graduate courses, and at least 18 credits at the 600 level or above. Students must also submit a scholarly paper and pass a comprehensive final exam.

Candidates for the non-thesis option of the M.S. degree are required to complete 30 credits, including six of the nine principal Astronomy graduate courses (18 credits), with the remaining 12 credits consisting of classroom courses or research credits in Astronomy or supporting fields. Students are required to complete a 2nd-year project, which includes one or more scholarly papers.

Thesis Option

30 credits. Thesis option requires 30 credits of coursework including six of the nine principal Astronomy graduate courses and six credits of ASTR799.

Candidates for the thesis option of the M.S. degree (less common) are required to complete 30 credits, including 6 credits of thesis research (ASTR799) and eight graduate courses (24 credits). At least six of the courses must come from the nine principal Astronomy graduate courses. A written thesis is required and must be successfully defended in an oral examination.

Astronomy, Doctor of Philosophy (Ph.D.)

Students choose a research stream depending on their interest within the field. Courses beyond the required eight are sometimes necessary for advanced research. This will be assessed by the student's thesis committee.

Advance to Candidacy: In addition to the coursework below, students must complete and present a research project in the second year of graduate study and pass the Thesis Proposal Defense in their third year. The Thesis Proposal Defense includes a thesis proposal write-up, an oral presentation of the thesis proposal, and a questions/discussion session on topics relevant to the thesis research. Admission to candidacy is based on course work, the second-year research project, and the Thesis Proposal Defense.

Post-candidacy: Complete at least 12 credits of ASTR899 Doctoral Dissertation Research and successfully defend a dissertation.

Course	Title	Credits
Core Requirements		
Complete at least six of the following courses:		18
ASTR601	Radiative Processes	
ASTR606	Stellar Structure and Evolution	
ASTR610	Astronomical Instrumentation and Techniques	
ASTR615	Computational Astrophysics	
ASTR620	Galaxies	
ASTR622	Cosmology	
ASTR630	Planetary Science	
ASTR670	Interstellar Medium and Gas Dynamics	
ASTR680	High Energy Astrophysics	
ASTR699	Special Problems in Advanced Astronomy	1-6
or ASTR898	Pre-Candidacy Research	
ASTR695	Introduction to Research	1
Dissertation Research Requirements		
ASTR899	Doctoral Dissertation Research	12
Total Credits		**32-37**

Atmospheric and Oceanic Science (AOSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Department of Atmospheric and Oceanic Science offers graduate study leading to the Master of Professional Studies, Master of Science, and Doctor of Philosophy degrees. Coursework in atmospheric and oceanic sciences is also offered at the upper division and graduate level as a service to other campus graduate programs. The educational program is broadly based and involves many applications of the mathematical, physical and applied sciences that characterize modern atmospheric sciences and physical oceanography, including climate and earth system science, and multidisciplinary studies of the interrelationship among the atmosphere, the oceans, the land, and the biota. The Department's advanced degree programs are designed to prepare students for participation in contemporary research in the atmospheric and oceanic science. Research specializations include: atmospheric dynamics; atmospheric chemistry; physical oceanography; air pollution; atmospheric radiative transfer; remote sensing of the atmosphere, ocean, and land; climate variability and change; data assimilation; numerical weather prediction; severe storms; surface-atmosphere, ocean-atmosphere and biosphere-atmosphere interactions; and earth system modeling. The curriculum includes a set of Core courses to provide a fundamental background in atmospheric and oceanic dynamics, physical meteorology and atmospheric chemistry, earth system science and climate, as well as advanced specialized courses. Supervised research using state-of-the-art facilities then prepares the students for future contributions in their chosen field.

The Department's close association with federal agencies in the Washington area provides graduate students with good training and opportunities in atmospheric and oceanic science. As a research

assistant, the student has the opportunity to develop a close working relationship with one or more of the scientific agencies.

Financial Assistance

Graduate research and teaching assistantships are available to qualified graduate students. Research assistants carry out research in the areas of physical and dynamic meteorology, physical oceanography, data assimilation, remote sensing, atmospheric chemistry, air pollution, climate dynamics, atmospheric radiation, severe storms, cryosphere, global climate change, and ocean-atmosphere and atmosphere-biosphere interactions. Fellowships are also awarded by the Graduate School to the most qualified applicants. In addition, hourly employment is available in the Department and off campus. Stipends are maintained at a competitive level.

Admissions

GENERAL REQUIREMENTS

- Statement of Research Interests
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume (optional)
- Description of Research/Work Experience
- Graduate Record Examination (GRE)

In addition to the requirements of the Graduate School, the department requires a Bachelor's or higher degree in meteorology, oceanography, physics, chemistry, mathematics, biology, engineering or other program with suitable emphasis in the sciences. We welcome applications from those with no background in atmospheric sciences. The Core courses offered in the first year of study present students with the necessary background in atmospheric and oceanic science for the more advanced courses. The minimum undergraduate background includes 3 semesters of calculus, differential equations, linear algebra, 3 semesters of calculus-based physics, and 2 semesters of chemistry, one semester of computer programming. Scores from the GRE General Examination are also required.

For information on the Master of Professional Studies in Atmospheric and Oceanic Science (http://apps.gradschool.umd.edu/Catalog/public-programs-detail.php?MPAO), please see its listing in the Graduate Catalog (http://apps.gradschool.umd.edu/Catalog/public-programs-detail.php?MPAO).

Note: Applicants must get approval from the AOSC Department to apply to the Spring semester.

The fall admission deadline for priority/funding is January 17 for both domestic and international students. The fall admission deadline for funding is February 1 for both domestic and international students. Final fall admission deadlines are May 17 for domestic students and March 15 for international students.

APPLICATION DEADLINES

Program Website: atmos.umd.edu/education/ms_phd (http://www.atmos.umd.edu/education/ms_phd.php)
Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Atmospheric and Oceanic Science, Doctor of Philosophy (Ph.D.) (p. 68)
- Atmospheric and Oceanic Science, Master of Science (M.S.) (p. 68)

Facilities and Special Resources

The Department participates in the Earth System Science Interdisciplinary Center (ESSIC) and the Cooperative Institute for Climate Studies (CICS). These institutions conduct research, and offer opportunities for graduate research beyond those offered by the department faculty. In addition, the Department maintains close research and teaching associations with Departments of Mathematics and Chemistry, as well as the Institute for Physical Science and Technology (IPST), Center for Scientific Computation and Mathematical Modeling (CSCAMM), and nearby government agencies including NOAA, NASA, ONR, USDA, NIST, and Marylands Department of the Environment and Department of Natural Resources. Special facilities that support the Department's teaching and research activities include sophisticated computing facilities allowing access to a variety of atmospheric and oceanographic datasets, a laboratory for atmospheric chemistry, a mobile air pollution laboratory, access to research aircraft, a variety of supercomputers, radar, windprofiler at Fort Meade, historical data. Most importantly the students are encouraged to exploit the resources of the nearby government laboratories: NASA Goddard Space Flight Center, NOAA National Centers for Environmental Prediction.

The Department maintains a specialized library with several hundred text and reference books in meteorology and allied sciences, specialized series of research reports, and many journals. The campus provides a main library as well as specialized libraries in chemistry, astronomy, and engineering. Several excellent government libraries in the area, including the Library of Congress, the NASA Goddard Space Flight Center, the National Archives, and the NOAA libraries provide unsurpassed resources.

The University of Maryland is located in an area of unparalleled professional resources. Because of its proximity to the nation's capital, The University of Maryland is able to interact closely with the many governmental groups interested in various aspects of the atmospheric, oceanic and earth system sciences. Scientists from government laboratories participate in many aspects of graduate education, such as giving lectures in classes, presenting research results in seminars, and serving on dissertation committees. Likewise, the Department faculty often attend and participate in the seminars, colloquia and scientific workshops being held at these neighboring institutions.

The Washington, D.C. chapter of the American Meteorological Society consists of about 400 members who hold professional meetings each month. The Washington, D.C. area is frequently the site of national and international conferences, most notably of the American Association for the Advancement of Science and the American geophysical Union. In addition to the various government and academic institutions, the Washington metropolitan area contains numerous well-known private contractors and consulting companies involved in meteorology and oceanography, which provide employment opportunities for students both before and after graduation.

As a member of the University Corporation for Atmospheric Research, the department enjoys the common facilities offered by the National Center for Atmospheric Research such as research aircraft and supercomputers.

Atmospheric and Oceanic Science, Master of Science (M.S.)

Non-thesis only (scholarly paper required): 30 credits

Course	Title	Credits
Core Requirements		
AOSC610	Dynamics of the Atmosphere and Ocean I	3
AOSC611	Dynamics of the Atmosphere and Oceans II	3
AOSC620	Physics and Chemistry of the Atmosphere I	3
AOSC621	Physics and Chemistry of the Atmosphere II	3
AOSC680	Introduction to Earth System Science	3
AOSC617	Atmospheric and Oceanic Climate	3
Electives		12
Total Credits		**30**

The Atmospheric and Oceanic Science Department offers a non-thesis program leading to the Master of Science Degree. This program provides fundamental training to prepare students for research and operational work in the atmospheric and oceanic sciences. Each new student will be assigned to a faculty advisor whose interests parallel those of the student. The faculty advisor will assist in the development of the student's course program and will follow the student's progress thereafter. The student may select an alternate advisor at any time, although financial support is dependent upon the availability of funds.

A minimum of 30 semester hours of coursework is required for the degree program. This must include 24 hours of 600-level AOSC courses, including the listed core courses. The remaining 6 semester-hours can come from additional 600-level courses, including up to 3 from AOSC798.

Students must write a Scholarly Paper in the final semester that demonstrates their ability to conduct original and/or literature-based research. The student's advisor and the Graduate Director will evaluate and approve the Scholarly Paper. Once approved, the student will orally present the scholarly paper findings at the AOSC Student Seminar. Students are additionally required to attend the weekly Department seminars.

The paper will become part of the permanent archive of the Department. A Ph.D. dissertation prospectus will satisfy this requirement but you must use the appropriate scholarly paper format when submitting to the Graduate Director.

All requirements for the M.S. degree must be completed within a five-year period. This time limit applies to any transfer work from other institutions [6 credits maximum] to be included in the student's program. A full-time student can easily complete the M.S. degree in two years.

Atmospheric and Oceanic Science, Doctor of Philosophy (Ph.D.)

This program is designed to furnish the student with the background necessary to carry out independent and original scientific research. To earn the Ph.D., the student must complete a course work requirement, pass the Candidacy Examinations, and prepare and defend a dissertation. Doctoral students are required to complete the M.S. course requirements. In addition, doctoral students are required to attend the weekly department seminar series.

A student seeking a Ph.D. degree will be assigned to a faculty advisor whose interests parallel those of the student. The academic advisor will establish and chair an advising committee which will oversee the student's degree program.

Students may wish to take a number of the core courses in order to prepare for the Qualifying Examination. In addition, there is a Minor course requirement of six semester hours of ancillary courses taken beyond the bachelor's degree in a related scientific area at the 600-level or above. These credits must have a unified or coherent theme. Students may petition the Department for a waiver of a portion of these requirements based on credits earned at another institution at the graduate level.

Advancement to Candidacy: In addition to the course requirements, students must pass the Candidacy Examinations, which are divided into two parts - The Qualifying Examination and the Specialty Examination. During the Specialty Examination, the student must present and defend a dissertation prospectus to the examination committee. Following successful defense, the student advances to candidacy.

Full-time students are expected to complete the Qualifying Examination by the end of the second year of graduate study and be admitted to candidacy by the end of the third year. Students must be admitted to candidacy within three years after admission to the doctoral program and at least six months before the date on which the degree will be conferred.

Post-Candidacy: Ability to perform independent research must be demonstrated by a written dissertation. The dissertation should be

an original contribution to knowledge and demonstrate the ability to present the subject matter in a scholarly style. Upon completion of the dissertation the candidate is required to present the research results at an Atmospheric and Oceanic Science Department seminar and to defend the material to the satisfaction of a Final Examining Committee appointed by the Dean for Graduate Studies.

The candidate must present an open seminar on his/her past research followed by a closed oral exam by the Examination Committee of at least three faculty plus the Graduate Director, and the Admissions Committee Chair. Two or more negative votes constitutes failure. The final decision will be subject to review by the committee of the whole.

The student must complete the entire program for the degree, including the dissertation and final examination, during a four-year period after admission to candidacy.

Course	Title	Credits

Total Credits		**42**

Graduate Track for Accomplished Scientists

Graduate students with exceptional scientific achievements may, through written petition to the Graduate Director, replace the written portion of the Comprehensive Exam with a seminar followed by an oral examination. To qualify for this track, the candidate needs to meet the following requirements:

1. have an earned MS degree in atmospheric or oceanic science, or a related field, ordinarily from an accredited American university, and receive approval from the five-member Departmental Examination Committee.
2. have published at least five, peer-reviewed, Science Citation Index (SCI) journal articles in atmospheric, oceanic, or a closely related science. He or she must be the lead or corresponding author of at least three of those papers.

Master of Professional Studies (MPAO) The Master of Professional Studies in Atmospheric and Oceanic Science is designed for meteorologists, oceanographers and environmental scientists who need cutting-edge skills and knowledge in atmospheric and oceanic science, in the computational methods used in our field, and in air quality science. The Director of Professional Studies will advise students in planning his or her course of study, and will provide career advice and The degree is earned by successful completion of ten 3-credit courses. Students must complete two out of the following three Certificate programs, each of which consists of four courses, plus two courses from the remaining Certificate Program. The MPAO program is designed with the needs of working professionals in mind, and can be completed on a part-time basis over no more than 5 years, or on a full-time basis in 1 year and one semester.

Beekeeping (Z088)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Graduate Certificate in Beekeeping (GC-Beekeeping) is a 12-credit graduate program that can be completed in twelve months of continuous study. The GC-Beekeeping focuses on the anatomy, physiology, and ecology of the honeybee. Students are taught how to construct and maintain a hive and best practices for maintaining a healthy colony.

Behavioral and Community Health (BCHL)

Graduate Degree Program
College: Public Health

Abstract

The Department offers graduate study leading to the Master Public Health (MPH) in Behavioral and Community Health and the Doctor of Philosophy degree in Behavioral and Community Health. The graduate programs are designed to prepare behavioral and community professionals with specific skills and the ability to implement theoretical knowledge in a practical setting.

The goal of the doctoral program is to develop health professionals competent in understanding the health needs of populations who are qualified to conduct research in order to implement programs and policies aimed at improving the public's health. This program is very selective and admission is competitive. The program provides students with the opportunity to develop research skills essential in making significant contributions to the scientific and professional literature in behavioral and community health.

Degree programs may be completed either full-time or part-time, although full-time is preferred. Faculty support coursework, research and practice experiences in many areas, including: health communication; health behavior; adolescent health; women's health; health literacy and health

disparities. Faculty hold doctoral degrees in public health, psychology, health education, sociology and epidemiology. The Department offers excellent research and laboratory facilities including the Center for Young Adult Health and Development and the Prevention Research Center.

Financial Assistance

The Department offers a limited number of fellowships, and graduate teaching and research assistantships. Please contact the Director of Graduate Studies for further information.

Relationships: Epidemiology (EPDM) (p. 196), Health Administration (HLSA) (p. 227), Maternal and Child Health (MCHS) (p. 288)

Admissions

The Ph.D. in Behavioral and Community Health program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and research areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS Application (https://academiccatalog.umd.edu/graduate/programs/behavioral-community-health-bchl/www.sophas.org) & UMD Supplemental Application (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)
- A master's degree in public health or a related field is preferred, but not required
- Three letters of recommendation
- Resume or curriculum vitae
- A writing sample is required. Please submit ONE of the following: published manuscript, undergraduate or graduate thesis/capstone project, research paper/report for a class or employer/client. If you submit a published manuscript and you are not the first author describe the contributions you made to the publication.
- Fit between applicant's goals, expectations and research interests and program competencies and faculty expertise
- Official GRE Test Score submission is **not required** for Fall 2022 admissions.
- Applicants being considered for the program will be invited for an interview.

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/).
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)

Admissions FAQ: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-faqs (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-faqs/)

Requirements

- Behavioral and Community Health, Doctor of Philosophy (Ph.D.) (p. 73)

Facilities and Special Resources

The Department has research specializations in a variety of areas including:

- Minority health/social inequalities in health
- Alcohol and drug abuse
- Safety and health
- Sexual health
- Adolescent health and risk behavior
- Violence prevention/community violence
- Public health communication
- Health literacy
- Treatment of nicotine dependence

Specialized laboratories operating within the Department include:

- The Center for Young Adult Health and Development
- The Prevention Research Center
- The Center for Health Behavior Research

The proximity of the nation's capital, the National Institutes of Health, the National Library of Medicine, and Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and numerous public health focused private and not-for-profit organizations/agencies render the University of Maryland unusually well suited for graduate work in behavioral and community health.

Behavioral and Community Health, Doctor of Philosophy (Ph.D.)

The PhD in Behavioral and Community Health is an 82 credit program depending on the number of course requirements that can or cannot be waived. This is a research-intensive degree that prepares students for individual research that results in a dissertation.

Advance to Candidacy: In addition to the coursework below, students must also pass a Qualifying Exam.

Post-candidacy: Students must complete at least 12 credits of HLTH899 Doctoral Dissertation Research and successfully defend a dissertation.

Course	Title	Credits
Core Requirements		
SPHL600	Foundations of Public Health	3
SPHL602	Foundations of Epidemiology and Biostatistics	4
SPHL603	Public Health Data Laboratory	1
SPHL611	Public Health Ethics	1
or SPHL612	Research Ethics	
MIEH600	Foundations of Environmental Health	3
HLSA601	Introduction to Health Systems	3

Behavioral and Community Health (MBCH)

Graduate Degree Program
College: Public Health

Abstract

The Department offers graduate study leading to the Master Public Health (MPH) in Behavioral and Community Health and the Doctor of Philosophy degree in Behavioral and Community Health. The graduate programs are designed to prepare behavioral health professionals with specific skills and the ability to implement theoretical knowledge in a practical setting.

The mission of the MPH program is to promote the development of behavioral and community health professionals who understand the science, theory, and practice of public health and can apply this knowledge toward the enhancement of health status of communities. The MPH program is designed as a professional degree to prepare behavioral and community health professionals working in public health service as practitioners, administrators, supervisors, educators, consultants, and researchers. Students will participate in both academic and applied training in program planning and implementation, program evaluation, and research.

Degree programs may be completed either full-time or part-time. All classes are held from in the late afternoon and evening typically starting at 4:00pm or later Monday through Friday. Faculty support coursework, research and practice experiences in many areas, including: health communication; health behavior; adolescent health; women's health; health literacy and health disparities. Faculty hold doctoral degrees in public health, psychology, health education, sociology, and epidemiology. The Department offers excellent research and laboratory facilities including the Center for Young Adult Health and Development, Laboratory for Health Behavior Assessment and Intervention and The Center for Health Behavior Research.

Financial Assistance

The Department offers a limited number of graduate teaching and research assistantships. Contact the Director of Graduate Studies for further information.

Courses: HLTH (https://academiccatalog.umd.edu/graduate/courses/hlth/) SPHL (https://academiccatalog.umd.edu/graduate/courses/sphl/)

Relationships: Epidemiology (EPID) (p. 197), Health Administration (HLSA) (p. 227), Maternal and Child Health (MCHS) (p. 288)

Admissions

The MPH in Behavioral and Community Health program has a two-part application process. Applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest, and faculty you are interested in working with

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application and the UMD Supplemental application
- Three letters of recommendation
- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Score submission is not required
- A writing sample is optional
  **The review committee will evaluate GRE scores if they are submitted. The lack of scores will not impact applications. If submitted, the program considers competitive scores to be 50th percentile or higher in each of the three parts.*

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language along with a literal English translation (https://globalmaryland.umd.edu/offices/international-students-scholar-services/translation-services/). Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/).
- Evidence of English Language proficiency is required the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/).

Visit the School of Public Health Website for detailed instructions on how to submit your application: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	April 7, 2023
	The priority deadline for both the SOPHAS and the UMD applications is December 16, 2022.
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	March 3, 2023
	The priority deadline for both the SOPHAS and the UMD applications is December 16, 2022.

Application Process: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)
Admissions FAQ: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-faqs (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-faqs/)

Requirements

- Behavioral and Community Health, Master of Public Health (M.P.H.) (p. 75)

Facilities and Special Resources

The Department has research specializations in a variety of areas including:

- Minority health/social inequalities in health
- Alcohol and drug abuse
- Safety and health
- Sexual health
- Adolescent health and risk behavior
- Violence prevention/community violence
- Public health communication
- Treatment of nicotine dependence

Specialized laboratories operating within the Department include:

- The Prevention Research Center
- The Center for Health Behavior Research
- The Center for Young Adult Health and Development

The proximity of the nation's capital, the National Institutes of Health, the National Library of Medicine, the Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and numerous public health focused private and not-for profit organizations/agencies render the University of Maryland unusually well suited for graduate work in behavioral and community health.

Behavioral and Community Health, Master of Public Health (M.P.H.)

Non-thesis option only: 45 credits

The MPH in Behavioral and Community Health is a 45-credit program which includes coursework, an internship, and a MPH project. It takes 2 years to complete as a full-time student and 3.5-5.0 years to complete as a part-time student. The program cannot be completed in less than 2 years due to limited course availability. At this time, the majority of courses are held in-person on the College Park campus, a few are online.

Biochemistry (BCHM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Graduate Program in Biochemistry offers study leading to Doctor of Philosophy and Master of Science degrees. The program emphasizes intensive mentoring, formal and informal training in presentation skills, scientific writing, bioinformatics, teaching chemistry and biochemistry, and professional ethics. Research specialization is available in protein structure, dynamics, and function; protein-protein and protein-nucleic acid interaction; protein and nucleic acid biochemistry; RNA and DNA structure, dynamics, interactions, and function; macromolecular folding and supramolecular assembly; biomolecular nuclear magnetic resonance spectroscopy, X-ray crystallography; proteomics, metabolomics mass spectrometry; membrane proteins, protein-lipid interaction, membrane structure and function; carbohydrate chemistry, glycobiology; immunology; bio-organic chemistry; post-translational protein modification and signaling; metabolic regulation; enzyme mechanisms; drug metabolism. Several of the biochemistry program faculty are members of the Institute for Bioscience and Biotechnology Research (IBBR) or other Related Programs and Campus Units listed below. Further information about the Biochemistry Graduate Program can be found at https://www.chem.umd.edu/graduateprogram/phdinbiochemistry (http://www.chem.umd.edu/graduateprogram/phdinbiochemistry/) and http://www.chem.umd.edu/.

Financial Assistance

Ph.D. candidates are normally supported on graduate teaching assistantships during their first year as graduate students. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester, salary, and health care benefits. Ph.D. candidates are normally supported in subsequent years on graduate research assistantships. Financial support is not generally available to M.S. candidates.

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- GRE Subject (optional)
- CV/Resume
- Description of Research/Work Experience

Admission to graduate study in Biochemistry at the University of Maryland requires a minimum of a Bachelor of Science (B.S.), Bachelor of Arts (B.A.) or equivalent degree. Applications are normally accepted only from Ph.D.-seeking students. The area in which the undergraduate degree has been earned need not be chemistry or biochemistry, but previous coursework must normally include a minimum of 30 semester or 40 quarter hours of chemistry, including at least 1 year of general chemistry, 1 year of organic chemistry and 1 semester of biochemistry, as well as laboratory courses in organic chemistry and biochemistry. A course in physical chemistry and a laboratory course in analytical chemistry are also desirable. Typical overall grade point averages for successful applicants are 3.0 or greater (on a scale where the average grade is 2.0), and averages in science and math courses are generally higher than this. Three letters of reference indicating a potential for independent, creative scientific research are also required.

The competition for available space may limit admissions to persons with credentials above these minimum requirements.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 4, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 4, 2023

Program Website: chem.umd.edu/graduateprogram (http://www.chem.umd.edu/graduateprogram/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Biochemistry, Doctor of Philosophy (Ph.D.) (p. 77)
- Biochemistry, Master of Science (M.S.) (p. 76)

Facilities and Special Resources

Biochemistry faculty and graduate students work in well-equipped, state-of-the-art research laboratories. Instrumentation and facilities that are available for research in biochemistry include analytical and preparative ultracentrifuges, high- and ultra-high field nuclear magnetic resonance spectrometers (600, 800, 900, 950 MHz), X-ray diffractometers and SAXS, fluorimeters, circular dichroism spectrometers, fluorescence- and phosphor-imagers, calorimeter, mass spectrometers, proteomics and genomics core facilities, Sanger and next-generation DNA sequencing, microarray, quantitative PCR, electron microscopes, atomic force microscopes, confocal and TIRF fluorescence microscopes, flow cytometer, animal colony, fermentation pilot plant, high-performance computing, and a chemistry-biochemistry library.

Biochemistry, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Course	Title	Credits
Core Requirements		
BCHM671	Protein Chemistry and Enzymic Catalysis	3
BCHM675	Biophysical Chemistry	3
BCHM661	Nucleic Acids I	2
BCHM662	Nucleic Acids II	2
Thesis or Non-Thesis Requirements		
Select one of the following options:		20
Thesis (p. 76)		
Non-thesis (p. 77)		
Total Credits		**30**

The M.S. degree program offers both the thesis and non-thesis options. The thesis option requires an oral defense of the thesis. Specific regulations are available from the Department of Chemistry and Biochemistry or from: www.chem.umd.edu/graduateprogram/ (http://www.chem.umd.edu/graduateprogram/)

Thesis Option

Thesis option requires 24 credits of coursework (including core courses) with at least 12 credits at the 600 level or higher. In addition, students

must complete six credits of BCHM799. Students are also required to present one seminar

Non-Thesis Option

Non-thesis option requires 30 credits of coursework (including core courses) with at least 18 credits at the 600 level or higher. This coursework should include six credits of BCHM699. Students are also required to submit a scholarly paper

Biochemistry, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 21 credits of coursework, with 19 credits completed by the end of the fourth semester.

Advance to Candidacy: In addition to the coursework below, students must pass an oral defense of a written research proposal, presentation of a seminar, complete an independent research proposal.

Post-Candidacy: Students must complete 12 credits of BCHM899 Doctoral Dissertation Research and successfully defend a publication-quality dissertation that advances the field.

Course	Title	Credits
Core Requirements		
BCHM671	Protein Chemistry and Enzymic Catalysis	3
BCHM675	Biophysical Chemistry	3
BCHM661	Nucleic Acids I	2
BCHM662	Nucleic Acids II	2
BCHM699	Special Problems in Biochemistry	2
BCHM677	Computational Tools in Biochemistry	1
BCHM889	Seminar	2
BCHM698	Literature Seminar in Biochemistry	2
Electives with advisor approval (minimum of 4 credits)		4
Dissertation Research Requirements		
BCHM899	Doctoral Dissertation Research	12
Total Credits		**33**

Specific regulations are available from the Department of Chemistry and Biochemistry or from: www.chem.umd.edu/graduateprogram/phdinbiochemistry/ (http://www.chem.umd.edu/graduateprogram/phdinbiochemistry/)

Bioengineering, Doctor of Medicine and Master of Science (dual degree) (M.D. and M.S.)

The Doctor of Medicine / Master of Science (M.D. / M.S.) Program is a dual degree program offered with the University of Maryland School of Medicine. Students applying to the M.D./M.S. Program must first apply to and be admitted to the M.D. program at the School of Medicine, and should indicate their interest in the dual-degree program when applying to the Medical School. The program is organized in the following fashion: 2 years M.D. studies + 1 year M.S. studies + 2 years M.D. studies. The objective of this program is to broaden the educational and research scope of medical doctors in bioengineering. The program should be attractive to those interested in areas including clinical research, biomaterials, biomedical imaging, medical device innovation, medical device development, and drug development. Graduates of the combined program will receive a Doctor of Medicine degree from the University of Maryland School of Medicine as well as a Master of Science degree from the A. James Clark School of Engineering at the University of Maryland, College Park.

Bioengineering, Doctor of Medicine and Doctor of Philosophy (dual degree) (M.D. and Ph.D.)

The Doctor of Medicine / Doctor of Philosophy (M.D. / Ph.D.) Program is a dual degree program offered with the University of Maryland School of Medicine. Students applying to the M.D./ Ph.D. Program must first apply to and be admitted to the M.D. program at the School of Medicine, and should indicate their interest in the dual-degree program when applying to the Medical School. The program is organized in the following fashion: 2 years M.D. studies + 4 years Ph.D. studies + 2 years M.D. studies. The objective of this program is to develop clinicians who are deeply involved in biomedical research. Graduates of the program are typically interested in pursuing both clinical work and bioengineering research in their future careers. Graduates of the combined program will receive a Doctor of Medicine degree from the University of Maryland School of Medicine as well as a Doctor of Philosophy degree from the A. James Clark School of Engineering at the University of Maryland, College Park.

Bioengineering (BIOE)

Graduate Degree Program
College: Engineering

Abstract

Welcome to the Graduate Program in the Fischell Department of Bioengineering at the A. James Clark School of Engineering, University of Maryland. Our program represents the strong intellectual interdisciplinary infrastructure and collaborative culture that links engineering, biology, and medicine at our university.

Our program provides a basic understanding of bioengineering at the molecular and cellular level, focusing on:

- Medical Devices
- Biocomputational Systems
- Optical Technologies
- Imaging
- Drug Delivery
- Therapeutics Design
- Biomolecular Engineering
- Cell and Tissue Engineering
- Biomaterials
- BioChips

With strong, funded research programs and innovative partnerships with the National Institutes of Health, Food and Drug Administration, and University of Maryland School of Medicine, the Fischell Department of Bioengineering is an exciting place for graduate study.

Financial Assistance

Graduate assistantships and fellowships are available on a competitive basis to Ph.D. students. No separate financial support application is

required. Students will automatically be considered for eligible forms of support.

Contact

Please see the program's website for program description, admission requirements, and financial aid information.

- CV/Resume
- Personal History Statement (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdpersonalhistorystatementbioe.pdf) (optional): Personal History Statement to be uploaded via the Supplementary Application document upload area within the "Program Upload Requirements" section of the application.

Admission to the Graduate Program in Bioengineering requires a Bachelor's degree in a science or engineering discipline from an accredited undergraduate institution. Applicants with degrees in non-engineering disciplines, such as biology, chemistry, physics, or mathematics, are expected to have the following prerequisite courses: Calculus I, II, III; Differential Equations; and Thermodynamics. These courses would ideally have been completed by the time of application, but they may also be in progress.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 13, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 13, 2023

Other Deadlines: bioe.umd.edu (http://www.bioe.umd.edu)
Program Website: bioe.umd.edu/graduate (http://www.bioe.umd.edu/graduate/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Bioengineering, Doctor of Medicine and Doctor of Philosophy (dual degree) (M.D. and Ph.D.) (p. 77)
- Bioengineering, Doctor of Medicine and Master of Science (dual degree) (M.D. and M.S.) (p. 77)
- Bioengineering, Doctor of Philosophy (Ph.D.) (p. 79)
- Bioengineering, Master of Science (M.S.) (p. 78)

Facilities and Special Resources

The Department is located in A. James Clark Hall, a 184,000 square foot building serving as a central hub for new partnerships and collaboration for organizations throughout the Maryland and Washington, D.C. region.

Approximately 7,332 sq. feet of classroom space and 11,402 sq. feet of class lab space is used to support instructional capabilities. To help create an organic flow of ideas between many disciplines, the building features flex classrooms and two stories of flexible laboratories to the campus – including wet and dry spaces as well as a vivarium.

Optical laser and imaging laboratories feature state-of-the-art technology in digital fabrication, rapid prototyping, 3D printing, optics, and bioinformatics. In the imaging suite, researchers have the ability to examine molecular resolution of pathogens – whether in the GI tract or bloodstream – that show how a nano-carrier delivers a drug to a specific tumor site. Additionally, laser devices and magnetic resonance imagers will allow a close examination of cross-sections of the body and brain.

Bioengineering, Master of Science (M.S.)

Thesis only: 30 credits

Course	Title	Credits
Core Requirements		
BIOE610	Mathematical Methods in Bioengineering	3
BIOE612	Physiological Evaluation of Bioengineering Designs	3
Restricted Electives (chosen with advisor)		6
Unrestricted Electives (chosen with advisor)		12
BIOE799	Master's Thesis Research	6
Total Credits		**30**

The terminal M.S. degree is intended for students who are interested in expanding their knowledge of bioengineering through research, beyond what is available at the B.S. level. Therefore, the M.S. program involves both coursework and a well-defined research project culminating

in a M.S. thesis. The M.S. program may be suitable for top UMD undergraduates engaged in research via an individualized, combined B.S. / M.S. program. A combined M.D. / M.S. program is also available. It should be noted, however, that due to limited resources, the department does not actively recruit students to its M.S. program. Students interested in the M.S. program should contact the Bioengineering Graduate Office prior to submitting an application.

Bioengineering, Doctor of Philosophy (Ph.D.)

The educational approach of the Ph.D. program is to combine the principles and applications embedded in engineering with the sciences of biology, medicine, and health. The motivation for many of the research projects stems from the belief that developments at the interface of biology and engineering will advance the efficacy of health care by developing new paradigms for the diagnosis of disease, and the development and delivery of new therapeutics. Our bioengineering students will gain the knowledge base and skill sets to quantitatively measure, and rationally manipulate cells, tissues, and integrated systems. Bioengineers must bring problem solving skills and design methodologies to the study of biology in an effort to translate the biological sciences into medical practice in an analogous manner to the transformation of chemistry into industrial practice that occurred in the 20th century

Advance to Candidacy: In addition to the coursework below, students must successfully complete a Research Aptitude Exam and a Ph.D. Proposal Exam.

Post-Candidacy: Students must complete 18 credits of BIOE899 and successfully defend a dissertation.

Course	Title	Credits
Required courses:		
BIOE610	Mathematical Methods in Bioengineering (Mathematical Methods in Bioengineering)	3
BIOE612	Physiological Evaluation of Bioengineering Designs	3
BIOE608	Bioengineering Seminar Series	3

BIOE606	BIOE Graduate Studies II	1
Restricted Electives (chosen with advisor)		6
Unrestricted Electives (chosen with advisor)		12
Dissertation Research Requirements		
BIOE899	Doctoral Dissertation Research	18
Total Credits		**47**

.

Bioengineering (online) (MEBI)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Students in our Bioengineering degree programs will learn to integrate priciples of engineering and biological systems to develop new technologies and devices that improve human health, fight disease, and aid persons with disabilities. Our biomedical engineering masters program is uniquley positioned to offer educational strengths in engineering, biology, and medicine.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

- CV/Resume (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents,

consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Requirements

- Bioengineering, Master of Engineering (M.Eng.) (p. 80)

Facilities and Special Resources

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Bioengineering, Master of Engineering (M.Eng.)

Coursework/Non-thesis only: 30 credits required
This graduate program is an approved non-thesis program. The non-thesis option has been satisfied when all coursework has been completed.

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://advancedengineering.umd.edu/degree-planning-sheets (https://advancedengineering.umd.edu/degree-planning-sheets/)

Course	Title	Credits
Core Requirements (Take Four Courses):		12
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658M - Applied Mathematics in Bioengineering)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658R - Regulatory Affairs in Medical Product Development)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658E - Biomedical Device Developments)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658P - Physiology for Bioengineers)	
Pre-Approved Electives (Choose 3-6 courses):		18
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658D - Application of Biomaterials)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658G - Genome Editing and Synthetic Biology)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658A - Additive Manufacturing for Bioengineering Applications)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658Y - Applications of Tissue Engineering)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658W - Biosensor Techniques, Instrumentation, and Applications)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658L - Applications in Biopharmaceutical Engineering)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658F - Applications of Bioinformatics)	
BIOE658	Special Topics in Bioengineering (M.Eng.) (BIOE658N)	
ENPM808	Advanced Topics in Engineering	
Other Electives (maximum of 3 courses). See plan.		
Total Credits		**30**

Contingent on availability of courses. Please see advisor for further details.

Bioengineering (online) (Z083)

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Students in our Bioengineering degree programs will learn to integrate priciples of engineering and biological systems to develop new technologies and devices that improve human health, fight disease, and aid persons with disabilities. Our biomedical engineering masters

program is uniquley positioned to offer educational strengths in engineering, biology, and medicine.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Biological Sciences (BISI)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Biological Sciences (BISI) Graduate Program offers a wide range of training opportunities for students interested in pursuing doctoral level research in exciting, diverse areas across the biological sciences. BISI is an interdepartmental umbrella program that consists of four Areas of Concentration:

- Behavior, Ecology, Evolution, and Systematics (BEES)
- Computational Biology, Bioinformatics, and Genomics (CBBG)
- Molecular and Cell Biology (MOCB)
- Physiological Systems (PSYS)

Graduate students in BISI are associated with one of these areas, but their interests often span multiple concentrations, which allows the development of innovative research projects across traditional disciplinary boundaries. Descriptions of each Concentration Area, faculty research interests, and more detailed programmatic information are available at bisi.umd.edu (http://www.bisi.umd.edu).

Although the BISI Program is administered within the College of Computer, Mathematical, and Natural Sciences, it involves distinguished graduate faculty from multiple departments and Colleges at the University of Maryland as well as outstanding adjunct faculty from nearby research institutions. Students may have opportunities to work with participating scientists from - as examples - the National Institutes of Health; Smithsonian Institution, including the National Museum of Natural History, the National Zoo, and Molecular Systematics Laboratory; the Food and Drug Administration; and the U.S. Department of Agriculture. BISI students have an incomparable wealth of potential research options and collaborations that extend from Maryland's College Park campus throughout the Washington D.C. metropolitan area.

Financial Assistance

Students are supported through fellowships, research assistantships, and/or teaching assistantships. Each type of funding provides a stipend, tuition remission, and access to health and dental insurance and a prescription drug plan. Historically, all students have been supported throughout their graduate careers.

Fellowships are offered on a competitive basis. There are no separate financial disclosure forms to fill out as part of the graduate application process.

Teaching assistantships require students to assist a faculty member in teaching a course or lab section(s). Benefits of teaching assistantships include building communication and organizational skills as well as resume enhancement for academic, government, or private sector jobs. It is also delightfully rewarding to explain concepts to students and then witness their excitement as ideas "click" and their questions are resolved.

Contact

Students are strongly encouraged to communicate directly with faculty in the area of their interest. Additional general information may be obtained by emailing bisi@umd.edu or by calling the Biological Sciences Graduate Office at 301-405-6905.

Please visit the Biological Sciences Graduate Program website, featuring a search engine to match research interests with faculty and links to all Concentration Areas: bisi.umd.edu (http://www.bisi.umd.edu)

The Graduate School provides detailed information on International Student Admission here: http://gradschool.umd.edu/admissions/international-admissions (http://gradschool.umd.edu/admissions/international-admissions/) and additional information for international graduate students is available on the International Students and Scholars website at http://globalmaryland.umd.edu/.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/education/z069/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationbisi.pdf)

- Writing Samples (optional)
- Publications/Presentations (optional)

All students applying to the Biological Sciences Graduate Program must have a Bachelor's degree from a recognized undergraduate institution. Applicants are expected to have a strong academic record, including coursework in advanced areas of biology as well as at least one year of calculus, general chemistry, organic chemistry, and physics. Able students with deficiencies in a particular area may be admitted and the deficiency corrected after enrollment. **Students are asked to identify a concentration area and research interests on the general application.**

To explore matches of your interests with those of BISI faculty, see the BISI website, bisi.umd.edu (http://www.bisi.umd.edu/).

For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Biological Sciences, Doctor of Philosophy (Ph.D.) (p. 87)
- Biological Sciences, Master of Science (M.S.) (p. 86)

Facilities and Special Resources

The campus and local area provide students access to a vast array of instrumentation, equipment, facilities, and technologies to advance biological research. As examples, the college has state of the art facilities for research in all aspects of cell and molecular biology including cell and organism culturing, protein and nucleic acid analyses, peptide sequencing, oligonucleotide synthesis and sequencing, fluorescence, confocal microscopy, scanning and transmission electron microscopy, computer graphics for molecular modeling, NMR, mass-spectroscopy, and X-ray diffraction. Students have access to a laboratory for evolutionary molecular sequence analysis; gas source stable isotope mass spectrophotometer; bioacoustic lab; flume lab; GIS (graphic information systems) lab; and high-speed network access to a wide range of desktop and super-computing facilities. Greenhouses and animal care facilities are available.

We also have several state-of the-art shared instrumentation laboratories. Two center around biological imaging for both electron and light microscopy, including a field-emission scanner and an image reconstruction/deconvolution microscope. Another shared laboratory augments existing sequencing facilities on campus, enabling large-scale processing and sequencing of nucleic acids, with multiple robotic sequenators and real time PCR. Other core facilities provide instrumentation for fluorescence-activated cell sorting (FACS), NMR, mass spectrometry, and microarray technology. Equipment and analytical instruments are available in both faculty and core laboratories for the maintenance of animal and plant tissue cultures, for the production of monoclonal antibodies, for the synthesis and micro-analysis of proteins, for large-scale fermentation and cultivation of microorganisms, and for computer assisted molecular modeling. Support staffing in shared instrumentation facilities is provided by the college, and maintenance costs have been subsidized by the college, thereby providing even occasional users with appropriate training and access, and simultaneously keeping instrument use costs low. This strategy provides exceptional opportunities for research and training, and enables graduate students to perform experiments with instrumentation that is at the leading edge of biological technology.

Students have access to the Smithsonian National Museum and USDA collections of living and preserved organisms.

LIBRARY FACILITIES

The library facilities on campus, as well as their online accessibility, are outstanding. In addition, there are libraries in the local area with specialized collections. The most important are the National Agricultural Library, the Library of Congress, the National Library of Medicine, and the Smithsonian Institution Library. Thus, the University of Maryland's region contains perhaps the most comprehensive collections of books and journals in the world.

Biological Sciences, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Students cannot be formally admitted into the M.S. program, but can earn the M.S. along the way to the Ph.D. Of the 30 credits required, 18 credits must be at the 600-level or above including BISI701 and BISI712. Of the 30 credits required, 16 credits must be in Biological Sciences with at least three courses in a single area of specialization.

Course	Title	Credits
Core Requirements		
BISI701	Teaching & Professional Development in Biology	1
BISI712	Responsible Conduct of Research for Biologists	1
Select 22 credits		22
Thesis or Non-Thesis Requirements		
Select one of the following:		6
Thesis:		
BISI799	Master's Thesis Research	
Non-Thesis:		
Complete a scholarly paper		
Additional coursework		
Total Credits		**30**

Biological Sciences, Doctor of Philosophy (Ph.D.)

The Ph.D. program in Biological Sciences is an interdepartmental umbrella research program that provides opportunities for students to develop scholarly, innovative, and independent work. Courses are designed to strengthen and complement the student's research. An advisory committee helps guide each student in selecting classes and other learning experiences. Students are encouraged to present their research at national and international meetings and to publish in peer reviewed journals. Seminar series featuring prominent scientists expose students to exciting topics and help students develop collaborative contacts.

Advance to Candidacy: In addition to the coursework outlined below, students must pass a qualifying exam.

Post-Candidacy: All students must complete at least 12 credits of BISI899 Doctoral Dissertation Research and successfully complete and defend an original dissertation. Students will also present that dissertation work in a seminar.

All students must complete the following requirements:

Course	Title	Credits
Core Requirements		
Select three credits of graduate seminar courses		3
Select nine credits of advanced coursework		9
Select one course in Bioethics		3
BISI701	Teaching & Professional Development in Biology	1
Specialization Requirements		
Select one of the following concentrations:		4-18
Behavior, Ecology, Evolution, and Systematics (BEES)		
Computational Biology, Bioinformatics, and Genomics (CBBG)		
Molecular and Cell Biology (MOCB)		
Physiological Systesms (PSYS)		
Dissertation Research Requirements		
BISI899	Doctoral Dissertation Research	12
Total Credits		**32-46**

Students choose from one of the following concentration options and complete the additional requirements in each:

Behavior, Ecology, Evolution, and Systematics (BEES)

Course	Title	Credits
BEES608	Seminar in Behavior, Ecology, Evolution and Systematics (BEES608A)	1
Approved Statistics course or quantitative course		3
Total Credits		**4**

Computational Biology, Bioinformatics, and Genomics (CBBG)

Course	Title	Credits
CBMG688	Special Topics in Cell Biology and Molecular Genetics (CBMG688Y - Bioinformatics and Genomics)	2
CBMG688	Special Topics in Cell Biology and Molecular Genetics (CBMG688P - Programming for Biology)	2
CBMG699	Special Problems in Cell Biology and Molecular Genetics (CBMG699D - Bioinformatics and Computation Biology Seminar Series)	2
CBMG688	Special Topics in Cell Biology and Molecular Genetics (CBMG688B - Bioethics)	1

Biophysics (BIPH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Biophysics Program in the Institute for Physical Science and Technology offers Ph.D. degrees in Biophysics. It is affiliated with the College of Computer, Mathematical, & Natural Sciences and the College of Engineering.

The Maryland Biophysics Program aims to train graduate students in the use of theoretical, computational, and experimental methods to gain quantitative insights into biological systems. The post genomic era is bringing tools for unprecedented characterization and control of living systems. To fully harness these tools for quantitative insights in biology, biomedicine, and bioengineering requires expertise from a number of disciplines. Thus, our program includes faculty from Chemistry, Physics, Biology, Mathematics, Materials Science, and Bioengineering. The Biophysics Program is open to students with undergraduate degrees in Chemistry, Physics, Biology, Mathematics, Computational Science, or Engineering. Because student backgrounds are diverse, we tailor the curriculum to suit the needs of the individual.

Research areas include Computational Biology and Complex Networks; Molecular Simulations; Cell Mechanics and Motility; Biological Machines and Molecular Motors; Protein and RNA Folding; Experimental and Computational Neuroscience; Membrane Biophysics; Machine Learning in Biology; Statistical Thermodynamics; Mechanobiology; Cellular dynamics in immune signaling and cancer.

The core courses that include (but are not limited to) Statistical Mechanics, Chemical Thermodynamics, Biophysical Chemistry, Membrane Biophysics and Cell Biology constitute the basis for further specialization.

Financial Assistance

TAships, RAships, Fellowships, arrangements for support from the National Institutes of Health.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose: In addition to the questions requested by the Graduate School, applicants should include their interests in the University of Maryland's Biophysics Ph.D. program
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- GRE Subject (optional)
- CV/Resume
- Writing Sample(s) (optional, up to 3)
- Description of Research/Work Experience

Students dedicated to a career in experimental or theoretical biophysics are sought. For more admissions information or to apply to the program, please visit our Graduate School website: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 16, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	December 16, 2022

Other Deadlines: marylandbiophysics.umd.edu (http://www.marylandbiophysics.umd.edu)
Program Website: marylandbiophysics.umd.edu/admissions/ (http://www.marylandbiophysics.umd.edu/admissions/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Biophysics, Doctor of Philosophy (Ph.D.) (p. 89)
- Biophysics, Master of Science (M.S.) (p. 89)

Facilities and Special Resources

Incoming students are provided with private desk space and up to date computer facilities. A Biophysics Seminar is run on the average of once a week generally given by visiting scholars. For those students electing to take the Seminar for credit (one credit is offered) must sign in each week. Three-person committee to mentor students. Symposia consisting of about six nationally and internationally known scholars are conducted once a year on various topics. Seminars and Symposia are well attended by students, postdocs, faculty, and visitors from local institutions such as NIH and Johns Hopkins.

Biophysics, Master of Science (M.S.)

Thesis option: 30 credits required
Non-thesis option: 30 credits required

Course	Title	Credits
Core Requirements		
BIPH699	Research in Biophysics	4
BIPH698	Biophysics Seminar (BIPH698L)	2
Advanced course		3
Oral Presentation		
Remainder of Coursework		15
Thesis or Non-Thesis Option		
Select one of the following:		6
Thesis:		
BIPH799	Master's Thesis Research	
Non-Thesis:		
Submit a scholarly paper and pass the qualifying examination at the M.S. level		
Total Credits		**30**

Biophysics, Doctor of Philosophy (Ph.D.)

One course, Research in Biophysics, which consists of three seven week rotations through three experimental or theoretical research groups, is required of all students. A short presentation must be made to all students at the end of each rotation. Students must meet and report their progress to a three-person mentoring committee starting with the first semester.

Advance to Candidacy: In addition the coursework below, doctoral students are required to pass a qualifying exam, as well as submit and successfully present a candidacy research paper to the Program Director and the three-member committee.

Post-candidacy: Students must complete 12 credits of BIPH899 Doctoral Dissertation Research and successfully defend a dissertation.

Biostatistics (BIOS)

Graduate Degree Program
College: Public Health

Abstract

Biostatistics is a science that addresses theory and techniques for describing, analyzing, and interpreting health data. The discipline is primarily focused on applications to problems in the health, medical, and biological sciences. The MPH with a concentration in biostatistics is a 45-credit professional degree that prepares graduates to work in public health services as practitioners, researchers, administrators, and consultants. A full-time student may complete our program in 2 years. Part-time students may take up to 4 years to complete the program. The majority of courses are offered in the evenings. In addition to coursework, all biostatistics master's students are required to complete a 240-hour internship and a capstone project.

Our proximity to the nation's capital offers students unparalleled opportunities for research experiences in public health, including placements at the National Institutes of Health, National Center for Health Statistics, Centers for Disease Control, Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Courses: EPIB **(**https://academiccatalog.umd.edu/graduate/courses/epib/**)** SPHL **(**https://umd-curr.courseleaf.com/graduate/courses/sphl/**)**

Relationships: Epidemiology (EPDM) **(**p. 196**)** Epidemiology (EPID) **(**p. 197**)**

Admissions

The **MPH in Biostatistics** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed

GENERAL REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate statistics course
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Three letters of recommendation

- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Scores submission is **optional***. If you decide to submit your GRE scores, please have ETS send scores to SOPHAS (code 0485)
  **The review committee will evaluate GRE scores if they are submitted. The lack of scores will not negatively impact applications. If submitted, the program considers competitive scores to be 50th percentile or higher in each of the three parts.*

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/).
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/).

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)

Requirements

- Biostatistics, Master of Public Health (M.P.H.) (p. 90)

Facilities and Special Resources

Our faculty in the Department of Epidemiology and Biostatistics includes individuals with multi-faceted interests in biostatistics, epidemiology, and bioinformatics. Biostatistics faculty apply statistical techniques including survival and longitudinal analysis, computational statistics, statistical analysis of genomic and proteomic data, machine learning, neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data. Epidemiology faculty have research interests and expertise in the epidemiology of infectious disease and chronic disease with particular focus in the areas of HIV/STIs, cancer, health disparities, cardiovascular disease, obesity/physical activity, and sexual and reproductive health. Additional areas of specialization include social and behavioral determinants of health, aging, cultural competency, and community-based interventions.

Biostatistics, Master of Public Health (M.P.H.)

Business Administration and Accounting (BAAC)

Graduate Degree Program
R.H. Smith School of Business

abstract

Combine your MBA studies with graduate coursework in accounting to create a unique set of skills and knowledge. It's just one more way the Smith MBA can help you distinguish yourself in a competitive

marketplace. Students take the MBA core courses and then complete the degree requirements for the MS in Accounting program.

- Business Administration and Accounting, Master of Business Administration and Master of Science (dual degree) (M.B.A. and M.S.) (p. 91)

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Business Administration and Accounting, Master of Business Administration and Master of Science (dual degree) (M.B.A. and M.S.)

Non-thesis only: 66 credits required

The Robert H. Smith School of Business is a global leader in integrating business management and technology. Smith MBAs can take advantage of this strength in the joint MBA/MS degree program and leverage their managerial skills with studies that develop research and technological skills in finance, accounting, information systems, or supply chain management. Students may apply for admission to the MBA/MS degree program at the beginning of the application process or at the end of their first year in the MBA program. Students must complete all required courses for both programs and reach a total of 66 credits. Students complete 36 credits of Business courses and 30 credits of Accounting courses. Part-time MBA students complete the **BUSI** designated courses.

Full-time MBA students complete the **BUSM** designated courses.

Business Administration (BMBA)

Graduate Degree Program
R.H. Smith School of Business

ABSTRACT

In the internationally recognized, top-ranked MBA program at Maryland Smith, future leaders develop strong analytical skills and an understanding of the way business functions like marketing, finance and operations interact.

Smith MBAs learn to leverage big data to make better decisions and explore their career options in a tight-knit community that encourages collaboration and intelligent risk-taking. With a Smith MBA, you'll be ready to lead fearlessly in any industry. The MBA program is offered in a full-time and part-time/flex format.

Financial Assistance

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

The University of Maryland Robert H. Smith School of Business is approved to operate in the District of Columbia by the Washington, DC Higher Education Licensure Commission.

Business Administration, Master of Business Administration (M.B.A.)

Non-thesis only: 54 credits required

The Robert H. Smith School of Business offers an MBA program designed to provide the educational foundation for those students with the potential to exhibit the highest degree of excellence in future careers as professional managers. The MBA program requires 54 credits of coursework, which is normally four semesters for a full-time student. There is no thesis requirement. Successful students in the program are expected to demonstrate the following:

1. a thorough and integrated knowledge of the basic tools, concepts, and theories relating to professional management;
2. behavioral and analytical skills necessary to deal creatively and effectively with organizations and management problems;

3. an understanding of the economic, political, technological, and social environments in which organizations operate;
4. a sense of professional and personal integrity and social responsibility in the conduct of managerial affairs both internal and external to the organization.

Students whose cumulative grade point average falls below 3.0 will be placed on probation and will be given a specified amount of time to raise the average to a 3.0. Failure to do so will result in academic dismissal from the program. Maryland MBA graduates obtain employment in a wide spectrum of organizations at highly competitive starting salaries.

Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.

Please note: MBA students are required to complete a minimum of 22 core credits of required courses. The number of required credits could increase due to program design and some courses having variable credits between 2 and 3. Please consult with your program advisor before registering for required courses.

Business Administration, Executive (CMBA)

Graduate Degree Program
R.H. Smith School of Business

ABSTRACT

Ranked among the best Executive MBA programs in the world, the University of Maryland's Robert H. Smith School of Business wants to prepare you to succeed and lead in a global economy. The Smith Global Leadership EMBA has been delivered in Beijing, China for more than a decade, in partnership with the University of International Business and Economics (UIBE). The Smith EMBA emphasizes personalized executive coaching to improve the leadership skills you need. Rise through the ranks, transition careers, or make a difference in the world—it all starts with a Smith EMBA.

R.H. Smith School of Business

ABSTRACT

Combine your MBA studies with graduate coursework in finance to create a unique set of skills and knowledge. It's just one more way the Smith MBA can help you distinguish yourself in a competitive marketplace. Generally, students take the MBA core courses and then complete the degree requirements for the Master of Finance program.

Program Website: rhsmith.umd.edu/programs (https://www.rhsmith.umd.edu/programs/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Business Administration and Finance, Master of Business Administration and Master of Science (dual degree) (M.B.A. and M.Fin.) (p. 95)

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Business Administration and Finance, Master of Business Administration and Master of Science (dual degree) (M.B.A. and M.Fin.)

Non-thesis only: 66 credits required

Students complete 36 credits of Business courses and 30 credits of Finance courses. Students can specialize in either Corporate Finance, Asset Management, Risk Management, or General Finance.

The Robert H. Smith School of Business is a global leader in integrating business management and technology. Smith MBAs can take advantage of this strength in the joint MBA/MS degree program and leverage their managerial skills with studies that develop research and technological skills in finance, accounting, information systems, or supply chain management. Students may apply for admission to the MBA/MS degree program at the beginning of the application process or at the end of their first year in the MBA program. Students must complete all required courses for both programs and reach a total of 66 credits.

Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.

Business Administration (online) (OMBA)

Graduate Degree Program
College: Business

Abstract

The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Executive MBA (EMBA), Online MBA, Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Master of Science in Business and Management (MS), Master of Quantitative Finance, Master of Science in Business Analytics (MS), and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.

The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are world-renowned scholars whose teaching and research equips students with the wisdom of business scholarship rooted in the experiential lessons of the marketplace. In addition to mastering core functional business knowledge, Smith students develop sophisticated analytical skills and an "integrative" systems understanding of the way the functional aspects of organizations interact. Students learn how to leverage big data for better decision-making, and explore their career options in a tight-knit community that encourages intelligent risk-taking, not cutthroat competition. Class sizes are small and the faculty are supportive, challenging and invested in student success.

Financial Assistance

Financial support may be available to qualified online MBA students in the form of scholarship.

Contact

Smith online MBA admissions can be reached at 877-807-8741 or admissions@onlineprograms.umd.edu. Additional information about the program and admissions requirements can be found at http://onlinemba.umd.edu/.

Facilities and Special Resources

The Office of Career Services (OCS) serves as partner for students future success. Whether it's advancing confidently through a student's current organization or taking the leap to transition careers, Smith's OCS is here to help. The OCS provides students with access to:

- One-on-one career coaching: Appointments are available throughout the lunch hours and into the evening to accommodate our busy professionals' work schedules. Students have the option of meeting in person or remotely to cover a wide range of career-related topics.
- Assessment tools to identify career interests and strengths, and provide insight into development needs and potential business career options.
- Career exploration resources including a library of industry-specific videos and webinars, as well as business directories, articles and career guides with insider information.
- The UMD Alumni Network
- An automated job posting, application and interview scheduling system, and access to MBA-Exchange, which provides information on MBA-level opportunities throughout the country and globally.
- Opportunities to network with students and alumni from the broader Smith MBA community, and more!
- Note: OCS services may be subject to change.

Business Administration, Master of Business Administration (M.B.A.)

Business Administration and Public Policy (BMPO)

Graduate Degree Program
College: Business / Public Policy

Abstract

The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

The Robert H. Smith School of Business offers graduate programs leading to the degrees of Master of Business Administration (MBA), Executive MBA (EMBA), Online MBA, Master of Finance, Master of Science in Accounting (MS), Master of Science in Information Systems (MS), Master of Science in Marketing Analytics (MS), Master of Science in Supply Chain Management (MS), Master of Science in Business and Management (MS), Master of Quantitative Finance, Master of Science in Business Analytics (MS), and Doctor of Philosophy (PhD). The school's MBA program is accredited nationally by the Association to Advance Collegiate Schools of Business (AACSB International). Only about 607 programs in the world are accredited by the AACSB, a reflection of the quality of the faculty, students, curriculum, and career management.

The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. School of Public Policy: www.publicpolicy.umd.edu/graduate/masters (http://www.publicpolicy.umd.edu/graduate/masters/)

Requirements

- Business Administration and Public Policy, Master of Business Administration and Master of Public Policy (dual degree) (M.B.A. and M.P.P.) (p. 103)

Business Administration and Public Policy, Master of Business Administration and Master of Public Policy (dual degree) (M.B.A. and M.P.P.)

Students complete **66 total credits** including at least 30 credits of Business courses, and at least 30 credits of Public Policy courses.

The University of Maryland Robert H. Smith School of Business and the School of Public Policy (both located in Van Munching Hall) offer a dual program of studies leading to both the MPP and MBA degrees in less time (typically 5 or 6 semesters) and at less cost than if the degrees were obtained separately.

Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.

Business Administration and Real Estate Development (MBRE)

Graduate Degree Program
R.H. Smith School of Business / School of Architecture, Planning and Preservation

ABSTRACT

The dual degree combines coursework from the graduate real estate and MBA programs to enable a student to complete both the Master of Business Administration and Master of Real Estate Development degrees with fewer total credits than it would take to complete the two separately and sequentially.

The Smith School of Business faculty has been recruited from the graduate programs of leading universities nationwide. They are world-renowned scholars whose teaching and research equips students with the wisdom of business scholarship rooted in the experiential lessons of the marketplace. In addition to mastering core functional business knowledge, Smith students develop sophisticated analytical skills and an “integrative” systems understanding of the way the functional aspects of organizations interact. Students learn how to leverage big data for better decision-making, and explore their career options in a tight-knit community that encourages intelligent risk-taking, not cutthroat competition.

Business Administration and Social Work (BMSW)

Graduate Degree Program
R.H. Smith School of Business / Maryland School of Social Work

ABSTRACT

In social service agencies, financial and business expertise combined with social work practice, knowledge, and experience is invaluable. The MBA and MSW degrees complement each other and provide graduates with a combination of knowledge, experience, and values necessary in business and the human services system.

Candidates must apply for admission to the School of Social Work and also to the MBA program at College Park and must be admitted to both programs. Information about the MSW program can be found at https://www.ssw.umaryland.edu/

CONTACT

MBA program information is available online at http://www.rhsmith.umd.edu (http://www.rhsmith.umd.edu/). Please contact us at:

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council. The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Business Administration and Social Work, Master of Business Administration and Master of Social Work (dual degree) (M.B.A. and M.S.W.)

Students complete **90 total credits** including 39 credits of Business courses. The remaining coursework is completed at the University of Maryland, Baltimore. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.

This program provides a unique combination of skills for those who wish to become managers of social service agencies. Elective courses can be taken at either the School of Social Work, University of Maryland, Baltimore, or at the Robert H. Smith School of Business. This program requires 90 total credit hours for graduation and can be completed in three years. More information on the School of Social Work can be found at http://www.ssw.umaryland.edu

Business and Management (BMSB)

Graduate Degree Program
R.H. Smith School of Business

ABSTRACT

Maryland Smith's Master of Science in Business and Management program gives you a competitive edge in the workplace through a management education. Our program provides you with foundational knowledge and a range of skills to get you started in the business world.

- Gain exposure to tools and concepts with a more concentrated focus in management than you'd get from a business minor or non-business undergraduate degree.
- Learn from top-ranked faculty and gain valuable leadership and business skills, better preparing you to step into a leadership role.
- Acquire skills in various business topics, such as accounting, finance, management and marketing.

Business and Management (BPHD)

Graduate Degree Program
R.H. Smith School of Business

Abstract

Founded in 1856, the University of Maryland is located on 1,250-acre suburban campus eight miles from Washington, D.C. and 35 miles from Baltimore. Washington, D.C. and the surrounding region offers unparalleled professional opportunities as well as a rich culture and recreational resources. This region is home to numerous federal agencies, universities, global corporations, and national and international nonprofit organizations. Robert H. Smith School of Business is one of 13 schools and colleges at the University of Maryland - one of the top-20 public research universities. This powerful combination makes Smith the ideal place to pursue a business doctoral degree.

The primary mission of Smith PhD is to produce individuals who will contribute to the discovery and dissemination of scientific knowledge through continued careers in research, publishing, and teaching at high quality research-oriented universities and research-oriented non-academic institutions throughout the world. In carrying out this mission, it is recognized that we operate in a knowledge-based economy that is being transformed by information technology.

Graduates of the program have accepted positions at various academic institutions including: Boston College, College of William and Mary, Cornell University, Columbia University, Georgetown University,Georgia Institute of Technology, Harvard, Hong Kong University of Science and Technology,Indiana University, Instituto de Empresa (Madrid), Lehigh University, McGill University, National Taiwan University, National

University of Singapore, Notre Dame, Penn State University, Rensselaer Polytechnic Institute, Southern Methodist University, Syracuse University, Texas A & M University, University of Houston, University of California (Davis), University of California (Los Angeles), University of Southern California, University of Texas, University of Washington, University of Wisconsin, and Vanderbilt University.

We offer 9 fields of study, which require individual application:

- Accounting and Information Assurance
- Finance
- Information Systems
- Managerial Economics
- Marketing (Behavioral and Quantitative)
- Organizational Behavior/Human Resource Management
- Operations Management/Management Science
- Supply Chain Management
- Strategic Management & Entrepreneurship

Financial Assistance

Financial support is available to doctoral students in the form of fellowships, graduate assistantships, and scholarships. 98% of our students receive funding from Smith PhD. Students not funded by the program are typically funded by government or military scholarships, which are guaranteed for five years. Applications are considered first for quality with the assumption that funding is required from Smith PhD. Only after rendering an admissions decision will funding be considered and evaluated. Information about financial support is located on our website (https://www.rhsmith.umd.edu/programs/phd-program/admissions/financial-support/).

Requirements

- Business and Management, Doctor of Philosophy (Ph.D.) (p. 109)

Facilities and Special Resources

The Robert H. Smith School of Business offers a PhD Program Suite, where every student has access to office space and supplies. Students have access to software and research computing tools.

Business and Management, Doctor of Philosophy (Ph.D.)

Smith PhD is a full-time program designed to produce outstanding scholars in management-related disciplines. The primary goal is to place graduates in academic tenure-track faculty position at research academic institutions. Thus, a strong research philosophy pervades the entire program. The low student-to-faculty ratio fosters a high degree of interaction between faculty and students on research projects of mutual interest, frequently culminating in journal articles. Students whose career aspirations are congruent with the program's research orientation can look forward to a learning experience that is not only demanding but also stimulating and enriching.

Students should complete course work within 2 years of the program and sit for a qualifying or comprehensive exam (or both) within those 2 years. Course requirements total 42 credits. The exam will determine whether the student should continue in the program. Students will complete 2 teaching requirements (as instructor) upon completion of course work. Additionally, students must propose their dissertation no later than May

31st of their fourth year, which designates the fifth year for the job market and completion of the dissertation.

Advance to Candidacy: In addition to the coursework outlined below, students must pass a qualifying and/or comprehensive exam, as well as successfully complete a scholarly paper.

Post-Candidacy: Students must complete at least 12 credits of BMGT899 Doctoral Dissertation Research as well as successfully defend a dissertation.

Business Management and Law (LMBA)

Graduate Degree Program
R.H. Smith School of Business / Maryland School of Law

ABSTRACT

The Robert H. Smith School of Business and the University of Maryland School of Law in Baltimore offer a joint program of studies leading to MBA and JD degrees. Under the terms of the joint program, a student may earn both degrees in four academic years. The accelerated program is possible because some courses can be credited toward both degrees. Candidates must apply for admission to the Law School as well as to the MBA program at College Park and must be admitted to both programs. Information about the JD program can be found at https://www.law.umaryland.edu/

Admissions

GENERAL REQUIREMENTS

- Essay
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letter of Recommendation (1)
- Graduate Management Admissions Test (GMAT) or Graduate Record Examination (GRE) (both optional)
- CV/Resume
- J.D. Application: *Law School (JD) Requirements: applicants should check with the* University of Maryland Law School *(*https://www.law.umaryland.edu/*). Applicants must apply to the M.B.A. and law programs separately and be accepted by both programs.*

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	August 1, 2023
International Applicants	
F (student) or J (exchange visitor) visas,E,G,H,I and L visas and immigrants	March 15, 2023

RESOURCES AND LINKS:
Other Deadlines: rhsmith.umd.edu/apply (https://www.rhsmith.umd.edu/apply/)
Program Website: rhsmith.umd.edu/programs (https://www.rhsmith.umd.edu/programs/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Business Management and Law, Master of Business Administration and Juris Doctorate (dual degree) (M.B.A. and J.D.) (p. 111)

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database, which matches a Smith MBA to the right industry position. The OCS also participates in regional and national career forums and job fairs, such as the National MBA Consortium, the National Black MBA Conference, the National Hispanic MBA Conference, the National Association of Women MBA's Conference, and the Career Services Council.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Business Management and Law, Master of Business Administration and Juris Doctorate (dual degree) (M.B.A. and J.D.)

Students complete **109 total credits** including 33 credits of Business courses. The remaining coursework is completed at the University of Maryland, Baltimore. Part-time MBA students complete the **BUSI** designated courses. Full-time MBA students complete the **BUSM** designated courses.

Twenty-one credits of law will be substituted for MBA elective coursework. Grade point averages in each program will be computed separately and students must maintain minimum standards in each school to continue in the program. The Graduate School will not accept transfer credit from coursework taken outside the joint program.
A student must complete both programs satisfactorily in order to receive both degrees. The MBA and the JD degrees must be awarded simultaneously. A student whose enrollment is terminated in one program may elect to complete work for the degree in which he or she remains enrolled, but such completion must be upon the same conditions as required of regular (nonjoint program) degree candidates. Student programs must be approved by the law school adviser for the joint program and the Associate Dean for Masters Programs. For further discussion of admission and degree requirements, students should see the above and consult the entry in the University of Maryland School of Law catalog.

Course	Title	Credits

Chemical and Biomolecular Engineering (PMCH)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

From biological engineering to nanotechnology, our Chemical and Biomolecular degree programs provide students with a fundamental understanding of physical, chemical, and biological processes. Courses also empower students to apply this knowledge to products and the processes by which they are made.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Chemical Engineering (ENCH)

Graduate Degree Program
College: Engineering

Abstract

The Chemical and Biomolecular Engineering Department offers educational opportunities leading to a Doctor of Philosophy degree or Masters of Science degree in Chemical Engineering. Both degrees require a written thesis and an oral examination on the thesis. Our faculty research interests cover a wide array of subject matter and is well-equipped for graduate research in; aerosol science and engineering, biochemical engineering, computational modeling, fluid mechanics and mixing, fuel cell technology, metabolic engineering and systems biology, nanoparticle technology, polymer processing and characterization, polymer reaction engineering, process control, thermodynamics and transport phenomena, and systems research. The Department maintains a distributed computing network consisting of research laboratories and a PC laboratory. Major research facilities including electron microscopy, X-ray diffraction, X-ray photoelectron spectroscopy, and NMR are coordinated through a variety of laboratories.

Financial Assistance

Graduate research assistantships typically support qualified Ph.D. students. Graduate fellowships are available on a competitive basis to both entering and continuing Ph.D. students. Typically only those Ph.D. students who enter the program in the Fall semester are eligible for fellowships. We are unable to provide financial support to students in our masters degree program.

Courses: ENCH (https://academiccatalog.umd.edu/graduate/courses/ench/)

Admissions

The programs leading to the Master of Science and Doctor of Philosophy degrees are open to qualified students holding the Bachelor of Science degree. Admission may be granted to students with degrees in other engineering and science areas from accredited programs, and it may be necessary in some cases to require courses to establish an undergraduate Chemical Engineering background. The general regulations of the Graduate School apply in reviewing applications.

Requirements

- Chemical Engineering, Doctor of Philosophy (Ph.D.) (p. 114)
- Chemical Engineering, Master of Science (M.S.) (p. 114)

Facilities and Special Resources

A number of special facilities are available for graduate study and research and are coordinated through the Polymer Reaction Engineering Laboratory, the Chemical Process Systems Laboratory, the Laboratory for Mixing Studies, the Thermophysical Properties Laboratory, the Laboratory for Biochemical Engineering and the Biochemical Reactor Scale Up Facility. These laboratories contain advanced process control computers, polymer processing equipment and polymerization reactors, polymer characterization instrumentation, fermentors, a laser Doppler anemometry facility, and an aerosol characterization facility.

Chemical Engineering, Master of Science (M.S.)

Thesis only: 30 credits

A minimum of 30 credit hours of course work in technical areas relating directly to chemical engineering is required for the M.S. degree, 6 of which are devoted to thesis research. All students seeking graduate degrees in Chemical Engineering must enroll in CHBE610, CHBE620, CHBE630, and CHBE640 if they have not completed equivalent courses. In addition to Graduate School regulations, special degree requirements (including core course GPA requirements) are described at the Chemical Engineering Department website: www.ench.umd.edu (http://www.ench.umd.edu).

CHBE630	Transport Phenomena	3
CHBE640	Advanced Chemical Reaction Kinetics	3
CHBE799	Master's Thesis Research	6
Remainder of coursework		10
Total Credits		**30**

Chemical Engineering, Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree is granted only upon sufficient evidence of high attainment in scholarship and the ability to engage in independent research. The Chemical Engineering Department requires minimum of 45 semester hours of course work beyond the B.S. degree. A minimum of 18 credit hours of Thesis Research is required; students in the PhD program can register only for CHBE899. All Ph.D. graduate students are required to serve as Teaching Assistants for two semesters. Other requirements, including CORE course GPA requirements are found on the Department website: www.ench.umd.edu (http://www.ench.umd.edu).

Advance to Candidacy: In addition to completing the course requirements below, students must complete a research aptitude Ph.D. qualifying examination and a research proposal including an oral presentation covering the projected Ph.D. dissertation

Post-Candidacy: Students must complete at least 12 credits of CHBE899 Doctoral Dissertation Research as well as successfully defend and submit an original dissertation.

Course	Title	Credits
Core Requirements		
Minimum of 27 credits of courses numbered 600 or above, including the following:		27
CHBE609	Graduate Seminar	
CHBE610	Chemical Engineering Thermodynamics	
CHBE620	Methods of Engineering Analysis	
CHBE630	Transport Phenomena	
CHBE640	Advanced Chemical Reaction Kinetics	
Dissertation Research Requirements		
CHBE899	Doctoral Dissertation Research	12
CHBE898	Pre-Candidacy Research	6
or CHBE899	Doctoral Dissertation Research	
Total Credits		**45**

Chemical and Life Sciences (CLFS)

Graduate Degree Program

College: Computer, Mathematical, and Natural Sciences

Abstract

The Master of Chemical and Life Sciences is an online content-based masters program for high school science teachers that provides in-depth knowledge of current research areas in the biological, biochemical and biomedical sciences. The courses cover subject matter as diverse as genetic engineering and gene therapy to chemistry, ecology and the concepts of biocomplexity. University faculty who are experts in the field will lead discussion sessions on topics of current interest with significant social impact. Topic examples include the positive and negative aspects of genetically engineered foods and their safety, the development of new energy sources and the ethical and moral issues involved in cloning and the handling of genetic information. The program also provides a set of laboratory experiences that facilitates the presentation of many of these concepts in the classroom. Aside from the laboratory experiences, all courses will be offered exclusively through distance education as online courses. Our infrastructure provides a web-based asynchronous program. Teachers who desire to update and advance their knowledge or who must complete an advanced degree or graduate courses, will find that this program meets their needs. In addition to our general program we offer focused Areas of Concentration in Biology and in Chemistry. During the course of studies towards a degree students may earn Credentials by taking a series of focused courses.

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (none)
- CV/Resume
- Science Undergraduate Degree: The undergraduate degree must be in biological science, chemistry, biochemistry or science education.
- Teaching Experience: The applicant must demonstrate one year minimum teaching experience.

Admission Information for the Master of Chemical and Life Sciences can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply (https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply/). UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). Additional requirements can be found here: https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply#International (https://oes.umd.edu/graduates-post-baccalaureates-professionals/professional-graduate-programs/master-chemical-life-sciences-mclfs/apply/#International)

In addition to a suitable undergraduate education and experience admission to the degree program requires the successful completion of either CLFS510 or CLFS520, gateway review classes; or a passing grade of B or better on either of the admissions exams based on CLFS510 and CLFS520. Suitable GRE scores will also be accepted to satisfy admission requirements (GRE scores are not required!). Upon application and the submission of documentation all applicants will be granted Provisional Admission to the program while they satisfy other admission requirements.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

APPLICATION DEADLINES

Requirements

- Chemical and Life Sciences, Master of Chemical and Life Sciences (M.Clfs.) (p. 115)

Chemical and Life Sciences, Master of Chemical and Life Sciences (M.Clfs.)

Non-thesis only (scholarly paper required): 30 credits

Students with a thorough and up to date understanding of biology or chemistry, and who are admitted without condition[1], may elect to take the appropriate Admission Exam. The Admission Exams are generally based on the content of CLFS510 or CLFS520. Students who feel

that they can benefit from a review may take CLFS510 or CLFS520. A passing grade (B) on either the Admission Exam or CLFS510/CLFS520 is sufficient for admission to the MCLFS program as a degree-seeking student. Students may take individual courses in the MCLFS program as Advanced Students. Up to 12 credits may be taken in this way. A maximum of six credits from other institutions may be transferred in with approval of the Director. (See: Transfer Form) The program's curriculum consists of 30 credit hours selected from the list below (not including CLFS510 or CLFS520). Included in the 30 hours are 6 credits of CLFS710 or the equivalent, and the completion of a scholarly paper. No more than six hours of CLFS608 credits may be counted towards the required 30 credits.

[1] Students with undergraduate grade point averages below 3.0, who have not previously demonstrated superior performance in graduate courses, will be required to take CLFS510 or CLFS520. (Note: as a 500-level course this cannot be used to meet the credit requirements of the MCLFS program.)

Course	Title	Credits

Chemical Physics (CHPH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Chemical Physics Program is a course of study and research leading to a Doctor of Philosophy degree for students who wish to enter professional careers requiring an in-depth knowledge of both physics and chemistry. Students can choose research topics across many disciplines including biophysics, chemistry, physics, chemical engineering, electrical engineering, materials and nuclear engineering, mechanical engineering, meteorology and quantum science, information and technology.

The Chemical Physics Program is designed for students with undergraduate degrees in Physics, Chemistry, Mathematics, or Engineering who are sufficiently well prepared in mathematics and the physical sciences to undertake graduate training in physics and physical chemistry. Formal course offerings in quantum mechanics, quantum chemistry, spectroscopy, thermodynamics, electricity and magnetism, statistical mechanics and biophysics prepare a student to explore the broad range of research topics at the University of Maryland.

The Chemical Physics Program is hosted and administered by the Institute for Physical Science and Technology, in collaboration with seven academic departments: Chemistry and Biochemistry, Physics, Electrical and Computer Engineering, Chemical Engineering, Materials and Nuclear Engineering, Mechanical Engineering, and Meteorology. The Chemical Physics Committee oversees the program and is made up of representatives (Chemical Physics faculty) from the sponsoring units with the Program Director as chair. Formal arrangements with the National Institute of Standards and Technology (NIST) and the National Institute of Health (NIH) allow students to perform research off campus under the supervision of a government scientist associated with the program and a Chemical Physics faculty member.

Research areas include Atmospheric and Space Sciences; Nano, Meso, and Micro-Scale Science and Technologies; Experimental and Theoretical Atomic, Molecular and Optical (AMO) Sciences and Ultrafast Optics; Experimental and Theoretical Condensed Matter and Material Sciences; Neutron Scattering and NMR; Experimental and Theoretical Nonlinear Dynamics and Chaos; Experimental and Theoretical Quantum Science, Information and Technology -- Joint Quantum Institute (JQI), the Joint Center for Quantum Information and Computer Science (QuICS) and the Quantum Technology Center (QTC); Experimental and Theoretical Statistical Mechanics, Phase Transitions and Thermodynamics.

Financial Assistance

Students are admitted with Teaching Assistantships or Research Assistantships. University and Chemical Physics Fellowships are also available.

Admissions

The program is for students with undergraduate degrees in chemistry, physics, mathematics, or engineering. For those students with degrees in other disciplines, knowledge of calculus, differential equations, and vector algebra, as well as introductory mechanics, electricity and magnetism, and quantum mechanics is ordinarily expected.

Program Website: chemicalphysics.umd.edu (http://www.chemicalphysics.umd.edu/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Chemical Physics, Doctor of Philosophy (Ph.D.) (p. 117)
- Chemical Physics, Master of Science (M.S.) (p. 117)

Facilities and Special Resources

Incoming students are provided with private desk space and up to date computer facilities. There is a wide array of advanced equipment associated with the various research groups in the Program including scanning probe microscopes, high-resolution spectrographs, ultra-short high-power lasers, multi-coincidence electron scattering spectrometers, and a fully equipped light-scattering laboratory.

Chemical Physics, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Course	Title	Credits
Thesis or Non-Thesis Requirements		
Select one of the following:		30
Thesis:		
Select 24 credits of coursework including an advanced laboratory course		
CHPH799	Master's Thesis Research	
Non-Thesis:		
Complete 30 credits of coursework. Students must pass a written qualifying exam at the M.S. level and submit a scholarly paper.		
Total Credits		**30**

Admission to the program is limited to Ph.D. students. Students can earn a thesis or a non-thesis M.S. degree while working towards the Ph.D. degree. In order to earn a non-thesis M.S. degree in Chemical Physics, students must pass the written Qualifying Examination at the M.S. level, maintain a B average, scholarly paper, 30 graduate credits of which 24 must be course credits including:

1. Advanced laboratory course
2. Two credits of seminar, can be included in the non-course credits
3. Advanced course at the 600 level or above
4. Two laboratory rotations

The Examining Committee consists of at least two faculty members, who will read the scholarly paper and attend the oral presentation. The paper should provide an informative review of the research topic selected by the candidate in consultation with his/her academic and research advisors. The bibliography is a particularly important part of the paper and should include the most significant references to the topic. The length of the paper is expected to be approximately 20 double space pages (12-point font) with 1-inch margins. The presentation is to last approximately one hour and can be part of regularly scheduled seminar series such as the Informal Statistical Mechanics Seminar or the Nonlinear Dynamics Seminar. Two faculty must be present and there should be sufficient time for questions and discussion.

For the thesis M.S. degree, students must complete a written masters thesis, maintain a B average, a scholarly paper and complete 30 graduate credits including:

1. Six credits of CHPH799
2. 24 course credits
3. Two credits of seminar, can be included in the non-course credits
4. Advanced laboratory course
5. Advanced course at the 600 level or above
6. Two laboratory rotations

The Thesis Examining Committee is to consist of at least three faculty members including the research advisor. The Examination Committee will review the M.S. thesis, attend the oral presentation and participate in the defense of the thesis. The thesis is to consist of an introduction to the field of research with which the student is engaged, a clear statement of the problem under study, the objectives of the research, the approach taken, original results, interpretation, discussion, and conclusions. A concise review of the literature, and a bibliography of the most important literature should also be included. The M.S. thesis has no set length, but is typically 30 to 40 pages. The format of the thesis (font, margins, etc.) must follow the University of Maryland Thesis and Dissertation Style Guide.

Chemical Physics, Doctor of Philosophy (Ph.D.)

Advance to Candidacy: In addition to the course requirements, students must submit a scholarly paper and make an oral presentation. The paper and presentation are evaluated by a candidacy committee consisting of at least three faculty members, generally including the advisor and a member of the advisory committee. In addition, students must pass the

written Qualifying Examination, normally taken at the beginning of the second year.

Students with a well-developed thesis topic and research results are expected to include these results together with further research plans in their scholarly paper and oral presentation. Students less far along with research will present background material and summaries of the research areas in which they will be working. A concise review of the literature is expected, along with a bibliography of the most important literature. The length of the paper is expected to be between approximately 20 double space pages (12-point font) with 1-inch margins. The paper is to be submitted to the candidacy committee at least two weeks before the date of the oral presentation. The presentation is to last approximately 50 minutes and can be part of regularly scheduled seminar series such as the Informal Statistical Mechanics Seminar or the Nonlinear Dynamics Seminar. Two members of the candidacy committee must be present and there should be sufficient time for questions and discussion.

Ph.D. Candidates: Within 12 to 18 months after beginning Ph.D. research, the candidate is to select a Ph.D. Thesis Examination Committee. To complete the PhD, candidates must earn 12 credits of CHPH899 (Ph.D. dissertation research, only available after advancement to Ph.D. candidacy) and prepare a written Ph.D. dissertation, the format of which (font, margins, etc.) must follow the University of Maryland Thesis and Dissertation Style Guide.

Doctoral students must maintain a B average. Students must complete 24 credits of coursework including:

1. Two credits of seminar
2. Advanced laboratory course
3. Advanced course outside of the student's main field of study at the 600 level or above

Chemistry (CHEM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Department of Chemistry and Biochemistry offers graduate study leading to the Ph.D. degree in Chemistry. Our Ph.D. program in Chemistry has a strong core in the traditional fields of chemistry, including analytical chemistry, chemical physics (in cooperation with the Institute of Physical Sciences & Technology), environmental chemistry, inorganic chemistry, nuclear chemistry, organic chemistry and physical chemistry. In addition to these traditional areas we also have interdisciplinary programs in contemporary areas such as nanoscience, chemical biology, energy sciences, materials chemistry, theoretical chemistry, and supramolecular chemistry.

Financial Assistance

Ph.D. candidates are normally supported on graduate teaching assistantships during their first year in graduate school as long as they are in good standing. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester, a salary and health care benefits. In subsequent years, Ph.D. candidates are typically supported on graduate research assistantships or fellowships. Financial assistance is not typically available to M.S. candidates.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- GRE Subject (optional/highly recommended)
- CV/Resume
- Description of Research/Work Experience

Admission to graduate study at the University of Maryland requires a minimum of a Bachelor of Science (B.S.), Bachelor of Arts (B.A.) or equivalent degree. Previous coursework must normally include a minimum of 30 semester or 40 quarter hours of chemistry, with at least 1 year of physical chemistry, 1 year of organic chemistry and 1 semester of inorganic chemistry, as well as laboratory courses in organic chemistry and physical chemistry. A laboratory course in analytical chemistry is also preferred.

The chemistry subject GRE score is not required but it can be helpful for a complete evaluation. Applicants from non-English speaking

countries must also present the results of the Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE).

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 4, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 4, 2023

RESOURCES AND LINKS:

Other Deadlines: chem.umd.edu (http://www.chem.umd.edu)
Program Website: chem.umd.edu/graduateprogram (http://www.chem.umd.edu/graduateprogram/)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Chemistry, Doctor of Philosophy (Ph.D.) (p. 119)
- Chemistry, Master of Science (M.S.) (p. 119)

Facilities and Special Resources

The Department has state-of-the-art research facilities to support research in the fields listed above. Facilities include "clean" rooms for environmental sample analysis, X-ray crystallographic instrumentation, numerous mass spectrometers, numerous NMR spectrometers including 400, 500, 600 and 800 MHz Fourier-transform NMR spectrometers; an XPS spectrometer, Atomic Force Microscopes, ultracentrifuges, analytical optical spectrometers, and a state-of-the-art computer graphics facility.

Departmental research is supported by a departmental server and many individual faculty workstations. The Department has access to electronics shop and campus machine shops. The Chemistry Library has an extensive collection in chemistry, biochemistry, and other fields. Electronic access to journals and literature search databases is available. A Macintosh workstation facility (25 units) is available in the Department for student/faculty use.

Chemistry, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

Thesis Option

At least 12 of the 24 credits of coursework must be in Chemistry or Biochemistry numbered 600 or higher. In addition, students are required to complete six credits of CHEM799. The thesis option requires a seminar presentation and an oral defense of the thesis.

Non-Thesis Option

At least 18 of the 24 credits of coursework must be in Chemistry or Biochemistry, of which at least 14 credits must be at or above the 600 level. In addition, students are required to complete six credits of CHEM699 and submit a scholarly paper. The scholarly paper is reviewed by a committee of 3 faculty members. Copies of specific regulations are available from the Department of Chemistry and Biochemistry or on the internet at: www.chem.umd.edu.

Course	Title	Credits
Required courses:		24
CHEM611	Professional Skills for New Graduate Students	
CHEM612	Scientific Presentations	
Thesis or Non-Thesis Requirements		**6**
Thesis		
CHEM799	Master's Thesis Research	
Non-Thesis		
CHEM699	Special Problems in Chemistry	
Scholarly Paper		
Total Credits		**30**

Chemistry, Doctor of Philosophy (Ph.D.)

Advance to Candidacy: In addition to the coursework below, students must successfully pass an oral exam.

Post-candidacy: Complete at least 12 credits of 899 Doctoral Dissertation Research and successfully defend your dissertation.

At least 12 of the 21 credits of coursework must be in Chemistry or Biochemistry courses numbered 600 or higher.

Course	Title	Credits
Coursework requirements include:		21
CHEM611	Professional Skills for New Graduate Students	
CHEM612	Scientific Presentations	
CHEM889	Seminar [1]	
Dissertation Research Requirements		
CHEM899	Doctoral Dissertation Research	12
Total Credits		**33**

[1] One credit of CHEM889 can be counted towards the 21 credit requirement but only if that one credit is earned during the semester that the student presents a formal seminar.

Civil and Environmental Engineering (ENCE)

Graduate Degree Program
College: Engineering

Abstract

The Department of Civil and Environmental Engineering offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees. All programs are planned on an individual basis by the student and an advisor taking into consideration the student's background and special interests. Areas of concentration at both the master's and doctoral levels include: Civil Systems, Disaster Resilience, Environmental, Geotechnical, Project Management, Transportation, Structures and Water Resources.

Financial Assistance

Research assistantships may be available from individual faculty members, depending on available resources. Only a limited number of teaching assistantships are available. Part-time work as grading assistants may be available as well. For best consideration for funding, apply by the preferred deadlines: September 1 for Spring admission, and January 15 for Fall admission.

Contact

Department of Civil and Environmental Engineering

Fax: 301.405.2585
Email: ceegradstudies@umd.edu

Website: cee.umd.edu **(**https://academiccatalog.umd.edu/graduate/programs/civil-environmental-engineering-ence/cee.umd.edu**)**

Courses: ENCE (p. 758)

Admissions

All applicants must hold a Bachelor's degree, typically in engineering, physical sciences, mathematics, or other quantitative fields, from an accredited institution. Applicants with undergraduate degrees in other disciplines are evaluated on a case by case basis and may be accepted with the stipulation that deficiencies in prerequisite undergraduate coursework be corrected before enrolling in graduate courses. In addition to the requirements set forth by the Graduate School, applicants must have a minimum GPA of 3.0 to apply to the Master's Program, and a minimum GPA of 3.5 to apply to the Doctoral Program. Applicants with lower GPAs may be considered and accepted in a provisional basis if other indicators of ability are exceptional (letters of recommendation, GRE scores, prior experience, etc.).

We strongly encourage applicants to the M.S. or Ph.D. in Civil and Environmental Engineering to identify one or two faculty members (on the Educational Intent section of the application) with whom you might be interested in working should you be admitted to the program. Identifying your faculty interests will help us better-evaluate your application. Preferred deadline (best consideration for funding): September 1 for Spring admission, and January 15 for Fall admission.

Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Civil and Environmental Engineering, Doctor of Philosophy (Ph.D.) (p. 121)
- Civil and Environmental Engineering, Master of Science (M.S.) (p. 120)

Facilities and Special Resources

Departmental research facilities include laboratories in the following areas: transportation, systems analysis, environmental engineering, hydraulics, remote sensing, structures, and soil mechanics. Graduate students have convenient access to a spectrum of computer facilities, including networked personal computers and workstations, specialized computer-aided design, graphics, and visualization laboratories, campus mainframe computers, and remote supercomputer facilities.

The Washington and Baltimore metropolitan areas are easily accessible for data, field studies, library access, contacts with national organizations, and attendance at national meetings. The location of the University of Maryland offers a unique opportunity to obtain an advanced degree in civil engineering.

Civil and Environmental Engineering, Master of Science (M.S.)

Students are required to complete 30 credits within one of the seven specializations. Students complete a set of core courses as well as electives. The M.S. degree program offers a thesis option and very rarely a non-thesis option. Applicants who do not wish to complete a thesis are encouraged to consider the Professional Master of Engineering (ENPM) degree instead: https://academiccatalog.umd.edu/graduate/programs/civil-environmental-engineering-pmce/

THESIS OPTION:

- At least 24 credits of coursework are required beyond the B.S. degree, including a minimum of 18 credits at the 600 level or above.
- In addition, six credits of ENCE799 are required.

NON-THESIS OPTION:

- At least 30 credits of coursework are required beyond the B.S. degree, including a minimum of 24 credits at the 600 level or above.
- In addition, students are required to complete a scholarly paper

Civil and Environmental Engineering, Doctor of Philosophy (Ph.D.)

The requirements for the Ph.D. degree are also the same as those of the Graduate School. The student will work closely with an adviser to develop an approved program of study suited to his or her individual needs. Before admission to candidacy, the student must pass a qualifying examination, which is normally taken after the coursework is at least 75 percent completed. There is no language requirement for the Ph.D.

Advance to Candidacy: Doctoral students are required to complete 36 credits beyond the Bachelor's degree, which would include the credits earned in the completion of a Master's degree. A qualifying examination is required in order to advance to candidacy.

Post-Candidacy: A doctoral student who passes the qualifying exam is admitted to candidacy will automatically be registered for 6 credits of ENCE899. A minimum of 12 credits must be taken in ENCE899.

Civil and Environmental Engineering (PMCE)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our degree programs in civil and environmental engineering provide advanced expertise in structures, pavements, environmental engineering, and water resources.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Classics (CLAS)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of Classics offers a graduate program of study with specializations in Latin or Latin and Greek, leading to the Master of Arts degree. The program provides students with advanced study of the Latin

and/or Greek languages and literatures in the context of a broader and deeper knowledge and understanding of Greek and Roman culture and civilization. In addition to advanced courses in language, each student will be required to take coursework in related disciplines outside of the Classics Department. Some individual programs may require more than 30 hours. Students may choose one of two tracks toward the degree: Latin or Latin and Greek. **Potential applicants should be aware that they will not be admitted unless they have reached the advanced undergraduate level in at least one, or preferably both, of the classical languages, Latin and ancient Greek.** Our M.A. alumni go on to a variety of careers, including especially the teaching of Latin in the schools. Many have also gone on to earn doctoral degrees in Classics at universities such as Brown, Michigan, and USC.

Financial Assistance

Teaching assistantships and several categories of fellowships are available for outstanding applicants. Contact the graduate director or the department chair for details.

Program Website: classics.umd.edu (http://www.classics.umd.edu)
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Classics, Master of Arts (M.A.) (p. 125)

Facilities and Special Resources

The Baltimore-Washington, D.C., area boasts of several outstanding classical libraries. Located in Washington, D.C., are the Center for Hellenic Studies, the Byzantine Library of Dumbarton Oaks, and the Library of Congress. Students may also use the Eisenhower Library on the campus of the Johns Hopkins University in Baltimore.

Classics, Master of Arts (M.A.)

Students choose either the Latin or Latin and Greek track. All students must pass a proficiency exam, submit a Scholarly Article Analysis, commentary, and present at the Classics department research conference.

Latin track: 30 credits required

Course	Title	Credits
Core Requirements		
LATN472	Historical Development of the Latin Language	3
or LATN672	Historical Development of the Latin Language	
Two courses may be in CLAS, HIST, or an allied field		6
Two of the remaining courses may be in LATN4xx, the others must be LATN6xx		21
Total Credits		**30**

Latin and Greek track: 33 credits required

Course	Title	Credits
Core Requirements		
LATN472	Historical Development of the Latin Language	3
or LATN672	Historical Development of the Latin Language	
GREK472	History and Development of the Greek Language	3
or GREK672	History and Development of the Greek Language	
One course may be in CLAS, HIST, or an allied field		3
One of the remaining courses may be in LATN4xx; two of the remaining courses may be in GREK4xx; the others must be LATN6xx or GREK6xx		24
Total Credits		**33**

Clinical Audiology (CAUD)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

Advanced graduate study in clinical audiology, available through the Department of Hearing and Speech Sciences within the College of Behavioral and Social Sciences, consists of the Doctor of Audiology program (CAUD) in which students earn the Au.D. degree. This doctoral program is available to post-baccalaureate students who have completed undergraduate pre-requisites in hearing and speech sciences/communication sciences and disorders. The CAUD program is an academically based, clinically oriented program designed primarily to prepare professional Audiologists. While information pertaining to hearing disorders comprises the central focus of the degree, education about the normal processes of communication, as well as about research design, is considered an integral part of the program. Students completing the program are eligible to obtain the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association, Board Certification in Audiology by the American Board of Audiology (ABA), and licensure in the State of Maryland and other states. A Ph.D. in Audiology is also available to those students who have already completed a graduate degree in Audiology (i.e., Au.D. degree or M.A. degree). A dual-degree program is available to CAUD students, in which they earn the Au.D. degree and continue their study immediately for the Ph.D. degree. Those students in the program who wish to pursue the dual-degree program will earn the Au.D. at the point in doctoral training when they have completed all of the academic, clinical, and research requirements for this first professional degree.

(Note: Applicants for the M.A. program in Speech-Language Pathology, please see SPLA; Applications for the Hearing and Speech Sciences Ph.D., please see HESP).

Additional information about the program's highlights can be found at the link below.
https://hesp.umd.edu/content/program-highlights-doctoral-program-clinical-audiology (https://hesp.umd.edu/content/program-highlights-doctoral-program-clinical-audiology/)

Financial Assistance

A limited number of graduate assistantships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. Students may also seek assistantships from other units on campus or scholarships sponsored by Federal agencies (e.g., NIDCD) or private foundations (e.g., American Speech-Language-Hearing Foundation; American Academy of Audiology Foundation).

Additional resources for funding opportunities can be found at the link below:

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://hesp.umd.edu/content/program-highlights-doctoral-program-clinical-audiology/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/umdsupplementaryapplicationcaudsplahespcert.pdf)
- Prerequisites: Completion of at least 60% of undergraduate prerequisite courses prior to application. For a list of pre-requisite courses, please go here (https://hesp.umd.edu/content/application-faqs/).

Admissions to the graduate program in Clinical Audiology is on a very competitive basis. Students admitted to the Au.D. program in Audiology generally have a minimum grade point average of 3.4 from a baccalaureate program in hearing and speech sciences, or related discipline. All applicants to the CAUD graduate program are required to furnish GRE scores taken within the last five years, three letters of recommendation, official transcripts from all undergraduate and graduate studies, and a statement of purpose. Admission to the program is confined to fall matriculation, Prospective applicants should note that decisions on admissions are made in early March. Students must submit application materials for the fall semester by January 5. Applicants with a background in the hearing and speech sciences or a related field are considered for admission to the Au.D., which requires four years of full-time graduate study. We no longer accept students who have not fulfilled their undergraduate requirements. Students interested in the dual degree track (Au.D./Ph.D.) are admitted into the CAUD program and may request to switch to the dual degree program after completion of the 3rd year of study. The time required for completion of the dual-degree track is 6-7 years of full-time graduate study. For more information on the prerequisite course requirements, please see our website: hesp.umd.edu. (https://hesp.umd.edu)

Requirements

- Clinical Audiology, Doctor of Audiology (Au.D.) (p. 127)
- Clinical Audiology, Doctor of Audiology and Doctor of Philosophy (dual degree) (Au.D./Ph.D.) (p. 128)

Facilities and Special Resources

The Department's facilities include numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, cochlear implants, hearing aids, infant and adult speech perception, neuropsychology, language, voice, fluency and electrophysiology. There are multiple sound-attenuating chambers and one electrically-shielded chamber devoted to research with humans, which are all integrated with computers and peripheral equipment for acoustic signal development, signal analysis, presentation and on-line data collection.

The Department also houses the Hearing and Speech Clinic (https://hespclinic.umd.edu/) at UMCP. this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting and cochlear implant programming. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation. Students pursuing clinical training in Audiology will also have access to the Audiology Service, Division of Audiology-Head and Neck Surgery, of the University of Maryland and University Hospital in Baltimore (UMB), for part-time clinical rotations or full-time clinical externships. This Service provides a full range of auditory and vestibular diagnostic and rehabilitative services in a large metropolitan hospital setting. Students also engage in clinical activities in the Audiology Section of the Clinical Center as well as intramural research programs of the National Institute on Deafness and Other Communication Disorders of the National Institutes of Health.

All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical opportunities are available at Walter Reed National Military Medical Center, the Johns Hopkins University School of Medicine, and at other facilities in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park. The Department of Hearing and Speech Sciences participates in the Center for the Comparative and Evolutionary Biology of Hearing Training Program (C-CEBH), the Neuroscience and Cognitive Sciences graduate program (see NACS), the Maryland Language Science Center, and the Cochlear Implant Center on Excellence (MCICE); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Clinical Audiology, Doctor of Audiology (Au.D.)

The Au.D. curriculum meets requirements specified in the Standards for the Certificate of Clinical Competence in Audiology of the American Speech-Language-Hearing Association, as well as those required for Board Certification in Audiology from the American Board of Audiology.Doctoral students are required to complete 93 credits including 61 credits of coursework and 32 credits of Clinical Registration requirements.

Clinical registration requirements include 14 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration. Full-time students are expected to complete the program in four years.

Advance to Candidacy: In addition to completing the coursework requirements, students must successfully pass comprehensive exams administered during the first three years of the program, as well as complete a four-credit doctoral capstone research project in order to advance to candidacy by the end of their third year in the program.

Post-Candidacy: Students complete 18 credits in a clinical internship residency.

Course	Title	Credits

HESP649	Clinical Practice in Audiology (HESP649B - Aural Rehabilitation)	1
HESP729	Advanced Clinical Practice in Audiology	4
HESP731	Seminar in Clinical Supervision (Seminar in Clinical Supervision)	1
HESP829	Clinical Internship Residency	18
Total Credits		**93**

Clinical Audiology, Doctor of Audiology and Doctor of Philosophy (dual degree) (Au.D./Ph.D.)

Doctoral students are required to complete 110 credits including 78 credits of coursework and 32 credits of Clinical Registration Requirements. Students must also successfully pass the comprehensive exams.

The Dual-degree (Au.D./Ph.D.) program requires 60 credit hours of graduate coursework, 6 credit hours of pre-candidacy research, 12 credit hours of dissertation research, 14 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration, for a total of 110 credit hours. The Dual-degree program is designed to meet requirements specified in the Standards for the Certificate of Clinical Competence in Audiology of the American Speech-Language-Hearing Association and in the Handbook for Board Certification in Audiology of the American Board of Audiology. The program also meets all requirements of the Graduate School. Ph.D. students must develop an individual study plan with the approval of a faculty Program Planning Committee, pass comprehensive examinations, and complete a dissertation and oral defense. Full-time students are expected to complete the program in approximately 6 years. Students will earn an Au.D. degree on the way to the Ph.D. degree after they have successfully completed academic coursework, pre-candidacy research, clinical practicum, the 4th-year clinical externship, and comprehensive examinations. The Department of Hearing and Speech Sciences also offers the traditional Doctor of Philosophy degree, with major emphasis in either speech, language or hearing, for those students seeking careers in research or higher education without clinical training. For information about the Ph.D. in Hearing and Speech Sciences (http://apps.gradschool.umd.edu/Catalog/public-programs-detail.php?HESP), please see HESP (http://apps.gradschool.umd.edu/Catalog/public-programs-detail.php?HESP).

Clinical Psychological Science (MPPS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The University of Maryland is proud to offer a Master of Professional Studies (MPS) in Clinical Psychological Science, the only master's-level degree that focuses explicitly on clinical psychological science. The goal of the MPS program is to provide rigorous training in clinical psychology, including coursework in evidence-based psychological assessment and interventions, as well as state-of-the-art research methods and critical thinking skills. Students take 10 courses (two per term) over the course of 15 months. Courses are taught in the evenings at the College Park campus and are designed for working professionals who desire advanced knowledge in clinical science to enter, advance, or expand their career options in the mental health field.

Communication (COMM)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of Communication is committed to communication for the public good. Faculty members and graduate students in the Department pursue and produce research that spans a wide range of the Communication discipline, generally focused in three broad curriculum areas:

- Communication Science & Social Cognition,
- Public Relations & Strategic Communication, and
- Rhetoric & Political Culture.

The Department encourages applications for graduate study from students wishing to pursue interests identified within these foci. The graduate program in Communication is designed for students whose educational objective is the Ph.D. degree (currently the program does not admit students whose degree objective is the M.A.) Most graduates of the doctoral program pursue academic careers; however, some work in public policy research and other professions requiring highly developed research skills.

Financial Assistance

Most departmental financial aid is in the form of graduate assistantships. However, a limited number of fellowships are available.

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample: This could be a research paper.
- Description of Research Interests: Describe in detail your primary research interests with reference to specific studies you have conducted in the past and/or plan to carry out in the future. Please also discuss your future career goals. This should be 2-4 pages. Please upload in the Uploads Requirements page of the online application.

Students must hold a Bachelor's or Master's degree (or the equivalent) prior to enrollment in the Ph.D. program. Although most applicants to the program will have earned a degree in the communication field, others with an interest in studying communication may be admitted (with the possibility of additional courses assigned to remedy deficiencies). Admission to the Ph.D. program is based on the student's prior academic record, letters of recommendation, statement of purpose and research interests, sample of scholarly writing, and other information relevant to the applicant's likelihood of successfully completing the program.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Communication, Doctor of Philosophy (Ph.D.) (p. 130)
- Communication, Master of Arts (M.A.) (p. 130)

Facilities and Special Resources

The Department of Communication houses a Center for Health and Risk Communication (http://www.healthriskcenter.umd.edu); a Center for Political Communication and Civic Leadership (http://www.comm.center.umd.edu); and an Oral Communication Center (https://communication.umd.edu/academics/undergraduate/oral-communication (https://communication.umd.edu/academics/undergraduate/oral-communication/)). The campus provides extensive computer resources and excellent library collections in communication. In addition, the Washington metropolitan area provides research and laboratory facilities for studying communication unmatched by other departments in the discipline.

Communication, Master of Arts (M.A.)

The Department of Communication is not currently admitting students whose terminal degree objective is the M.A.

Communication, Doctor of Philosophy (Ph.D.)

Advance to Candidacy: Course requirements include work in a cognate discipline and research methods. In addition students must successfully pass a comprehensive examination that certifies mastery of disciplinary knowledge and preparation for independent research

Post-candidacy: In order to advance to candidacy, students must complete and successfully defend a dissertation that advances knowledge of communication.

Community Planning (CMPL)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The Urban Studies and Planning Program offers graduate study leading to the Master of Community Planning (MCP) degree. (The School of Architecture, Planning and Preservation, in which the MCP program is located, offers a Ph.D. in Urban and Regional Planning and Design -- see URPD for details). The MCP Program is accredited by the Planning Accreditation Board of the American Institute of Certified Planners and the Association of Collegiate Schools of Planning. Dual Masters degrees in Planning and Architecture, Planning and Historic Preservation, and Planning and Landscape Architecture are offered. There is a transfer of credit agreement with the School of Law on the Baltimore campus as part of a joint JD and MCP program. There is also a cooperative program with the PhD program in Policy Sciences at the UMBC campus. Entering students have diverse academic backgrounds, such as architecture, fine arts, English, history, business, geography, sociology, economics, and political science. The Program's faculty specialize in metropolitan and regional planning, housing, transportation planning, environmental and land use planning, social policy, quantitative planning methods, urban design, and economic development planning. Employment opportunities remain strong for graduates in a highly competitive field. The Baltimore-Washington metropolitan region offers diverse employment potential in urban planning and program management in the public, private, and non-profit sectors.

Financial Assistance

Aside from student loans through the university, MCP students are eligible to apply for graduate assistantships with URSP and the National Center for Smart Growth Research and Education. MCP applicants who are also Peace Corps veterans are eligible to apply for the Shriver Peaceworker fellowship program that is administered by the University of Maryland Baltimore County. Please note that competition is high for these financial awards. The program also maintains a list of internships, and many of our students work in part- or full-time jobs while completing the program. Program classes are scheduled to begin at 4:00 p.m. and 7:00 p.m. to accommodate our working students.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Samples (optional, up to 3)
- Portfolio PDF Upload (optional)
- Graduate Record Examination (GRE) (optional)

The application process consists of the following:

- First, fill out the on-line application for the University of Maryland Graduate School. The administrative code for the Community Planning program is "CMPL."
- Second, submit all transcripts, three professional letters of recommendation, statement of purpose, resume, official GRE test scores, and portfolio as part of the application.

All applicants must have a bachelor's degree from an accredited institution. There is no restriction on the applicants' previous field of study, and indeed we encourage diversity in all senses

Requirements

- Community Planning, Master of Community Planning (M.C.P.) (p. 133)

Facilities and Special Resources

The University of Maryland is an excellent location for the pursuit of community planning, and graduate students are encouraged to take advantage of the opportunities. The university is eight miles from the incomparable library and research facilities of Washington, D.C. In the nations's capital, UMCP graduate students have access to, among other resources, the Library of Congress, the specialized collections of professional associations and international organizations, and agencies at all levels of government. The College Park campus is a 45-minute drive from Baltimore City, whose planning programs have gained national attention. At least two planning studio courses are offered each year, in either Baltimore, the Washington metropolitan area, or an international setting. Baltimore city and Washington, D.C. are ideal laboratories for students interested in research on urban issues and planning.

Urban Studies and Planning is one of five graduate degree programs in the University's School of Architecture, Planning, and Preservation. The School administers the National Center for Smart Growth Research and Education, which involves faculty and graduate students from several campus units in: multi-disciplinary research on the fiscal, environmental and social impacts of alternative development patterns; evaluation of growth management strategies (with a focus on Maryland's Smart Growth programs); technical assistance to state agencies and local jurisdictions; and training programs for federal program managers and state and local officials.

Community Planning, Master of Community Planning (M.C.P.)

Non-thesis only (capstone project required): 48 credits

Graduation requires satisfactory completion of 48 credits of course work. The 24 credits in core courses introduce students to the foundations of city and regional planning, research methods, planning process, planning history and theory, and the physical and socio-economic functions of cities and regions. Nine additional credits are required for a specialization. Specializations include community development, housing, economic development, international planning, land use / environmental planning, social planning, historic preservation, and transportation planning. A studio and internship are required. Courses are listed under URSP. The MCP program accepts up to nine credits from other graduate programs. Applicants to this program should use the CMPL program code.

Community Planning and Historic Preservation (CPHP)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The dual degree combines course work from the Historic Preservation and Urban Studies and Planning programs to enable a student to complete both the Master of Historic Preservation and Master of Community Planning degrees with fewer credits than it would take to complete the two separately.

Students of the dual-degree program are ideally prepared to practice at the intersection of planning and preservation, disciplines that have long had close ties. For example, the Maryland Historical Trust, Maryland's State Historic Preservation Office is housed with the state's planning department. Similarly, preservation is imbedded in the planning offices in Baltimore City, and county's such as Prince Georges and Montgomery. Graduates of this program are prepared to practice in either discipline (a strength in times of economic recession) and, more importantly, are able to bring their special knowledge and understanding to preservation planning issues in communities across the state and nation.

Financial Assistance

The School of Architecture, Planning, and Preservation offers a limited and varying number of teaching and research assistantships, scholarships, fellowships, and internships. Applicants should apply for financial assistance when submitting the application for admission.

Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply to the entire program, subject to academic performance. Periodically there are named scholarships provided by various organizations or companies.

In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. However, students in the dual degree program may find it difficult to complete their degree requirements timely if they are working off campus, or more than 10 hours per week.

Applicants should inquire as to the availability of funding for the term they are starting.

Admissions

General Requirements

- Statement of Purpose: In addition to the stated requirements, students should discuss specific interest in pursuing a concurrent dual degree within two programs.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample (one required, up to two more optional): A writing sample of at least 10-30 pages. This can be previous individual academic or professional work. It does not necessarily have to be related to historic preservation or community planning, however a related topic is preferred. The writing sample should demonstrate the ability to analyze a problem/question and clearly communicate your findings. Upload to the Writing Sample section of the Uploads Requirements page in the online application.
- Portfolio PDF Upload (optional)
- Must be admitted by both programs to pursue dual degree.

The administrative code for the dual degree of Master of Community Planning and Master of Historic Preservation is "CPHP." Applicants must be admitted by both programs to pursue this dual degree but only one application is required.

- Community Planning and Historic Preservation, Master of Community Planning and Master of Historic Preservation (dual degree) (M.C.P. and M.H.P.) (p. 135)

Facilities and Special Resources

The School of Architecture, Planning and Preservation is ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for community planning and historic preservation is unsurpassed.

The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. The Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI.
The interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning as well as historic preservation.

Community Planning and Law (LCPL)

Graduate Degree Program
College: Architecture

abstract

The University of Maryland School of Law on the Baltimore campus (UMB) will accept up to 9 credits of MCP coursework towards the JD degree, and the Urban Studies and Planning Program will accept up to 9 credits of JD coursework towards the MCP degree. This means that students who complete both programs can save up to 18 credits. Applicants must apply to each program separately and be accepted by both programs. Only grades of B or better may be transferred. Credits from the MCP program can be transferred to the Law program only if they are taken while the student is enrolled in the Law program and vice versa. This means that students cannot take advantage of the transfer of credits if they have already completed either of the programs.

Comparative Literature (CMLT)

Graduate Degree Program
College: Arts and Humanities

Abstract

A small, elite PhD degree program housed in the Department of English, the Comparative Literature Program is committed to the comparative and transnational study of literature and other media. Combining its own dynamic resources with those of the English Department and other units in the College of Arts and Humanities, the Program supports a wide range of interests, including Western Hemispheric and Transatlantic Studies, Film, Early Modern Studies, Classical Reception, and Diasporic and Postcolonial Studies. Students in the Program work in at least two languages and national literatures, one of them Anglophone. The Comparative Literature PhD Program complements the current PhD Program in English, giving students a place to pursue true comparative studies. Students seeking admission to the PhD Program in Comparative Literature must demonstrate advanced language proficiency before entry into the Program, and commit themselves to achieving a high degree of intellectual expertise in two or more languages and national literatures. Graduates are as likely to find academic positions in departments of foreign languages as they are to find them in English. A doctoral degree in Comparative Literature can uniquely prepare them for a profession that more and more studies literatures and cultures within a globalized, transnational context.

Financial Assistance

The Comparative Literature Department, in conjunction with the College of Arts and Humanities and the Graduate School, awards a combination of fellowships and teaching assistantships to admitted PhD candidates..

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample: A single sample of critical writing of approximately 12-20 pages. While we encourage you to submit your best writing sample, we prefer a writing sample in your declared field of interest. The writing sample should include an updated works cited page to help us evaluate your critical and theoretical familiarity with a field, a period or a genre. (uploaded to the Uploads Requirements section of the application)
- Master's degree

Applicants should have a strong background in arts and humanities. Students will not be admitted to the program without demonstrated proficiency in English and at least one other language. Each student must submit a critical writing sample (in English), three letters of recommendation, evidence of language proficiency, and GRE scores. International applicants must also submit TOEFL scores.

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Comparative Literature, Doctor of Philosophy (Ph.D.) (p. 137)

Facilities and Special Resources

The Comparative Literature Program combines the benefits of a small department with the opportunities available at a large research university located in suburban Washington, D.C. Students have access to such University resources as the rare books and special collections of McKeldin Library, the Women's Studies Graduate Certificate program, and the Meyerhoff Center for Jewish Studies. Area resources include the extensive archival collections of the Library of Congress, the U.S. Archives, and the Folger Institute, as well as museums, galleries, embassies and cultural institutions in the Washington area and in the Baltimore-Philadelphia-New York corridor.

Comparative Literature, Doctor of Philosophy (Ph.D.)

The Ph.D. degree normally entails at least 30 credits of course work (beyond M.A. courses) and 12 credits of dissertation research. Advising will address the depth, breadth, and coherence of each student's course plan and, if necessary, coordination among different histories of the early modern and modern.

Advance to Candidacy: In addition to the course requirements below, students must successfully pass a Qualifying Exam, as well as fulfill a language requirement. This requirement can be met in various ways (prior coursework, translation test, or a degree in language).

Post-Candidacy: Students must complete at least 12 credits of CMLT899 and successfully defend and submit a dissertation.

Computer Networking (Z117)

Graduate Certificate Program
College: Engineering

Abstract

The Certificate in Computer Networking will only be available to current ENTS students. It will allow ENTS students to have the option of enhancing their MS degree with specific technical knowledge and also enable them to remain competitive in the marketplace with graduates from similar degree programs at peer institutions.

Financial Assistance

Since the Master's in Telecommunications Program does not normally offer financial support in the form of graduate assistantships, many of our students find assistantships in other units, especially non-academic units, which do not have graduate students.

Computer Science (CMSC)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Computer Science Department's graduate program is ranked among the top in the nation and in the top ten among public universities. Both M.S. and Ph.D degrees are offered, and almost all full-time students receive financial aid in the form of assistantships, fellowships, and grants. The Department has strong research programs in the following areas: artificial intelligence, computer systems and networking, database systems, programming languages, software engineering, scientific computing, algorithms and computation theory, computer vision, geometric computing, graphics, human-computer interaction, and bioinformatics.

Financial Assistance

Financial aid, in the form of teaching assistantships, research assistantships, and fellowships, is offered to qualified applicants. Almost all full-time students receive some type of financial aid.

Requirements

- Computer Science, Doctor of Philosophy (Ph.D.) (p. 140)
- Computer Science, Master of Science (M.S.) (p. 140)

Facilities and Special Resources

The computer science department, located in the Brendan Iribe Center for Computer Science and Engineering, provides general purpose computing support to advance the academic and research mission of the department.

The department operates a data center in the AV Williams building with multiple 10 Gbps connections to the campus and national research networks. In addition to the primary data center, the department oversees a co-location facility for research groups wanting hands-on management of their own specialized equipment.

General purpose computing is provided via a RedHat Enterprise Virtualization environment. The system provides four compute nodes, each with at least 16 cores and 128GB of RAM. The cluster has 14 TB of shared disk. Nodes are connected to each other and the file system by multiple 10 Gbps Ethernet links.

Computer Science, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

Students completing the non-thesis option must complete 30 credits of coursework, comprehensive examinations, and complete a scholarly paper. Students following the thesis option must complete 24 credits of coursework, and 6 credits of master's thesis research.

Course	Title	Credits
Core Requirements		
At least four M.S. qualifying computer science courses at the 600-800 level in four of the eight areas of study are required. A total of 21 credits in CMSC courses must be taken.		24
Thesis or Non-Thesis Requirements		
Select one of the following options:		6
Thesis Option:		
CMSC799	Master's Thesis Research	
Non-Thesis Option:		
Complete a scholarly paper		
Six additional credits of coursework		
Total Credits		**30**

Computer Science, Doctor of Philosophy (Ph.D.)

The program milestones include a six-course qualifying sequence plus two electives, a preliminary oral examination on a dissertation proposal and reading list in three related areas, and the dissertation defense. The number and variety of courses offered each semester enable students and their advisors to plan individualized programs.

Advance to Candidacy: In addition the required coursework, students must successfully pass a preliminary oral exam on a dissertation proposal and reading list in three related areas.

Post-Candidacy: Students must complete at least 12 credits of CMSC899 and successfully defend and submit a dissertation.

Course	Title	Credits
Core Requirements		
Select six 600-800 level courses spread over at least four areas, with no more than three in any one area.		18
Select two additional 600-800 level courses		6

Consecutive Interpreting, Post-Baccalaureate Certificate (P.B.C.)

21 credits required

The Graduate Certificate of Professional Studies in Consecutive Interpreting (GCPS in Consecutive Interpreting) is designed to equip you with the knowledge and skills required for entry-level work in the interpreting profession. Examples include serving as dialogue interpreters for non-specialized content in community, health, legal, and political settings. You will begin to develop high-level skills in consecutive interpreting (oral rendering after the speaker pauses) and will be grounded in the tenets of the profession, including professional conduct and ethics, as you are guided through the steps needed to advance your professional skill set.

The GCPS in Consecutive Interpreting is a one-year 21-credit program offering instruction in the fundamental skills of consecutive interpreting in interpreting studies, the interpreting profession, and intercultural communication.

Two Languages

Course	Title	Credits
Core Requirements		
COMM609	Fundamentals of Interpreting	4
COMM610	Introduction to Translation and Interpreting Studies	3
COMM683	Intercultural Communication Theory	3
COMM619	Consecutive Interpretation	4
COMM730	Seminar in Health Communication	3
or COMM762	The Rhetoric of Political Institutions	
Select up to four credits of the following electives:		4
COMM641	Introduction to Computer-Assisted Translation	
COMM798	Independent Study (Intensive Writing in English)	
COMM798	Independent Study (Public Speaking)	
COMM639	Fundamentals of Translation	
COMM629	Introduction to Simultaneous Interpretation	
COMM730	Seminar in Health Communication (if not taken to fulfill requirement)	
COMM762	The Rhetoric of Political Institutions (if not taken to fulfill requirement)

Product Management (online) (MPCI)

Graduate Degree Program
College: A. James Clark School of Engineering

ABSTRACT

The online Master of Professional Studies (MPS) in Product Management enables learners to build the knowledge, competencies, and relationships to lead the product life cycle from discovery to delivery by:

- Understanding the keys to successfully navigating the roles and responsibilities of being a product manager to champion change with internal and external collaborators and influencers.
- Learning how to truly know your target customer, your customer's underserved needs, your value proposition, your product feature set, and your user experience, then integrate this knowledge into product and market requirements and positioning plans.
- Translating product ideas into tangible assets by creating wireframes, 3D renderings, prototypes, and minimum viable products (MVPs) to test assumptions and validate customer interests.
- Developing techniques for designing and modeling for fast feedback and idea sharing, system optimization with open architectures, validating functions and verifying performance, and leveraging and enabling the system designs, platforms, and ecosystems.
- Embracing modern product leadership to form and motivate product teams, and grow organizations that can both discover and deliver products at scale.

The MPS in Product Management is exclusively designed as a 100% online program without any face-to-face or residency requirements. Students benefit from the global accessibility and time flexibility of fully online learning without the requirement of meeting in a certain place, or at a certain time, on a regular basis. While there is a set syllabus and learning agenda for each week, the recorded lectures may be viewed by students at any time of their choosing each week.

The 30-credit curriculum is completed on a 15-month schedule. Students enroll in two 3-credit courses per 12-week term.

Counseling Psychology (COCP)

Graduate Degree Program
College: Education

Abstract

The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization:

- Counseling Psychology (in collaboration with the Psychology Department) and
- School Psychology.

Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology are prepared to work as researchers,

educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The Counseling Psychology **(**https://education.umd.edu/academics/departments/chse/cope/**)** program at the University of Maryland is a joint program between the Department of Counseling and Personnel Services and the Department of Psychology. Our Counseling Psychology Program has been continuously accredited by the American Psychological Association since 1953. In ratings evaluating Counseling Psychology over the past three decades, the University of Maryland is always among the very top ranked programs in the United States. Our faculty represent a broad range of research interests, including psychotherapy process and outcome research, multicultural psychology, vocational psychology, and interpersonal relationships.

For more information please visit our site at http://www.counselingpsychology.umd.edu/counsel2.html

Financial Assistance

The Department of Counseling, Higher Education, and Special Education offers graduate research, teaching, and administrative assistantships on a selective basis to both masters and doctoral students. The Department also assists its students in finding assistantship placements with a variety of on-campus and off-campus units. In addition, a small number of new Ph.D. students are offered highly selective fellowships funded jointly by the Department and the University.

- Description of Research/Work Experience

Applicants for regular admission to master's degree programs must have an undergraduate GPA of at least B (3.0 on a 4.0 scale) and must submit their scores on the Graduate Record Examination. Applicants for admission to Ph.D. programs should check specific admissions criteria on the program's website. Applicants' undergraduate programs should ordinarily include at least 15 semester hours of coursework in behavioral science fields (e.g., anthropology, education, psychology, sociology, statistics). Selective screening of qualified applicants is necessary in order to limit enrollments to a size that guarantees high quality

professional preparation and a close working, professional relationship between faculty and students.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 1, 2022
International Applicants

Program Website: http://www.education.umd.edu/CHSE/academics/specialization/CounselingPsychology.html
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Counseling Psychology, Doctor of Philosophy (Ph.D.) (p. 145)
- Counseling Psychology, Master of Arts (M.A.) (p. 145)

Facilities and Special Resources

All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The Counseling Psychology area of concentration has excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

Counseling Psychology, Master of Arts (M.A.)

Thesis only: 30 credits required

Students pursing doctoral degrees may earn the M.A. with thesis within the doctoral program while progressing to the Ph.D. The applicant should consult the web page associated with specific CoPE program areas of specialization for further information concerning the relevant entry-level requirements and curriculum.

Couple and Family Therapy (FCFT)

Graduate Degree Program
College: Public Health

Abstract

The mission of the M.S. in Couple and Family Therapy (CFT) program is to prepare competent, effective therapists for clinical practice and advancement of the marriage and family therapy discipline. The program seeks to train professionals who demonstrate superior therapeutic skills, ethical integrity, intellectual curiosity, and a sincere commitment to working with families from diverse populations.

The Couple and Family Therapy M.S. program provides students with the coursework and supervised clinical training typically required in states with Marriage and Family Therapy licensure. The program is accredited by the Commission on Accreditation for Marriage and Family Therapy Education of the American Association for Marriage and Family Therapy (AAMFT). The CFT program requires 48 credits for the non-thesis option and 51 credits for the thesis option. Completion of the program, which includes the 2-year internship, generally requires 2 years.

The Department of Family Science prepares students to describe, explain, and improve the quality of life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a system or ecological paradigm, combining the perspectives of interrelated professional fields of family science, maternal and child health, couple and family therapy, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non-profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human services and public health programs.

Financial Assistance

Graduate Assistantships are available to students admitted into the CFT program.

Courses: FMSC (https://umd-curr.courseleaf.com/graduate/courses/fmsc/)

Admissions

The **Master of Science in Couple and Family Therapy** accepts applications through the TerpEngage Graduate Admissions System (https://terpengage.force.com/community/CustomLoginPage/?GradApp=True).

General Requirements

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose

Program-Specific Requirements

- Prior coursework in family studies, human development, abnormal psychology, introduction to therapy or counseling, and statistics courses are useful in preparation for graduate CFT work. In addition, computer literacy is essential.
- Three letters of recommendation

- Resume or curriculum vitae
- One writing sample is required.
- GRE scores are **not required** for this program. Please do not submit GRE test scores.

Note for applicants with foreign credentials:

- The UMD graduate application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 2, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	December 2, 2022

Application Process: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)

Requirements

- Couple and Family Therapy, Master of Science (M.S.) (p. 147)

Facilities and Special Resources

Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Couple and Family Therapy, Master of Science (M.S.)

Non-Thesis option: 48 credits
Thesis option: 51 credits

Students in the non-thesis option must complete a total of 48 credits including three credits of FMSC789 (https://umd-curr.courseleaf.com/search/?P=FMSC789), and successfully pass the written and oral case presentation. Students in the thesis option must complete 51 credits including six credits of FMSC799 (https://umd-curr.courseleaf.com/search/?P=FMSC799), and successfully pass the written and oral defense of the thesis.

Supervised client contact begins in the student's first semester. Clinical students are required to gain 400 hours of face-to-face client contact, and 250 of these hours must be relational (with couples or families). The Center for Healthy Families, the couple and family therapy clinic operated by the Department, offers the opportunity to gain these hours. Clinical students receive 100 hours of supervision, both individual and group, for their client contact hours. Supervision in the Department's clinic is provided through a range of techniques including case discussion, one-way mirror observation, video review, co-therapy, and telephone consultation during live sessions. Students may choose to do some of their clinical work in a variety of available externship sites in the local area.

Creative Writing (CRWR)

Graduate Degree Program
College: Arts and Humanities

Abstract

The MFA in Creative Writing provides a professional course of study for graduate students seeking to perfect their ability to compose poems, stories, and novels. While primarily affording students intensive studio or practical work within their chosen genre, the MFA in Creative Writing requires that students incorporate such work with a traditional study of literature. The goal of the MFA in Creative Writing is to provide an atmosphere in which students can both hone their skills as writers and gain a theoretical and historical understanding of their craft.

The Department of English also offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees in English Language and Literature (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?ENGL). Please visit the English Language and Literature (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?ENGL) listing for more information.

Financial Assistance

Each year, the program accepts 8 applicants (4 fiction writers and 4 poets), who are fully funded by Teaching Assistantships, and, this current admissions cycle, we were able to enhance all 8 Teaching Assistantships with additional fellowship support. Our aid packages are typically 2-year agreements. As Teaching Assistants, our MFA students teach one class during their first year (in the spring semester) and three classes during their second year. Although a great deal of this teaching is Academic Writing (English 101), our MFA students are guaranteed at least one chance to teach an undergraduate creative writing workshop or to serve as a teaching assistant in an undergraduate literature course.

Requirements

- Creative Writing, Master of Fine Arts (M.F.A.) (p. 149)

Facilities and Special Resources

Resources for research in the College Park and Washington, D.C. area are unsurpassed. The university's libraries hold over 2,000,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Folger Shakespeare Library, Dumbarton Oaks, the National Archives, the Smithsonian Institution, and the National Center for the Study of the Visual Arts. The university recently partnered with the Phillips Collection to create the University of Maryland Center for Art and Knowledge, a dynamic collaboration that includes new curriculum, experimental and community-focused education programs, a new Phillips Collection gallery and an open storage facility in College Park.

UMCP is a member of the Consortium of Institutions in the Washington area, which permits graduate students at College Park to enroll in courses at other universities for graduate credit at UMCP. Graduate students in English also may take courses for graduate credit at the Folger Institute of Renaissance and Eighteenth-Century Studies, which runs a series of seminars by distinguished scholars each year.

Creative Writing, Master of Fine Arts (M.F.A.)

Thesis option only: 36 credits

The M.F.A. degree program requires 36 credit hours of graduate work. The program balances courses in literature with writing workshops (30 hours), and requires a creative thesis (six hours). It offers concentrations in fiction and in poetry.

Course	Title	Credits
Core Requirements		
Poetry or Fiction concentration must complete the following:		
ENGL688	Poetry Workshop	12
Four English Literature Courses		12
Humanities elective		3
ENGL799	Master's Thesis Research	6
Concentration Options		
Select one of the following:		3
Poetry concentration:		
ENGL788	Studies in Poetic Form	
Fiction concentration:		
ENGL789	Form and Theory in Fiction	
Total Credits		**36**

Criminology and Criminal Justice (CJCH)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

Students complete the first part of their coursework at Nanjing Normal University in China and the second part at the University of Maryland. Please visit the websites listed below for more information.

Please note: To successfully complete the CJCH program and receive a Master's degree from the University of Maryland, students must maintain a cumulative GPA of 3.0 or higher. Furthermore, only course grades of "C-" or higher count toward degree completion; if a student receives a course grade that is not a "C-" or higher, then the candidate must retake the course at a later time.

Criminology and Criminal Justice (CRIM)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The program of graduate study leading to a Traditional Master of Arts and Doctorate of Philosophy degrees in the area of Criminology and Criminal Justice is intended to prepare students for research, teaching and professional employment in operational agencies within the field of criminal justice. This program combines an intensive background in a social science discipline such as criminology, criminal justice, sociology, psychology and public policy with graduate-level study of selected aspects of crime and criminal justice.

In addition, the Department offers a joint J.D./M.A. degree with the University of Maryland Francis King Carey School of Law, located in Baltimore.

A recent study of Department M.A. and Ph.D. alumni reveals that master's degree graduates have found employment in both public and private institutions in virtually every kind of activity associated with the criminal justice system: research; teaching; federal, state and local law enforcement; courts; corrections; private security; and funded programs. Ph.D. graduates have found employment mostly in teaching, research, and government agency administration.

Financial Assistance

Graduate research assistantships, teaching assistantships, scholarships, and fellowships are available to select individuals applying to our doctoral program. In recent years many admitted doctoral students receive funding through assistantships, and some may be awarded supplemental scholarships or fellowships offered by the Department, the BSOS Dean's Office, or The Graduate School. Applications should be received by December 1st of the preceding Fall term for best consideration.

If you're interested in applying for the Fellowships in Support of Diversity and Inclusion (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdfellowshipsinsupportofdiversityinbsos.pdf) in the Behavioral and Social Sciences, please be sure to upload your materials under "Supplementary Application" when submitting your online admissions application.

Program Website: https://ccjs.umd.edu/landing/Graduate (https://ccjs.umd.edu/landing/Graduate/)
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Criminology and Criminal Justice, Doctor of Philosophy (Ph.D.) (p. 151)
- Criminology and Criminal Justice, Master of Arts (M.A.) (p. 151)

Facilities and Special Resources

The Department has various opportunities for graduate students to participate in current projects. Recent students have worked in research centers at the Maryland State Commission on Criminal Sentencing Policy, National Consortium for the Study of Terrorism and Responses to Terrorism (START), and the National Institute of Justice. In addition, our faculty maintain an array of ongoing, funded research projects where students can assist. These resources provide numerous opportunities for students to engage in policy development, research, and professional activities.

Criminology and Criminal Justice, Master of Arts (M.A.)

Thesis only: 30 credits required

For the M.A. applicant, the undergraduate major must have included at least one course each in theory, statistics and research methods. The general plan of study for the Traditional M.A. is as follows: 30 semester hours of courses consisting of:

1. five required courses that must be passed with a 'B' or better (including two statistics courses);
2. six hours of thesis credit; and
3. three elective courses

Course	Title	Credits
Core Requirements		
CCJS600	Criminal Justice	3
CCJS610	Research Methods in Criminal Justice and Criminology	3
CCJS620	Fundamentals of Criminological Research	3
CCJS621	General Linear Models in Criminal Justice Research	3
CCJS651	Seminar in Criminology	3
CCJS799	Master's Thesis Research	6
Electives		9
Total Credits		**30**

Criminology and Criminal Justice, Doctor of Philosophy (Ph.D.)

Description of coursework: Doctoral students who enter the program with a B.A. or B.S. must complete the master's requirements in addition to the doctoral level requirements. Students who enter with a M.S. or M.A. are required to complete only the doctoral level requirements.

Students whose highest degree is a BA/BS may choose to apply for entry either into the Traditional Masters program or directly into the Ph.D. program. Students admitted directly into the Ph.D. program will complete the requirements of the Traditional Masters program before beginning Ph.D.-level work.

In addition to the general Graduate School requirements, competence in research methodology and in quantitative techniques is expected for the completion of the Ph.D. degree, as well as competence in theory and the criminal justice field. The necessary coursework is determined on the basis of the student's previous preparation, needs and interests.

Advance to Candidacy: In addition to the course requirements, students are required to pass a Qualifying Exam and a clinical assessment before advancing to candidacy.

Post-Candidacy: Students must complete at least 12 credits of 899 Doctoral Dissertation Research and successfully defend and submit a doctoral dissertation.

Critical Theory (Z017)

Graduate Certificate Program
College: Arts and Humanities

Abstract

The Graduate Certificate in Critical Theory is an integrated curriculum offering students the opportunity to gain advanced knowledge, expertise, and certification in the interdisciplinary and international field of critical theory. Students enrolled for the M.A. or Ph.D. degree within any department at the University of Maryland at College Park may apply to participate. The Certificate is presently administered through the Department of English and the Program Coordinator is Professor Christina Walter.

Cultural and Heritage Resource Management (online) (MPCH)

Graduate Degree Program
College: Behavioral and Social Sciences

abstract

The online Master of Professional Studies in Cultural and Heritage Resource Management provides advanced training for those interested in working in the applied specialization of cultural resource management and heritage resource management. The coursework and training bridge the knowledge and experience gap between what is offered in a traditional academic course of study and the knowledge and skills required in cultural and heritage resource management. The program is built on a broad foundation including research methods, ethics, communication, management, technical writing, and critical thinking skills.

Curation and Management of Digital Assets (online) (Z093)

Graduate Certificate Program
College: Information Studies

Abstract

The Curation and Management of Digital Assets (CMDA) Certificate is a post-master's program that focuses on instruction about and research into the creation, management, and use of digital assets, and the long-term preservation and current and future access to those assets in a variety of disciplines and sectors of the economy. This four-course, fully online certificate designed for working professionals who need training in next-generation cloud computing technologies, tools, resources, and best practices to help them evaluate, select, and implement digital curation solutions.

In the Washington, D.C.-Maryland-Virginia region, across the nation, and around the world, the need for professionals to manage and curate digital assets is acute. Major corporations, government agencies, international organizations, universities, cultural heritage institutions, and scientific organizations need information professionals with the knowledge, skills, and abilities to manage, preserve, and curate digital resources.

Curriculum and Instruction (EDCI)

Graduate Degree Program
College: Education

Abstract

The Curriculum and Instruction (EDCI) program, housed within the Department of Teaching and Learning, Policy and Leadership, offers graduate study leading to the Master of Education (**M.Ed.**). The Department offers a variety of programs individually designed to meet graduate students' personal and professional goals which may include educational research, teaching, supervising, providing leadership as curriculum specialists within the disciplines, teacher education or consulting at all levels of instruction: elementary, secondary and higher education. Some of the M.Ed. concentrations lead to teacher certification, including concentrations for candidates who have a bachelor's degree in fields other than education and wish to become certified teachers (https://education.umd.edu/academics/departments/tlpl/prospective-students/). Other options include "stand-alone" M.Ed. concentrations intended for teachers and other education professionals. We also offer masters programs intended for education professionals whose work centers around research, as M.A. in the Teaching & Learning, Policy & Leadership program (TLPL).

For a complete list of current programs and specializations, please see the TLPL master's program listings (https://education.umd.edu/academics/programs/graduate/masters/?department=25894).

NOTE: Students interested in the M.Ed. (as opposed to the M.A.) programs should apply to EDCI, even though the Department of Teaching and Learning, Policy and Leadership (TLPL) now sponsors these programs. Students interested in a master of arts (M.A.) degree should visit Education: Teaching and Learning, Policy and Leadership (EDTL) in the graduate catalog. Students interested in the Department's Ph.D. program should go to Teaching and Learning, Policy and Leadership (TLPL) in the graduate catalog.

Financial Assistance

A variety of sources are available for seeking financial assistance in the way of graduate assistantships, scholarships, fellowships and financial aid loans. For more information visit https://education.umd.edu/admissions/funding-scholarships (https://education.umd.edu/admissions/funding-scholarships/).

Facilities and Special Resources

Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multicultural Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center and numerous Professional Development Schools in local school districts.

Curriculum and Instruction, Master of Education (M.Ed.)

Students have the option of pursuing certification or non-certification tracks.

Beyond the successful completion of courses, students must demonstrate high standards of scholarship and the ability to engage in

independent research. Students must either write and defend a research thesis, complete a seminar paper (non-thesis option) or a professional portfolio--requirement varies by specialization. Your faculty advisor will help you develop a program of study that is consistent with Departmental and University guidelines.

Certification options

1. Elementary: 36 credits required
2. Middle School: 38 credits required
3. Secondary English: 36 credits required
4. Secondary Social Studies: 36 credits required
5. Secondary Mathematics: 36 credits required
6. Secondary Sciences: 36 credits required
7. PreK-12 Art: 36 credits required
8. PreK-12 World Languages: 36 credits required
9. PreK-12 Teaching English to Speakers of Other Languages (TESOL): 39 credits required
10. PreK-12 Physical Education: 42 credits required
11. PreK-12 Dance: 42 credits required
12. TESOL with K-12 Certification (on-campus): 39 credits
13. Reading Education with Reading Specialist certification: 30 credits required
14. World Languages: 36 credits required
15. Creative Initiatives in Teacher Education: 37 credits required
16. Secondary Computer Science: 42 credits required

non-certification options

All of the non-certification tracks require 30 credits.

1. Art Education
2. Arts Integration
3. Elementary-Middle School
4. English Literacy Education
5. Mathematics Education
6. Minority and Urban Education
7. Reading Education
8. Science Education
9. Social Studies Education
10. STEM Elementary
11. World Languages Education
12. TESOL Teacher Leadership

Cybersecurity Engineering (online) (Z092)

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Offered in collaboration with Department of Electrical and Computer Engineering, Department of Computer Science, and the Maryland Cybersecurity Center, our Cybersecurity Engineering degree programs merge engineering applications with computer science principles.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Requirements

- Cybersecurity Engineering, Post-Baccalaureate Certificate (P.B.C.) (p. 158)

Facilities and Special Resources

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Cybersecurity Engineering, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

All Graduate Certificate in Engineering Programs consist of 4 courses/12 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://advancedengineering.umd.edu/degree-planning-sheets (https://advancedengineering.umd.edu/degree-planning-sheets/)

Dance (DANC)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Theatre, Dance, and Performance Studies offers a Master of Fine Arts degree in Dance, encompassing choreography, performance, dance and technology, scholarly research, and pedagogy. Emphasizing creative work and collaboration with TDPS MFA candidates in Lighting, Set, Costume and Media/Projection Design, the program is grounded in rigorous academic study and offers a transformational education to those who are curious, motivated, self-directed and possess a spirit of expansive inquiry and innovation. The program is designed to give outstanding students advanced training, experience in teaching, and opportunities for creative growth. For more information visit the MFA in Dance website at http://tdps.umd.edu/programs/mfa-dance (http://tdps.umd.edu/programs/mfa-dance/) or the School website at http://tdps.umd.edu.

Aimed primarily at modern or contemporary dancers with a high skill level and background in creating and performing at a professional level, opportunities abound in the creation of cross-disciplinary projects, presenting choreography in formal and informal settings throughout the three years, performing in guest artist and faculty works, presenting academic work at conferences and symposia, and participating in community-based performance and scholarly events.

The degree culminates with a thesis: an original choreographed and performed creative project and a written thesis. The third year also includes an off-campus internship with a professional arts organization, research venue, agency, company, or school.

The competencies that students learn during the program will allow them to teach a broad range of dance and dance-related subjects after they graduate. They will be able to produce and present dance in a number of contexts and modalities, on campus, in professional and site-specific venues, and in the community.

We wish our graduates to exhibit a high degree of insight into the cultural contexts in which dance has developed in the past and continues to develop today.
Students are expected to spend a significant amount of time learning about technical aspects of dance as well as promotion and house management and the myriad of other organizational details that go into producing a dance performance. They will be actively involved in the practical application of this knowledge as part of their training.

The program is highly selective (four students per year) and auditions are required. The MFA is a full-time three-year program. Financial support is available for each student selected.

Financial Assistance

Four candidates are admitted each Fall, and each of the four are offered financial support through teaching assistantship appointments, or if available, fellowships. Assistantships are never guaranteed and funding can change year to year. All qualified applicants may be nominated for Graduate School fellowships; the deadline for all applications is posted on the TPDS website annually. For more information, visit http://tdps.umd.edu or call 301-405-6694.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample
- Sample of Work: A 10-15 minute video, providing example of applicant's choreography with a description to include name of the work, performers and other choreographers, either on the applicant's professional website or through a Vimeo/YouTube link entered into the Multimedia Requirements section of the application

Applicants should have a strong undergraduate preparation in technique and dance composition. They should have completed the following undergraduate courses or their equivalent: improvisation, kinesiology, dance teaching methods, dance production, Laban Movement Analysis, and two semesters of dance history or one semester of history and one of dance philosophy, ethnology or aesthetics. Undergraduate deficiencies will be considered on an individual basis.

Requirements

- Dance, Master of Fine Arts (M.F.A.) (p. 163)

Facilities and Special Resources

The location of the campus, eight miles away from Washington D.C., places the School a half hour away from America's arts district where one may study and enjoy a wide variety of offerings of ballet, modern and broad variety of dance forms. Washington D.C. is also a center for policy and participation in the public discourse about the arts.

Dance, Master of Fine Arts (M.F.A.)

Thesis only: 60 credits required

Students enrolled in the program must complete a total of 60 credit hours of study with a minimum cumulative grade point average of 3.0 to graduate and will be assessed on a regular basis to determine their progress. Graduation from the program requires the successful completion of a final project demonstrating a synthesis of craft and artistic understanding as well as professional competence in the area of concentration. Final projects consist of:

1. the thesis project consisting of the public presentation of a dance work choreographed by the candidate, along with written documentation of the project as agreed upon with the thesis adviser;
2. the presentation of an online portfolio of selected indicators of artistry and pedagogy.

The thesis project work may be presented in one or more publicly attended events, in a shared capacity with another MFA candidate. Candidates are responsible for the organization of all production elements involved in the presentation of the project.

The following courses are required. Students should check with their advisor to determine the remainder of their coursework.

Course	Title	Credits
Core Requirements		
DANC600	Graduate Dance Research	3
DANC604	Graduate Studies in Dance Pedagogy	3
DANC608	Graduate Choreography I: Creative Process	3

Data Science (Z104)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Graduate Certificate in Data Science provides a broad introduction to the field—including how to extract and clean data, store and manage large volumes of data, and analyze such data and extract insights from it. The program involves interdisciplinary activities that create data-centered products, applications or programs that help to answer scientific, socio-political or business questions. It requires the ability to integrate data, operate on data at scale, and analyze data to make predictions, find patterns and form and test hypothesis. Practices from a variety of fields are incorporated, including in computer science disciplines such as Machine Learning, Statistics, Databases, and Visualization.

This is a 12-credit graduate program designed to accommodate working professionals while minimally disrupting personal and professional life. Instruction is provided by UMD faculty and experts in the field. The program features face-to-face instructional delivery; classes meet at the UMD College Park campus (https://maps.umd.edu/map/).

Financial Assistance

See: http://oes.umd.edu/professional-programs/data-science/data-fees-aid (http://oes.umd.edu/professional-programs/data-science/data-fees-aid/) for information about fees, payment plans, and financial aid.

Digital Studies (Z110)

Graduate Certificate Program
College: Arts and Humanities

Abstract

Digital Studies in the Arts and Humanities (DSAH) is an interdisciplinary Graduate Certificate at the University of Maryland.

It offers graduate students a chance to combine the critical study of new forms of digital media and identity with creative and analytical practices utilizing digital media as well as the application of computational tools and techniques to traditional areas of humanistic study. While it is often hands-on or applied, Digital Studies also encourages—indeed demands—work that is primarily critical, theoretical, or experimental in nature.

Broadly speaking then, Digital Studies is a critical, scholarly, and creative response to the widespread influence of digital media across nearly every aspect of contemporary life; more specifically, it recognizes that teaching, research, and scholarship in the arts and humanities cannot remain isolated from the networks, platforms, and new media all around us. Scholars and practitioners of the arts and humanities should play an active critical and creative role in shaping both reception and development of digital media, both in our disciplines and in society at large.

- CV/Resume

Application for admission to the Certificate is currently available on a rolling basis to any matriculated graduate student in the College of Arts and Humanities (http://www.arhu.umd.edu/) (ARHU) at the University of Maryland's College Park campus.

Admission is selective, and will be offered at the discretion of the program Director and the Advisory Board (http://dsah.umd.edu/people/). Considerations in admissions decisions will include the student's current academic standing, the extent to which students can demonstrate that their research or professional plans are compatible with the goals and objectives of the program, and—vitally—diversity.

We regret that we cannot offer admission to candidates who are not currently graduate students already enrolled in an ARHU department or program on the College Park campus, though enrollment in the Colloquium or other individual courses may be possible subject to instructor approval.

Economic Analysis (off-campus) (Z074)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The off-campus Graduate Certificate in Economic Analysis (Z074) is conferred to students who graduate after successfully completing the 5 core courses of the off-campus Master of Science in Applied Economics program (ECAO). Classes meet weeknights in Washington, DC.

The Z074 Graduate Certificate requirements are identical to those of the Z098 Graduate Certificate, but the Z098 certificate is conferred to students who graduate after successfully completing the 5 core courses of the on-campus ECAM program.

Financial Assistance

The economics department does not offer fellowships or graduate assistantships to any of the students in the Z074 Graduate Certificate program. To be eligible to receive any type of Federal Student Financial Aid, the student must:

1. be a U.S. citizen, U.S. Permanent Resident, or other eligible non-citizen
2. register with the Selective Service Administration (unless exempt). Students are exempt if they are female, under 18, born before 1960, on active duty in the U.S. Armed Forces, citizens of the Federated State of Micronesia or The Marshall Islands, or permanent residents of the Trust territory of the Pacific Islands (Palau).
3. enroll at a college or university that participates in the Federal Student Financial Aid Programs. These programs include the Federal Pell Grants (Pell Grants), Federal Supplemental Educational Opportunity Grants (FSEOG), Federal Subsidized and Unsubsidized Direct Loans, Federal Perkins Loans, and Federal Work-Study (FWS).
4. be working toward a degree or certificate.
5. be making Satisfactory Academic Progress.
6. not owe a refund on any federal grant, must not have borrowed federal student loans in excess of annual or aggregate loan limits, and must not be in default on any federal student loan unless satisfactory payment arrangements have been made.

Some of our students also have their tuition paid, at least in part, by an employer or other 3rd parties.

The University's Financial Services Center provides Third Party Billing when the third party requires a bill from the university. More information about financial aid is available from the University of Maryland's Office of Student Financial Aid.

Economics (ECON)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Economics Program offers graduate study leading to the Doctor of Philosophy degree. During the course of study toward the Ph.D., doctoral students also have the opportunity to obtain a Master of Arts degree. Areas of specialization include: Advanced Macroeconomics, Advanced Microeconomics, Behavioral and Experimental Economics, Comparative Institutional Economics, Econometrics, Economic Development, Economic History, Environmental and Natural Resource Economics, Industrial Organization, International Finance and Macroeconomics, International Trade, Labor Economics, Political Economy, and Public Economics.

Financial Assistance

All applicants will be considered for assistantships and fellowships through the regular application review process. Funding from the department is merit-based. Applicants should also be aware that we are an affirmative action department and that we are especially interested in recruiting strong African-American, Hispanic-American and Native American students to our Ph.D. program. As always, we will consider applications from students who have already secured an outside source of funding.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s): Transcripts from all institutions attended after high school or secondary school whether or not a degree was received. Fall term transcripts need to be included for anyone still attending an institution.
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) - optional
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationecon.pdf)
- Description of Research/Work Experience (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umddescriptionofresearchworkexperienceecon.pdf)
- Writing Samples (optional, up to 3)

By the application deadline, applicants should have completed advanced undergraduate courses in microeconomics, macroeconomics, and econometrics. Applicants are also expected to have completed the equivalent of three semesters of calculus, a semester of linear algebra, and a semester of differential equations. The majority of admitted students have also completed course work in real analysis or other upper-level mathematics. For admission for Fall 2022, submitting the Graduate Record Examination (GRE) Aptitude test is optional. All of the Department's graduate students are full-time students.

Requirements

- Economics, Doctor of Philosophy (Ph.D.) (p. 169)
- Economics, Master of Arts (M.A.) (p. 169)

Economics, Master of Arts (M.A.)

Our department offers admission only to students interested in earning a Ph.D. Our program is not designed for students who are interested only in a Master's degree. However, our Ph.D. students may obtain an M.A. degree during their program, either as a terminal degree for students leaving the Ph.D. program, or as an intermediate sign of achievement for students who are continuing in the Ph.D. program. For students who are interested in applied economics, but are not pursuing a Ph.D., the University of Maryland offers a professional masters in applied economics. This program is designed for working professionals; it is not appropriate for a Ph.D. in economics. Contact masters-econ@umd.edu or visit http://masters.econ.umd.edu for more information.

Economics, Doctor of Philosophy (Ph.D.)

The Department of Economics at the University of Maryland prepares graduate students for careers in teaching, research, and government service. The course of study provides a solid foundation in economic theory, econometrics and applied fields. The Ph.D. requires:

1. completion of a three-course sequence and a written examination or field paper in a major field,
2. completion of a two-course sequence in a minor field,
3. completion of an econometrics sequence,
4. an additional supporting course in a theoretical or applied field, and
5. a dissertation.

In the third year, students begin directed research by participating in workshops appropriate to their dissertation research.

Advance to Candidacy: In addition to the course requirements below, students must successfully pass two written comprehensive examinations in microeconomic and macroeconomic theory, taken during the summer after the first year of study.

Post-Candidacy: Students must complete at least 12 credits of ECON899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits

Electrical and Computer Engineering (ENEE)

Graduate Degree Program
College: Engineering

Abstract

The Department of Electrical and Computer Engineering (ECE) at the University of Maryland, College Park offers one of the strongest and most highly-ranked programs in the nation. Led by 89 full-time and affiliate faculty members and 50 research faculty and postdocs, the research programs of the department cover a wide spectrum of activities in the areas of:

- Communications and Networking
- Signal Processing
- Control, Robotics, and Dynamical Systems
- Computer Engineering
- Optics and Photonics
- Circuits and Systems
- Electronic Materials and Devices
- Bioelectronics and Systems
- Applied Electromagnetics

Our close affiliation with a number of research institutes such as the Institute for Systems Research, the Institute for Advanced Computer Studies, the Institute for Research in Electronics and Applied Physics, the Institute for Physical Science and Technology, and the Maryland Center for Integrated Nano Science and Engineering provides to our students and researchers the opportunity for team-oriented, cross-disciplinary research and access to the institutes' state-of-the-art laboratories.

ECE is a large department that offers a broad range of programs and research opportunities. Its research innovations are aimed at helping government and industry face today's most difficult global challenges. Employers and peer institutions recognize the prestige of Maryland's engineering programs.

Maryland's proximity to Washington, DC, offers unique research opportunities with national and government laboratories such as NASA's Goddard Space Flight Center, the National Institutes of Health, the National Institute of Standards and Technology, and the Army and Navy Research Labs. No other top Engineering program in the U.S. can provide such close proximity and access to national laboratories, federal government, and the Department of Defense.

The Department of Electrical and Computer Engineering offers graduate study leading to the Master of Science and Doctor of Philosophy degrees.

For additional information about the department's programs and research, please visit ece.umd.edu (http://www.ece.umd.edu).

Financial Assistance

Financial aid is available to graduate students in the form of research assistantships, teaching assistantships, and fellowships. Details are available in the ECE Graduate Handbook (http://www.ece.umd.edu/handbook/). Applicants for admission are automatically considered for

these packages provided they mark "yes" for financial assistance on the application form and submit their materials by the preferred deadline.

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume
- Writing Samples (optional)

For the most current and detailed information regarding ECE graduate admissions and deadlines, please refer to our ECE Graduate Admissions (http://www.ece.umd.edu/grad/admissions/) web page. Applicants must follow all instructions detailed on this web page.

For admission to the graduate programs in electrical and computer engineering, students must hold an undergraduate degree in electrical or computer engineering or related field (math, computer science, physics, or other areas of engineering) and have an overall grade point average of B+ or better. In exceptional cases, students with a lower GPA may also be admitted. Other criteria include overall academic record, strength of recommendations, GRE score, and adequacy of preparation. Applicants are competitively judged by a faculty committee.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	March 31, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	March 3, 2023

RESOURCES AND LINKS:

Program Website: http://www.ece.umd.edu

Application Process: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

Requirements

- Electrical and Computer Engineering, Doctor of Philosophy (Ph.D.) (p. 171)
- Electrical and Computer Engineering, Master of Science (M.S.) (p. 171)

Facilities and Special Resources

For detailed information on the department's research institutes and laboratories, please see the ECE Research Overview (https://ece.umd.edu/research/).

Electrical and Computer Engineering, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

The M.S. program offers the thesis and non-thesis options. Students must satisfy a course requirement and complete either a thesis or scholarly paper. For complete details, see the ECE Graduate Handbook (http://www.ece.umd.edu/handbook/).

THESIS OPTION

Course	Title	Credits
Select three ENEE core courses		9
Remainder of coursework [1]		15
ENEE799	Master's Thesis Research	6
Total Credits		**30**

1. Additional ENEE & approved non-ENEE courses are accepted- must be at the 600-level or above but cannot include: ENEE 698, 699, 799, 898, 899

non-thesis option

Course	Title	Credits
Select four ENEE core courses		12
Remainder of coursework [1]		18
Complete a scholarly paper		
Total Credits		**30**

1. Additional ENEE & approved non-ENEE courses are accepted- must be at the 600-level or above but cannot include: ENEE 698, 699, 799, 898, 899

Electrical and Computer Engineering, Doctor of Philosophy (Ph.D.)

Advance to Candidacy: In addition to the course requirements below, students must satisfy a Ph.D. qualifying requirement as well as pass an oral Ph.D. research proposal examination.

Post-Candidacy: Students must complete at least 12 credits of ENEE899 Doctoral Dissertation Research as well as successfully defend and

submit an original dissertation. For more details, see the ECE Graduate Handbook (http://www.ece.umd.edu/handbook/).

Course	Title	Credits
Graduate Technical courses [1]		18
ENEE698	Graduate Seminar	3
Two approved non-ENEE lecture courses		6
Remainder of coursework [2]		9
Doctoral Dissertation Research Requirement		
ENEE899	Doctoral Dissertation Research	12
Total Credits		**48**

1 Complete six ENEE lecture courses. These courses must be at the 600 level or above, not including ENEE698, ENEE699, ENEE799, ENEE898, and ENEE899.

2 A maximum of six credits of ENEE699 and ENEE799 combined may be included.

Electrical and Computer Engineering (PMEE)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Offered by the Department of Electrical and Computer Engineering, our Master of Engineering program in electrical and computer engineering boasts a unique connection with prestigious institutes, advanced laboratories, and leading faculty. Students also benefit from a team-oriented, multidisciplinary program that helps strengthen professional networks and provides knowledge and experience in areas of communications and networking, signal processing control, computer engineering, and more. Students in this program choose from 1 of 2 tracks: Computer Engineering or Communications and Signal Processing.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Requirements

- Electrical and Computer Engineering, Master of Engineering (M.Eng.) (p. 173)

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus.

The Clark School's Engineering Information Technology group provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs.

Electrical and Computer Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://advancedengineering.umd.edu/degree-planning-sheets (https://advancedengineering.umd.edu/degree-planning-sheets/)

The student chooses an area of concentration offered by an engineering department and completes 30 credit hours of approved coursework with an average grade of B. The coursework, which allows up to 12 credits at the 400-level, must be approved by the program's departmental faculty advisor.

Students complete six core courses and four electives. Two available focus areas include Computer Engineering (1) and Communication and Signal Processing (2).

Computer Engineering

Course	Title	Credits
Complete five of the following core courses:		15
ENPM617	Compilers	
ENPM607	Computer System Design and Architecture	
ENPM609	Microprocessor-Based Design	
ENPM610	Digital VLSI Design	
ENPM615	Embedded Systems	
ENPM674	Design and Synthesis of Digital Systems	
ENPM675	Operating System Design	
ENPM676	VLSI Testing and Design for Testability	
Select at least one of the following additional core courses:		3
ENPM600	Probability and Stochastic Processes for Engineers	
ENPM601	Analog and Digital Communication Systems	
ENPM602	Data Networks	
ENPM603	Theory and Applications of Digital Signal Processing	
ENPM616	Wireless Communications: Systems and Network Design Principles	
ENPM677	Wireless Sensor Networks	
ENPM611	Software Engineering	
ENPM612	System and Software Requirements	
ENPM613	Software Design & Implementation	
ENPM614	Software Testing & Maintenence	
ENPM696	Reverse Software Engineering	
ENPM808	Advanced Topics in Engineering (ENPM808E)	
Other pre-approved electives:		12
ENPM691	Hacking of C programs and Unix Binaries	
ENPM694	Networks and Protocols	
ENPM808	Advanced Topics in Engineering (ENPM808B)	
ENPM808	Advanced Topics in Engineering (ENPM808D)	
ENPM808	Advanced Topics in Engineering (ENPM808X)	
ENPM809	Special Topics in Engineering (ENPM809P)	
ENPM809	Special Topics in Engineering (ENPM809X)	
ENPM690		
Total Credits		**30**

Communication and Signal Processing

Course	Title	Credits
Complete five of the following core courses:		15
ENPM600	Probability and Stochastic Processes for Engineers	
ENPM601	Analog and Digital Communication Systems	
ENPM602	Data Networks	
ENPM603	Theory and Applications of Digital Signal Processing	
ENPM616	Wireless Communications: Systems and Network Design Principles

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our electronic packaging Graduate Certificate in Engineering leverages the university's unique strength in reliability along with its expertise in electrical engineering, mechanical engineering, materials science, and business to empower students to further careers in areas such as avionics, automotive electronics, industrial motor drives, military electronics, and medical equipment. Course topics include basics of electronic system integration, heat transfer, thermal management, stress analysis, cost analysis, quality and reliability assessment, and prognostics and health management.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Drawing on the innovation and expertise of the University of Maryland Energy Research Center, the Energy Systems Engineering masters program prepares professional engineers for the multi-disciplinary challenges of this rapidly growing field. Students can build on the core

coursework through our defined elective sets in reliability engineering and energy systems or by mixing and matching technical electives.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Students choose five core courses, and five elective courses. All electives must be approved by the student's advisor.

Course	Title	Credits
Select five of the following core courses:		15
ENCH648	Special Problems in Chemical Engineering (ENCH648K - Advanced Fuel Cells and Batteries)	
ENCH648	Special Problems in Chemical Engineering (ENCH648L - Photovoltaics: Solar Energy)	
ENME701	Sustainable Energy Conversion and the Environment	
or ENPM624	Renewable Energy Applications	
ENPM654	Energy Systems Management	
ENPM622	Energy Conversion I - Stationary Power	
ENPM627	Environmental Risk Analysis	
ENPM656	Energy Conversion II -- Mobile Power	
Select five electives approved by advisor		15
Total Credits		**30**

Energy Systems Engineering (online) (Z082)

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Drawing on the innovation and expertise of the University of Maryland Energy Research Center, the Energy Systems Engineering masters program prepares professional engineers for the multi-disciplinary challenges of this rapidly growing field. Students can build on the core coursework through our defined elective sets in reliability engineering and energy systems or by mixing and matching technical electives.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Engineering and Public Policy (MEPP)

Graduate Degree Program
College: Engineering / Public Policy

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments. Late afternoon, evening, and 100% online classes are taught by the College Park faculty and experienced adjunct faculty at the College Park campus and designated learning centers in Maryland. For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Facilities and Special Resources

Courses in the Professional Master of Engineering program are currently offered on the College Park campus, at off-campus centers via video-teleconferencing, and 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening or at a time convenient for their schedule. Remote sites around the State of Maryland where our courses can be taken live via DETS are at the Universities at Shady Grove in Montgomery County, the University Center of Northeastern Maryland in Harford County, and the Southern Maryland Higher Education Center in St. Mary's County. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

The Clark School's Engineering Information Technology group also provides access to needed software and computer resources through dedicated virtual computer terminals that allow distance students full access to licensed software, libraries, databases, and specialized programs

This program is not currently accepting applications.

English Language and Literature (ENGL)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of English offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees; particular strengths of the department include early British literature; American literature; literature of the African diaspora; postcolonial and transnational literary studies; digital humanities; feminist theory and gender studies; and composition and rhetoric. The Department also offers a Master of Fine Arts degree in Creative Writing (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?CRWR) (See listing for Creative Writing (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?CRWR)). Most students enrolled in graduate programs in English Language and Literature seek employment in higher education, but many also seek non-academic employment in publishing, business and technical writing, administration, and personnel management. To assist with placement, the department has a Placement Director and the university has a Career Development Center.

Financial Assistance

The English Department, in conjunction with the College of Arts and Humanities and the Graduate School, awards a combination of fellowships and teaching assistantships to admitted PhD candidates. Limited financial aid (usually in the form of teaching assistantships) is available to some incoming MA students.

Contact

Tawes Hall
7751 Alumni Drive
University of Maryland
College Park, MD 20742
Email: englishgrad@umd.edu
Website: http://www.english.umd.edu
Courses: ENGL (p. 781)
Relationships: Comparative Literature (CMLT) (p. 136), Creative Writing (CRWR) (p. 147)

Admissions

General Requirements

1. Statement of Purpose: A statement addressing the intended focus of your graduate studies and how your past educational experiences have prepared you for this course of study. If applicable, this statement would also be the place to address any unusual challenges that you may have faced during your academic career and/or the formative nature of any extracurricular activities (i.e. athletics, outreach activities, clubs, etc.) that may have had an impact on your intellectual development. (If you are applying to the PhD program but would like to be considered for the MA in the event that a PhD spot is unavailable, please also indicate that here.)
2. Transcript(s)
3. TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

1. Letters of Recommendation (3)
2. Academic CV
3. Writing Sample: A single sample of critical writing of approximately 12-20 pages. While we encourage you to submit your best writing sample, we prefer a writing sample in your declared field of interest. The writing sample should include an updated works cited page to help us evaluate your critical and theoretical familiarity with a field, a period or a genre. (Uploaded to the Upload Requirements section of the application).

In addition to fulfilling Graduate School requirements, applicants to the M.A. degree program should present a 3.5 GPA in English and 24 hours of upper-level English courses. Applicants to the Ph.D. degree program should present at least a 3.7 GPA and a B.A. degree, normally in English Language and Literature. All M.A. and Ph.D. applicants should submit a single critical writing sample of 12-20 pages as indicated on the application guidelines. We accept general GRE scores but are waiving the requirement due to the COVID-19 pandemic. For best consideration, complete applications for all degree programs should be submitted by December 1. Applications are not accepted after December 1. The Admissions Committee will begin reviewing applications immediately. Admission is for the Fall semester only.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

RESOURCES AND LINKS:

Program Website: http://www.english.umd.edu
Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- English Language and Literature, Doctor of Philosophy (Ph.D.) (p. 184)
- English Language and Literature, Master of Arts (M.A.) (p. 184)

Facilities and Special Resources

Resources for research in the College Park and Washington, D.C. area are unsurpassed. The university's libraries hold over 2,000,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Folger Shakespeare Library, Dumbarton Oaks, the National Archives, the Smithsonian Institution, and the National Center for the Study of the Visual Arts among others

UMCP is a member of the Consortium of Institutions in the Washington area, which permits graduate students at College Park to enroll in courses at other universities for graduate credit at UMCP. Graduate students in English also may take courses for graduate credit at the Folger Institute, which runs a series of seminars by distinguished scholars each year.

English Language and Literature, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The M.A. degree program requires 30 credit hours of graduate work distributed to assure coverage of major historical fields. The student either may take 24 hours of coursework and write a thesis for the other six hours, or may take 30 hours of coursework and do a capstone writing project. The department also offers a special M.A. with a Concentration in Composition and Rhetoric; this degree program requires 30 credit hours of graduate work, provides thesis and non-thesis options, and balances courses in literature with courses in the theory of composition and rhetoric.

Literature concentration

Course	Title	Credits
ENGL601	Introduction to Graduate Studies	3
or ENGL602	Critical Theory and Literary Criticism	
Select one course in Critical Theory, Genre, or Rhetoric		3
Select one course in each of the following areas:		12
Medieval and Early Modern		
The Long 18th-century		
The Long 19th-century		
Modern and Contemporary		
Thesis or Non-thesis option:		**12**

ENGL799	Master's Thesis Research	
Electives		
Non-thesis:		
Electives		
Writing Project		
Total Credits		**30**

Writing studies and rhetoric

Course	Title	Credits
ENGL607	Readings in the History of Rhetorical Theory to 1900	3
ENGL775	Seminar in Composition Theory	3
or ENGL776	Seminar in Modern Rhetorical Theory	
Select four additional ENGL designated courses		12
Thesis or Non-thesis option:		**12**
Thesis:		
ENGL799	Master's Thesis Research	
Electives		
Non-thesis:		
Electives		
Capstone Project		
Total Credits		**30**

English Language and Literature, Doctor of Philosophy (Ph.D.)

Advance to Candidacy: In addition to the course requirements below, students must pass a qualifying examination in their areas of specialization and demonstrate, through examination or coursework, evidence of reading competence in a foreign language related to their areas of specialization.

Post-Candidacy: Students must complete at least 12 credits of ENGL899 Doctoral Dissertation Research as well as successfully defend and submit an original dissertation.

A minimum of 36 credits of coursework is required for students entering the doctoral program without an M.A. A minimum of 27 credits of coursework is required for students entering the doctoral program with an M.A.

Course	Title	Credits
Core Requirements		
ENGL601	Introduction to Graduate Studies	3
ENGL602	Critical Theory and Literary Criticism	3
ENGL611	Approaches to College Composition	3
Select five 700-level seminars		15
Select four additional courses 600-700 level		12
Reading knowledge of one language other than English		
Dissertation Research Requirements		
ENGL899	Doctoral Dissertation Research	12
Total Credits		**48**

Entomology (ENTM)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Department of Entomology offers Doctor of Philosophy and Master of Science degrees. Graduate students may conduct research in a range of both basic and applied topics, including insect ecology and behavior; physiology, morphology, evolution and biosystematics; insect pathology,

molecular biology and genetics; aquatic entomology; pollinator biology and apiculture; and integrated pest management.

Employment opportunities for graduates exist in industry; academia and extension; federal, state, and local governments; private and non-profit arenas; and in international and national spheres.

Financial Assistance

Graduate students are supported primarily in two ways. Many students are supported by extramural funding sources, usually obtained by the student's faculty advisor or by the student for research on a specific topic. The second type of support is provided by the department from internal funds via University and departmental fellowships and teaching and research assistantships. Teaching and research assistantships are available on a competitive basis. Teaching assistants usually instruct undergraduate laboratory and recitation classes and receive in return a tuition waiver of ten credits each semester. Those students whose records indicate superior academic achievement and promise may also be competitive for University and departmental fellowships. Several part-time employment opportunities are also available in governmental and private research laboratories in the area. Regardless of the initial source of funding, the department makes a financial commitment to each graduate student. In the case of master's students, support is provided for the first three years of the program only. In the case of doctoral students, five years of support is provided but must be used during the first six years of the student's program. Support is usually for the full 12 months per year.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Optional Writing Samples (up to 2)

Students applying for graduate work in entomology are expected to have a strong background in the biological or agricultural sciences, chemistry, genetics, and mathematics. An undergraduate degree in entomology is not required, but a strong basic preparation is preferred for admission to the program.

Admission is granted on the basis of the following criteria by the Graduate Affairs Committee: Analysis of transcripts, including course selection and GPA; letters of recommendation; statement of purpose; and acceptance by a graduate faculty advisor. International applicants must also submit proof of English proficiency (TOEFL, iBT or IELTS scores). Acceptance by an advisor is absolutely required; thus, it helps to make contact with faculty when applying.

Upon admission to the MS or PhD program, the student's study committee suggests a program of coursework and approves a detailed research proposal.

Facilities and Special Resources Overview

The department is housed in a modern research facility on the College Park campus, where state-of-the-art offices, laboratories, environmental growth chambers, multimedia classrooms, and lecture halls provide an excellent environment for research and teaching. Students have individual workstations and access to sophisticated computer graphic facilities. The department also shares extensive technical expertise and scientific equipment with other departments on campus. The University's strategic location in the Washington, DC area provides many opportunities for students to conduct research and gain hands-on experience in federal facilities, such as the Smithsonian Institution, USDA-ARS Beltsville Agricultural Research Center, Walter Reed Army Institute of Research, NIH, and more. Vast resources are available in the University's library system and nearby federal libraries. The USDA's National Agriculture Library at Beltsville is only four miles from campus, and the Library of Congress is in nearby Washington, DC. Besides the main campus, the Maryland Agriculture Experiment Station has Research & Education Centers in the state where field and laboratory work is carried out on urban and

agricultural insects. Land use and technical services at these centers are available to faculty and students.

Institutional Partners

The University of Maryland is a large Research University located just outside of Washington, DC. Our unique location enables us to offer research opportunities with neighboring universities, research institutes, and state and federal laboratories, including:

- USDA Beltsville Agricultural Research Center (https://www.ars.usda.gov/northeast-area/beltsville-md-barc/beltsville-agricultural-research-center/)
- Smithsonian National Museum of Natural History (https://naturalhistory.si.edu/)
- Smithsonian Conservation Biology Institute (https://nationalzoo.si.edu/center-for-conservation-genomics/)
- NASA Applied Sciences Program DEVELOP (https://develop.larc.nasa.gov/about.php)
- National Institutes of Health (https://www.nih.gov/)
- Walter Reed Army Institute of Research (https://www.wrair.army.mil/)
- United States Department of Agriculture National Institute of Food and Agriculture (https://nifa.usda.gov/)
- USGS Patuxent Wildlife Research Center (https://www.usgs.gov/centers/pwrc/)
- Environmental Protection Agency (https://www.epa.gov/)
- National Park Service (https://www.nps.gov/)

Campus Resources

The Plant Sciences Building is adjacent to the Biology-Psychology, Bioscience Research, and Microbiology Buildings, which facilitates interaction between multiple departments – Entomology, Plant Sciences, Biology, Cell Biology & Molecular Genetics, Neuroscience & Cognitive Science, and Microbiology – in a highly collaborative environment.

Research Farms & Greenhouse

The department is affiliated with both the College of Computer, Mathematics & Natural Sciences (https://cmns.umd.edu/) (CMNS) and Agriculture & Natural Resources (https://agnr.umd.edu/) (AGNR). Our close ties to AGNR allow faculty and students to utilize the Maryland Agricultural Experiment Station, which maintains Research & Education Centers at nine sites across the state where field and laboratory work is carried out on urban and agricultural insects.

At each research farm, faculty and students have access to plot space and experienced farm crews that can help maintain research/training plots. Each farm is equipped with tractors, planters, sprayers and irrigation equipment as well as crop management and harvest equipment to carry out research. Each facility is also equipped with wagons for transporting stakeholders on farm tours.

Faculty and students also have access to a state-of-the-art greenhouse (https://agnr.umd.edu/research/research-and-education-centers-locations/research-greenhouse-complex/) on campus. This resource is a 2-acre site with 45,000 square feet in greenhouse space and an outdoor nursery area.

Insect Rearing & Animal Housing

Insect rearing facilities include Percival incubators within laboratories and walk-in growth chambers in the department, all of which have temperature, light and humidity controls. A fly food facility (housed on the 5th floor of the Plant Sciences Building) is shared by five fly groups on campus, providing fly food to each once per week at minimal cost.

The Animal & Avian Sciences Building provides housing for the animal subjects (https://ansc.umd.edu/research/research-facilities/) involved in research and teaching programs at UMD. The facility can accommodate mammalian, reptilian, avian, and aquatic animal subjects. It contains modern, climate controlled, and restricted access space for animal housing, as well as ancillary rooms used to perform surgeries, conduct research, mix feed, and wash cages. This facility is located within walking distance of the Plant Sciences Building.

High Performance Computing

Faculty and students at UMD are provided access to Deepthought2, MARCC/Bluecrab, and Juggernaut high-performance computing clusters (http://hpcc.umd.edu/) through the Division of Information Technology (DIT). A variety of open-source software packages relevant to biological research are available, maintained, and updated on these clusters by DIT.

Core Facilities

The College of Computer, Mathematics, and Natural Sciences and the University maintain a large number of Core Facilities (http://biosciencecores.umd.edu/), all of which are available to faculty and students.

- Imaging Core (http://biosciencecores.umd.edu/imaging.html)
- Genomics Core (http://biosciencecores.umd.edu/genomics.html)
- Proteomics Core (http://biosciencecores.umd.edu/proteomics.html)
- Flow Cytometry Core (http://biosciencecores.umd.edu/flow-cytometry.html)

Entomology, Master of Science (M.S.)

Thesis only: 30 credits

Students in the Entomology M.S. Program are required to complete 24 credits of coursework, including two core courses and three graduate topic seminars (ENTM798 or equivalent). The three topic seminars must include a Responsible Conduct of Research seminar. In addition, students are required to register for and attend all Entomology Colloquium seminars and complete 6 credits of ENTM799. Please note, M.S. students that hold a Teaching Assistantship must complete a course in TA training, which is currently offered as ENTM701.

The Entomology M.S. program provides diverse opportunities for the selection of a thesis question and composition a thesis advisory committee.

Other program requirements include a minimum of one thesis advisory committee meeting per year and submission of an annual progress report. Students in the M.S. program are required to present their final thesis research to the department in a public seminar, such as the Entomology Colloquium Series.

Course	Title	Credits
Required courses:		
BSCI481	Insect Diversity and Classification	4
BSCI482	Insect Physiology and Molecular Biology	4
Remainder of coursework approved with advisor:		16

	Complete three topic seminars (ENTM798 or equivalent) including a seminar in Responsible Conduct of Research	
	Entomology Colloquium (ENTM788C) each semester	
	*TA training (ENTM701) is required for students with a Teaching Assistantship)	
Thesis research:		
ENTM799	Master's Thesis Research	6
Total Credits		**30**

Entomology, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 28 credits of coursework, including three core courses and five topic seminars (ENTM798 or equivalent). The five topic seminars must include a Responsible Conduct of Research seminar. In addition, students are required to register for and attend all Entomology Colloquium seminars until they advance to candidacy by passing an oral qualifying exam and proposal defense. Candidates must complete 12 credits of ENTM899. Please note, doctoral students that hold a Teaching Assistantship must complete a course in TA training, which is currently offered as ENTM701.

The Ph.D. program provides diverse opportunities for the selection of a dissertation question, composition of a dissertation advisory committee, and selection of an area of specialization. Each student's specialization is determined under the guidance of the dissertation advisory committee.

Other program requirements include a minimum of one dissertation advisory committee meeting per year and submission of an annual progress report.

Advance to Candidacy: In addition to the course requirements, students must pass an oral qualifying examination and proposal defense for advancement to candidacy.

Post-Candidacy: Complete at least 12 credits of ENTM899 Doctoral Dissertation Research and successfully defend and submit an original dissertation. Doctoral students are required to present their final dissertation research to the department in a public seminar, such as the Entomology Colloquium seminar series.

Course	Title	Credits
Required courses:		
BSCI480	Arthropod Form and Function	4
BSCI481	Insect Diversity and Classification	4
BSCI482	Insect Physiology and Molecular Biology	4
Remainder of Coursework Approved with Advisors		16
ENTM798	Topic Seminar (Complete five topic seminars including a seminar in Responsible Conduct of Research)	
ENTM788	Entomological Topics ((ENTM788C Entomology Colloquium each semester until candidacy))	
*TA training (ENTM701) is required for students with a Teaching Assistantship)		
Dissertation Research Requirements		
ENTM899	Doctoral Dissertation Research	12
Total Credits		**40**

Environmental Engineering (PMEN)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

This program prepares graduates to better preserve and protect human and environmental health from harmful activities, contaminants, and pathogens. Courses provide insight into pressing issues such as drinking water supply and treatment, wastewater treatment, air pollution management, solid waste management, and sustainable energy systems.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Environmental Health Sciences (ENVH)

Graduate Degree Program
College: School of Public Health

abstract

The **M.S. program** in Environmental Health Sciences, within the Maryland Institute for Applied Environmental Health (https://sph.umd.edu/academics/departments-units/maryland-institute-applied-environmental-health/) (MIAEH), School of Public Health, provides advanced graduate-level training with a focus on research and mitigation of major public health concerns influenced by environmental issues. The M.S. in Environmental Health Sciences covers an essential core of knowledge in environmental health and exposures sciences, epidemiology and biostatistics and includes completion of practical research training, culminating in a Master's Thesis. Within the program, there is a significant public health focus on populations of high vulnerability or those underserved, including those experiencing environmental injustice due to poverty or race. See our website (https://sph.umd.edu/academics/masters-degrees/ms-environmental-health-sciences/) for more information.

Students in the **Ph.D. program** in Environmental Health Sciences master an essential core of knowledge in environmental health, epidemiology and biostatistics. Elective courses and rotations with faculty, in field studies and/or laboratories provide students key skills required to specialize within the broader area of environmental health and become independent researchers. There is a significant research focus on events or outcomes affecting populations of high vulnerability or those underserved; including those experiencing environmental injustice due to poverty or race. See our website (https://sph.umd.edu/academics/doctoral-degrees/phd-environmental-health-sciences/) (https://sph.umd.edu/academics/masters-degrees/ms-environmental-health-sciences/)for more information.

Courses: MIEH (https://umd-curr.courseleaf.com/graduate/courses/mieh/) SPHL (https://umd-curr.courseleaf.com/graduate/courses/sphl/)

Admissions

The **M.S.** and **Ph.D.** programs in Environmental Health Sciences have a two-part application process. Applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course (M.S. applicants)
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and research areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application (Step 1) & UMD Supplemental application (Step 2)
- Three letters of recommendation
- Resume or curriculum vitae
- A master's degree in public health or a related field preferred (Ph.D. applicants)
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Scores submission is **optional***. If you decide to submit your GRE scores, please have ETS send scores to SOPHAS (code 0485) and UMD (code 5814)
- A writing sample is **optional for M.S.** applicants and **required for Ph.D.** applicants, such as a published manuscript, undergraduate or graduate thesis, research paper. If you submit a published manuscript and you are not the first author you should describe the contributions you made to the publication.
- Applicants being considered for the program will be invited for a virtual interview via Zoom
  **The review committee will evaluate GRE scores if they are submitted. The lack of scores will not negatively impact applications. If submitted, the program considers competitive scores to be 50th percentile or higher in each of the three parts.*
  Note: Course work in environmental health or science, or public health/public policy, or biological/chemical sciences, or biochemistry, or biotechnology, or engineering, or geography/geology, or math, or biostatistics, or epidemiology, or medical sciences, or anthropology, preferred.

For detailed instructions on how to submit your application, please visit the School of Public Health Website: (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/)

Applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	Ph.D. - November 11, 2022
	M.S. - December 16, 2022 (priority) / April 7, 2023 (final)
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	Ph.D. - November 11, 2022
	M.S. - December 16, 2022 (priority) / March 3, 2023 (final)

Thesis:		
MIEH799	Master's Thesis Research	
Non-thesis:		
MIEH789	Independent Study	
Elective		
Total Credits		**32**

Environmental Health Sciences, Doctor of Philosophy (Ph.D.)

The PhD program in Environmental Health Sciences consists of a minimum of 46 credit hours of graduate courses depending on the incoming student's previous coursework. In particular, students without an MPH degree will require additional coursework as required by the public health accrediting body (CEPH). Graduate courses include (1) core courses within environmental health, epidemiology and biostatistics; (2) supporting courses in environmental health research, ethics, public health, and grant writing; (3) specialized courses selected within the research foci; and (4) dissertation credits. The program can be completed on either a full- or part time basis. It is anticipated that students will complete more than the minimum number of credits.

Advance to Candidacy: Students must successfully complete a written and oral comprehensive exam in order to advance to candidacy.

Post-Candidacy: Students must pass an oral defense of a written dissertation research proposal, complete a minimum of 12 credits of MIEH899 doctoral dissertation research, as well as submit and defend an original dissertation.

Some core coursework may be waived based on previous courses taken at UMD or in another master's program. Students would not be able to waive out of all rotations or the seminar requirements. Rotations can be in physical labs or with faculty conducting non-laboratory based research. At least 1 rotation must be outside of the students focus area. Students would not be able to waive out of any of the 12 to 15 credits required for the specialization area. No more than 6 credits of MIEH 898 could be taken as part of the specialization area.

Course	Title	Credits
MIEH600	Foundations of Environmental Health	3
MIEH700	Advanced Environmental Health	3
MIEH720	Principles of Toxicology	3
MIEH740	Environmental Health Risk Assessment	3
MIEH771	Exposure Assessment of Environmental Hazards	3
SPHL602	Foundations of Epidemiology and Biostatistics	4
SPHL603	Public Health Data Laboratory	1
EPIB651	Applied Regression Analysis	3
MIEH609	Methods in Environmental Health	3
SPHL611	Public Health Ethics	1
or SPHL612	Research Ethics	
MIEH688	Seminar in the Maryland Institute for Applied Environmental Health: Current Topics in Environmental Health	3
MIEH899	Doctoral Dissertation Research	12
SPHL600	Foundations of Public Health	3
Specialization courses		15
Total Credits		**60**

Environmental Health Sciences (MIEH)

Graduate Degree Program
College: School of Public Health

Abstract

The MPH program within the Maryland Institute for Applied Environmental Health (https://sph.umd.edu/academics/departments-units/maryland-institute-applied-environmental-health/), School of Public Health, prepares graduates to work in public health service as practitioners, researchers, administrators, and consultants. The mission

of the MPH program with a concentration in Environmental Health Sciences is to promote the development of professional practitioners and researchers in environmental health who understand the science, theory and practice of public and environmental health, and can apply this knowledge toward the detection, management, and prevention of environmental health problems. There is a significant focus on health outcomes in populations of high vulnerability or those that are underserved, including those experiencing environmental injustice due to poverty or race. See our website (https://sph.umd.edu/academics/masters-degrees/mph-master-public-health/mph-environmental-health-sciences/) for more information.

Admissions

The **MPH in Environmental Health Sciences** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- At least one undergraduate math course
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, areas of interest, and faculty you are interested in working with

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application (Step 1) & UMD Supplemental application (Step 2)
- Three letters of recommendation
- Resume or curriculum vitae
- Official GRE test scores submission is optional*
- Fit between applicant's goals and expectations and program degree competencies
- A writing sample is optional, such as a published manuscript, undergraduate or graduate thesis, research paper. If you submit a published manuscript and you are not the first author, describe the contributions you made to the publication
- Applicants being considered for the program will be invited for a virtual interview via Zoom
  **The review committee will evaluate GRE scores if they are submitted. The lack of scores will not negatively impact applications. If submitted, the program considers competitive scores to be 50th percentile or higher in each of the three parts.*

  Note: course work in environmental health or science, or public health/public policy, or biological/chemical sciences, or biochemistry, or biotechnology, or engineering, or geography/geology, or math, or biostatistics or epidemiology, or medical sciences, or anthropology, preferred.

Applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)
- MIEAH TOEFL scores requirements: 100 Overall score (Speaking, 24; Listening 25; Reading 26; Writing 25)

Facilities and Special Resources

The proximity of the University of Maryland, College Park to the nation's capital offers prospective students unparalleled opportunities for internships and research experiences in public health, including placements at the National Institutes of Health, the CDC Washington Office, the U.S. Department of Health and Human Services, Children's National Medical Center, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies. The diversity of cultural and socioeconomic groups, communities, industries, and health organizations provides a rich environment for learning, research, public policy analysis, and service.

Environmental Health Sciences, Master of Public Health (M.P.H.)

Non-thesis only: 45 credits

Course	Title	Credits
SPHL601	Core Concepts in Public Health	1

Environmental Science and Technology (ENST)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Department of Environmental Science and Technology (ENST) offers graduate programs leading to the Master of Science and Doctor of Philosophy degrees. ENST students can choose to work within one of four specializations: Soil and Watershed Sciences; Ecological Technology Design; Wetland Science; Ecosystem Health and Natural Resource Management.

Financial Assistance

ENST offers a number of graduate assistantships to qualified applicants that are awarded on a competitive basis. To apply, use the form for requesting financial assistance included in the Graduate School application packet. In addition to a competitive stipend, graduate assistants receive tuition remission and are offered excellent health benefits by the University of Maryland.

Courses: ENST

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application (https://drupal-base-s3-drupalshareds3-1qwpjwcnqwwsr.s3.amazonaws.com/gradschool/s3fs-public/uploads/admissionsforms/umd_supplementary_application_enst.pdf)
- Supplementary Application Two
- Writing Sample (optional)
- Description of Research/Work Experience

Students seeking admission should have strong training in the basic sciences and mathematics. To be admitted with full admission status, a student must have completed a minimum of one semester of Calculus and a total of at least 20 credits in some combination of basic level Chemistry, Physics, Biology or Mathematics (beyond Calculus I). It is also helpful for applicants to have completed other courses in science and engineering. Applicants to the M.S. program must have earned a B.S. degree in a related field with an undergraduate cumulative GPA of 3.0 or higher. Applicants to the Ph.D. degree program must have earned an M.S. Degree in a closely related field. In special cases students may be admitted to a Ph.D. program without first completing an M.S. degree provided these students have:

1. an exceptional academic record and test scores; and
2. have demonstrated significant research experience during their B.S. program (such as completion of a research based honors thesis.)

Graduate Record Examination scores (GRE - General Test) are required of all applicants. International applicants must also submit TOEFL scores

Application Deadlines

Program Website: http://www.enst.umd.edu
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Environmental Science and Technology, Doctor of Philosophy (Ph.D.) (p. 195)
- Environmental Science and Technology, Master of Science (M.S.) (p. 195)

Facilities and Special Resources

The Department has many well-equipped laboratories designed to carry out basic and applied research in Soil and Watershed Sciences, Ecological Technology Design, Wetland Science, and Ecosystem Health and Natural Resources Management. Laboratories are located on the College Park campus in H.J. Patterson Hall and the ANSC/AGEN Building. Greenhouse facilities are available on campus and a statewide network of research and education centers as well as our proximity to Chesapeake Bay provide access to a wide range of environmental conditions for research. Students have access to computer resources in the department and a comprehensive computer center located on campus. The University Libraries on campus and the National Agricultural Library located nearby, supplemented by the Library of Congress, make the library resources accessible to students among the best in the nation. Many ENST projects are conducted in cooperation with other departments on campus and with professionals at various scientific centers in the area. Scientists at the USDA-ARS, US Geological Survey, the National Academy of Sciences, NASA, National Institutes of Health, Department of Energy, Smithsonian, and National Park Service, US Fish & Wildlife Service, as well as other agencies, have cooperated with ENST faculty on various projects. Scientists from some of these agencies have adjunct appointments in the Department, have taught special courses at the University, and participate on graduate committees.

Environmental Science and Technology, Master of Science (M.S.)

Thesis only: 30 credits

Students must complete 30 credits of coursework including 6 credits of thesis research. All students must select an area of specialization and complete the specific track requirements.

Course	Title	Credits
Required courses:		
ENST602	Research Principles and Methodology in Environmental Scienceand Technolgy	3
ENST702	Environmental Science and Technology: Communication and Professional Development	2
ENST798	Graduate Seminar	2
ENST799	Master's Thesis Research	6
One graduate level statistics course		4
Choose an area of specialization		**minimum of 12 credits**
Soil and Watershed Sciences:		
Courses must be from the following five areas: soil chemistry, soil physics, pedology, soil biology, soil fertility		
Ecological Technology Design:		
Six credits of graduate level courses in ecology and six credits of graduate level courses in ecological design or related engineering courses		
Wetland Science:		
Minimum of three credits must be earned from each of these groups: Ecology, Soil Science, and Hydrology		
Ecosystem Health & Natural Resource Management:		
ENST604	Advanced Ecological and Natural Resource Ethics	
Nine additional credits in Ecosystem Health and Natural Resource Management		

Environmental Science and Technology, Doctor of Philosophy (Ph.D.)

All ENST Ph.D. students are expected to complete a minimum of 50 credits beyond the B.S. degree (in addition to research credits ENST898 and ENST899) and are required to complete ENST602, ENST702 and two graduate level statistics courses (these can be taken during either the M.S. or Ph.D. program), and two semesters of Graduate Seminar (ENST798) beyond any ENST798 taken during the MS program. Each student must have completed (prior to or during the PhD) all the courses (12 credits) required for the MS specialization. In addition, each student must take courses during the PhD as specified below for the specialization. Each student's advisory committee needs to approve all specialization courses.

Advance to Candidacy: In addition to the course requirements, students must successfully pass a comprehensive exam and submit a research proposal approved by the student's committee.

Post-Candidacy: Complete at least 12 credits of ENST899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits
Required courses:		
ENST602	Research Principles and Methodology in Environmental Scienceand Technolgy	3

ENST702	Environmental Science and Technology: Communication and Professional Development	2
ENST798	Graduate Seminar	2
ENST799	Master's Thesis Research	6
Select two graduate level statistics courses, if not already completed in the M.S. program		
Choose one of the four areas of specialization		
Soil and Watershed Sciences:		
Complete one semester of graduate level physical chemistry or biochemistry and at least one additional graduate level course in chemistry, biochemistry, physics, mathematics, engineering, or computer science		
Ecological Technology Design:		
Complete one semester of graduate level systems modeling and one additional graduate level course in ecology, ecological design or ecological engineering		
Wetland Science:		
Complete one graduate level course in modeling; two additional graduate level courses from within the areas of Ecology, Soil Science, or Hydrology		
Ecosystem Health and Natural Resource Management:		
Complete three additional graduate level courses in Ecosystem Health and Natural Resource Management		
Dissertation Research Requirements		
ENST899	Doctoral Dissertation Research	12

Epidemiology (EPDM)

Graduate Degree Program
College: Public Health

Abstract

Epidemiology is the study of the distribution and determinants of disease, and other health states in human populations. As the fundamental science of public health practice, epidemiology provides the conceptual and applied tools necessary for the study of public health problems. The MPH with a concentration in Epidemiology is a 45-credit professional degree that prepares graduates to work in public health services as practitioners, researchers, administrators, and consultants. A full-time student may complete our program in 2 years. Part-time students may take up to 4 years to complete the program. The majority of courses are offered in the evenings. In addition to coursework, all epidemiology master's students are required to complete a 240-hour internship and a capstone project.

Our proximity to the nation's capital offers students unparalleled opportunities for research experiences in public health, including placements at the National Institutes of Health, National Center for Health Statistics, Centers for Disease Control, Food and Drug Administration, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Email: xinhe@umd.edu

Website: http://sph.umd.edu/department/epib **(**http://sph.umd.edu/department/epib/**)**

Courses: EPIB **(**https://umd-curr.courseleaf.com/graduate/courses/epib/**)** SPHL **(**https://umd-curr.courseleaf.com/graduate/courses/sphl/**)**

Relationships: Biostatistics (BIOS) **(**p. 89**)** Epidemiology (EPID) **(**p. 197**)**

Admissions

The **MPH in Epidemiology** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course (M.S. applicants)
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Three letters of recommendation
- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Scores submission is optional*. If you decide to submit your GRE scores, please have ETS send scores to SOPHAS (code 0485)
  **The review committee will evaluate GRE scores if they are submitted. The lack of scores will not negatively impact applications. If submitted, the program considers competitive scores to be 50th percentile or higher in each of the three parts.*

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional

information (https://gradschool.umd.edu/admissions/international-admissions/)

- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/))

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	April 7, 2023
	The priority deadline for both the SOPHAS and the UMD applications is December 16, 2022.
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	March 3, 2023
	The priority deadline for both the SOPHAS and the UMD applications is December 16, 2022.

Requirements

- Epidemiology, Master of Public Health (M.P.H.) (p. 197)

Facilities and Special Resources

The Department of Epidemiology and Biostatistics faculty includes individuals with multi-faceted interests in both epidemiology and biostatistics. Our faculty has multi-faceted interests and expertise in the epidemiology of infectious disease and chronic disease with particular focus in the areas of HIV/STIs, cancer, health disparities, cardiovascular disease, obesity/physical activity, and sexual and reproductive health. Additional areas of specialization include social and behavioral determinants of health, aging, cultural competency, and community-based interventions. Biostatistics faculty apply statistical techniques including survival and longitudinal analysis, computational statistics, statistical analysis of genomic and proteomic data, machine learning, neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data.

Epidemiology, Master of Public Health (M.P.H.)

Epidemiology (EPID)

Graduate Degree Program
College: Public Health

Abstract

The Department of Epidemiology and Biostatistics offers a Ph.D. program in Epidemiology. Students in the Ph.D. program in Epidemiology master core knowledge in epidemiologic and biostatistical methods related to the design, implementation and evaluation of public health studies surrounding psychosocial, behavioral, biological, and cultural factors. Students may work with their advisor to design their own research specialization or they may apply to one of our two specializations:

1. Social Epidemiology or
2. Environmental Epidemiology.

Our students have full access to faculty who will guide you through all phases of the program to ensure your educational goals are met. Our Washington, DC area location provides unparalleled opportunities for research experiences in public health, including placements at the U.S. Department of Health and Human Services (e.g., National Institutes of Health, National Center for Health Statistics), Children's National Medical Center, the Maryland Department of Health and Mental Hygiene, and many other national, state, and local health agencies.

Financial Assistance

The Department offers a limited number of fellowships, and graduate teaching and research assistantships.

neuroimaging statistics, (network) meta-analysis, missing data analysis, Bayesian hierarchical methods, and bioinformatics to analyze and interpret health data.

Epidemiology, Doctor of Philosophy (Ph.D.)

The PhD in Epidemiology requires a minimum of 64 credits beyond the master's degree in epidemiology or public health, including 12 credits of EPIB899. Students are also required to complete a minimum of 12 credits in a specialization cognate area, included in the 64 credit total. There is an additional 13 credits of prerequisite courses that must be completed during the doctoral program or prior to admission. Students who have not taken the prerequisites would complete a total of 77 credits.

Advance to Candidacy: In addition to the course requirements below, students admitted to the Ph.D. program advance to candidacy by passing a written comprehensive examination with an oral defense.

Post-Candidacy: After advancement to candidacy, students must complete a dissertation proposal and oral defense, followed by successful completion of the doctoral dissertation and oral defense.

Ethnomusicology (MUET)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Music offers programs of study leading to the Master of Arts degree with areas of specialization in ethnomusicology, music history and literature (musicology), music education, and music theory; the Master of Music degree with areas in performance, composition, conducting, and music education; the Doctor of Philosophy degree with areas of specialization in ethnomusicology, musicology, music education, and music theory; and the Doctor of Musical Arts degree with areas of specialization in composition, performance, and conducting.

Financial Assistance

A number of competitive fellowships, graduate assistantships, teaching assistantships, opera assistantships, and orchestral assistantships are available. Preference for financial assistance will be given to those who have filed an application for admission to the University and the School of Music Supplemental Application by December 1 (for performance programs) and January 15 (for Music Education only) and have been officially admitted.

Contact

School of Music: The Academic Handbook is available online (http://www.music.umd.edu/current_students/handbooks/) and provides descriptive information, details of course requirements, examination procedures, and graduation requirements for the M.A., M.M., D.M.A., and Ph.D. degree programs. International students should read the information contained in the International Applicants section of the Graduate Admission Application.

Facilities and Special Resources

With approximately 300 public performances each year—including student recitals and more than thirty ensembles—School of Music students have robust performance opportunities The School of Music also hosts numerous guest clinicians each year and presents the Renegade Series, which brings to campus some of the most visionary artists in our field. As one of the nation's leading public research universities, the University of Maryland provides a wealth of opportunities to learn from and collaborate with scholars in a variety of disciplines. The School of Music makes its home in the Clarice Smith Performing Arts Center, which serves as an inter-disciplinary laboratory for the arts. The building's six performance halls, the Michelle Smith Performing Arts Library, specialized rehearsal rooms, and classrooms provide students with all the resources needed to become twenty-first century artist-citizens. The Clarice's presenting arm provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent artists-in-residence have included the St. Lawrence String Quartet, the Cappella Pratensis, Etienne Charles, Tine Thing Helseth, Jeremy Denk, and Dawn Upshaw. The Michelle Smith Performing Arts Library (MSPAL) ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

The surrounding DC-Baltimore region offers a host of community engagement opportunities. Our students can often be seen performing at major venues such as The John F. Kennedy Center for the Performing Arts, Strathmore Hall and the Phillips Collection. We also present at intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre. Within a few miles of our home in College Park are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

Ethnomusicology, Master of Arts (M.A.)

Students entering Spring 2020 or later:

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

The Master of Arts Degree (Thesis Option in Ethnomusicology, Music Education, Musicology or Music Theory; Non-Thesis Option in Ethnomusicology or Musicology requires a minimum of 30 credit hours. A grade of B- or better is required in all courses used to fulfill requirements for the degree. Six credits of thesis research or six credits of additional seminars are required. An oral defense of the thesis and a written comprehensive examination must be passed. Specific courses are required in each area of specialization.

Students must complete the following courses.

Course	Title	Credits
Required courses:		
MUSC677	Introduction to Ethnomusicology	3
MUSC646	Introduction to Musicology	3
MUSC632	The Anthropology of Music	3
MUSC633	Field Methods in Ethnomusicology	3
Other Studies in Music		12
Thesis or Non-Thesis Requirements		
Select one of the following:		6
Thesis:		
MUSC799	Master's Thesis Research	
Non-Thesis:		
Two seminar courses		
Total Credits		**30**

Ethnomusicology, Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree requires the satisfactory completion of a body of coursework that, in the student's and the Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy. In addition to this pre-candidacy coursework, doctoral students are required to complete 12 credits of MUSC899. A grade of B- or better is required in all courses used to fulfill requirements for the degree. In consultation with the academic advisor, the student will nominate a dissertation committee. The student

must submit a detailed dissertation prospectus to the members of the dissertation committee and the Graduate Director, and must be admitted to candidacy prior to the approval of the dissertation committee by the Graduate School. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Philosophy degree requires a dissertation.

Post-Candidacy: Complete at least 12 credits of MUSC899 doctoral dissertation research and successfully defend and submit an original dissertation.

Course	Title	Credits
Required courses:		
MUSC677	Introduction to Ethnomusicology	3
MUSC646	Introduction to Musicology	3
MUSC632	The Anthropology of Music	3
MUSC633	Field Methods in Ethnomusicology	3
MUSC679	Seminar in Ethnomusicology (two seminars, 3 cr. each)	6
Electives		3
Doctoral Dissertation Research Requirements		
MUSC899	Doctoral Dissertation Research	12
Total Credits		**33**

Public Management (Executive) (EXPM)

Graduate Degree Program
College: Public Policy

Abstract

The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Family Science (FMSC)

Graduate Degree Program
College: Public Health

Abstract

The Doctor of Philosophy (Ph.D.) program in Family Science provides an interdisciplinary, research-oriented approach to the discovery and application of knowledge about families. This exciting program examines both internal family processes and the dynamic interaction of families with the biological, psychological, social, political, and economic aspects of their environment. Graduates are prepared for a number of careers in the public, non-profit, and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service programs.

The Ph.D. program adopts an ecological or systems approach to the study of families and the problems they face in today's society. The program of study provides doctoral students with a broad knowledge of family theory, research methodology, family policy, family programs, ethnic families, and major issues confronting contemporary families. Students also learn to design, implement, and evaluate culturally-sensitive interventions addressing family needs and to analyze the consequences of public/private policies on family well-being.

Students applying to the PhD program in Family Science should have a Master's degree in Family Science or a related behavioral or social science. From time to time, a student who seeks to combine clinical work with research is accepted into the Family Science Ph.D. program with only a Bachelor's degree, but they must also simultaneously apply to, and be accepted into the Master of Science (M.S.) degree in Couple and Family Therapy. They then must complete this degree before beginning the Ph.D. program.

The Department of Family Science prepares students to describe, explain, and improve the quality of family life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a system or ecological paradigm, combining the perspectives of interrelated professional fields including family science, couple and family therapy, maternal and child health, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non-profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service and public health programs.

Financial Assistance

Fellowships and Graduate Assistantships are available to students admitted into the Family Science Ph.D. program.

Admissions

The **Ph.D. program in Family Science** accepts applications through the TerpEngage Graduate Admissions System (https://terpengage.force.com/community/CustomLoginPage/?GradApp=True).

GENERAL REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose

PROGRAM-SPECIFIC REQUIREMENTS

- Three letters of recommendation
- Resume or curriculum vitae
- One writing sample is required. Example writing samples include published manuscript, undergraduate or graduate thesis, research paper, etc. If you submit a published manuscript and you are not the first author describe the contributions you made to the publication.
- GRE scores are **waived** for this program. Please do not submit GRE test scores.

Note for applicants with foreign credentials:

- The UMD graduate application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

Requirements

- Family Science, Doctor of Philosophy (Ph.D.) (p. 203)

Facilities and Special Resources

The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Center for Healthy Families: This Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

Family Science, Master of Science (M.S.)

Students interested in the M.S. degree should see the Couple and Family Therapy (p. 146) program page.

The CFT curriculum has three parts: didactic coursework, clinical practica, and supervised client contact. The minimum total credits required are 51 for the non-thesis option.

Supervised client contact begins in the student's first semester. Clinical students are required to gain 400 hours of face-to-face client contact, and 250 of these hours must be relational (with couples or families). The Center for Healthy Families, the couple and family therapy clinic operated by the Department, offers the opportunity to gain these hours. Clinical students receive 100 hours of supervision, both individual and group, for their client contact hours. Supervision in the Department's clinic is provided through a range of techniques including case discussion, one-way mirror observation, video review, co-therapy, and telephone consultation during live sessions. Students may choose to do some of their clinical work in a variety of available externship sites in the local area.

Family Science, Doctor of Philosophy (Ph.D.)

All Ph.D. students must complete foundation coursework required for a master's degree in Family Science. At the discretion of the Department's Graduate Committee, students entering the Ph.D. program with a master's degree in a related discipline may make up deficiencies in coursework through classes taken at the beginning of the program. Students admitted full-time to the Ph.D. program post-master's can complete this program within three years, but typically finish within four years. Doctoral students must complete 57 credits beyond the master's degree.

Advance to Candidacy: In addition to the course requirements below, students must also complete a research internship paper (FMSC 689) and pass a qualifying exam in order to advance to candidacy.

Post-Candidacy: Complete at least 12 credits of FMSC899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits
Required courses:		
FMSC601	Doctoral Seminar in the Process of Inquiry	1
FMSC606	Ethnic Families and Health Disparities	3

Finance (BMFN)

ABSTRACT

Maryland Smith's Master of Finance program gives you the advanced skills you'll need to launch an exciting career in finance.

- Explore key finance concepts and learn the latest industry technologies, such as Python and R
- Combine the theories you learn in class with projects and experiences that mirror what you'll do in the workplace
- Learn useful skills that can prepare you to take the Certified Financial Analyst (CFA) and the Financial Risk Manager (FRM) exams
- Gain career insights from Maryland Smith's finance career coaches and professors with years of relevant business experience

Financial Assistance

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Visit http://www.rhsmith.umd.edu for more information.

Finance, Master of Finance (M.Fin.)

Non-thesis only: 30 credits required

The Master of Finance program provides students with the knowledge and skills necessary to succeed in the complex and networked world of finance.

All students must complete the following core courses and complete an additional 18 credits in one of the four specializations. Specializations include Corporate Finance, Asset Management, Risk Management, and General Finance.

Course	Title	Credits
Required courses:

Fire Protection Engineering (ENFP)

Graduate Degree Program
College: Engineering

Abstract

The Department of Fire Protection Engineering (FPE) offers a world-class environment for advanced graduate study and research in the broad area of fire safety. The department offers a Master of Science (M.S) degree and a Master of Engineering (M.Eng.) degree. The mission of the FPE Department is to reduce the burden of fire losses on life and property by providing the highest quality of scientifically-based education, research, and outreach in fire protection engineering, and in fire-related safety, health and environmental issues. The FPE graduate program provides the unique interdisciplinary academic foundation and scholarly training needed to address complex engineering problems with emphasis on advancing the field of fire protection engineering.

The educational objectives of the FPE M.S. and M.Eng degree programs are to produce graduates who:

- Have the technical knowledge and skills needed to practice fire protection engineering locally, nationally and internationally in a variety of modern professional settings;
- Have the ability to understand and communicate societal, environmental, economic and safety implications of engineering decisions on the local and global communities;
- Are prepared to participate in the development and promotion of fire protection engineering and assume technical and/or business leadership positions.

Some additional educational objectives specific to the FPE M.S. degree program are to produce graduates who:

- Appreciate the importance of scientific research as a mechanism to strengthen the technical basis of fire protection engineering.
- Have the basic competencies needed to pursue advanced studies (e.g., Ph.D.) in fire protection engineering or related fields.

The program is designed to stimulate intellectual growth, increase the level of objective understanding of the physical world and further develop capabilities for analysis and synthesis in order to produce premier fire safety engineers and/or researchers.

Financial Assistance

The Department of Fire Protection Engineering offers several types of financial support through various research or teaching assistantships. Students are also encouraged to seek other external funding opportunities, for instance via University of Maryland work-study programs and internships available in fire laboratories and FPE consulting companies in the Baltimore-Washington area. For more details, see the department's graduate guide available at http://www.fpe.umd.edu/grad (http://www.fpe.umd.edu/grad/).

- GRE Subject (optional)
- CV/Resume
- Description of Research/Work Experience (optional)
- Writing Sample (optional)

The M.S. and M.Eng. programs are open to qualified students holding a Bachelor of Science (B.S.) degree in engineering, or a related field from an accredited institution. Applicants should have taken the following 4 prerequisite courses: differential equations, fluid mechanics, heat transfer, structural mechanics (or strength of materials). Applicants who have not completed all prerequisites may still be admitted on a provisional basis if they demonstrate satisfactory academic performance in a related field and/or relevant work experience; these applicants may then be asked to complete the prerequisite courses during their first semester at the University of Maryland. In most cases, the application process requires scores from the Graduate Record Examination (GRE).

Fire Protection Engineering, Master of Science (M.S.)

Thesis only: 30 credits

The Master of Science (M.S.) degree program requires a research thesis and completion of a minimum of 24 credit hours of approved courses. Individual coursework plans are determined by the student, his or her advisor and the department. The M.S. research thesis should make a contribution to the advancement in the state-of-the-art of fire safety science and/or engineering. In addition to a M.S. degree, the department also offers a Master of Engineering (M.Eng.) degree which requires 30 credit hours of approved courses in major and minor core areas. The M.Eng. degree does not include a research thesis. The department's degree requirements are given in detail in its graduate guide, see http://www.fpe.umd.edu/grad (http://www.fpe.umd.edu/grad/).

Fire Protection Engineering (online) (ENGF)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Fire protection engineers are among the most sought-after professionals in the industry. Performance building codes and the international trend towards performance-based fire safety analysis and design approaches in construction have increased demand for fire protection engineers. The University of Maryland's fire protection engineering degree programs represent the Department of Fire Protection Engineering's commitment to preparing engineers for the challenges of this rapidly growing field. Fire protection engineering courses are available to explore basic processes of fire behavior, prediction of fire development, the combustion of materials and furnishings, the effects of fire on structures and the environment, smoke management, evacuation and tenability analysis and the law.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Requirements

- Fire Protection Engineering, Master of Engineering (M.Eng.) (p. 207)

Facilities and Special Resources

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week.

In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Fire Protection Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Students must complete Group A courses before completing Group B courses.

Course	Title	Credits
Group A: [1]		
ENFP625	Advanced Fire Modeling	3
ENFP655	Smoke Control	3
ENFP651	Advanced Fire Dynamics	3
ENFP652	Fire Assessment Methods	3
ENFP653	Advanced Fire Supression	3
Group B courses (complete five):		15
ENFP613	Advanced Life Safety Analysis	
ENFP621	Analytical Procedures of Structural Fire Protection	
ENFP661	Forensic Fire Analysis	
ENFP662	Performance Based Design	
ENFP663	Advanced Fire Risk Modeling	
ENFP664	Advanced Industrial Fire Safety

Fire Protection Engineering (online) (Z049)

Graduate Certificate Program
College: Engineering

ABSTRACT

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Fire protection engineers are among the most sought-after professionals in the industry. Performance building codes and the international trend towards performance-based fire safety analysis and design approaches in construction have increased demand for fire protection engineers. The University of Maryland's fire protection engineering degree programs represent the Department of Fire Protection Engineering's commitment to preparing engineers for the challenges of this rapidly growing field. Fire protection engineering courses are available to explore basic processes of fire behavior, prediction of fire development, the combustion

of materials and furnishings, the effects of fire on structures and the environment, smoke management, evacuation and tenability analysis and the law.

FINANCIAL ASSISTANCE

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Requirements

- Fire Protection Engineering, Post-Baccalaureate Certificate (P.B.C.) (p. 208)

Facilities and Special Resources

This program is currently offered 100% online. The Clark School of Engineering's Distance Education Technology and Services (DETS) office administers a live interactive distance education system and webcast course capture for students to take courses as they are happening, in some instances, or at a time convenient for their schedule each week. In addition to lecture dissemination, DETS provides state-of-the-art chat, bulletin board, video chat, group presentation, and discussion technologies that give our distance students the same, if not more access to faculty and their fellow students.

Fire Protection Engineering, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

All Graduate Certificate in Engineering Programs consist of 4 courses/12 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Fire Protection Engineering (PMFP)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Fire protection engineers are among the most sought-after professionals in the industry. Performance building codes and the international trend towards performance-based fire safety analysis and design approaches

in construction have increased demand for fire protection engineers. The University of Maryland's fire protection engineering degree programs represent the Department of Fire Protection Engineering's commitment to preparing engineers for the challenges of this rapidly growing field. Fire protection engineering courses are available to explore basic processes of fire behavior, prediction of fire development, the combustion of materials and furnishings, the effects of fire on structures and the environment, smoke management, evacuation and tenability analysis and the law.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus. In addition to in-person courses, you may have the option to take some course requirements in an online format. Course format offerings are subject to change.

This program is also offered 100% online. Please see Fire Protection Engineering (ENGF) for more information.

Fire Protection Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

Students taking courses on campus for the Master of Engineering Degree work with an advisor to identify a course of study based on the student's professional interests. Students are required to complete 10 approved courses, including a minimum of six fire protection engineering core courses.

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://advancedengineering.umd.edu/degree-planning-sheets (https://advancedengineering.umd.edu/degree-planning-sheets/)

Modern French Studies (FRMS)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Ph.D. in French Modern Studies encompasses the Renaissance to the present. The diversity of the Graduate Faculty makes it possible for students to specialize in a wide variety of areas in French language, literature, film, and culture. The Department is part of a larger School of Languages, Literatures and Cultures that encourages and facilitates interdisciplinary scholarship, particularly in Film Studies and in Cultural Studies. Through consortia arrangements with universities in the area, including George Washington University and Georgetown University, students may augment their programs with courses otherwise unavailable at the University of Maryland.

Financial Assistance

Graduate applicants can request to be considered for Teaching Assistantships and Graduate Fellowships. Graduate Teaching Assistantships carry ten-month stipends for a total of four years (provided that the student remains in good standing), plus remission of all fees (10 credits) other than those for registration and health facilities.

Program Website: sllc.umd.edu (http://www.sllc.umd.edu)

Admissions Information: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Modern French Studies, Doctor of Philosophy (Ph.D.) (p. 212)

Facilities and Special Resources

With a total student enrollment of over 35,000, the University of Maryland is supported in its academic endeavors by the University Libraries, a system of eight libraries and more than three million volumes. Other area research facilities include two of the worlds outstanding libraries: the Library of Congress and the Folger Library, both of which have extensive holdings in French. The School of Languages, Literatures and Cultures, the Women's Studies Program, and the David C. Driskell Center For The Study of The Visual Arts and Culture of African Americans and The African Diaspora, among other campus units, offer seminars, lectures, and symposia on a wide variety of topics relevant to graduate students in French.

Modern French Studies, Doctor of Philosophy (Ph.D.)

All doctoral students are required to complete 24 credits beyond the M.A. in addition to 12 credits of FREN899. All Ph.D. students are required to demonstrate a sound reading knowledge of one other foreign language in addition to French. A student having a recognized degree or diploma in a subsidiary area such as Music, Economics, Political Science, etc, and who plans to make substantial use of this body of knowledge for the dissertation may be permitted, with the approval of the Graduate Programs Committee, to substitute such degree or diploma for the additional foreign language requirement.

Advance to Candidacy: In addition to course requirements, students must pass two Qualifying Examinations consisting of a two-part Comprehensive Examination. The first part is written, then oral, taken over two consecutive days by the end of the third semester in the PhD program. The second requirement is to defend a written Dissertation Prospectus (scheduled by the end of the fourth semester in the PhD program) before being advanced to candidacy.

Advance to Candidacy: Complete at least 12 credits of FREN899 and write and defend a dissertation that explores significant questions about French-language literature and culture, past or present, hexagonal or extra-hexagonal.

All requirements for the Ph.D. degree, except the dissertation, must be completed within five years of admission to the program. The dissertation must be completed no more than four years after advancement to candidacy. (See department website f (http://sllc.umd.edu/french/graduate/)or additional information)

French Language and Literature (FRIT)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of French and Italian prepares students for the Master of Arts (FRIT) and Doctor of Philosophy (FRMS) degrees in French language, literature and culture. The research interests of the graduate faculty span the Renaissance to the present. For the doctoral program, consult the graduate catalog under FRMS, "Modern French Studies."

Financial Assistance

Graduate applicants can request to be considered for Teaching Assistantships and Graduate Fellowships. Graduate Teaching Assistantships carry ten-month stipends for two years, plus remission of all fees (10 credits) other than those for registration and health facilities.

French Language and Literature, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The M.A. without thesis requires a minimum of 30 credits, of which at least 18 must be selected from courses numbered 600 or above. In lieu of a thesis, students must present a Qualifying Paper of between 25 and 30 pages in length as evidence of their ability to do independent research. The M.A. with thesis requires a minimum of 24 credits, of which not less than 12 must be selected from courses numbered 600 or above. A further six credits (thesis research/FREN799) are required. The M.A. thesis committee consists of 2 faculty members in addition to the student's thesis director, who serves as chairperson. There is an oral examination on the thesis, which should be a minimum of 80 pages in length. (See department website (http://sllc.umd.edu/french/) for complete information)

Teaching Assistant Requirement

All Teaching Assistants are required to take SLLC601 for one credit. This course counts towards the total credits required.

Geographical Sciences (GEOG)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Department of Geographical Sciences offers graduate study leading to the Doctor of Philosophy, Master of Professional Studies in Geospatial Information Sciences, and five year, combined Bachelors of Science and Masters of Science in Geographical Sciences degrees.

The specific research specializations represented by the faculty include:

Human Dimensions of Global Change

Coupled Human and Natural Systems. The Department's ultimate research goal is to advance an integrated understanding of the coupled Earth system including spatially distributed human processes. Our research addresses both fundamental and applied issues in coupled human and natural systems, such as population, socio-economic development, consumption and production, poverty, climate impacts and adaptation, vulnerability and mitigation, as well as the examination of policy options and trade-offs on sustainability. Our scientists investigate both the human socio-economic system and the climate system, and their linkages.

Land Cover, Land Use Change

Land cover and land-use change is a key interface between human and natural systems. Our scientists are world leaders in the remote sensing of land-cover changes. This information is actively combined with human socio-economic data to study past land cover and land use change and to inform advanced modeling of spatially-explicit future scenarios. These methods are actively being used to simultaneously address social, economic, carbon, climate, biodiversity and other aspects of land-use changes. We develop agricultural monitoring systems and look at societal impacts, adaptions and vulnerability to fire, droughts, floods, desertification, and other catastrophic events.

Geospatial Information Sciences and Remote Sensing

Collecting and interpreting geospatial data is central to everything we do as geographers, whether on computers or in the field. From local events to multi-scale processes, our faculty are developing and applying advanced remote sensing capabilities and GI Science that will help us to develop the next generation of GI technologies and understanding of the world's geography. Our strengths include advanced computer modeling, scientific and geographic visualization, sensor calibration and design, image processing, geocomputing, spatial statistics, and semantic learning.

Carbon, Vegetation Dynamics and Landscape-scale Processes

The department carries out a broad array of research focused on monitoring vegetation dynamics, with a particular focus on mapping and studying human and natural disturbances and their landscape-

scale impacts, as well as changes to the earth surface as a result of climate variability. This research involves integration of field-based research with remotely-sensed observations to address key scientific uncertainties. Alterations to the global carbon cycle are changing atmospheric composition and climate with implications for human well-being and a particular focus of our research is on monitoring and modeling the terrestrial carbon cycle with unprecedented sophistication and resolution.

The Department contains several specialized groups, including the Global Land Cover Facility, as well as several smaller groupings of research interests. The Department also has close ties with cross-campus research initiatives, including the Earth Systems Science Interdisciplinary Center (ESSIC) and the Joint Global Change Research Institute (JGCRI). ESSIC is an initiative that brings together the Departments of Geography, Geology and Atmosphere and Ocean Science in a Research Institute to further encourage interdisciplinary studies to address contemporary questions in Earth Systems Science. JCGRI is a collaboration between the University of Maryland and the Pacific Northwest National Laboratory and is dedicated to understanding the problems of global climate change and their potential solutions.

Financial Assistance

Teaching Assistantships, Research Assistantships, and various Fellowships are available. Salary is for 9.5 months per year. Assistants work 20 hours per week. Fellowship recipients have no work assignment. Depending upon resources, the department will provide up to four years of funding, provided the student meets the department's benchmarks (see the PhD Handbook (https://geog.umd.edu/graduate/phdhandbooks/)). Applications are made on the University Graduate Admission Application and further information about Financial Aid is given in the Application. Note, residents of certain Southern States without equivalent Geography graduate programs may be eligible to receive tuition at the lower, in-state fee rates.

Funding is not available for students in the combined BS/MS program.

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample (one required, up to two more optional)
- Description of Research/Work Experience
- Publications/Presentations (optional)
- Portfolio PDF Upload (optional)

The Department offers courses of study leading to the Ph.D. degree and the MPS (masters in professional studies in geospatial information sciences). The MPS program is administered separately and has different admission deadlines and requirements than the Ph.D. program. See the MPS GIS Program (https://geog.umd.edu/landing/Graduate/). The Department no longer offers an M.A. option. The M.S. option is for a closed cohort in the combined Bachelor's/Master's program only.All accepted students applying to the Geographical Sciences (GEOG) program are admitted directly to the Ph.D. program.

Ph.D. Program

The Department admits students to our doctoral program that have already completed a masters degree and exceptionally well qualified students who have only completed a bachelor's degree. Admitted students are required to either possess or shall develop a strong foundation in the discipline of Geography. Admission to the Ph.D. program is not limited to students with a Geography degree. Those with degrees in related disciplines such as environmental, physical or biological sciences, anthropology, economics, history and social science are encouraged to apply but may be required to undertake additional background study. Some knowledge of data processing and statistics is necessary for all applicants.

Applicants proposed program of study must clearly draw on the research strengths of existing faculty members. All applicants are strongly encouraged to contact individual faculty members (in person, by phone, or by email) to discuss their research interests and to identify potential advisors, as they will need a faculty to sponsor them for admission.

In general, the Department admits between 10-15 students each year into the Ph.D. program. Virtually all students accepted are fully-funded through assistantships and fellowships. While there is no longer a formal M.S. program, a terminal masters degree may be received for qualified students who are unable to complete the Ph.D. program.

Combined BS/MS Program

The Masters of Science degree is only earned through the Department's combined five year BS/MS program. The combined BS/MS program enables some of the better performing students pursuing an undergraduate Geographical Sciences major to earn both their BS and their MS in five years by counting up to 8 credits of their Geographical Sciences graduate courses towards both degrees, thus significantly reducing both the time and cost of earning both degrees.

Most students apply to the program at the end of their Junior year to begin graduate courses and be part of the program as of their Senior year. Admission into the program is strongly competitive. Students will be admitted with an undergraduate degree in Geographical Sciences, including those with an ENSP concentration in Geographical Sciences. Minimum requirements are: 3.5 GPA overall, three letters of recommendation, and a statement of research.

Applicants' proposed statement of research must clearly align with the research strengths of existing faculty members. All applicants are

strongly encouraged to contact individual faculty members (in person, by phone, or by email) to discuss their research interests and to identify potential advisors, as they will need a faculty member to sponsor them for admission.

In general, the Department admits between 5-10 students each year into the combined BS/MS program. There is no Departmental funding available.

Facilities and Special Resources

The Washington, D.C. metropolitan area is an exceptional location in which to pursue geographic research. Many national and international agencies are within a short distance of the campus, including the NASA Goddard Space Flight Center, the USDA Beltsville Agricultural Research Center, the National Archives, Bureau of the Census, National Institutes of Health, USGS, National Geospatial Imaging Agency, Smithsonian Institution, and NOAA. International and non-governmental agencies are located within easy reach, including the National Geographic Society, the Nature Conservancy, World Wildlife Fund, World Bank, and many others. Corporations, businesses and nonprofit organizations that use geographical applications are also well represented. Libraries on campus and nearby are unrivaled elsewhere in the world. The University is also located in a region of extraordinary geographic diversity, including two major urban centers (Baltimore and Washington, D.C.), and the superb, continuous section from the Appalachian mountains, through the Piedmont, Coastal Plain, and Chesapeake Bay to the Atlantic Coast.

Many opportunities exist for students to participate in externally funded research projects. Graduate students find these research programs a rich source of ideas for dissertations as well as providing opportunities to join projects as paid research assistants and, often, identifying openings for employment on completion of their studies.

The Department is housed in over 35,000 sq. ft. on the main College Park campus. Teaching laboratories include facilities for cartography, GIS, and the Turner laboratories dedicated to computer-based instruction, while other facilities needed for virtually any type of investigation are available through collaborations with other departments. There are two primary computer environments, namely PC and UNIX, with over 100 machines dedicated to teaching and graduate research. The research laboratories support UNIX, Linux, and high-end PC machines, including very high performance processors and peripherals and large volume RAID arrays. There are a large number of printers, magnetic disk farms, tape libraries, etc. An extensive range of software is available, including satellite data processing, image analysis, and ESRI GIS packages. Field research, remote sensing, global positioning systems, and other types of equipment are available.

Geographical Sciences, Master of Science (M.S.)

Non-thesis only: 30 credits required

Students are also required to complete a scholarly project.

The combined BS/MS degree is only granted to students who have successfully completed the 120 hours of undergraduate coursework, 30 hours of graduate coursework, and a scholarly paper. For more information in the course sequencing and credits applicable to both the undergraduate and graduate degrees, see the Department's website: http://geog.umd.edu/combined-bsms-program (http://geog.umd.edu/combined-bsms-program/).

Course	Title	Credits
Required courses:		
GEOG601	The Nature and Practice of Science	3
GEOG606	Quantitative Spatial Analysis	3
GEOG789	Independent Readings	6
GEOG798	Selected Topics in Geography: Seminar Series	3
GEOG6xx: Technical Elective		3
GEOG6xx: Physical Elective		3
GEOG6xx: Human Elective		3
GEOG6xx: Electives		6
Total Credits		**30**

Geographical Sciences, Doctor of Philosophy (Ph.D.)

For those entering with a Master's degree in Geography, the PhD should be completed withing 4 years; For those entering with a Bachelor's or without a Geography background, the PhD should be completed within 5 years. Part-time study takes longer, but at least 1 year full-time attendance is required. Students entering with a B.A. or without a Geography background will take one course each in the following areas: Human, Physical, and Methods. See the PhD Handbook (https://geog.umd.edu/graduate/phdhandbooks/) for further details.

Students without a Geography background should complete an additional 9 credits in the following areas:

- Environmental and Biological Aspects of Earth Systems Science,
- Human Dimensions of Global Change, and
- Geospatial Information Sciences.

Advance to Candidacy: In addition to course requirements, students must successfully pass an annual faculty review, a portfolio assessment, and successfully defend a dissertation prospectus.

Post-Candidacy: In addition to annual faculty reviews, students complete at least 12 credits of GEOG899 Doctoral Dissertation Research as well as successfully defend and submit an original dissertation.

Course	Title	Credits
Required courses:		
GEOG601	The Nature and Practice of Science	3
GEOG606	Quantitative Spatial Analysis	3
or GEOG636	Qualitative Methods in Geography	
GEOG608	Comprehensive Portfolio Assessment Summary	1-3
GEOG788	Selected Topics in Geography (GEOG788D - Selected Topics in Geography)	3
GEOG798	Selected Topics in Geography: Seminar Series	2
Pass a portfolio assessment		
Dissertation Research Requirements		
GEOG899	Doctoral Dissertation Research	12
Total Credits		**24-26**

Geology (GEOL)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Department of Geology offers programs leading to the M.S. and Ph.D. degrees. On a full time basis, the M.S. normally requires two to three years of work, which includes courses, the completion of an M.S. research thesis, and an oral defense of the thesis. On a full time basis, the Ph.D. commonly requires three to four years of work, if conducted after the completion of an M.S. program, or four to five years from the time of admission if pursued directly from the Bachelor level. The Ph.D. program normally includes course work, a qualifying examination and proposal defense, a dissertation, and an oral defense and examination of the dissertation.

Our students are required to engage in independent and original research under a mentoring program that promotes creative thinking. This is most commonly achieved via the collaboration between students and faculty in ongoing research programs. Geology is concerned with the Earth, its origin and evolution and the origin of life, and the processes by which Earth's atmosphere, surface and interior have been and continue to be modified. To pursue these topics we have developed research strengths in four themes: Geochemistry, which involves investigations of low- to high-temperature processes operating from Earth's surface to it's core and within the Solar System; Solid Earth Science, which is the study of the minerals, rocks, and structures that constitute Earth, and the tectonic and other processes by which they are formed and altered; Surficial Processes and Environments, which involves the study of active and past fluxes (and reservoirs) of water, dissolved components, and sediment on Earth's surface and the interactions of these fluxes with the biosphere and atmosphere; and, Geophysics, which includes investigations of Earth's interior structure and dynamics, as well as planetary physics. These areas are not mutually exclusive, and students are encouraged to develop a program that suits their interests. Developing areas within the Department include planetary geology and forensics.

Although students will choose an advisor within the Department of Geology, they may also wish to take advantage of research opportunities provided by collaboration with other departments on campus, such as Mathematics, particularly the Applied Mathematics and Scientific Computation Program (AMSC), Atmospheric and Oceanic Science, Physics, Geography, and Chemistry, as well as other institutions in the area including the Smithsonian Institution, United States Geological Survey, NASA, Department of Terrestrial Magnetism, Geophysical Lab and National Institute of Standards and Technology. The Earth System Science Interdisciplinary Center is a collaborative venture between the Departments of Geography, Geology and Atmospheric and Ocean Science on Campus, and the Earth Sciences Directorate at NASA Goddard. This wealth of in-house and collaborative resources positions our graduate students with an unmatched spectrum of opportunities and gives them access to a strong multi-disciplinary program of international stature.

Our current student demographics are diverse, with an approximate 50:50 mix of male and female students of which 10-20% are minority students. Approximately 60% of our graduate students are Ph.D. candidates (the remaining are M.S. students), and some of the M.S. students will petition to become Ph.D. candidates following the successful completion of their M.S. degree program. Other M.S. candidates are focused solely on the M.S. degree, which is the commonly held degree for practicing professionals in government and industry.

Our graduate students benefit from the opportunities of working within an advanced graduate program. Our graduates go on to distinguished post-doc, research and applied positions in academic, government and industrial settings. We proudly acknowledge having placed our students into prestigious post-doc positions and government laboratories and we highlight their publications (see https://www.geol.umd.edu/graduate/gradpubs.php), presentations at national and international meetings (see https://www.geol.umd.edu/graduate/gradpresentations.php) and awards (see https://www.geol.umd.edu/graduate/gradfunding.php).

Financial Assistance

Graduate students are eligible for Departmental teaching assistantships, Graduate School fellowships and grant-supported fellowships and research assistantships. In addition, some curatorial, library and other part-time work is sometimes available.

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)

Qualified students with a B.S. degree in geology, physics, mathematics, chemistry, biology, engineering or other related sciences are invited to apply for admission to the graduate programs. Our graduate degree program in geophysics welcomes students with undergraduate degrees in physics and or astronomy having little to no background in geology. Coursework expectations for students applying to the program is at least a year of calculus, a semester of physics for science majors, and for those in the in geology and geochemistry track a year of chemistry or its equivalent.

Requirements

- Geology, Doctor of Philosophy (Ph.D.) (p. 217)
- Geology, Master of Science (M.S.) (p. 217)

Facilities and Special Resources

The Department maintains a suite of state-of-the-art facilities and equipment for research, including: three solid source mass spectrometers, six gas source mass spectrometers, with inlet devices for inorganic and organic isotope analyses, single and multicollector inductively-coupled plasma mass spectrometers (ICP-MS), three UV lasers for in situ analyses with gas-source and plasma mass spectrometer, two chemical clean labs, with ion chromatographic facilities, JEOL 8900 superprobe with an Oxford instrument mini-cathodoluminescence detector, Scanning and Transmission Electron Microscopes, color image analysis system, fluid inclusion stage, high temperature and high pressure equipment for dry or hydrothermal experiments, diamond anvil cell facilities, including laser heating and external heating, two triaxial deformation apparatii with flow through capacity and acoustic emission recording, flame and graphite furnace atomic absorption equipment, spectrophotometers, HPLC with fluorescence detector, UV lamps and monochronometer for photochemistry, anoxic chamber, Geographic Information Systems (GIS) computational laboratory, electromagnetic and acoustic doppler velocity meters, laboratory and field hydrogeology equipment, campus drill rig, microstructures and fabrics analysis instruments, research microscopes with reflectance capabilities, rock preparation and mineral separation laboratories, computer network with direct access to supercomputer facilities, nitrogen Permeameter 400, helium Porosimeter 300, Solaris Impedance Meters.

Further information is found at the following URL https://www.geol.umd.edu/graduate/index.php (https://www.geol.umd.edu/graduate/)

Geology, Master of Science (M.S.)

Thesis only: 30 credits

Students are required to complete 30 credits, including at least 18 credits from the Department of Geology and at least 12 credits at the 600 level or higher.

The Department of Geology offers a Master of Science degree. There is no single prescribed curriculum. Although 24 credit hours of course work and 6 credit hours of thesis research are required, the entire course of study is individually developed for each student by his/her graduate program committee as approved by the Director of Graduate Studies. The M.S. degree is awarded following the successful completion of the course requirements, defense of a proposal, submission of a satisfactory thesis, and an oral defense of the thesis. The M.S. normally requires two years of work.

Course	Title	Credits
Coursework including at least 18 credits from the Department of Geology and at least 12 credits at the 600 level or higher		24

Geospatial Information Sciences (Z035)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The **Master of Science in Geospatial Information Sciences Program** is dedicated to providing the most up-to-date education on geospatial technology, theory and applications. The courses cover spatial analysis, statistics, programming, databases, modeling, remote sensing, Internet GIS, Mobile GIS, and Open Source GIS. Both **MS degree (30 Credits)** and **Graduate Certificate (12 Credits)** in GIS are offered.

Financial Assistance

There are no fellowships available in this program. However, there are potential Teaching Assistantships available depending on the student's qualification.

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

The Graduate School requires all admitted graduate students to have a baccalaureate degree from a regionally accredited college or university in the United States, or the equivalent of a baccalaureate degree in another country. A GPA of 3.0 is normally required for admission into this program. Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis.

Applicants with foreign credentials must submit academic records in the original language with literal English translations.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Geospatial Intelligence (Z109)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The **Graduate Certificate in Professional Studies in Geospatial Intelligence (GCPS GEOINT)** is dedicated to providing workforce-focused training at graduate level in ways that can nimbly respond to developments in what is often a rapidly shifting landscape of applied problem-sets, analysis schemes, big and growing data-sets, and software platforms that characterize today's geospatial intelligence.

The GC GEOINT program entails 15 credits from five courses (GEOG661, GEOG662, GEOG697 and two elective courses). These courses cover spatial analysis, remote sensing, big data analytics, geovisualization, programming in web and mobile GIS, geospatial intelligence in various fields, etc.

The **Master of Science in Geospatial Intelligence (MS GEOINT)** is also offered, which entails 30 credits from 10 courses (five core and five elective courses). The credits earned from a GCPS GEOINT can be transferred towards the MPS GEOINT.

Financial Assistance

Teaching Assistantships are offered depending on availability and students' qualifications.

Requirements

- Geospatial Intelligence, Post-Baccalaureate Certificate (P.B.C.) (p. 221)

Facilities and Special Resources

New classroom facilities are provided for GEOINT programs as part of the development of the Center for Geospatial Information Science. A dedicated set of server and high-performance computing clusters are also provided from CGIS for teaching GEOINT courses. Students also have full access to the resources (e.g. computer labs, software applications, seminars, etc) in the Geographical Sciences Department as regular graduate students. All registered students have full access to the facilities and resources (e.g. libraries, gym, computer labs) on campus.

Our local surroundings play host to the center of influence for the geospatial intelligence industry in the United States. The National Geospatial-Intelligence Agency employs 8,500 people at the third largest federal building in the D.C. region at nearby Springfield, VA. The NASA Goddard Space Flight Center in nearby Greenbelt, and the United State Geological Survey in nearby Reston, VA serve as the nexus for the nation's earth science geospatial intelligence. The U.S. Census Bureau in nearby Suitland, MD is tasked with a decennial nationwide data collection exercise that mobilizes a huge workforce to perform geospatial intelligence gathering year-round.

Geospatial Intelligence, Post-Baccalaureate Certificate (P.B.C.)

German Studies (GERS)

Graduate Degree Program
College: Arts and Humanities

Abstract

The German Program of the Department of Germanic Studies offers graduate study leading to the M.A. and Ph.D. degrees. The main focus is on Modern German Studies combining both discipline-based and interdisciplinary courses. The intellectual focus of the degrees is German-speaking Europe from the Enlightenment to the present, as represented in literary and non-literary texts, and other cultural productivity.

The degrees reflect the paradigm shift within the field of German language and literature expanding the focus of Germanistik to a broader concentration on cultural studies which include gender studies, film studies, and postcolonial theory.

Financial Assistance

The German Program offers graduate fellowships and teaching assistantships, and the Graduate School offers, **on a competitive basis, fellowships, and grants.**

Requirements

- German Studies, Doctor of Philosophy (Ph.D.) (p. 222)
- German Studies, Master of Arts (M.A.) (p. 222)

Facilities and Special Resources

In addition to its course offerings listed below, the German Program of the Department of Germanic Studies sponsors the German Club, the University of Maryland Chapter of Delta Phi Alpha (the national German language honors society). The department participates in the University Honors Programs and has a departmental honors program. Distinguished scholars and lecturers as well as visiting professors visit the metropolitan area and campus regularly. College Park's proximity to Washington, D.C., facilitates participation in the many cultural functions of the capital with its wealth of German and Scandinavian social groups and national societies: the Embassies of Austria, Denmark, Germany, Norway, Sweden, Switzerland; the German Historical Institute, and the Goethe Institute.

German Studies, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The M.A. degree program offers both a thesis and non-thesis option. For the thesis option, the student must complete 24 hours of coursework, the thesis with oral defense and a written comprehensive examination. The non-thesis option requires 30 hours of coursework, a mini-thesis with oral defense and a written comprehensive examination. For both options the comprehensives consist of two three-hour examinations based on the coursework and the M.A. reading list.

Course	Title	Credits
GERM620	Methods of German Literary Studies I: Theory	3
German courses at the 600-800 level		15
Thesis or Non-Thesis Requirements		**12**
Thesis:		
Electives		
GERM799	Master's Thesis Research	
Pass an oral defense and a written Master's comprehensive exam		
Non-Thesis:		
Electives		
Written Master's comprehensive exam		
Total Credits		**30**

[1] All Teaching Assistants are required to take SLLC601 for one credit. This course counts towards the total credits required.

German Studies, Doctor of Philosophy (Ph.D.)

Doctoral students must complete 24 credits of coursework beyond the master's degree over a period of at least one year at the University of Maryland in addition to 12 credits of doctoral dissertation research. Other doctoral requirements include:

1. a reading skill examination in a language other than English or German, which may be another Germanic language or a language related to the candidate's research;
2. comprehensive written examinations;
3. presentation of the dissertation, an original study in the field of specialization on a topic approved by the adviser and the examining committee; and
4. the oral defense of the dissertation (one to two hours)

Global Health (Z070)

Graduate Certificate Program
College: Public Health

Abstract

The Graduate Certificate in Global Health is designed to provide basic knowledge in global health delivery to those employed or seeking employment in positions requiring this knowledge or to individuals who desire this added credential. The Global Health Certificate provides knowledge of issues, policies, and practices in global health that enables individuals (many of whom do not have public health backgrounds) to work effectively in agencies and programs providing global health services. As an area for study, research, and practice, global health emphasizes translational health issues, synthesizing population-based prevention with evidenced-based, community-supported initiatives.

The Global Health Certificate requires completion of four courses (12 credits), three of which are required and a fourth of which is an elective. The core curriculum includes foundational aspects of global health, communication and promotion, and program planning and evaluation. The elective topics include history, diplomacy and/or social marketing in Public Health. A blended learning format featuring seminar-style, face-to-face instruction and online learning is offered at the College Park campus. Course descriptions can be found here: http://sph.umd.edu/department/miaeh/certificate-global-health (http://sph.umd.edu/department/miaeh/certificate-global-health/)

The Global Health Certificate is offered through the University of Maryland's School of Public Health, a leader in the discovery, application, and dissemination of public and global health knowledge in the state of Maryland, the nation, and the world. The School of Public Health has specifically targeted programs, curricula, service and research dedicated to the understanding and improvement of global health.

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letter of Recommendation (1): The letter of recommendation needs to be an academic reference.
- CV/Resume

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

Non-UMD students who would like to pursue the Certificate in Global Health should visit the UMD Graduate School Admissions (https://gradschool.umd.edu/admissions/) page for detailed application steps. http://gradschool.umd.edu/admissions (http://gradschool.umd.edu/admissions/)

UMD cannot issue the immigration documents necessary for international students to study (F1 or J1 student visas) in this program. International students who currently reside in the U.S. on existing visas may apply. Eligible international students have additional requirements per the Office of International Student & Scholar Services (ISSS). For additional requirements, please see: http://oes.umd.edu/professional-programs/global-health/gh-admission-information#international (http://oes.umd.edu/professional-programs/global-health/gh-admission-information/#international)

Current graduate students within the School of Public Health may enroll in courses that fulfill the requirements of the Certificate in Global Health. Please contact your Graduate Director or the certificate program for more information.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

Government and Politics (GVPT)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Department of Government and Politics offers a Ph.D. degree in political science, intended primarily for those planning academic careers. Students can specialize in American politics, comparative politics, international relations, and political theory. In addition, students can study in depth more specialized fields such as public law, national security, public policy, political psychology, international and inter-ethnic conflict, international political economy, urban politics, post-Soviet and post-communist studies, East-Asian studies, environmental politics, and the politics of advanced industrial societies.

Financial Assistance

In addition to fellowships and teaching assistantships, the Department also has a public service intern program for students interested in State government. There are also a limited and variable number of research positions available.

Fellowships in Support of Diversity and Inclusion (https://gvpt.umd.edu/graduate/fellowships-support-diversity-and-inclusion-behavioral-and-social-sciences/) (optional): *If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences (2017-18), please be sure to upload your materials under "4. Supplementary Application Two" when submitting your online admissions application.*

- Graduate Management Admissions Test (GMAT) (optional) or Graduate Record Examination (GRE) (optional)
- Supplementary Applications (up to two optional)
- CV/Resume
- Writing Sample (one required, second one optional)

The Department recruits highly qualified students and admits only a limited number of the strongest applicants. The Admissions Committee rarely grants provisional or conditional admission to the graduate program. The Department does not usually admit M.A. applicants. Only students whose ultimate objective is the Ph.D. should apply for direct admission to that program. Admission is granted only for the Fall Semester.

Requirements

- Government and Politics, Doctor of Philosophy (Ph.D.) (p. 226)
- Government and Politics, Master of Arts (M.A.) (p. 226)

Facilities and Special Resources

Graduate students in the department participate in the activities of the Public Service Intern Program, Project ICONS, the Center for International Development and Conflict Management, the Center for the Study of American Politics and Citizenship, the Center for the Study of Post-Communist Societies, The Committee on the Political Economy of the Good Society, and the Harrison Program on the Future Global Agenda.

Government and Politics, Master of Arts (M.A.)

30 credits required

Master of Arts (M.A.) The graduate program in the Department of Government and Politics is designed for doctoral students. Except for students participating in our dual-degree program with the United States Naval Academy, we do not accept students for the sole purpose of acquiring a Master's degree. Doctoral students may obtain a Master of Arts Degree during their course of doctoral study once they have satisfied the requirements associated with the Master's degree.

Course	Title	Credits
Core Requirements		
Complete 10 courses		30
Pass a comprehensive exam		
Complete two seminar papers		
Total Credits		**30**

Government and Politics, Doctor of Philosophy (Ph.D.)

Students are required to complete 42 credits of coursework, in addition to 12 credits of GVPT899. The doctoral program is intended to provide students with the knowledge, methodological skills and research experience appropriate for persons who intend to enter the discipline of political science. Students must complete 42 hours of graduate work including courses in political theory and research methods and pass written comprehensive examinations in two fields. Although formal coursework and field examinations are important components of the doctoral program, the research component, especially in the form of the dissertation is paramount. Consequently students who are able to demonstrate an interest in quality research activities and desire to become creators as well as consumers of knowledge are appropriate for the doctoral program.

Advance to Candidacy: In addition to course requirements, students are also required to complete two comprehensive exams, a third year paper, and pass the Prospectus Defense.

Post-Candidacy: Complete at least 12 credits of GVPT899 as well as successfully defend and submit an original dissertation.

Health Administration (HLSA)

Graduate Degree Program
College: Public Health

Abstract

We are excited to inform you that we have changed the name of the on-campus MHA to the MPH in Healthcare Management. The new name better reflects the content of the degree that is designed to give students a strong knowledge base in health care management and health service delivery systems and an understanding of the basic and core principles of public health. If you have any questions about the change, please contact Melvin Seale at mseale@umd.edu***.***

Please see the Master of Public Health in Health Care Management (https://academiccatalog.umd.edu/graduate/programs/health-care-management-hlcm/) program page for more information.

Admissions

Please see the Master of Public Health in Health Care Management (https://academiccatalog.umd.edu/graduate/programs/health-care-management-hlcm/) program page.

Requirements

- Health Administration, Master of Health Administration (M.H.A.) (p. 227)

Health Administration, Master of Health Administration (M.H.A.)

Non-thesis option: 45 credits
Thesis option: 45 credits

Students completing the thesis option will replace their 3-credit capstone (HLSA786) with a 6-credit thesis experience (HLSA799). Three credits of the HLSA799 will then replace one course in the management module, so that only 6 courses in the management module are required for graduation.

Elective		
Thesis:		
HLSA799	Master's Thesis Research	
Total Credits		**45**

Health Equity (HLEQ)

Graduate Degree Program
College: Public Health

Abstract

The Master of Public Health (MPH) degree with a concentration in Health Equity is a 45-credit interdisciplinary professional degree. It is a school wide program, currently administered by the Department of Health Services Administration.

The MPH program in Health Equity is designed to train students as public health scientists and practitioners that focus practice and/or research activities on the recognition, description and elimination of health disparities. Health disparities exist across several groups such as race/ethnic groups, geographic residence, gender, sexual orientation, age, and disability status. Public health and health care practitioners and researchers play a critical role in the identification and amelioration of health disparities and in working towards achieving health equity.

The MPH program in Health Equity is a unique and interdisciplinary program with students taking courses across all departments at UMD-SPH and across the UMD campus. The expertise gained through the MPH in Health Equity prepares students for careers that involve integrating health equity into public health practice at various levels. Various agencies in the state (e.g., county and state health departments) and across the nation (e.g., NIH and CDC), including colleges/universities, health-related agencies, community groups, and even large corporations (hospitals and insurance plans), employ public health professionals with a deep understanding of health disparities in order to design, implement, evaluate, and monitor interventions and policies to improve the health of their constituents by working towards health equity.

To accommodate a variety of career pursuits, students have flexibility in designing their course structure. Once a foundational knowledge

is acquired through the MPH program's core requirements, students are encouraged to take electives across a range of disciplines. A large number of elective courses are available within the existing graduate curriculum across all departments in the School of Public Health as well as across other UMD colleges and DC area institutions. Students will be advised to work with SPH faculty for recommendations about how certain elective courses will best support particular career aspirations.

The curriculum is adaptable to both a full and part-time student status.

Please see our website for updated information on the program https://sph.umd.edu/academics/masters-degrees/mph-master-public-health/mph-health-equity (https://sph.umd.edu/academics/masters-degrees/mph-master-public-health/mph-health-equity/)

Courses: SPHL (https://umd-curr.courseleaf.com/graduate/courses/sphl/) HLSA (https://umd-curr.courseleaf.com/graduate/courses/hlsa/)

Admissions

The **MPH in Health Equity** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest, and faculty you are interested in working with

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Three letters of recommendation
- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Score submission is **waived** for Fall 2022 admissions. GRE scores won't be reviewed.
- A writing sample is optional

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/).

Health Policy Analysis and Evaluation (HPAE)

Graduate Degree Program
College: Public Health

Abstract

The Master of Public Health (MPH) degree with a concentration in Health Policy Analysis and Evaluation is a 45-credit professional degree offered by the Department of Health Policy and Management (HPM).

The MPH program in Health Policy Analysis and Evaluation is designed to train students as public health scientists and practitioners that focus practice and/or research activities on the understanding, analysis, evaluation, and development of health policy. Various agencies in the state (e.g., county and state health departments) and across the nation (e.g., NIH and CDC), including colleges/universities, health-related agencies, community groups, and even large corporations (health care systems and insurance plans), employ public health professionals with a deep understanding of health policy in order to design, implement, analyze and evaluate policies to improve the health of their constituents. This program prepares graduates to take leadership positions in government agencies, consulting companies, health care organizations such as hospitals, community clinics, or health systems corporations, as well as health policy research organizations.

The MPH concentration in Health Policy Analysis and Evaluation at the University of Maryland School of Public Health (SPH) is unique in that it focuses not only on health care policies but on the analysis and evaluation of all policies that affect the public's health such as policies related to public health organizations and other public policies in education, housing, nutrition, and environmental pollution, among others that have an impact on population health. Students in the program benefit from the SPH's location in the DC area, with its proximity to federal government and agencies tasked with developing and implementing health policies such as the Centers for Medicare & Medicaid Services, in particular the Center for Medicare & Medicaid Innovation, The Agency for Healthcare Policy and Research, the Environmental Protection Agency and Health Resources and Services Administration, as well as top private and non-profit research institutions such as RAND, Mathematica, The Urban Institute, and The Brookings Institution, which conduct high-quality, independent research and provide innovative, practical recommendations to health policy makers. Faculty in the HPM department has active collaborations with several of these agencies and institutions and students in the department have access to internships, capstone projects and post-graduation positions at these organizations. In addition, students in the program benefit for the HPM department's close links with the State of Maryland legislature and students have interned with General Assembly members; in those experiences, they have conducted research on legislative issues, co-authored legislation, assisted in preparation for hearings, and other policy related tasks.

- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- Official GRE Test Score submission is **waived** for Fall 2022 admissions. GRE scores won't be reviewed.
- A writing sample is optional

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/).

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	April 7, 2023	N/A
	The priority deadline for both the SOPHAS and the UMD applications is December 16, 2022.	
International Applicants

Requirements

- Health Policy Analysis and Evaluation, Master of Public Health (M.P.H.) (p. 230)

Health Policy Analysis and Evaluation, Master of Public Health (M.P.H.)

Non-thesis option: 45 credits
Thesis option: 45 credits

Students completing the thesis option will replace their 3-credit capstone (HLSA786) with a 6-credit thesis experience (HLSA799). Three credits of the HLSA799 will then replace one course elective, so that only 3 elective courses in the are required for graduation

Course	Title	Credits
Required courses:		
SPHL601	Core Concepts in Public Health	1
SPHL602	Foundations of Epidemiology and Biostatistics	4
SPHL603	Public Health Data Laboratory	1
SPHL610	Program and Policy Planning, Implementation, and Evaluation	5
SPHL611	Public Health Ethics	1
SPHL620	Leadership, Teams, and Coalitions: Policy to Advocacy	2
HLSA601	Introduction to Health Systems	3
HLSA702	Policy and Politics of Health	3
HLSA711	Health Economics and Analysis	3
HLSA775	Health Services and Policy Research Methods	3
HLSA778	Internship in Public Health	4
HLSA786	Capstone Project in Public Health	3

Electives	12
Total Credits	**45**

Health Services Research (PHHS)

Graduate Degree Program
College: Public Health

Abstract

The goal of the doctoral program in Health Services Research is to provide interdisciplinary training in research, practice, and policy analysis relevant to the planning, administration, management, and evaluation of health and public health programs. The degree program will prepare students to advance research, policy, and practice to order to improve access, cost, and quality of health services, with a particular emphasis on federal, state, and local health policy. The Ph.D. in Health Services Research requires a minimum of 50 credits organized in four modules. After module 1 (required core health services research courses), students select a cognate area or track. Potential tracks are: health economics, health policy, health equity/sociology of health, and an interdisciplinary track (developed with advisor's approval). Together with their advisor, students select 5 elective courses in the track of which 2 must be methods courses relevant to the cognate area. After completing the track coursework, students must pass a qualifying exam. All students must take an ethics course, a proposal development course and must pass an oral proposal defense to be admitted to candidacy. After candidacy, students take a graduate seminar, and dissertation credits which culminate in a doctoral dissertation and an oral dissertation defense. For further information go to https://sph.umd.edu/academics/doctoral-degrees/phd-health-services-research (https://sph.umd.edu/academics/doctoral-degrees/phd-health-services-research/).

Relationships: Health Administration (HLSA) (p. 227) Health Equity (HLEQ) (p. 227) Health Policy Analysis and Evaluation (HPAE) (p. 229) Principles of Public Health (Z076) (p. 331) Public Health Practice and Policy (PHPP) (p. 340)

Courses: SPHL (https://umd-curr.courseleaf.com/graduate/courses/sphl/) HLSA (https://umd-curr.courseleaf.com/graduate/courses/hlsa/)

Admissions

The **PhD program in Health Services Research** has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and research areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Masters Degree and course work on Public Health or related areas
- Three letters of recommendation
- Resume or curriculum vitae
- Fit between applicant's goals, expectations and research interests and program competencies and faculty expertise
- Official GRE Test Score submission is **required**. GRE taken within the past 5 years should be in the 50th percentile or higher. Please have ETS send scores to SOPHAS (code 0485)

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language along with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/).

Hearing and Speech Sciences (HESP)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Department of Hearing and Speech Sciences provides the opportunity for advanced graduate study in the communication sciences and disorders. The department offers three degrees; this entry is for the Ph.D. program, with concentrations in Hearing, Speech or Language.

Students applying to the Ph.D. program can opt to receive an MA in Speech-Language Pathology en route to the final degree. Students interested in the clinical MA degree in Speech-Language Pathology (p. 382) should see SPLA and use this code when applying for admission to study; students interested in a clinical doctorate in Audiology should see CAUD and use this code when applying for admission to study). At the doctoral level, the Ph.D. is offered in Hearing and Speech Sciences, with concentrations in Hearing, Speech or Language.

Financial Assistance

A limited number of graduate assistantships and fellowships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. The Department also recommends outstanding students for Graduate School Fellowships; many of these fellowships have early deadlines for recommendations, so students are encouraged to submit their applications to the department early to ensure full consideration for funding. Students may also seek assistantships elsewhere on campus (such as through the Dean's office or through other departments) or doctoral fellowships sponsored by Federal agencies (e.g., NIH or NSF) or private foundations (e.g., American Speech-Language-Hearing Foundation). Fellowships in Support of Diversity and Inclusion (optional): If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences, please be sure to upload your materials under "Supplementary Application" when submitting your online admissions application.

Fellowships in Support of Diversity and Inclusion (https://hesp.umd.edu/graduate/prospective-students-funding-your-graduate-education/) (optional): If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences (2017-18), please be sure to upload your materials under "Supplementary Application" when submitting your online admissions application.

Courses: HESP (https://umd-curr.courseleaf.com/graduate/courses/hesp/)

Relationships: Clinical Audiology (CAUD) (p. 126) Human Development (EDHD) (p. 248) Linguistics (LING) (p. 278) Neurosciences and Cognitive Science (NACS) (p. 316) Speech Language Pathology (SPLA) (p. 382)

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Description of Research/Work Experience
- Writing Sample: Writing Sample should be recent, 5-10-page scholarly writing, such as a first-authored peer-reviewed publication or other scholarly assignment – uploaded to the Uploads Requirements section of the application. (one required, second one optional)

Admission to the doctoral programs is on a very competitive basis. Our program is a mentoring-based program; we only accept doctoral students for whom there is an obvious mentor who is willing to work with that student. Students typically have high GPA and GRE scores, excellent letters of recommendation and statements of purpose, and a high-quality writing sample. Admission is currently confined to fall matriculation; early application is encouraged.

Admission to the Ph.D. degree program may be offered to applicants with either a Bachelor's or Master's degree. Clinical certification is not required for the degree, although a clinical graduate degree may be needed in addition to the Ph.D. degree for employment in some university settings. Students who wish to receive both degrees can apply to the Ph.D. program and receive a clinical MA while working towards the doctoral degree. Requirements for completion of a program of doctoral study are dependent on a student's prior background in the communication sciences and disorders.

Applicants interested in pursuing an integrated research-clinical doctorate in speech-language pathology (M.A./Ph.D.) should apply to the Ph.D. program and indicate their intention in the Statement of Purpose. Applicants interested in pursuing the dual-degree path in Audiology (Au.D.-Ph.D.) should apply to the Au.D and indicate their intention in the Statement of Purpose. Students may enter the Ph.D track towards the end of their 2nd year, pending decision of the departmental admissions committee.

Program Website: http://www.hesp.umd.edu
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Hearing and Speech Sciences, Doctor of Philosophy (Ph.D.) (p. 234)

Facilities and Special Resources

The Department's facilities include

1. numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, infant and adult speech perception,neuropsychology, language and language development, voice, fluency and electrophysiology. There are multiple sound-attenuating chambers and one electrically-shielded chamber devoted to research with humans, which are all integrated with computers and peripheral equipment for acoustic signal development, signal analysis, presentation and on-line data collection;
2. the Hearing and Speech Clinic at UMCP. this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and
3. an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation. Students pursuing clinical training in Audiology will also have access to the Audiology Service, Division of Audiology-Head and Neck Surgery, of the University of Maryland and University Hospital in Baltimore (UMB), for part-time clinical rotations or full-time clinical externships. This Service provides a full range of auditory and vestibular diagnostic and rehabilitative services in a large metropolitan hospital setting. Externally-funded research projects are an integral part of the activities at UMB. All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical facilities are available in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park.

The Department of Hearing and Speech Sciences participates in the Neuroscience and Cognitive Sciences graduate program (see NACS), the Comparative and Evolutionary Biology of Hearing Training Grant, and the Maryland Language Science Center, and has ties to the Center for Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Hearing and Speech Sciences, Master of Arts (M.A.)

The Department of Hearing and Speech Sciences offers the Master of Arts degree with major emphasis in Speech-Language Pathology (p. 382) with either the thesis or the non-thesis option.The Master's degree is required by national credentialing standards for individuals intending to practice as speech pathologists in schools, hospitals, rehabilitation facilities, hearing and speech centers or in other clinical settings. Academic course work, which includes a minimum of 36 credits, is supplemented by additional credit registrations in supervised clinical practica in the University Speech and Hearing Clinic and in selected outside clinical facilities so that the graduate will meet the academic and practicum requirements for the Certificate of Clinical Competence (C.C.C.) issued by the American Speech-Language-Hearing Association, and be eligible for licensure in the State of Maryland and other jurisdictions. The Master's degree program is accredited by the Council on Academic Accreditation, the national accrediting agency which oversees graduate programs in Speech-Language Pathology and

Audiology. A full description of the Master's degree program is available at our web site, listed below.

Hearing and Speech Sciences, Doctor of Audiology (Au.D.)

The Department of Hearing and Speech Sciences offers two doctoral degree options for individuals seeking a clinical doctorate in Audiology. See CAUD (http://pdc-webapp-lamp27.umd.edu/Catalog/public-programs-detail.php?CAUD) for more details. The Au.D. curriculum meets requirements specified in the Standards for the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association. The CCC-A is the minimum qualification for practice in Audiology required by most states and jurisdictions. The Au.D. program for post-BA students requires 57 hours of graduate coursework, 4 credit hours for a capstone research project, 14 hours of clinical practicum registration and 18 credit hours of full-time clinical internship registration, for a total of 93 credit hours. Au.D. students must pass comprehensive examinations and complete a capstone research project. Full-time students are expected to complete the program in 4 years. The Au.D. 'fast-track' program for returning students who already hold an M.A. degree in Audiology and Clinical Certification requires 30 credit hours of graduate coursework and 6 credit hours for a doctoral research project. There is no minimum requirement of supervised clinical practicum experience, although clinical practicum will be available to students as needed. The dual degree Au.D./Ph.D. track in Audiology is designed for students wishing to be trained as scientist-practitioners. The dual degree program requires 60 credits of graduate coursework, 6 credit hours of pre-candidacy research, 12 credit hours of dissertation research, 12 credit hours of clinical practicum registration, and 18 credit hours of full-time clinical internship registration, for a total of 108 credit hours. The Au.D./Ph.D. curriculum is designed to meet requirements specified in the Standards for the Certificate of Clinical Competence in Audiology (CCC-A) of the American Speech-Language-Hearing Association, and by the Graduate School. Ph.D. students must develop an individual study plan with the approval of a faculty Program Planning Committee, pass comprehensive examinations, and complete a dissertation and oral defense. Full-time students are expected to complete the dual-degree program in approximately 6 years.

Hearing and Speech Sciences, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 32 credits of coursework, in addition to 18 credits of research requirements. Students are also required to participate in a Professional Development Seminar each year for five years, complete a teaching portfolio, and pass a comprehensive exam.

The Department also offers the Doctor of Philosophy degree with a major emphasis in speech, language or hearing. Students with a B.A. or M.A. are considered for admission to the doctoral program. Matriculated doctoral students will choose within their major a special interest area, which may focus on the normal aspects of their major or disorders related to the major. A student must also select a minor area of study either from within or outside departmental offerings. There are no foreign language requirements, but advanced courses in statistics and experimental research design are required for the degree. Course programs are planned by the student and a committee of at least four faculty members. All doctoral students are expected to participate in varied research activities within the Department for academic credit.

Advance to Candidacy: In addition to course requirements, students must complete a teaching portfolio as well as successfully pass a written and oral comprehensive examination.

Post-Candidacy: Doctoral students complete at least 12 semester hours of HESP899 dissertation research credit before completing the degree.

A full description of the Doctoral program, as well as listings of faculty research expertise, can be found at the Departmental website (https://hesp.umd.edu/graduate/program-highlights-doctoral-program-hearing-and-speech-sciences/).

Higher Education (HIED)

Graduate Degree Program
College: Education

Abstract

Higher Education is an area of concentration within the Higher Education, Student Affairs, and International Education (HESI) program at the University of Maryland. As a nationally recognized graduate area of concentration, Higher Education at Maryland prepares students for leadership positions in higher education institutions and policy organizations, as well as engagement in scholarship. Alumni of the Higher Education concentration work as mid- and senior-level college administrators, higher education policy makers and analysts as well as university faculty.

It is important to note that while being a concentration in HESI, the Higher Education concentration is a distinct program with its own admission criteria and requirements. Students can take courses in the following areas: Policy and Finance; Diversity and Student Experiences; Leadership and Organization; and Academic Professions. In addition, in conjunction with their faculty advisor, students can design an area of specialization to meet their individual needs. Higher Education students can also take courses in areas such as business, public affairs, and the social sciences. Programs of study are individually designed by students in consultation with their faculty advisor. Department courses are usually offered in the afternoon and evening.

Doctoral students with an interest in student personnel services can take courses in the Student Affairs concentration. The two concentrations offer distinct degrees but cooperate closely on course offerings. Because the University of Maryland is located close to the nation's capital, masters and doctoral students also have access to many seminars and presentations by higher education leaders and public policy makers in the Washington DC area.

Additionally, the Higher Education concentration is in a unique position to also offer students opportunities that enable them to gain practical experience in the form of internships at federal government agencies,

public policy think tanks, and higher education advocacy organizations throughout the Washington DC area. In the past, in addition to interning at offices on campus and the University System of Maryland, students have interned at the US Senate, National Center for Education Statistics, American Council on Education, and the Institute of Higher Education Policy.

Admitted students to the Higher Education concentration are invited to our Preview Program each spring in order to interview for assistantships across Academic Affairs, Student Affairs and other administrative offices. Nine-and twelve-month assistantships are available. Some doctoral applicants may be recommended for fellowships by our admissions committee.

Financial Assistance

The Department has a very limited number of merit-based fellowships and graduate assistantships available to students. Fellowships are awarded to doctoral students in March only for the following fall semester. Assistantships are also awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility. International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time.

If you need information about ISSS clearance, visit the ISSS website at http://www.umd.edu/ies (http://www.umd.edu/ies/). For more information on financial assistance, see the department website: http://www.education.umd.edu/chse/admissions/finance (http://www.education.umd.edu/chse/admissions/finance/).

- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample

To be recommended for full admission to a doctoral or master's program, a minimum undergraduate grade point average of 3.0 is required. A minimum graduate grade point average of 3.5 is required for doctoral programs. Of the three scores on the Graduate Record Examination (verbal, quantitative, analytic), at least one should be at the 70th percentile or higher for PhD applicants (40th percentile or higher for master's applicants) and none should be under the 40th percentile for PhD applicants.

If the Miller Analogies Test is used, the score should be at least at the 70th percentile for PhD applicants (40th percentile for master's applicants). Students who do not meet one of these requirements, but show other evidence of outstanding potential, may be considered for provisional admission. For more information on admissions please refer to our website at http://www.education.umd.edu/CHSE/admissions/overview/ and click on prospective students.

It is recommended that, if possible, prospective students talk with concentration coordinators and faculty, and visit classes, to help determine if a particular concentration is appropriate to their academic interests and professional goals.

Historic Preservation (HISP)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

Based in the School of Architecture, Planning, and Preservation, the Historic Preservation Program is a collaboration of faculty from across the University–from the departments of American Studies, Anthropology, Architecture, History, Landscape Architecture, Real Estate Development, and Urban Studies and Planning, as well as the National Trust Library. Our shared goal is educating professionals for work in a wide range of preservation organizations. Research on historic preservation issues is also a focus of the Program, pursued through faculty and student projects, in partnership with preservation organizations and University partners. With many preservation organizations and agencies in the DC area, you will learn from well-connected faculty and challenging internships that will allow you to expand and apply your knowledge and skills. You will experience two great laboratories in Baltimore and Washington; places and spaces where you can explore gentrification, sustainability and other pressing issues. We also sit within a broad cultural landscape that extends from the Atlantic coast to the mountains of Appalachia.

The Historic Preservation Program offers a Master of Historic Preservation (MHP) degree, a graduate Certificate, and several dual degrees (with Architecture, Planning, Real Estate Development, and Anthropology). The MHP is designed as a full-time, two-year curriculum leading to a professional degree. The 45-credit MHP curriculum includes core courses, an internship, an interdisciplinary studio course, a final project, and a large selection of electives to stimulate each student's particular interests. Students will be admitted to the program with a variety of backgrounds but with a demonstrated prior interest in the preservation field. (In some exceptional cases, students may be admitted to the program on a part-time basis.)

Financial Assistance

HISP's principal form of financial aid consists of graduate assistantships related to research and outreach activities. The assistantships consist of tuition remission as well as a stipend. In addition, the Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related

project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

Requirements

- Historic Preservation, Master of Historic Preservation (M.H.P.) (p. 238)

Facilities and Special Resources

The University of Maryland's Historic Preservation Program is privileged to be part of a dynamic, successful preservation community that has long thrived throughout the state and in the District of Columbia. Opportunities to study and work abound in the incredibly diverse cities, towns, and landscapes across Maryland. In addition, the Program enjoys close relationships with many state, local, national, international and federal-government organizations working in historic preservation, as well as non-profit groups and private firms.

You will have the opportunity to combine your coursework with invaluable research and field-based professional training in documentation, policy and interpretation. Virtually every class gets you out in the field and connects you to preservation issues and practice in communities and neighborhoods. The program has an ongoing relationship with the Town of Bladensburg to use the Bostwick House property as a learning laboratory and classroom. This 1746 brick home and several farm outbuildings sit on a 10-acre parcel adjacent to the Anacostia River in the middle of suburban Bladensburg [www.bostwickhouse.weebly.com (http://www.bostwickhouse.weebly.com)] and just 10 minutes from campus.

The HISP program is directly related to and substantially enhanced by the National Trust for Historic Preservation Library, housed on the College Park campus since 1986 [https://archives.lib.umd.edu/repositories/2/resources/1342 (https://archives.lib.umd.edu/repositories/2/resources/1342/)]. This Library is one of the leading scholarly resources for preservation in the country.

The program is further strengthened by close working relationships with the Maryland Historical Trust, the National Park Service, the National Trust for Historic Preservation, the Maryland National Capital Park and Planning Commission, Historic Annapolis, Inc., Preservation Maryland, Prince George's Heritage, the Anacostia Trails Heritage Area, and others. Practical experience can be gained through a variety of internship opportunities with these organizations and many others.

Historic Preservation, Master of Historic Preservation (M.H.P.)

Non-thesis only (capstone project required): 45 credits

The Master of Historic Preservation (MHP) requires completion of 45 credits. Required courses cover history and theory of preservation, preservation law, historical research methods,documentation, conservation, preservation economics, preservation planning & policy, group studio/workshop, internship, and independent final project. Elective courses may be taken from all contributing HISP units, and other departments with prior approval from the HISP Director. A description of the full MHP curriculum is available on the program web site at http://arch.umd.edu/hisp/historic-preservation (http://arch.umd.edu/hisp/historic-preservation/).

Historic Preservation and Real Estate Development (HPDV)

Graduate Degree Program
College: Architecture

Abstract

Based in the School of Architecture, Planning, and Preservation, the Historic Preservation Program is a collaboration of faculty from across the University--from the departments of American Studies, Anthropology, Architecture, History, Landscape Architecture, and Urban Studies and Planning, as well as the National Trust Library. Our shared goal is educating professionals for work in a wide range of preservation organizations. Research on historic preservation issues is also a focus of the Program, pursued through faculty and student projects, in partnership with preservation organizations and University partners.

The dual degree program in Historic Preservation and Real Estate Development is a 60 credit program that can be completed, by taking courses full time over 5 semesters (2 1/2 years), including at least one winter and summer term course. While not preferred students may be admitted to the program on a part-time basis. Consult with the HISP Program Director.

The final project for the HISP portion of the degree will also have to meet the requirements for a Capstone Project in real estate development and should be discussed early on with each Program Director to be sure it will meet the requirements of both.

Financial Assistance

HISP's principal form of financial aid consists of graduate assistantships related to research and outreach activities. The assistantships consist of tuition remission as well as a stipend. In addition, the Program awards--in conjunction with local non-profit Prince George's Heritage--the Prince George's Heritage Preservation Fellowship, an annual competitive award for a HISP student or students whose Prince George's County related project is judged to be especially outstanding. Additionally, there are possibilities for paid internships and paid part-time work with a variety of national and local organizations and governmental agencies.

The Colvin Institute provides scholarship funds to a number of highly qualified students each term. Scholarship determinations are made at the time of application and admission. Scholarships are generally awarded on a per course basis and commitments are made at the time of admission and apply for the duration of the entire program, subject to academic performance.

The MRED Program offers a limited number of administrative graduate assistantships to full time MRED students. Contact the Program Director to apply. Periodically there are named scholarships provided by various real estate organizations or development companies.

In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. Students in the past have been successful in finding part time internships and full time work with local real estate companies. The MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty and sponsors.

Applicants should inquire as to the availability of scholarship funding for the term they are starting. Scholarships are typically for a portion of tuition only, and are paid on a per course basis as students progress through the program. Scholarships are available to part time, full time, and dual degree students.

Requirements

- Historic Preservation and Real Estate Development, Master of Historic Preservation and Master of Real Estate Development (dual degree) (M.H.P. and M.R.E.D.) (p. 240)

Facilities and Special Resources

The School of Architecture, Planning, and Preservation and the Colvin Institute of Real Estate Development are ideally located between Washington, DC, and Baltimore and surrounded by a number of historic communities and a varied physical environment. The resulting opportunity for real estate development and historic preservation study is unsurpassed.

Close by the University are key historically important and interesting places in the development of U.S. communities, including the 4th settlement in America at Historic St. Mary's City in Southern Maryland, which was the first planned city in America. Just 10 minutes from campus is the 1930s new town of Greenbelt, Maryland, and within 45 minutes are the 1960's new towns of Columbia, Maryland, St. Charles,

Maryland and Reston, Virginia. One of the best examples of new urbanism is the Kentlands development less than 30 minutes away. And not to be missed are the major redevelopment and urban living revivals in the Port City of Baltimore and the historic neighborhoods of Anacostia and Columbia Heights in the District of Columbia.

The University of Maryland's Historic Preservation Program is privileged to be part of a dynamic, successful preservation community that has long thrived throughout the state and in the District of Columbia. Opportunities to study and work abound in the incredibly diverse cities, towns, and landscapes across Maryland. In addition, the Program enjoys close relationships with many state, local, national, international and federal-government organizations working in historic preservation, as well as non-profit groups and private firms.

The HISP program is directly related to and substantially enhanced by the National Trust for Historic Preservation Library, housed on the College Park campus since 1986 [https://archives.lib.umd.edu/repositories/2/resources/1342 (https://archives.lib.umd.edu/repositories/2/resources/1342/)]. This Library is one of the leading scholarly resources for preservation in the country. The program is further strengthened by close working relationships with the Maryland Historical Trust, the National Park Service, the National Trust for Historic Preservation, the Maryland National Capital Park and Planning Commission, Historic Annapolis, Inc., Preservation Maryland, Prince George's Heritage, the Anacostia Trails Heritage Area, and others. Practical experience can be gained through a variety of internship opportunities with these organizations and many others.

The School's resources include a model shop, a digital fabrication lab, and both PC and MAC computer labs with REVIT, ARGUS, GIS, Maptitude and other design programs available. The School's library contains some 57,000 monographs and 6,000 current periodicals, making it one of the major architectural libraries in the nation. The National Trust Library for Historic Preservation, housed in McKeldin Library, contains 11,000 volumes and 450 periodical titles. THe Colvin Institute holds the entire library offerings of the Urban Land Institute and access to all the case studies published by ULI. The slide collection includes approximately 430,000 slides on architecture, landscape architecture, planning, and technical subjects. The interdisciplinary National Center for Smart Growth Education and Research is based in the School offering perspectives and opportunities to engage important issues facing urban and regional planning.

Both the Real Estate Development and Historic Preservation Programs benefit from the strong support of the professional community, including practitioners who bring expertise into the class room and project courses as instructors and advisors. The RDEV courses are all taught by working or retired real estate professionals giving unparalleled access for students to making connections with current practice in the industry.

Job placement for HISP graduates has been outstanding with graduates sought out by national, local and regional firms and agencies. The over 150 alumni of the real estate program have a very active and passionate group of grads in the area who meet regularly and share practice tips, connections and future job opportunities.

Historic Preservation and Real Estate Development, Master of Historic Preservation and Master of Real Estate Development (dual degree) (M.H.P. and M.R.E.D.)

Non-thesis only: 66 credits required

Required courses cover history and theory of preservation, preservation law, historical research methods, documentation, conservation, preservation economics, preservation planning & policy, group studio/workshop, and independent final project.

Real Estate requirements address real estate economics, finance, planning and entitlements, design and construction management and asset and property management.

The final project must not only address historic preservation or adaptive reuse issues, but must meet the requirements of an MRED Capstone project with real estate feasibility and pro forma modelling.

Historic Preservation (Z005)

Graduate Certificate Program
College: Architecture

Abstract

The historic preservation certificate program is designed to provide students in allied graduate programs (for example, American studies, anthropology, history, landscape architecture, planning, real estate development, and architecture) at the College Park campus with a basic understanding of the discipline of historic preservation with an emphasis on connecting preservation practice with their home discipline.

History (HIST)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of History offers programs leading to the degrees of Master of Arts and Doctor of Philosophy. In conjunction with the College of Information Studies, the Department of History also offers a dual-degree Master of Arts in History and Library Science. In conjunction with the School of Architecture, Planning, and Preservation the Department of History also offers a dual-degree Master of Arts in History and Historic Preservation.

Major fields of concentration for the MA and PhD programs are: Ancient Mediterranean, Medieval, Early Modern Europe, Modern Europe, Global Interaction and Exchange, International, Jewish, Latin America, Middle East, Russia & Eurasia, Technology, Science, & Environment, the United States, and Women & Gender. MA-only fields are: Africa and Military. The graduate program, which includes over fifty regular faculty members and approximately 150 degree-seeking students, excels in the following subfields: African-American, US, and Middle East. Other areas of established strength are Western and Central Europe, Russia and Eurasia, Ancient Mediterranean, Latin American, and Women & Gender. More recently, the following fields have emerged as centers of growing faculty strength and are attracting increasing numbers of students and faculty: Atlantic history, the African diaspora, and Global Interaction and Exchange.

The students in our four-degree programs come from across the nation, from small liberal arts colleges and major research institutions, as well as from Europe, Canada, East Asia, Eurasia, and Latin America. History students have won a number of major external fellowships, including the ACLS/Mellon Early Career Fellowship, the Fulbright-Hays Doctoral Research Fellowship, the Berlin Program for Advanced German and European Studies Dissertation Fellowship, the Foundation for the Research and Study of the East German Dictatorship Fellowship, the Fulbright-IIE Student Grant, the International Research & Exchanges Board Fellowship, the Mary Savage Snouffer Dissertation Fellowship, the Library Company of Philadelphia Fellowship, the Maryland Historical Society Lord Baltimore Research Fellowship, the Massachusetts Historical Society Research Fellowship, the Center for Jewish History Fellowship, and the Mellon Fellowship for Dissertation Research in Original Sources.

Recent graduates have started postdoctoral fellowships or tenure-track jobs at institutions that include Case Western University, George Washington University, Bucknell University, Claremont-McKenna College,Christopher Newport University, Morgan State University, Johns Hopkins University, Monash University, Appalachian State University, Montclair State University, Ohio University, Rhode Island College, SUNY Purchase, the United States Naval Academy, the University of South Florida, Framingham State University, the University of Southern Mississippi, and Western Washington University. The members of our extended alumni community, numbering more than 300 master of arts and doctoral recipients, work as professional historians throughout the State of Maryland, in a number of United States Government agencies, and at institutions of higher education and historical research across the United States and the globe.

Financial Assistance

The Department of History administers several forms of financial assistance for graduate students, including fellowships, teaching assistantships, graduate assistantships, research assistantships, and research grants. All fellowships, assistantships, and grants are awarded on the basis of merit, as determined by the Graduate Committee, upon the recommendation of faculty and the Director of Graduate Studies.

A multiyear guarantee of continuous funding is frequently offered to newly matriculating PhD students. Guaranteed funding is not standard for students entering the MA and HiLS programs.

Funding packages typically include two years of fellowship and three years of Teaching Assistantship. The packages include tuition remission and a health benefits option, subject to satisfactory progress towards the fulfillment of program requirements. All teaching assistants receive tuition remission and a health benefits option.

For FY21 (2020-21 academic year), the pay scale for 9.5-month teaching, graduate, and research assistantships range between $19,225.80 and $20,060.00. Fellowships follow a similar pay scale. Assistantships and fellowships include tuition remission and a health benefits option. Variations in stipend amounts are due to a number of factors, including the type of appointment, international student status, previous appointments, and advancement to candidacy.

Additional funding is available through the Arts and Humanities Research and Travel Grant competition, Department semester dissertation fellowships, Department summer research award, matching funds for travel to academic conferences, and various campus-wide funding competitions. All doctoral students are expected to seek outside funding for pre-dissertation and dissertation research, as appropriate.

History graduate students may seek grants and fellowships, assistantships, hourly employment, and other forms of self-support offered by non-departmental sources.

Admissions

General Requirements

- Statement of Purpose: Other than the required questions for the Statement of Purpose asked by the University of Maryland, the History Department asks applicants to include content that emphasizes academic and research interests:
  a. what is the applicant interested in studying and why,
  b. what the applicant might be interested in working on for the M.A. thesis or Ph.D. dissertation and
  c. how the applicant's prior education has provided good training for graduate work in the particular field of interest.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample: Research paper of about 20 pages, uploaded to the Upload Requirements section of the application.
- Description of Research/Work Experience

As a demonstration of our commitment to excellence in historical scholarship and education, admission to our degree programs is highly competitive. It is important that each applicant clearly articulate his/her academic preparation and qualifications for graduate study at Maryland. All prospective applicants are encouraged to make contact with the faculty in the area(s) of interest. Faculty play an important role in the admissions decision. Prospective applicants are also encouraged to make contact with current graduate students to learn more about their experiences. The History Graduate Student Association can facilitate communications with current students.

Although there are exceptions, the minimum overall grade point average is 3.25 for admission to a master's degree program and 3.50 for

admission to the doctoral program. The admissions committee would typically expect a higher grade point average in past coursework in history and related disciplines.

There is no language requirement for the MA degree, but the command of one or more languages is required for admission into the PhD program in some fields within History. For more information on language requirements, see the History Department website.

The University requires that all admitted students demonstrate proficiency in written and spoken English.

Requirements

- History, Doctor of Philosophy (Ph.D.) (p. 244)
- History, Master of Arts (M.A.) (p. 243)

Facilities and Special Resources

In addition to the field concentrations described above, the Department of History offers several forms of specialized training, including certificate programs in Museum Scholarship & Material Culture, co-sponsored by the Department of American Studies, and Historic Preservation, co-sponsored by the School of Architecture.

The Nathan and Jeanette Miller Center for Historical Studies, housed within the Department, promotes both research and graduate training by sponsoring seminars and colloquia, major scholarly conferences, and visiting professors who teach graduate courses. Typically, the Center's activities each year concentrate on a historical theme of surpassing interests that cuts across the usual chronological and cultural boundaries.

The University of Maryland is home to a number of important archives, special collections, and historical editing projects, including the archives of the American Federation of Labor-Congress of Industrial Organizations (AFL-CIO), the Freedmen and Southern Society Project and the Samuel Gompers Papers, the Library of American Broadcasting, the Gordon W. Prange Collection, and the National Trust for Historic Preservation Library. The Combined Caesarea Expeditions, an archeological project that joins excavation of the terrestrial remains of Caesarea Maritima with underwater investigation of the site's ancient harbor, are coordinated at Maryland.

The University sponsors a number of significant scholarly publications of interest to historians, including the *Hispanic American Historical Review*, the flagship English-language journal in Latin American history; and *Feminist Studies*, a pioneer in women's history and gender studies.

The College Park campus is located within the Washington-Baltimore corridor, one of the nation's most dynamic regions for historical research. Francis Scott Key Hall, home to the Department of History, sits less than ten minutes from Archives II, the U.S. government's largest repository, and less than thirty minutes from downtown Washington, D.C., a city of unparalleled cultural resources and unique opportunities for historical research, including the Library of Congress, the Folger, and the US Holocaust Memorial Museum. Annapolis and Baltimore, home to significant archival holdings related to the history and cultures of the State of Maryland, the greater Chesapeake Bay region, and the Atlantic world, can be reached in less than forty-five minutes.

History, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Organized in the 1920s, the Master of Arts in History program at the University of Maryland provides broad and intensive instruction in bibliography, research, and writing in various fields of historical study. The MA degree may constitute a step toward doctoral research or preparation for a variety of other fields, such as archives administration, museum scholarship and exhibitions, public history, primary or secondary school teaching, law, or international relations.

Admission to the Master of Arts program is offered to highly qualified applicants holding at least a bachelor's degree, normally in history or a related discipline. Application and admissions procedures are described on the Department's website.

The MA degree program requires a total of thirty (30) semester hours of course work and research credits and the submission of one or two original research papers. In addition, MA students must successfully defend a thesis (the Degree-by-Thesis option) or pass a written examination (the Degree-by-Examination or 'non-thesis' option).

The anticipated period for completion is two (2) years of full-time study. The degree must be completed within five (5) years.

Thesis Option

Course	Title	Credits
HIST601	History and Contemporary Theory	3
Approved major field courses		9
HIST8xx Research Seminar		3

Submit two research papers		
Total Credits		**30**

History, Doctor of Philosophy (Ph.D.)

First awarded in 1937, the Doctorate in History at the University of Maryland is conferred for superior achievement in historical study and research. The major portion of the degree is the dissertation, an original and noteworthy contribution to historical knowledge. In anticipation of this research, students must master the historical literature in their fields, bibliographic tools, research and writing methods, and general, special, and minor fields of study. Competence in these preliminary steps will be measured by successful completion of course work and by comprehensive examinations.

Doctoral students must complete 42 credits including 12 credits HIST899. Unless they have taken comparable courses elsewhere, students must complete the general seminar(s) in their major field, HIST601 (History and Contemporary Theory), a minimum of nine hours of reading courses, six hours of research seminars, and nine hours in a minor field.

Depending on the field of study, doctoral students may be required to demonstrate competence in one or more foreign languages and/or special skills.

Advance to Candidacy: In addition to course requirements, students must also pass a language exam, pass the Major Field written exam, an oral exam, and pass the Prospectus Defense.

Students who enter with a master's degree in history or a related field are expected to sit for a set of written and oral comprehensive examinations within five semesters. Those who enter with a bachelor's degree typically take the comprehensive exams within six semesters. Upon successful completion of all examinations, doctoral students are expected to prepare a dissertation prospectus and advance to doctoral candidacy within one or two semesters.

Post-Candidacy: Complete at least 12 credits of HIST899 doctoral dissertation research as well as successfully defend and submit an original dissertation.

The requirements for the doctoral degree are intended to be completed in five to six years. For more information, see the History Department website.

Course	Title	Credits
HIST601	History and Contemporary Theory	3

History and Library & Information Science (HILS)

Graduate Degree Program
College: Information Studies / Arts and Humanities

Abstract

The History and Library Science (HiLS) dual-degree program is the result of a cooperative agreement between the College of Information Studies, (Maryland's iSchool) and the Department of History. HiLS students graduate with both a Master of Arts in History and a Master of Library and Information Science (MLIS) degree.

The HiLS program is ideally suited for students interested in gaining a multidisciplinary perspective to research as well as practical hands-on skills. Because of the proximity of the College Park campus to a variety of immensely rich research collections, students are able to gain first-hand experiences through internships that reinforce their classroom instruction. As a result of the dual-degree studies, students in the HiLS program gain skills in historical methodology and cutting-edge library and information science practices, preparing them for careers in libraries, archives, museums, and other information centers in the public, private, and non-profit sectors.

Students admitted to the HiLS Program typically complete the program of study in three (3) years, however they have up to five (5) years to complete the degrees. The HiLS program requires fifty-four (54) credit hours of study, with a minimum of twenty-four (24) hours in both the Department of History and the College of Information Studies. Students select how to use the remaining six (6) credits.

The MA and the MLIS are awarded simultaneously, and a student who fails to complete the special requirements for the coordinated degree programs may not receive either degree. When a student admitted to the HILS program subsequently wishes to receive only one degree, he/she must transfer from HILS either to the graduate program in History or to the College of Information Studies and fulfill the normal requirements for the separate master's degree. The dual-degree History and Library Science offers the option of a degree-by-thesis (History and iSchool) as well as a degree-by-examination (History).

Financial Assistance

The College of Information Studies and the Department of History make available a limited number of teaching and/or graduate assistantships for master's students, including students in the HILS dual-degree program. These assistantships are awarded on the basis of merit, staffing needs, and budget. Neither academic unit extends guaranteed awards.

For more information on financial aid options from the College of Information Studies, please visit the Financial Aid section of the College of Information Studies website. (http://ischool.umd.edu/)

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT) (optional)
- CV/Resume
- Supplementary Essay (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationhilsdual.pdf)
- Writing Sample
- Portfolio PDF Upload (optional)

Students must apply for admission to both the Department of History and the College of Information Studies under the rubric HILS (History and Library Science). There is one, consolidated application, but two, independent admission decisions. An offer of admission from both, the Department of History and the College of Information Studies is required in order to be admitted to the dual-degree program.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 6, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	January 6, 2023

Requirements

- History and Library & Information Science, Master of Arts and Master of Library and Information Science (dual degree) (M.A. and M.L.I.S.) (p. 245)

Facilities and Special Resources

The College of Information Studies operates five research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), and the Digital Curation Innovation Center. iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education. The College also operates a student computer lab for currently enrolled students. Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

History and Library & Information Science, Master of Arts and Master of Library and Information Science (dual degree) (M.A. and M.L.I.S.)

Thesis option: minimum of 54 credits
Non-thesis option: minimum of 54 credits

Students must complete a minimum of 24 credits in the Department of History and a minimum of 24 credits in the College of Information Studies. Students have the option of specializing in one of the iSchool's specializations: Archives and Digital Curation, Community Analytics and Policy, Youth Experience, Diversity and Inclusion, or an Individualized Program Plan. Students completing a thesis must take 6 credits of HIST799.

Human-Computer Interaction (HCIM)

Graduate Degree Program
College: Information Studies

Abstract

In the HCIM program, students learn to design, evaluate, and implement new information technologies that are understandable, usable, and appealing to a wide variety of people. Our students develop a fundamental understanding of the technology design process, tool-building technologies, evaluation techniques, application areas for users, and the social impact of technology on the individual and community. The program prepares students to become human-computer interaction (HCI) leaders in industry and government, or to become successful in doctoral work in a particular specialization of HCI.

Our 30-credit program is typically completed in two years by full-time students, while offering flexibility to accommodate part-time and professional students. Our core curriculum grounds students in the fundamentals of HCI perspectives and methodologies, while electives offer in-depth insight into specialized areas of the field. Students are free to spend the summer in between working at an internship they secure, volunteering, taking courses, or developing their own projects of interest. The choice of an individual thesis or a client-based team capstone project allows students to demonstrate the skills they've acquired in the form best suited to their career goals.

Financial Assistance

The HCIM program is not able to offer applicants financial aid on admission. Many of our students apply for and secure graduate assistantships after being admitted to the program, but these positions are administered by individual faculty, departments, and offices, not by the program itself. For more information about scholarships and financial aid offered by the College of Information Studies, please see here (https://ischool.umd.edu/academics/tuition-fees-graduate/).

Contact

For more information about applying to the HCIM program (https://ischool.umd.edu/academics/master-of-science-in-human-computer-interaction/admissions/), please contact Dustin Smith, the HCIM program's academic advisor, at hcim@umd.edu.

Please visit the College of Information Studies website (http://ischool.umd.edu/) for details on upcoming Information Sessions (https://academiccatalog.umd.eduHTTPS://ISCHOOL.UMD.EDU/ACADEMICS/VIRTUAL-INFO-SESSIONS/) or Open House programs.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s): Uploading unofficial transcripts is sufficient for the purposes of the application review process. However, if you are offered admission and choose to enroll in the University of Maryland, you will need to provide an official and unopened transcript.
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationhcim2020.pdf)
- Portfolio PDF Upload

All applicants to the College of Information Studies must meet the minimum requirements set by the University of Maryland Graduate School.

- Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution.
- Applicants must have earned a minimum 3.0 average GPA (on a 4.0 scale) in all prior undergraduate course work.
- Applicants must provide an official copy of a transcript for all their post-secondary work.

Admission to the HCIM program is competitive. Applicants are evaluated for admission to the program based primarily on academic achievement (GPA and prior coursework) and admissions essays. TOEFL score should be 100 or higher. GRE should be in the 40th percentile or higher for Verbal scores and in the 60th percentile or higher for Qualitative scores.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 6, 2023
International Applicants

Program Website: https://ischool.umd.edu/
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Human-Computer Interaction, Master of Science (M.S.) (p. 247)

Facilities and Special Resources

The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC).

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, the College of Education, and the Philip Merrill College of Journalism.

Human-Computer Interaction, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The Master of Science in Human Computer Interaction (HCIM) is a unique cross disciplinary degree program that integrates information studies, computer science, education, psychology and engineering to prepare future HCI leaders in industry, government, education and other sectors. Through coursework and research experiences, students in this program will develop skills in the fundamentals of HCI, advanced research methods, usability analysis and testing, social computing strategies and technologies, and technology design.

HCIM students devise a plan of study to meet graduation requirements: three core courses, a required research methods course and internship experience, a thesis or capstone project, and three elective courses for a total of 30 credit hours. Students will take 9 credits of elective courses in the following areas: Information Policy, Information Ethics, Users and Use Context, Information and Universal Usability, Information Environments.

Students who wish to complete a thesis should enroll in six credits of INST799. These credits must be taken as 3 credits in the fall of the student's final year and 3 credits the following spring.
Students who wish to complete a capstone project should enroll in INST775 (3 credits) and INST776 (3 credits). These courses must be taken consecutively in the fall and spring of the student's final year.

Course	Title	Credits
INST630	Introduction to Programming for the Information Professional	3

Total Credits		**30**

Human Development (EDHD)

Graduate Degree Program
College: Education

Abstract

The purposes of the Human Development graduate programs are to contribute to basic knowledge about human development and learning and apply this knowledge in various settings. The general areas of human development covered in courses and research include infant and early childhood development, child development, and adolescent development. Specific faculty areas of expertise and research include achievement motivation, cognitive development, developmental neuroscience, early childhood policy, intergroup attitudes and relationships, language development, literacy development, peer relationships, moral development, social development, temperament, parenting, prejudice and discrimination, and the role of culture on many aspects of development.

Graduate programs in Human Development lead to the Master of Education, Master of Arts, and Doctor of Philosophy degrees. The research-oriented M. A. (with thesis) and the Ph.D. degree programs in human development are designed to develop students' scientific knowledge of human development and ability to carry out original empirical research projects. The M.Ed. and M.A. without thesis programs are designed to develop competencies in identifying implications of the scientific knowledge of human development for specific situations and contexts, particularly elementary and secondary schools.

Human Development offers two specialization areas of study at the doctoral level, Developmental Science and Educational Psychology. The graduate programs and specializations prepare graduates for faculty positions at universities or research positions at institutions where research in developmental science and educational psychology is conducted. Graduates of our program have obtained positions as university professors, research scientists, program analysts, and other research-oriented occupations including research-oriented professionals in private, policy, or advocacy organizations.

Financial Assistance

Students requesting consideration for Financial Aid, in addition to completing the financial aid form found in the Graduate Admissions application, must submit their application by the priority deadline. All students who submit their application by December 8, 2021 (domestic) and December 1 (international) will automatically be reviewed for any departmental aid. University fellowships and Departmental assistantships are awarded on a competitive basis -- more students are admitted than can be awarded funding. In recent years, only students with undergraduate GPA's of 3.6, outstanding research experience, and strong letters of recommendation from academic references have been successful in obtaining Recruitment Fellowships sponsored by the Graduate School and graduate assistantships in the Department.

First priority for Departmental assistantships goes to students already admitted to the Department who have been assured financial assistance for the full course of their study. Almost all awards of fellowships and assistantships are based on previous academic performance, with little attention to need. In addition, some faculty have external grants which provide support for graduate students. Students who do not receive a fellowship or assistantship from the Department may contact the University Financial Aid office at 301-314-9000 for information about other sources of financial support.

Admissions

ON-CAMPUS ADMISSIONS INFORMATION

General Requirements

- Statement of Purpose
- Transcript(s): Please note: EDHD requires all applicants to submit official transcripts (hard copies) to: University of Maryland, College Park, Enrollment Services Operation/Graduate Admissions, Room 0130 Mitchell Building, College Park, MD 20742
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)* Graduate Record Examination (GRE) scores are not considered as a criterion for admission into the program. GRE scores that are submitted are made available to potential faculty advisors.
- CV/Resume
- Description of Research/Work Experience (M.A. only)
- Writing Sample (required for M.A. and Ph.D., not required for M.Ed.)
- Supplementary Application

The College of Education and Graduate School require a minimum GPA of 3.0 (on a 4.0 scale) at the undergraduate level. At the master's level, a minimum GPA of 3.5 is required by the College of Education. The general Graduate Record Exam (GRE) is required by the Department. Three letters of recommendation including evidence of academic potential from university faculty references are required. In addition, students must write a statement of purpose which indicates a match between student research interests and faculty expertise. Students should indicate their

research interests, describe any relevant research experience, and how their experience and interests can be met by our program.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

OFF-CAMPUS M.ED. ADMISSIONS INFORMATION

The Department of Human Development & Quantitative Methodology (HDQM) at the University of Maryland will begin accepting applications on **July 1, 2022** for the Fall 2023 cohort of the off-campus, 30 credit Master of Education in Human Development program. Applications will be reviewed on a rolling basis and close on **June 1, 2023** (domestic).

Please contact Dr. Lauren Trakhman, Director of Outreach, at trakhman@umd.edu or Ms. Jannitta Graham, HDQM Graduate Coordinator, at jgraham7@umd.edu for further information or with any questions.

Admissions Requirements

- Non-refundable $75 application fee*
- Complete a graduate student on-line application, including
  - Scanned transcripts showing receipt of a bachelor's degree from an accredited institution with an undergraduate GPA of 3.0 or higher (on a 4.0 scale). If you have international credentials, please provide transcript in original language with English translation, diploma and certificate. You may be required to submit TOEFL exam scores, https://gradschool.umd.edu/admissions/international-admissions (https://gradschool.umd.edu/admissions/international-admissions/)
    - **Note:** Official transcripts are required by the Graduate School for the final admission decision. If accepted into the University and program, applicants must send official, sealed undergraduate and graduate transcripts from all post-secondary schools attended (with 9 credits or more). Transcript(s) from the institution should be mailed to University of Maryland College Park Enrollment Services Operation, Attn: Graduate Admissions, Room 0130 Mitchell Building, College Park, MD 20742
  - 3 letters of recommendation
  - Statement of purpose
  - Evidence of having taken a college-level statistics class in the last five years with a grade of B- or above. If you have not, please indicate this in your statement of purpose and you will work with Dr. Trakhman to take a statistics course online in the summer before the program begins

* Subject to increase. If you were previously admitted as a Graduate Student, registered, AND completed at least one semester, you will not be charged a second application fee. To obtain a waiver you will need to indicate your previous graduate student status within the online graduate application. In the "Previous Institution" section of the application, when you enter "UMCP", a waiver link will appear within the application. You will click on the link and be asked to certify that you previously attended the university. However, you must complete all of the paperwork for admission, as you now are entering a degree program through a new department. You must request the waiver before submitting the application.

Requirements

- Human Development, Doctor of Philosophy (Ph.D.) (p. 250)
- Human Development, Master of Arts (M.A.) (p. 249)
- Human Development, Master of Education (M.Ed.) (p. 250)
- Human Development, Master of Education (off campus, M.Ed.) (https://academiccatalog.umd.edu/graduate/programs/human-development-edhd/off-campus-med/)

Facilities and Special Resources

The Washington, D.C. area and the University of Maryland are rich in resources for graduate study in human development. The faculty of the Department is multi-disciplinary, representing the broad range of developmental sciences, educational psychology, and related fields. There are programs of funded research, field service programs, and internship experiences available in cooperation with agencies and schools. The Department sponsors the Center for the Study of Children, Relationships, and Culture and manages the on-campus Center for Young Children. Faculty in the department make use of the research facilities at the Maryland Neuroimaging Center and Maryland Language Science Center. Students in the College of Education have access to the latest technology through Educational Technology Services.

Human Development, Master of Arts (M.A.)

Thesis or Non-thesis option: 30 credits

The M.A. program requires 30 credit hours and offers both a thesis option (24 hours of courses plus 6 hours of thesis) and a non-thesis option (24 hours of courses plus 6 hours of supervised placement in an organization and accompanying papers).Courses in biological, social, cognitive, and personality development and in quantitative methods and a written comprehensive examination are required for all master's degrees.

Course	Title	Credits
Required courses:		
EDHD690	Theoretical Foundations of Human Development	3
EDMS645	Quantitative Research Methods I	3
EDHD720	Social Development and Socialization Processes	3

EDHD721	Cognitive Development and Learning: An Introduction	3
EDHD775	Human Development and Neuroscience	3
Thesis or Non-Thesis Requirements		
Select one of the following:		15
Thesis:		
EDMS646	General Linear Models I	
EDHD799	Master's Thesis Research	
Two electives approved by advisor		
Non-Thesis:		
EDHD789	Internship in Human Development	
Three electives approved by advisor		
Total Credits		**30**

Human Development, Master of Education (M.Ed.)

Non-thesis only: 30 credits required

The Master of Education degree in Human Development has the following requirements: Minimum of 30 credits of coursework, including EDMS645. A minimum of 15 hours in courses numbered 600-800, with the remainder in the 400 series or above. Required courses focus on biological, social, cognitive, and personality development and in quantitative methods. A written comprehensive examination and seminar paper are required to be taken at the end of the coursework.

The Off Campus Master of Education program curriculum is designed to respond to developmental and motivational challenges faced by teachers and other professionals who work with children and adolescents in education settings. This is not a certification program. The program uses a cohort model. Each fall a new cohort of students begins the program, which runs for two years, including one summer semester. To graduate, students must successfully complete 30 credits of study and a seminar paper. Classes are held off campus, primarily at the Universities at Shady Grove. For More information, please visit https://education.umd.edu/human-development-program#prospective-graduate-students (https://education.umd.edu/human-development-program/#prospective-graduate-students)

Human Development, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 72 credits, including 12 credits of EDHD899. Students can specialize in either Educational Psychology or Developmental Science, and must complete an Independent Emprical Research Project as well as The Doctoral Comprehensive Knowledge Portfolio.

Courses in biological, social, and cognitive development and in intermediate statistics and research methods are required. Students also receive credit for research experiences. Slight modifications of these requirements characterize the Specializations in Educational Psychology and Developmental Sciences.

Advance to Candidacy: In addition to coursework requirements, students must complete an independent empirical research project as well as successfully complete a comprehensive examination portfolio.

Post-Candidacy: Students must complete at least 12 credits of 899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Industrial/Organizational Psychology (MPIO)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The University of Maryland Master's of Professional Studies in Industrial Organizational Psychology provides rigorous training in the scientific principles and methods in IO Psychology while also increasing graduates' capacity to influence the way work is done, to apply evidence-based best practices, and to ask and answer questions that matter in the workplace. Students take 10 courses (two per term) over the course of 15 months. Courses are taught in the evenings at the College Park campus and through pre-recorded online lectures. This program is designed for working professionals who desire advanced knowledge in industrial and organizational psychology to enter, advance, or expand their career options.

Information Management (INFM)

Graduate Degree Program
College: Information Studies

Abstract

The Master of Information Management (https://ischool.umd.edu/mim/) (MIM) program at the College of Information Studies, Maryland's iSchool prepares graduates to be industry leaders in information science and technology, maximizing the value of information management solutions and empowering organizations through the optimized decision-making process. Drawing from management, computer science, information systems, and information science, the MIM program provides students with the skills and knowledge necessary to successfully meet users' information needs, lead efforts to develop organizations' information management capabilities, develop and deploy emerging technologies, and manage high-value information resources.

The specific goals of the MIM program are to:

- Prepare professionals for leadership positions that bridge the gap between technology-oriented staff, functional personnel, and management;
- Address the growing need for skilled information professionals who can strategically manage information and technology assets to fulfill critical information needs in organizations;
- Provide leadership in the information management field through the study of ethical, political, social, and technical issues related to information management in modern society;
- Assist organizations in the formation of information policies, development and application of information systems and services, and the use of information management technologies and methods.

The MIM curriculum consists of 36 credits (12 courses) of graduate-level coursework in information management and related subjects, including a balanced mix of required and elective courses. The courses are integrated into four main blocks:

- Core courses provide a foundation of skills and knowledge related to information, technology, user analysis, and management. They are also opportunities for students to determine which aspects of information management they find most interesting and useful.

- Specialized courses in Management and Information Technology enable students to build advanced skills and knowledge and develop the expertise required in the information management field;
- Practicum courses allow students to connect theory from their learning experience in the classroom to real-world settings through projects carried out in partner organizations;
- Elective courses provide flexibility to the program and allow students to pursue their own educational and professional interests in greater depth.

The Master of Information Management degree courses are offered at the College Park campus (College Park, Maryland), at the Universities at Shady Grove campus (Rockville, Maryland), and online.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)): The minimum TOEFL score for admission into the MIM program is 96. Students must be eligible for full enrollment.

Program-Specific Requirements

- Letters of Recommendation (3)
- GRE scores are required for all applicants, except domestic applicants with an undergraduate GPA of 3.25 or higher. Any requests to waive the GRE requirement will be evaluated on a case-by-case basis by the program committee. GMAT scores may also be submitted instead of GRE scores (please notify the department if you will be sending GMAT scores). Please send any requests to mimprogrammanager@umd.edu.
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationinfm.pdf): Please note: Though the responses to these questions may have some overlap with the Graduate School's statement of purpose – applicants may cut and paste, as relevant, from the Graduate School's statement submission.

The admissions process for the MIM program is designed to determine whether the program is a good fit considering the applicant's background, education, and professional development goals. Applications for admission to MIM program are evaluated on the basis of the following criteria:

- A baccalaureate degree from a regionally accredited college or university with a minimum "B" or 3.0 average on a 4.0 scale on all academic work attempted for consideration;
- Strength of the three (3) recommendations from persons able to judge probable success in graduate school;
- Strength of applicant statement of purpose, explaining the reasons for undertaking the graduate study at the University of Maryland;
- Strength of supplemental application responses, describing why you are interested in the Masters of Information Management program and why this program is a good fit for your professional/career goals;
- International applicants are required to submit the TOEFL or IELTS scores;
- Potential for leadership and innovation in information management as reflect in previously earned graduate degrees and work experience;

Please visit the MIM Admission (https://ischool.umd.edu/academics/master-of-information-management/admissions/) page for more information about applying to the MIM program.

Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Information Management, Master of Information Management (M.I.M.) (p. 254)

Facilities and Special Resources

The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC).

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

The College also operates a student computer lab for currently enrolled students.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Information Management, Master of Information Management (M.I.M.)

Thesis option: 36 credits
Non-thesis option: 36 credits

Successful completion of the MIM degree requires that students complete 36 credit hours of academic work with at least a B average (3.0 GPA). Full-time students complete the program in 24 months. Part-time students typically complete the program in two to three academic years. Students may take courses in daytime and evening and may switch between part-time and full-time enrollment. However, all coursework must be finished within five calendar years of the first registration.

All MIM students must complete four core courses, which provide a foundation of skills and knowledge related to information, technology, user analysis, and management. These courses must be completed within student's first 18 credits in the program. The MIM core courses include INFM600, INFM603, INFM605, and INFM612.

After completing the MIM core courses, all students are required to complete a set of electives that provide depth of knowledge in one or more areas of information management expertise. To help students satisfy this requirement, the MIM program offers a variety of focus areas and specialization guidelines, which provide students with examples of ways their MIM elective coursework can be organized to meet their educational and professional goals. The program offers seven focus areas (cyber threat intelligence, data science and analytics, game and entertainment analytics, information risk management, smart cities and connected communities, strategic management, and technology development) and two specialization tracks(Information Analysis - with a focus on either **Data Analytics** or **Strategic Management and Technology Design** - with a focus on Technology Development).

If students are interested in developing a general course of study, there is an option for the **Individualized Program Plan**. There is also an option for writing a thesis through the **Information Management Research** track.

Course	Title	Credits

Information Studies (INFS)

Graduate Degree Program
College: Information Studies

Abstract

The PhD program at Maryland's iSchool offers an interdisciplinary approach to research and teaching provided by faculty at this leading public research university. Small classes and wide-ranging research projects enable students to work closely with faculty mentors to gain experience in identifying knowledge gaps, investigating both theoretical and practical solutions, evaluating results, and creating and disseminating new knowledge. A range of required research courses, two foundational doctoral seminars, and electives chosen by the students and their faculty mentors provide both the structure necessary for individuals to become successful researchers and the flexibility that allows them to pursue the research areas about which they are most passionate.

What Are the Unique Aspects of the Doctoral Program?

Maryland's iSchool is at the center of groundbreaking research in the fast-moving field of information studies. With a multidisciplinary faculty studying such diverse topics as online communities, information systems, information policy, human-computer interaction, and digital cultural heritage, the iSchool cultivates doctoral students from a wide range of backgrounds. The PhD program offered at the iSchool provides students with training in interdisciplinary theory, research, and pedagogy as preparation for original research that connects communities, technologies, and information.

The iSchool's location near Washington, DC, the information capital of the world, offers unparalleled opportunities for students to pursue research and employment opportunities. Our PhD students hold internships at and conduct research in government agencies, top technology and design firms, and the nonprofit sector; and graduate to jobs in academia, industry, and government.

What are the Goals of the Doctoral Program?

Upon successful completion of the doctoral program, graduates have:

- Knowledge of the foundations of the field of information studies.
- Mastery of research methods and design.
- Understanding of the research in a specialized content area.
- Proficiency in synthesizing and applying knowledge from a variety of areas.
- Expertise in conducting research and disseminating new knowledge.

Financial Assistance

Information on the availability of financial assistance is available on the Ph.D. program's website at http://ischool.umd.edu/phd (http://ischool.umd.edu/phd/). The College seeks to offer funding to entering doctoral students throughout their study in the doctoral program, contingent on factors such as successful progress through the doctoral program, likelihood of timely completion of the doctoral program, qualifications, and the availability of funding.

Requirements

- Information Studies, Doctor of Philosophy (Ph.D.) (p. 256)

Facilities and Special Resources

The College operates six research centers: Center for Archival Futures (CAFe), the Center for Advanced Study of Communities and Information (CASCI), the Computational Linguistics and Information Processing (CLIP), The Human-Computer Interaction Lab (HCIL), the Social Data Science Center (SoDA), and the Trace Research & Development Center (Trace). The College also facilitates three interest groups: the Sociotechnical Cybersecurity (STC) Interest Group, the Search Mastery Interest Group, and the Dean's Distinguished Lecture Series.

iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS) and the Maryland Institute for Technology in the Humanities (MITH), as well as the Departments of Computer Science, Criminal Justice, English, Geographical Sciences, and Sociology, the Robert H. Smith School of Business, the School of Public Policy, and the College of Education and the College of Journalism.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory (HCIL), and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Information Studies, Doctor of Philosophy (Ph.D.)

Doctoral students must complete a minimum of 27 graduate credit hours at the University of Maryland. Course work will be taken in three areas of study:

- Information Studies (6 credit hours)
- Research Methods and Design (12 credit hours)
- Specialized area(s) (9 credit hours)

Advance to Candidacy: In addition to course requirements, students must successfully pass a first-year review, submit an integrative paper, and a dissertation proposal.

Post-Candidacy: Complete at least 12 credits of INST899 as well as successfully defend and submit an original dissertation.

Information Systems (BMIS)

ABSTRACT

Maryland Smith's Master of Science in Information Systems program gives you the cutting-edge data science, IT and analytical skills you'll need to stand out in the job market and help company leaders make informed decisions.

- Learn the best ways to manage data using the latest analytics tools and explore how to help business leaders further adapt to a changing technological landscape.
- Participate in case competitions and do simulation exercises that mirror the challenges you'll face in the workplace.
- Build relationships with other talented students from diverse academic backgrounds and boost your skills under the guidance of expert faculty.

Financial Assistance

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Information Systems, Master of Science (M.S.)

Non-thesis only: 30 credits required

The MS in Information Systems program is ideal for those who understand the value of technology and are interested in gaining the knowledge to manage it. You will learn how information is captured, organized, managed and analyzed, preparing you to lead in the ongoing technology revolution. Get ready to harness the power of information and help move your organization to the next level.

Integrated Pest Management (Z089)

Graduate Certificate Program

College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Graduate Certificate in Integrated Pest Management (GC-IPM) is a 12-credit graduate program that can be completed in twelve months of continuous study. The GC-IPM focuses on the techniques of integrated pest management for proper pest control management. The program is an effective and environmentally conscientious approach to pest management. Students learn about the life cycles of insects and their interaction with the environment to determine the most effective pest control methods while taking in consideration the effects of treatments to local ecosystems.

Requirements

- Integrated Pest Management, Post-Baccalaureate Certificate (P.B.C.) (p. 258)

Integrated Pest Management, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

In this 12-credit certificate, students learn the techniques of Integrated Pest Management (IPM), an effective and environmentally conscientious approach to pest management. Students learn about the life cycles of insects and their interaction with the environment to determine the most effective pest control methods while taking in consideration the effects of treatments to local ecosystems.

Intelligence Analysis (Z021)

Graduate Certificate Program
College: Public Policy

ABSTRACT

The objective of the Certificate Program in Intelligence Analysis is to develop proficiency in a uniform set of core conceptual competencies and skills that all those involved in the support of major national security

and intelligence agencies should possess, as well as additional tools important to particular forms of intelligence analysis.

At no time in American history has sound intelligence analysis been a more important public policy concern. Today, the collection, analysis, and dissemination of intelligence to support national security decision making is rightly at the forefront of government and supporting organizations' actions.

International Education Policy (HIEP)

Graduate Degree Program
College: Education

Abstract

The Higher Education, Student Affairs, and International Education (HESI) program is committed to advancing the positive role education can have in society. Our faculty and students study core facets of the education system; this includes the functioning and impact of colleges and universities, student learning and development in higher education, and the enactment and implementation of K-18 and nonformal education policies in an international context. HESI offerings are characterized by a particular emphasis on social justice, diversity, policy, and system change. Our students and faculty are scholars, practitioners, change agents, and innovative leaders active in universities, as well as in national and international organizations and policy-making bodies. The program is a collaborative community that develops theory, conducts research and translates these into practice, and engages students, educators, and professionals in the advancement of education.

The HESI programs offer three areas of concentration: Higher Education; Student Affairs; and International Education Policy. Please only include one area of concentration on the application. Before applying students should familiarize themselves with each concentration area and choose the one that most closely fits their own particular needs and aspirations. The College of Education website (http://www.education.umd.edu/) offers descriptions of all the concentrations, faculty profiles and contact information, and is an essential resource for all applicants.

Note that, as of 2012, the HESI graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. Previously, Student Affairs was part of the Department of Counseling and Personnel Services and Higher Education and International Education Policy were part of the Department of Education Leadership, Higher Education, and International Education.

The International Education Policy (IEP) **(**http://www.education.umd.edu/**)** program offers M.A. and Ph.D.degrees designed to provide an interdisciplinary understanding of today's educational policy and practice. The focus is on the relation of education to economic, political, and social development in both developing and developed countries at local, national, regional, and global levels. The IEP program gives comprehensive attention to education, considering both formal schooling, from pre-school to higher education, as well as non-formal, adult, and community-based education.

Financial Assistance

The Department has a very limited number of merit-based fellowships and graduate assistantships available to doctoral students. Fellowships are awarded to doctoral students in March only for the following fall semester. Assistantships are also awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility. International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time. If you need information about ISSS clearance visit the ISSS website at www.umd.edu/ies (http://www.umd.edu/ies/). For more information on financial assistance, see the department website: www.education.umd.edu/chse/admissions/finance (http://www.education.umd.edu/chse/admissions/finance/).

Requirements

- International Education Policy, Doctor of Philosophy (Ph.D.) (p. 261)
- International Education Policy, Master of Arts (M.A.) (p. 261)

Facilities and Special Resources

Faculty and students in the Department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including international agencies and non-governmental organizations, provide exceptional opportunities for internships, field experiences, and research to enhance formal course experiences.

International Education Policy, Master of Arts (M.A.)

Thesis option: 30 credits
Non-Thesis option: 30 credits

The M.A. program in International Education Policy is looking for first-rate students with an interest in professional careers or further study in the field. This degree seeks to form professionals with an understanding of the complex array of issues concerning educational policies and practices in both developing and industrialized countries. It also seeks to form professionals who will join institutions working on projects that range from assistance to educational systems under times of crisis to efforts to improve educational curricula and to the conduct of exchanges of students and academics across countries.

The M.A. program requires a minimum of 30 credits and usually takes one and a half to two years to complete. The program is distinguished by the development of a unique program of study to suit the needs of each student.

Complete a Master's paper		
Total Credits		**30**

International Education Policy, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 90 credits beyond the Bachelor's degree, including a maximum of 24 credits transferred from a previously earned Master's degree. Students are also required to complete 12 credits of EDHI899, which is included in the total credit requirement.

The degree generally requires 54 credits of coursework which can be completed in 2 to 3 years. The program is distinguished by the development of a unique program of study to suit the needs of each student. Initial program plans are flexible and are usually revised throughout a student's graduate work as particular directions and their implications for coursework develop.

Advance to Candidacy: In addition to course requirements, students must successfully pass a comprehensive exam in order to advance to candidacy.

Post-Candidacy: Complete at least 12 credits of EDHI899 doctoral dissertation research as well as successfully defend and submit an original dissertation.

Admissions

This program is not currently accepting applications

Requirements

- Interpreting, Master of Professional Studies (M.P.S.) (p. 261)

Interpreting, Master of Professional Studies (M.P.S.)

44 credits required

Students select either the Conference Interpreting track or the Public Service Interpreting track. In either track, students can focus on two languages or three.

Regardless of track or number of languages, all MPIN students must complete the following courses:

Course	Title	Credits
COMM610	Introduction to Translation and Interpreting Studies	3
COMM683	Intercultural Communication Theory	3
COMM769	Professional Practice Forum in Interpreting: Workplace Processes and Procedures	1

COMM789	Seminar: Special Topics in Intercultural Communication	3
COMM657	Professional Practice Forum in Interpreting: Career Portfolio and Exams	1
COMM759	Professional Practice Forum in Interpreting: Practicum	1
Additional course requirements [1]		32
Total Credits		**44**

[1] Students should check the department website for the remainder of their course requirements. The remainder of the course requirements vary based on the student's track and number of languages.

Jewish Studies (JWST)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Jewish Studies Program offers both a Masters Degree in Jewish Studies, and a Graduate Certificate in Jewish Studies.

The Masters Program in Jewish Studies is designed to offer students broad, interdisciplinary, graduate-level training in Jewish Studies, as well as in-depth focus on some aspect of the Jewish experience. The curriculum draws on the strengths of the Jewish Studies Program at Maryland, especially Jewish History, Bible, Jewish Literature and Cultural Studies (particularly in the ancient and modern periods), Yiddish, Philosophy, Religious Studies, and Israel Studies. In addition, students take courses in cognate fields outside of Jewish Studies in consultation with their advisors. The extremely strong, and still growing, library collection (rivaled in the mid-Atlantic region only by the Library of Congress), and our proximity to the National Archives, the Library of Congress, the U.S. Holocaust Memorial Museum, and other museums and institutions make the University a prime location for graduate Jewish Studies.

The Post Baccalaureate Certificate in Jewish Studies offers students already enrolled in graduate programs at the University to receive training in Jewish Studies. The program draws on faculty in History, English, Philosophy, Hebrew, and other departments and programs.

Financial Assistance

MA applicants are eligible for University-wide fellowships. In addition, the Jewish Studies program may award up to two fellowships per year to outstanding Masters students.

Limited funds may be available for outstanding certificate students.

For more information, please contact the Prof. Charles Manekin, Director of the Meyerhoff Center and Program for Jewish Studies.

Requirements

- Jewish Studies, Master of Arts (M.A.) (p. 262)

Facilities and Special Resources

The University's libraries hold over 3,000,000 volumes and house among the strongest holdings in Judaic Studies in the Mid-Atlantic region. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the Dumbarton Oaks, the National Archives, the Smithsonian Institution, the U.S. Holocaust Memorial Museum, and numerous other scholarly, cultural, and political resources. Through the Consortium of Institutions in the Washington D.C. area, University of Maryland graduate students may enroll in courses at other universities for graduate credit.

Jewish Studies, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

As a prerequisite for admission, students must have achieved the proficiency-level corresponding to four semesters of university-level Hebrew, and must achieve the level of six semesters of university-level Hebrew by the time they have completed the program. Courses in Hebrew language will not count toward the 30 credits needed for the degree. Students will be asked to demonstrate their knowledge of modern academic Hebrew by examination, or through a research project making extensive use of Hebrew-language materials.

Course	Title	Credits

Jewish Studies (Z018)

Graduate Certificate Program
College: Arts and Humanities

abstract

The Meyerhoff Center for Jewish Studies is one of the leading centers for Jewish Studies in the United States, boasting an internationally recognized faculty, an excellent and growing Jewish Studies library collection, and especially rich library, archive, and museum resources in the greater Washington area. If you are considering graduate work in Jewish Studies the following information may be useful to you.

The Jewish Studies Program offers a Graduate Certificate and a Masters Degree in Jewish Studies. In addition, Jewish Studies offers special degrees for teachers. The Hebrew Language Program is designed for prospective or current teachers of Hebrew. Students have the option of receiving a MEd in Education (Curriculum and Instruction), or an MA in Jewish Studies. In addition, students continue to have the ability to earn a MEd in Education Policy and Leadership with a Jewish Studies concentration through the College of Education.

Journalism (JOMJ)

Graduate Degree Program
College: Journalism

abstract

The Master of Journalism degree is a nonthesis program that requires 30 to 37 credits, depending on students' experience and whether they are invited to spend an extra semester working on a multidisciplinary team with the Howard Center for Investigative Journalism.

This program is intended for students who want to work as professional journalists after graduation. M.J. students' degree program culminates

in a review of their journalism portfolio by a panel of faculty and professionals. There is no thesis requirement for M.J. students.

Broadcast journalism students will complete their program deeply prepared for a career as a broadcast news reporter. Students may also choose to take electives in studio production, investigative journalism or sports journalism or other areas. Multiplatform journalism students may take a sequence of courses in data journalism, investigative journalism, sports journalism, visual journalism, audience engagement or other areas. Or, students may choose to take courses in multiple areas.

In their final required semester, M.J. students enroll in a six-credit capstone course in one of the Capital News Service (CNS) bureaus on campus, in Annapolis or in Washington, D.C.

For more information about the program, visit go.umd.edu/MasterJournalism (http://go.umd.edu/MasterJournalism/).

Facilities and Special Resources

The University of Maryland is located just a few miles from Washington, the media capital of the world. Students and researchers have access to The Washington Post and USA Today, as well as hundreds of Washington bureaus for newspapers, online news sites, and TV and radio news outlets from around the world. The Philip Merrill College of Journalism operates daily news bureaus in Washington, D.C., at the Ronald Reagan Building a few blocks from the White House; in Annapolis, just a block from the Maryland State House; and on campus from two locations -- Knight Hall, our state-of-the-art building with multiple news labs and opportunities for multi-platform experimentation; and UMTV, a cable TV station that reaches more than 600,000 homes in central Maryland. The broadcast program is equipped with state-of-the-art digital editing systems used by students to produce a 30-minute nightly newscast. Opened in 2010, Knight Hall also brings all of the College's affiliated centers under one roof. The college also provides equipment for all specialty media classes -- from broadcast cameras to DSLRs -- so students are not required to bring their own equipment.

Journalism Studies (JOST)

Graduate Degree Program
College: Journalism

abstract

Maryland's elite Ph.D. in Journalism Studies (http://merrill.umd.edu/academics/phd-program/) prepares scholars for next-generation research in the key issues confronting journalism in the 21st century.

- The program features small classes and a high level of collaboration with professors (http://merrill.umd.edu/academics/phd-program/ph-d-faculty/). Work focuses on the analysis of journalism practice and ethics, media history, gender and media, international media, as well as in emerging technology and the audience.
- With an emphasis on helping journalists translate career experience into research expertise, the program is highly successful (http://merrill.umd.edu/academics/phd-program/ph-d-positions/) at placing its doctoral graduates into teaching and research posts in higher education.

If you are seeking a master's degree to provide you with the fundamentals of journalism for a professional career, please see the Journalism (JOMJ) (p. 263) degree. If you are an experienced journalist looking for a research-focused master's degree, go to Journalism (JOUR) (p. 266);
If you're seeking a graduate journalism multimedia certificate, go to Multimedia Journalism (Z071) (p. 303).

Requirements

- Journalism Studies, Doctor of Philosophy (Ph.D.) (p. 266)

Journalism Studies, Doctor of Philosophy (Ph.D.)

The University of Maryland's Ph.D. in Journalism Studies is designed to prepare students for careers in university teaching, academic and industry research, and media consulting. The first two years of the program consist of coursework in theory, research methods, journalism, and an outside area of interest (such as Communications, Sociology, History, etc.). After advancing to doctoral candidacy, students then conduct research and write the dissertation. Most successful candidates enter the program with a master's degree, but a master's degree is not a prerequisite for admission

Advance to Candidacy: At the end of coursework, students are required to pass five comprehensive examinations: four written comprehensive exams and one oral exam. Each of the four written exams cover the following topics: theory, a cognate area, methodology, and an area of specialization. The fifth one is an oral defense of the comprehensive exams.

Post-Candidacy: Complete at least 12 credits of JOUR899 doctoral dissertation research. Successfully defend and submit an original dissertation.

Course	Title	Credits

Journalism (JOUR)

Graduate Degree Program
College: Journalism

Abstract

This Master of Arts (JOUR) degree is mainly intended for experienced journalists seeking a research-focused, academic journalism degree with the goal of a future teaching or Ph.D. program. If you are seeking a master's degree to provide you with the fundamentals of journalism for a professional career, please see the Journalism (JOMJ) (p. 263) degree. If you're looking for a Ph.D. program, go to Journalism (JOST) (p. 265). If you're seeking a graduate journalism multimedia certificate, go to Multimedia Journalism (Z071) (p. 303).

The Master of Arts in Journalism is a research-oriented, thesis program of 30 credits. The program is intended for experienced journalists, academics and others who are looking for a more scholarly master's program. The degree offers a great deal of flexibility by tapping into the resources of the University of Maryland, a top-ranked, public, research institution located minutes away from Washington, D.C., Annapolis and Baltimore. The college's unmatched access to internships in one of the nation's top media markets and opportunities to learn from the pros working in today's multimedia newsrooms make the Philip Merrill College of Journalism a training ground like no other. Our students are fearless and #MerrillMade.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) or Graduate Management Admissions Test (GMAT) (both optional)

- GRE Subject (optional)
- CV/Resume
- Portfolio PDF Upload (Optional)
- Writing Samples (3)
- Supplementary Application (optional)
- Description of Research/Work Experience (optional)

Applicants seeking admission to the master's program must hold a bachelor's degree from a accredited institution of higher learning. Undergraduate study of journalism and/or professional experience in journalistic fields are not required. Students must take the Graduate Record Examination (GRE), provide three writing samples and obtain three letters of recommendation.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	February 3, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	February 3, 2023

Other Deadlines: Please visit the program website at http://www.merrill.umd.edu

Requirements

- Journalism, Master of Arts (M.A.) (p. 267)

Facilities and Special Resources

The University of Maryland is located just a few miles from Washington, the media capital of the world. Students and researchers have access to The Washington Post and USA Today, as well as hundreds of Washington bureaus for newspapers, online news sites, and TV and radio news outlets from around the world. The Philip Merrill College of Journalism operates daily news bureaus in Washington, D.C., at the Ronald Reagan Building a few blocks from the White House; in Annapolis, just a block from the Maryland State House; and on campus from two locations -- Knight Hall, our state-of-the-art building with multiple news labs and opportunities for multi-platform experimentation; and UMTV, a cable TV station that reaches more than 600,000 homes in central Maryland. The broadcast program is equipped with state-of-the-art digital editing systems used by students to produce a 30-minute nightly newscast. Opened in 2010, Knight Hall also brings all of the College's affiliated centers under one roof. The college also provides equipment for all specialty media classes -- from broadcast cameras to DSLRs -- so students are not required to bring their own equipment.

Journalism, Master of Arts (M.A.)

Thesis only: 30 credits

The degree requires 30 credits of coursework and a thesis, which is a critical and scholarly work. Required among the 30 credits are three-credits of research methods, three credits of theory and six credits of master's thesis work. The remaining 18 credits are comprised of elective courses, which may be taken within the College of Journalism or, with approval, in affiliated fields of study within the Graduate School or Washington Consortium.

Kinesiology (KNES)

Graduate Degree Program
College: Public Health

Abstract

A vital part of the School of Public Health, the Department of Kinesiology offers programs leading to the Master of Arts (thesis and non-thesis options) and Doctor of Philosophy degrees. Research emphases within the three broadly defined areas of exercise physiology, cognitive motor neuroscience, and physical cultural studies are offered. Within each of these cognate areas, students develop specialized programs with faculty guidance and consistent with faculty expertise. Details of faculty research interests and additional information can be found at the department website (https://sph.umd.edu/academics/departments-units/department-kinesiology/).

Financial Assistance

Teaching and research graduate assistantships are offered each academic year. At the present time, over two-thirds of the graduate students are financially supported. Teaching assistants work as discussion leaders and laboratory assistants as well as instructors in physical activity classes. Many research assistants are supported by grants. The department is active in seeking University fellowships for its outstanding applicants.

Website: https://sph.umd.edu/academics/departments-units/department-kinesiology (https://sph.umd.edu/academics/departments-units/department-kinesiology/)
Courses: KNES (https://umd-curr.courseleaf.com/graduate/courses/knes/) SPHL (https://umd-curr.courseleaf.com/graduate/courses/sphl/)
Relationships: Bioengineering (BIOE) (p. 77) Neurosciences and Cognitive Science (NACS) (p. 316)

Admissions

The M.A. and Ph.D. in Kinesiology programs accept applications through the online graduate application (https://terpengage.force.com/community/CustomLoginPage/?GradApp=True) through the TerpEngage Graduate Admissions System.

General Requirements

- A Bachelor's degree
- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Minimum 3.0 undergraduate GPA (M.A applicants)
- A Kinesiology undergraduate degree is not required; relevance of undergraduate major at discretion of proposed faculty advisor (M.A applicants)
- Master's degree in Kinesiology is not required; prior degree relevance will be assessed by the potential faculty advisor (PhD applicants)
- Three letters of recommendation - letters should be from people knowledgeable about the applicant's prior academic achievements and potential
- CV/Resume

- Official GRE test scores submission is waived for Fall 2022 admissions. GRE scores won't be reviewed.
- A writing Sample(s) is **required.** E.g: Undergraduate thesis or major paper; Master's thesis or major paper; Published manuscript (if you submit a published manuscript and you are not the first author, describe your contribution to the publication).
- Description of Research/Work Experience (optional)
- Publications/Presentations (optional)
- Teaching Assistantship form (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationknes.pdf) (optional)

Note for applicants with foreign credentials:

- The UMD graduate application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

Students may qualify for admission with a 3.0 GPA (M.A.) or 3.5 GPA (Ph.D.), and a focused letter detailing academic and research goals as well as previous research experiences. In addition, each applicant should submit a minimum of three strong recommendations from people knowledgeable about the applicant's prior academic achievements and research potential. Appropriate background course work closely aligned with the intended research specialization is expected. Graduate faculty sponsorship is also necessary for admission; each faculty member has only a limited number of openings and only the most highly qualified applicants are selected. Faculty review of applications does not occur until all required parts of the application are received. This review is done in early January; therefore applicants are encouraged to have all their application materials submitted by January 1 for best consideration for admission and financial support."

Note: Regardless of academic preparation, a qualified faculty member in the proposed Area of Study (i.e. Cognitive Motor Neuroscience, Exercise Physiology, or Physical Cultural Studies) must be willing to sponsor and mentor the student prior to applying. Applicants should speak with the faculty member with whom they prefer to study. Applicants are encouraged to visit the campus and make appointments to interview with faculty.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Kinesiology, Doctor of Philosophy (Ph.D.) (p. 270)
- Kinesiology, Master of Arts (M.A.) (p. 270)

Facilities and Special Resources

The Department has three areas of specialization: Cognitive Motor Neuroscience, Exercise Physiology, and Physical Cultural Studies. Laboratories are maintained, which support original investigations in each of the three areas. Laboratories include equipment for measuring metabolic parameters, strength, body composition, postural sway, ground reaction forces, amount of physical activity in daily life, as well as muscle biopsies and movement analysis. The response of the human body to physical activity/exercise can be viewed through ECG, EEG, EMG and systematic behavior observation systems. Each of the three research areas has interfaced computer hardware and software to support data collection and analysis. Collaborations with the School of Medicine at the Baltimore campus and with NIH often result in the availability of other facilities and equipment. All graduate students have access to computers and other forms of technology. Details and pictures of current facilities and equipment are available at our website: www.sph.umd.edu/KNES/. (http://www.sph.umd.edu/KNES/.html)

Cognitive Motor Neuroscience Lab Various tools provide students with opportunities to measure, postural sway, ground reaction forces, multi-digit pressing and moments in 3-D, and movement analysis. These tools include:

1. A three wall rear-projected monoscopic CAVE display system with three XGA digital projectors. The system is designed for standing humans to be immersed in a visual world to test questions about how the nervous system processes visual information to maintain upright stance.
2. A hydraulically-controlled moveable force platform for recording center of pressure and ground reaction forces inside the CAVE.
3. An Optotrak motion analysis system, capable of tracking up to 24 LEDs simultaneously for whole body analysis.
4. A touch plate consisting of a miniature force plate capable of resolving .01 N of force in three directions.
5. A Logitech 6D ultrasonic tracking system consisting of a control unit, two triangular receivers and one triangular transmitter. Each receiver provides three components of translation (x, y, z) and three components of rotation (yaw, pitch, roll) with a resolution of .006 cm.

6. A 16 channel EMG Neuraxon system for recording muscle activity. Because responses of the human body can be viewed through Electrocardiographic (ECG), Electroencephalic (EEG), and Electromyographic (EMG), we collaborate with the University of Maryland, School of Medicine at Baltimore and the National Institutes of Health. This results in the availability of other facilities and equipment whereby students may join forces on projects involving neuroimaging and virtual reality environments.

Exercise Physiology Lab The Exercise Physiology group has various laboratories capable of supporting a wide-range of exercise-related studies, including metabolic testing, Bod-Pod body composition, muscular strength and power testing, and various clinical blood-based assays. Moreover, the group collaborates with various nearby facilities for high-quality measurement of body composition, including muscle size, bone density, and visceral adiposity. A 6,000 sq. ft. training facility is fully equipped with aerobic exercise training equipment and 20+ Keiser strength training machines for all major muscle groups. In addition to these general facilities, the group maintains other specialized laboratories. The Functional Genomics Lab studies the role of genetic variation in disease susceptibility and the responses and adaptations of different individuals to various exercise programs. The lab has state of the art equipment for genetic analysis, including extensive computer resources. The Molecular Biology Lab has extensive scientific resources for examining the effects of exercise and inactivity on muscle, adipose, and other cell types utilizing both in vivo and in vitro approaches. website: www.sph.umd.edu/KNES/ (http://www.sph.umd.edu/KNES/).

Physical Cultural Studies (PCS) advances the critically and theoretically-driven analysis of physical culture, in all its myriad forms. These include sport, exercise, health, dance, and movement related practices, which PCS research locates and analyzes within the broader social, political, economic, and technological contexts in which they are situated. More specifically, PCS is dedicated to the contextually based understanding of the corporeal practices, discourses, and subjectivities through which active bodies become organized, represented, and experienced in relation to the operations of social power. PCS thus identifies the role played by physical culture in reproducing, and sometimes challenging, particular class, ethnic, gender, ability, generational, national, racial, and/or sexual norms and differences.

Kinesiology, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

Completion of the master's degree with thesis requires a minimum of 24 semester hours and six thesis credits. The M.A. non-thesis option requires a minimum of 27 semester hours, a three-credit project based on an independent scholarly investigation, and a final comprehensive examination. Students in both options work under the direction of a graduate faculty advisor and must complete, as a minimum, six semester hours in a cognate area, six semester hours in research processes, and twelve semester hours in supporting courses either in or outside of the department. If internships are selected as part of the individual program, the total credits will exceed the minimum 30 credits.

Course	Title	Credits

Kinesiology, Doctor of Philosophy (Ph.D.)

The doctoral program is designed to prepare outstanding scholars in a research domain in Kinesiology. To complete the program, a student must provide substantial evidence of his or her ability to frame and complete original research. The doctoral program in Kinesiology requires a minimum of 60 credits.

The program of study includes research experiences, as well as courses in the cognate area, other supportive courses outside of the department that broaden or deepen one's knowledge, and courses in research and analytic processes. Students also are expected to engage in the culture of Kinesiology through active participation in seminars and other departmental activities and to develop teaching expertise in the subdiscipline.

Advance to Candidacy: In addition to course requirements, students must successfully pass a comprehensive exam in order to advance to candidacy.

Post-Candidacy: Complete at least 12 credits of KNES899 doctoral dissertation research as well as defend and submit an original dissertation.The dissertation is the culminating research experience and contributes to knowledge in kinesiology.

Course	Title	Credits
Required coursework includes:		
KNES609	Research Issues in Kinesiology	1-3
or KNES618	Current Readings in Exercise and Applied Physiology	
SPHL612	Research Ethics	1
SPHL600	Foundations of Public Health	3

Landscape Architecture and Community Planning, Master of Landscape Architecture and Master of Community Planning (dual degree) (M.L.A. and M.C.P.)

The dual master's program in Community Planning and Landscape Architecture combines key elements of the Master of Community Planning and the Master in Landscape Architecture. Student have two options for the Landscape Architecture portion of the dual degree. Those who did not major in landscape architecture as undergraduates will be enrolled the First MLA Professional Degree Curriculum. Those students who already have a bachelor's degree in Landscape Architecture will enroll in LARC's Post-Professional degree program.

Landscape Architecture (LARC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Master of Landscape Architecture (MLA) is a professional degree program that prepares students for work as design professionals in design firms, nonprofits, and governmental agencies. This program has been recognized by the National Center for Education Statistics as a STEM program under the category of 30.3301 - Sustainability Studies. MLA students take a series of lecture and studio design courses, beginning with an introduction to landscape design principles in the first year and culminating in an advanced research and studio design project in the graduating year. The three-year first professional degree curriculum is for students who have a bachelor's degree in a non-design field. The MLA is a degree that is accredited by the LAAB (Landscape Architecture Accreditation Board), which allows graduates to sit for the professional license exam (LARE). The two-year post-professional degree curriculum is for students who have a bachelor's degree in landscape architecture or a related design field.

The University of Maryland's MLA program is characterized by a balance of theory and practice to address the challenges of stormwater management, climate change, therapeutic landscapes, and environmental justice. Through the required courses, concentration electives, and individual research, each student will acquire a thorough theoretical basis, grounding in methods and practices, and exposure to contemporary local and global issues. The required studio courses and the thesis or creative project, conducted with faculty and community partners, advances the knowledge base of landscape architecture through research and community outreach activities.

Our extensive hands-on training and real-world creative problem-solving approaches provide you the knowledge, skills, and abilities needed to excel and make a difference. The studio experience provides an opportunity to implement ecological design solutions ranging from development, conservation, and restoration. From creating livable communities to solving environmental design problems, Landscape Architects are committed to helping shape the future while protecting the past.

The MLA program is interdisciplinary in its philosophy and its operation. Individual courses convey concepts and tools from diverse disciplines and studio, research, and outreach projects have a multi-discipline association. Project and research advisors come from faculty in Landscape Architecture, Plant Science, Environmental Science, Geography, Geology, American Studies, Architecture, Urban Studies and Planning, Historic Preservation, Real Estate Development, and other academic disciplines and professional partnerships.

The University of Maryland now offers a dual masters program in community planning (MCP) and landscape architecture (MLA) as well as a dual masters program in historic preservation (MHP) and landscape architecture (MLA). For more, please see our Masters of Landscape Architecture (https://larch.umd.edu/graduate/masters-landscape-architecture/) page.

Financial Assistance

A limited number of Graduate Assistantships are available to qualified students. These include Teaching, Research, and Administration Assistantships. Assistantships can be 9-month or 12-month appointments and include tuition remission (5 to 10 credits each semester, commensurate with GA appointment), an annual salary, health benefits, and in-state tuition, in exchange for 10 to 20 hours of work per week. Scholarships, fellowships, and other funding sources are available through a variety of external agents, such as the Landscape Architecture Foundation (LAF), the Garden Club of America (GCA), and others, including the following:

For more information on financial assistance and scholarships, please see our Student and Campus Resources (https://larch.umd.edu/student-and-campus-resources/) page.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationlarc.pdf)
- Portfolio PDF Upload
- Description of Research/Work Experience (optional)

Portfolio

The portfolio is a compilation of graphic, written or scored work that you have created or observed and recorded. This collection should show your interest and aptitude for the visual language of design. Expertise in design is welcomed but not required. The portfolio should illustrate your interests in a variety of areas related to landscape architecture and environmental design. This portfolio should be uploaded digitally with your application. If you have any questions please email Diana Cortez at dcortez@umd.edu. **Portfolios are due no later than the application deadline.**

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	August 18, 2023	December 1, 2022
International Applicants		
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	January 27, 2023	September 30, 2022

Other Deadlines: Please visit the program website at http://larch.umd.edu

Requirements

- Landscape Architecture, Master of Landscape Architecture (M.L.A.) (p. 274)

Facilities and Special Resources

The Master of Landscape Architecture program is accredited by the Landscape Architecture Accreditation Board (LAAB) of the American Society of Landscape Architects and meets the educational requirements for licensure in all 50 states and the District of Columbia. The program maintains a balance between design theory and application in a professional degree curriculum. The MLA program builds upon the strengths of the Department of Plant Science and Landscape Architecture (PSLA) and the Landscape Architecture Program (LARC). The PSLA Department is composed of faculty members who specialize in landscape architecture, landscape history, ecology, plant science, urban forestry, turf and golf course management, and landscape management. It provides a strong, comprehensive grounding for landscape design, planning and preservation, landscape assessment, site and ecological systems analysis, plant identification, plant conservation, and plant pathology. Other environmental programs in the College of Agriculture and Natural Resources offer knowledge and practical insight into the science of ecology, ecological restoration, water and soil conservation, and forest management. The MLA builds on this collaboration through advanced courses, student advising, and the contribution of non-teaching programs such as lectures, symposia and research projects.

The Master of Landscape Architecture Program is located in the Plant Sciences Building on the College Park campus. Advanced individual computing facilities, personal drafting stations, scanning and printing facilities, and a model-making workshop are available 24 hours a day, 7 days a week, to every student in the MLA program.

Landscape Architecture, Master of Landscape Architecture (M.L.A.)

Three-Year First Professional Degree Curriculum

• 47 credits required

Students are required to complete a minimum of 47 credits. An additional 23 credits of leveling courses are required unless waived by the MLA program chair. Students will be advised to take remedial Woody Plant Identification courses prior to arrival or in the first year of study at Maryland. The MLA Program requires these courses in order to meet accreditation standards.

Course	Title	Credits
LARC641	Graduate Studio II	5
LARC642	Graduate Studio III	5

Library and Information Science (LBSC)

Graduate Degree Program
College: Information Studies

Abstract

The fully American Library Association (ALA) accredited Master of Library and Information Science (MLIS) program at the University of Maryland prepares graduates to be socially engaged and technologically focused information professionals, ready to create, educate, and innovate. The MLIS is a professional degree that provides students with a comprehensive foundation in both research and practice in library and information science. This foundation prepares students for careers with government agencies, archives, museums, libraries, startups, and any organization engaged in information activities.

At the iSchool we seek students who will serve as the next generation of leaders in information science and who will succeed in the dynamic and evolving global information society.

The MLIS program is designed for students from a wide variety of academic and career backgrounds, and is flexible enough to accommodate students working full or part-time. Students can complete their MLIS degree in-person, fully online, or through a hybrid approach.

Each student in the MLIS Program selects one of our unique specializations. Our specialization offerings are:

- Archives and Digital Curation
- Individualized Program Plan
- Diversity and Inclusion
- School Library
- Youth Experience
- Intelligence Analytics
- Legal Informatics

To request information about the MLIS program, please reach out to us at https://umdgrad.askadmissions.net/emtinterestpage.aspx?ip=umdinformationstudies or at mlisprogram@umd.edu.

Financial Assistance

For more information on financial aid, please visit the Financial Aid (https://ischool.umd.edu/academics/tuition-fees-graduate/) section of the College of Information Studies (https://ischool.umd.edu/) website.

Requirements

- Library and Information Science, Master of Library and Information Science (M.L.I.S.) (p. 275)

Facilities and Special Resources

The College operates six research centers: the Human-Computer Interaction Lab (HCIL), the Information Policy and Access Center (iPAC), and the Center for Advanced Study of Communities and Information (CASCI), the Cloud Computing Center (CCC), the Trace Center, and the Digital Curation Innovation Center (DCIC). iSchool faculty and doctoral students also participate in or have affiliations with the University of Maryland Institute for Advanced Computer Studies (UMIACS), the Maryland Institute for Technology in the Humanities (MITH), and the Computational Linguistics and Information Processing Laboratory (CLIP), as well as the Departments of Computer Science, English, and Sociology, the Robert H. Smith School of Business, and the College of Education.

Faculty and students participate in cooperative research with staff of the University Libraries, the Human-Computer Interaction Laboratory, and other campus units. Students have access through cooperative arrangements and programs to the resources of Archives II, the National Agricultural Library, the Library of Congress, and other prominent research facilities.

Library and Information Science, Master of Library and Information Science (M.L.I.S.)

Thesis option: 36 credits
Non-thesis option (Field Study): 36 credits

The MLIS degree requires 36 credit hours of academic work to be completed with a B minimum average within five calendar years from the first semester of registration. A full-time MLIS student usually completes

the program in two years. The time limit for completion of all degree requirements is five years.

Students completing their MLIS courses in-person may take courses in the daytime and evening and may change from part-time to full-time and vice versa, as their circumstances permit. Most in-person MLIS courses are offered during the evening, but there are online sections offered on a rotating basis.

The History/Library Science (HILS) dual degree program requires 54 credit hours for the MLIS and MA in History. The time limit for completion of all degree requirements for this dual degree program is five years.

At least 24 credits of the 36 required credits must be courses taken in the College (LBSC, INST, or INFM). A student may take courses in other UMCP departments or through the Consortium at other area institutions (limit of six credits). Six credits may be transferred from another accredited graduate program. Up to 9 credits earned as an Advanced Special Student at UMCP may be applied to the degree. Information about policies and procedures governing degree requirements and courses taken outside the College is available from the College's Student Services Office and on the College's website at http://ischool.umd.edu/graduate-student-services (http://ischool.umd.edu/graduate-student-services/).

Linguistics (LING)

Graduate Degree Program
College: Arts and Humanities

Abstract

Research on language has proven to be one of the most fruitful means to cast light on the nature of human cognition. Building on recent developments in the field, the Maryland Linguistics (https://linguistics.umd.edu) program trains students to pursue and answer research questions about language as a component of the mind. How do particular languages reflect general properties of our linguistic capacity? How is this capacity instantiated in the mind, as a computational, psychological or neurological system? How does it reflect properties which are encoded genetically, and how does it support the acquisition of languages by young children? And how can linguistic knowledge be used to improve human language technology?

The Department of Linguistics (https://linguistics.umd.edu) at the University of Maryland has an internationally recognized Ph.D. program. The Department combines current theoretical research in phonology, morphology, syntax, semantics with state-of-the-art experimental research in psycholinguistics, first language acquisition, language processing, neurolinguistics, and computational linguistics. An interdisciplinary background enables students to evaluate proposals critically and make a lasting contribution to the field. Many students choose to split their major and minor areas between theoretical and experimental linguistics. Many students also choose to concurrently pursue the Certificate Program in Neuroscience and Cognitive Science (https://nacs.umd.edu/landingtopic/nacs-certificate/). The department also hosts an NSF-supported interdisciplinary training program on "Biological and Computational Foundations of Language Diversity" (see website for more information).

The Department encourages applications from students with an interest in the Department's areas of expertise.

Students with a primary interest in Neurolinguistics and Cognitive Science may also want to consider applying to the Neuroscience and Cognitive Science (https://nacs.umd.edu/) (NACS) Ph.D. program.

Students seeking a Ph.D. in other areas of linguistics may want to consider a range of other strong programs at the University of Maryland. The PhD program in Second Language Acquisition (https://sllc.umd.edu/sla/), based in the School of Languages, Literatures and Cultures, has a strong cognitive science and research focus. Students with a focus on ESL should consider the Applied Linguistics and Language Education Program (https://education.umd.edu/academics/departments/tlpl/llsi/applied-linguistics-and-language-education-phd/), based in the College of Education. Students with a clinical focus should also consider the Hearing and Speech Sciences Program (https://hesp.umd.edu/).

Students interested in human language technology and computational linguistics should also consider the PhD programs in the iSchool (https://ischool.umd.edu/) or the Department of Computer Science (p. 139). The Computational Linguistics and Information Processing (https://wiki.umiacs.umd.edu/clip/index.php/Main_Page/) (CLIP) laboratories contain state of the art computing facilities and data resources.

Financial Assistance

Initial offers of admission and financial aid are normally made in February-April. Further offers are sometimes made at a later date, if additional funds become available. In recent years, approximately 6-8 new students have started the Ph.D. program each year.

Financial aid (tuition + stipend) is available on a competitive basis. The department aims to provide graduate students with financial aid (stipend + tuition) during their full course of study (5 years), provided that the student makes satisfactory academic progress. Graduate funding comes from a number of sources. The Department offers Graduate Assistantships (GAs) and Research Assistantships (RAs). GAs typically involve teaching service in undergraduate linguistics courses. RA positions typically involve research associated with a grant-supported faculty research project. Also available are Graduate Fellowships. The University offers a number of these to outstanding applicants, which release the student from GA or RA responsibilities for 1-2 years of study. Other sources of funding are occasionally available through the Department or University. Also, a number of students come to the Department with funding of their own from external fellowships.

Fellowships and GAs generally provide 10 credits of tuition remission respectively per semester. In additions to tuition remission, the Graduate Assistantship comes with Health benefits. The student is responsible for approximately $440.00 in mandatory student fees per semester.

The Department sets aside a portion of its operating budget to support travel by faculty and graduate students to present papers at conferences. Any member of the Department can request support for this purpose. Graduate students may also apply for university travel awards for this purpose.

Contact

The Department's website, Maryland Linguistics (https://linguistics.umd.edu), contains a good deal of information on the program, but if you have further questions about Graduate Study in the Department, you should contact Dr. Jeffrey Lidz (jlidz@umd.edu). Alternatively, if you have a particular interest in the research of an individual faculty member, you may want to contact that person directly via email.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationling2021.pdf)
- Description of Research/Work Experience
- Writing Sample (one required, up to two more optional)

All students must hold a Bachelors or Masters degree (or international equivalent) prior to starting the Ph.D. program. Although the student's previous degrees may be in a field other than linguistics, it is essential that a student have some previous experience in linguistics.

Applicants should check the University's admission requirements (https://gradschool.umd.edu/admissions/) and the department's web site (https://linguistics.umd.edu/academic-programs/graduate/) for the most up-to-date information on graduate applications. Electronic submission of application materials is strongly preferred. Applicants are encouraged to submit the initial on-line application form well before the application deadline, preferably by mid-December, since this form must be processed before an applicant is able to submit other electronic materials. Note that the January 7th target date applies to all applicants, domestic and international.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Deadlines

International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	December 9, 2022

Other Deadlines: Please visit the program website at https://linguistics.umd.edu

Requirements

- Linguistics, Doctor of Philosophy (Ph.D.) (p. 279)
- Linguistics, Master of Arts (M.A.) (p. 279)

Facilities and Special Resources

In addition to university and departmental library facilities, linguists at Maryland have ample office and meeting spaces. The department has outstanding resources for interdisciplinary research (https://linguistics.umd.edu/research/) that bridges theoretical, experimental, and computational linguistics. The Cognitive Neuroscience of Language (CNL) Laboratory has the specific purpose of bridging the gap between theoretical/computational models of human language and the brain-level mechanisms that support language. The research in the CNL Lab combines the study of linguistics, cognitive neuroscience, language acquisition and psycholinguistics, genetic disorders and computational modeling. The CNL Lab is housed in around 5000 sf. of labs and offices and includes the following:

1. Event-Related Potentials (ERP) Lab: 128-channel Neuroscan ERP facility for recording electrical signals originating in the brain by measuring electrical activity at the scalp.
2. Magnetoencephalography (MEG) Lab at the Maryland Neuroimaging Center: a 160-channel whole-head MEG facility that is used for non-invasive measurements of the magnetic fields associated with neuronal activity in the brain.
3. Head-mounted Eye Tracking Lab: lightweight eye-tracker suitable for use with children and adults.
4. Fixed Eye Tracking Lab: eye-tracker suitable for on-line studies of reading.
5. Center for Young Children: state-of-the-art on-campus preschool for 3-6 year olds, with testing rooms suitable for study of language acquisition.
6. Infant Language Lab: for testing infants and young children.
7. Phonetic/Speech Analysis facilities: equipment for generation, recording, manipulation and analysis of speech sounds.

In addition to the facilities available at the CNL Lab itself, Maryland linguists have taken advantage of the many additional research opportunities in closely affiliated departments and institutions, in particular at the National Institutes of Health (NIH), located in nearby Bethesda, Maryland. These include fMRI brain imaging, PET brain imaging and TMS (transcranial magnetic stimulation) at NIH, and aphasia research in collaboration with NIH researchers.

Linguistics, Master of Arts (M.A.)

Under exceptional circumstances, students are awarded an MA degree on completion of the core coursework requirements (six courses, see PhD requirements), four further classes, and writing either an MA thesis which is defended publicly (LING799) or two comprehensive papers in different areas of language study (LING798). Two of the post core-level class requirements should be taken in the Department of Linguistics, with the rest being taken either in Linguistics or in other departments satisfying a secondary area of specialization and complementing the student's work. **Note that the Department of Linguistics does not normally admit students whose objective is a terminal M.A. degree.** The M.A. degree primarily serves students who withdraw from the Ph.D. program.

Linguistics, Doctor of Philosophy (Ph.D.)

Students pursuing the Ph.D. take at least 33 graduate-level credits of course-work, of which at least 9 credits are at the 800-level (seminars) and 6 credits correspond to the Minor area of specialization, possibly in

another department. These minimum requirements are usually fulfilled by formal classes and not by independent studies, although the latter may be used to supplement a student's program of study. The student's first year is normally devoted to the 'core', foundational coursework in the department's three primary research areas:

1. theoretical linguistics (syntax, semantics, phonology),
2. psycholinguistics/neurolinguistics/language acquisition,
3. computational linguistics.

In addition to satisfying (part of) the 9 credit requirement for seminars, the next two years are devoted to satisfying 6 credits (beyond any core courses) in the Minor, as approved by the Graduate Director. Some students choose to pursue the Certificate in Neuroscience and Cognitive Science, which may count as the minor area. To help ensure satisfactory progress towards the degree, students are required to submit to the Graduate Director a Ph.D. Roadmap once each semester, completed in consultation with their advisor.

Advance to Candidacy: By their fifth semester, students write a substantial paper LING888, under the supervision of a faculty member. This paper enables students to demonstrate a capacity for productive research and to make an original contribution to the literature, often forming the basis for the dissertation research. It is submitted to a three member examining committee, is defended publicly two weeks later, and must be approved by the committee after the defense. The student must then upload the completed paper to the folder in the department PDF locker, and inform the Graduate Director that this has been done.

In addition, by their seventh semester students must also write a paper in their Minor area of specialization (or some other area that is not their major area). The paper must be prepared under the supervision of a member of the faculty. Once the paper is completed to the satisfaction of the supervising faculty member, it must be uploaded to the 896 folder in the department PDF locker, and the Minor Area Paper approval form presented to the Graduate Director. [Under special circumstances, upon the written recommendation of the student's advisor and with the approval of the faculty of the department, a student may satisfy the Minor area paper requirement by instead taking a third course in the Minor area.]

LING888 and the Minor area paper replace the 'comprehensive examinations' held in some departments.

Post-Candidacy: After satisfactory completion of the 895 paper, students are admitted to candidacy and write a proposal for a dissertation, which a faculty member agrees to supervise. Students enroll in LING899 while working on the dissertation, and must take at least 12 credits of this course. The dissertation must make a substantial and original contribution to knowledge. The supervisor, in consultation with other committee members (selected by the student and the supervisor), determines when there is a draft which will be defended publicly at an oral examination. The dissertation is approved by a five member examining committee. On completion of the approved dissertation, a hard copy will be submitted to the department, along with a 2nd hard copy or else an electronic version for the department web page.

Course	Title	Credits
Required coursework:		
LING800-level electives		9
Minor area courses		6
LING888	Doctoral Research Paper	6
Select one of the following sequences:		6
Syntax:		
LING610 & LING611	Syntactic Theory and Issues in Syntax	
Phonology:		
LING620 & LING621	Phonological Theory and Issues in Phonology	
Semantics:		
LING660 & LING661	Introduction to Semantics and Issues in Semantics	
Select one additional sequence from the following:		6
Psycholinguistics:		
LING640 & LING641	Psycholinguistics and Issues in Psycholinguistics	
Computational Linguistics:		
LING723 & LING773	Natural Language Processing and Computational Linguistics II	
Select two additional courses from any unselected sequence		6
Dissertation Research Requirements		
LING899	Doctoral Dissertation Research	12
Total Credits		**51**

Literacy Coaching (Z038)

Graduate Certificate Program
College: Education

Abstract

The Department of Curriculum and Instruction's (EDCI) literacy coach post-baccalaureate graduate certificate program is designed to prepare experienced, highly qualified middle and high school teachers to serve as literacy coaches in low performing middle and high schools. Literacy coaches are skilled content area collaborators who function effectively in middle school and/or high school settings for secondary teachers in the core content areas of English language arts, mathematics, science, and social studies. They are skilled evaluators of literacy needs within various subject areas and are able to collaborate with secondary school leadership teams and teachers to interpret and use literacy assessment data to inform instruction. Finally, literacy coaches are accomplished middle and high school teachers who are skilled in developing and implementing instructional strategies to improve academic literacy in the four targeted content areas. The program courses focus on

1. reading, cognition, and instruction across content areas,
2. diagnostic reading assessment and instruction,
3. teaching ESOL reading and writing in secondary content areas,
4. assessing, diagnosing, and teaching writing across content areas,
5. TESOL, special education, and assistive technology, and
6. coaching and mentoring teachers.

In addition, literacy coach candidates participate in school district professional development workshops mapped onto the literacy coach coursework. The EDCI literacy coach program addresses the Standards for Middle and High School Literacy Coaches (International Reading Association, 2006). Upon successful completion of the literacy coach program, candidates receive a graduate literacy coach certificate from the University of Maryland.

Literacy Coaching, Post-Baccalaureate Certificate (P.B.C.)

18 credits required

The Post-Baccalaureate Certificate in Literacy Coaching is a six week program designed to prepare experienced, highly qualified middle and high school teachers to serve as literacy coaches in low performing middle and high schools. It is a joint program between the University of Maryland (UM)/Baltimore City Public Schools (BCPS City Schools)/ Montgomery County Public Schools (MCPS)/Prince George's County Public Schools (PGCPS) serving cohorts of selected middle and high school teachers.

Marine, Estuarine, and Environmental Sciences (MEES)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The specific objective of the university-wide Graduate Program in Marine-Estuarine-Environmental Sciences (MEES) is the training of qualified graduate students, working toward the M.S. or Ph.D. degree, who have research interests in fields of study that involve interactions between biological, physical and chemical systems in the marine, estuarine, freshwater or terrestrial environments. The MEES curriculum provides a balance of disciplinary strength and interdisciplinary perspective, designed for environmental issues in the 21st century. The MEES Curriculum is designed around four interdisciplinary Foundational Areas: 1) Environment and Society (http://mees.umd.edu/environment-and-society-page/); 2) Earth and Ocean Sciences (http://mees.umd.edu/earth-ocean-sciences-page/); 3) Ecological Systems (http://mees.umd.edu/ecological-systems/), and 4) Environmental Molecular Science and Technology (http://mees.umd.edu/environmental-molecular-science-technology/).

Financial Assistance

University fellowships, research assistantships and traineeships, and teaching assistantships are available. In general, aid provides for full living and educational expenses. Some partial assistance may also be available. Research support from federal, state, and private sources often

provides opportunities for additional student support through either research assistantships or part-time employment on research projects.

- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationmees.pdf) (optional)
- Description of Research/Work Experience

It is particularly important that a student articulate clearly, in the application, a statement of goals and objectives for future work in the field. Because of the interdisciplinary and interdepartmental nature of the program, only students for whom a specific advisor is identified in advance can be admitted. Prior communication with the faculty in your choice Foundation is highly encouraged.

For more admissions information or to apply to the program, please visit our Graduate School website: www.gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	January 18, 2023	N/A

Requirements

- Marine, Estuarine, and Environmental Sciences, Doctor of Philosophy (Ph.D.) (p. 283)
- Marine, Estuarine, and Environmental Sciences, Master of Science (M.S.) (p. 282)

Facilities and Special Resources

Students may conduct their research in the laboratories and facilities of the College Park (UMCP), Baltimore (UMB), Baltimore County (UMBC), or Eastern Shore (UMES) campuses, in one of the laboratories of the University's Center for Environmental Studies (UMCES): the Chesapeake Biological Laboratory (CBL) at Solomons, Maryland; the Horn Point Laboratory (HPL) near Cambridge, Maryland; and the Appalachian Laboratory (AL) in Frostburg, Maryland; or at the Institute of Marine and Environmental Technology (IMET) in Baltimore. CBL and HPL are located on the Chesapeake Bay. They include excellent facilities for the culture of marine and estuarine organisms. Berthed at CBL are the University's research vessels. At HPL there are extensive marshes, intertidal areas, oyster shoals, tidal creeks, and rock jetties. AL, located in the mountains of western Maryland, specializes in terrestrial and freshwater ecology. On the campuses and at IMET are specialized laboratory facilities for environmental research, including microbiology; biotechnology; water chemistry; cellular, molecular, and organismal biology; and specialized facilities for remote sensing of the environment. Extensive field sites for environmental research are available through the University's agricultural programs and through cooperation with many other organizations in the state.

Marine, Estuarine, and Environmental Sciences, Master of Science (M.S.)

Thesis option only: 30 credits

A minimum of 30 credits with 24 credits of course work and 6 credits of graduate research, MEES799. Of the 24 course credits, 12 of them must be at the 600 level or higher; including MEES601.

Initial Advisory Meeting
A three member Research Advisory Committee is to be formed during the first semester and meets with the student to discuss the student's progress (mainly coursework, but also basic research interests). A report of this meeting must be filed with the MEES Program Office by the end of the student's second semester (Form can be found here (https://www.mees.umd.edu/s/Initial-Advisory-Committee-Rpt-Foundation.pdf)).

Annual Committee Report
Every year that the student is in residence, committee meetings are to be held in order for the committee to review academic and research progress. Reports of these meetings are due annually to the MEES Program by September 30th. Annual Committee Report Forms can be found here. (https://www.mees.umd.edu/s/Annual-Report-Form.pdf)

Thesis
An Oral Defense of the Thesis, administered according to Graduate School regulations, will take place at the completion of the research project. This defense will be conducted by the Advisory Committee and will be administered once all other degree requirements have been fulfilled.

The Thesis Defense will generally last no longer than two hours, but the time will be long enough to ensure an adequate examination. The Research Advisory Committee also approves the thesis, and it is the candidate's obligation to see that each member of the committee has at

least two weeks in which to examine a copy of the thesis prior to the time of the defense.

The Research Advisory Committee may conclude that the candidate has passed or failed. A student may be conditionally passed with the provision that minor changes in the thesis be made and approved by the Major Advisor. A student who fails may at the discretion of the committee and with approval of the MEES Director and the appropriate Graduate School be permitted to stand a second defense after acting on suggestions for improvement of the thesis (collection of more data, use of different statistical analysis, rewriting of the discussion, etc.), at such time as the advisor considers appropriate. Once the thesis has been successfully defended, one copy must be supplied to the MEES Office in addition to the copies required by the Graduate School.

More information can be found on the MEES program website (https://www.mees.umd.edu/current-ms-req-1/).

Course	Title	Credits
Core Requirements		
30 credits of coursework including:		30
MEES799	Masters Thesis Research	
MEES601	Applied Environmental Science (Applied Environmental Sciences)	
One seminar for each year of residence in program		
Two professional development courses		
Foundation options:		
Students select one of the following foundations and complete the requirements:		
Environment and Society:		
MEES620	Environment and Society	
Electives		
Earth & Ocean Science:		
MEES640	Interconnected Earth Systems: Land, Ocean, and Estuary	
Electives		
Ecological Systems:		
MEES660	Ecological Systems	
Electives		
Environmental Molecular Science & Technology:		
MEES680	Cell and Molecular Biology for the Environmental Scientist- From Genes to Ecosystems	
Electives		
Total Credits		**30**

Marine, Estuarine, and Environmental Sciences, Doctor of Philosophy (Ph.D.)

The student must complete a minimum of 36 credits, with at least 24 credits of course work and 12 credits of dissertation research. Twelve credits of course work must be at the 600 level or above. Coursework completed to fulfill a Master's degree can be applied towards this requirement, up to a maximum of 16 credits. Required course work includes

1. one seminar course (MEES608 or equivalent) is required for each year in residence (on average);
2. one approved Statistics course (600 level or higher);
3. one graduate course representing significant interdisciplinary breadth, outside the student's specialization;
4. one course or seminar in management, ethics or philosophy of science.

Initial Advisory Meeting
A five member Research Advisory Committee is to be formed during the first semester and meets with the student to discuss the student's progress (mainly coursework, but also basic research interests). This committee will follow the student throughout their tenure in the program. A report of this meeting must be filed with the MEES Program Office by the end of the student's second semester (Form can be found here).

Annual Committee Report
Every year that the student is in residence, committee meetings are to be held in order for the committee to review academic and research progress. Reports of these meetings are due annually to the MEES Program by September 30th. Annual Committee Report Forms can be found here.

Comprehensive Examination
The Research Advisory Committee is responsible for administering the comprehensive examination. Since this examination must be successfully completed before the dissertation proposal can be defended, it is in the student's best interests to take the Comprehensive Examination as early as possible in the Program. However, the exam must be taken by the end of the student's sixth semester. This examination is intended to determine whether the student demonstrates sufficient evidence of scholastic and intellectual ability in major and related academic areas. The examination will not be a defense of the research proposal.

Dissertation Proposal Defense
The Proposal Defense is an oral examination on the research proposal administered by the Research Advisory Committee. At least 2 weeks prior to the examination, the student must supply the committee members with a formal research proposal in which the following is detailed: background information, research progress to date (if any), specific objectives, and experimental design of the proposed research.

Advance to Candidacy
In addition to the course requirements below, students must successfully complete both the Comprehensive Examinations and the Defense of the Dissertation Proposal. Once the student applies and is approved to advance, they must nominate a dissertation committee.

Post-Candidacy
In addition to completing at least 12 credits of MEES899, a candidate for the Ph.D. degree will present a public seminar on the dissertation research during the academic year in which the degree will be awarded. Students expecting degrees at the end of the summer must be scheduled for presentation before the end of May. The student and Advisor will be responsible for initiating arrangements through the MEES Office for the date and advertisement of advertisement of the seminar. The seminar will be open to faculty, students, and other interested parties. The final oral defense of the dissertation is conducted by the Dissertation Examining Committee.

More information can be found on the MEES program website (https://www.mees.umd.edu/current-doc-req-1/).

Marketing Analytics (BMMA)

ABSTRACT

Maryland Smith's Master of Science in Marketing Analytics program teaches you how to collect, analyze and interpret massive amounts of consumer data to help businesses engage with the right audiences and launch cost-effective campaigns that work.

- Use cutting-edge tools and programming languages to analyze big data and solve marketing challenges for real businesses.
- Connect with other talented students from diverse academic backgrounds and boost your skills under the guidance of expert faculty.
- Participate in data competitions and network with top employers who hire our students.

Financial Assistance

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Marketing Analytics, Master of Science (M.S.)

Non-thesis only: 30 credits required

The MS in Marketing Analytics will give you the cutting-edge knowledge and skills you need to apply marketing analytics to daily business practice. The program will provide you with an in-depth understanding of the mathematical and statistical models and tools needed for customer analysis in the context of marketing problems.

Materials Science and Engineering (ENMA)

Graduate Degree Program
College: Engineering

Abstract

Materials Science and Engineering is an interdisciplinary program. Students from engineering and science disciplines receive a solid foundation in the physics and chemistry of materials, thermodynamics and structure of materials, as well as the latest technological aspects of materials in today's manufacturing environment. Faculty research areas are mainly concentrated in the development of novel materials for today's electronics, energy, biomedical and high tech industries. These materials may be bulk or thin film format and range from ceramics, semiconductors, metals, polymer and biomaterials. Departmental faculty members are major participants in the University of Maryland Materials Research Science and Engineering Center (http://mrsec.umd.edu/), the Maryland NanoCenter (https://www.nanocenter.umd.edu/) and the University of Maryland Energy Research Center (http://www.umerc.umd.edu/). For an overview of the Materials Science and Engineering Department, please visit Materials Science and Engineering at the University of Maryland (http://www.mse.umd.edu/).

Financial Assistance

Financial assistance in the form of teaching and research assistantships and sponsored fellowships are available to qualified students. Requests for financial assistance will be considered for Fall admission only.

Requirements

- Materials Science and Engineering, Doctor of Philosophy (Ph.D.) (p. 286)
- Materials Science and Engineering, Master of Science (M.S.) (p. 286)

Facilities and Special Resources

Special equipment includes scanning and transmission electron microscopes; X-ray diffraction devices; image analysis and mechanical testing facilities; crystal growing, thin film deposition and analysis equipment; HPLC, GC, IR and other sample preparation and analytical apparatus.

The Laboratory for Advanced Materials Processing (LAMP) in JM Patterson 2225 includes a class 1000 clean room for various kinds of thin film processing, particularly things difficult to acccomplish in the NanoCenter's new FabLab clean room in the Kim Building. LAMP also features custom-designed ultraclean chemical vapor deposition (CVD) and atomic layer deposition (ALD) equipment as the basis for research in nano applications and manufacturing process prototyping, particularly with real-time chemical sensing for metrology and process control.

A custom wafer-scanning electrical characterization facility enables resistance and capacitance mapping.

The Nano-Bio Systems Laboratory (NBSL) in JM Patterson 2229 adjoins LAMP and provides capability for biotech research, specifically in biomaterials processing and biomicrosystems development. It includes a Zeiss 310 laser confocal/fluorescence microscope, microfluidic chip testing for biomolecular reaction and cellular response experiments, biomaterials deposition, a Zyvex L200 nanomanipulator system for life science studies, and mass spectrometry and ICP optical emission equipment.

The W. M. Keck Laboratory for Combinatorial Nanosynthesis and Multiscale Characterization in 1141 Kim Building houses several thin film deposition chambers for rapid exploration of novel functional materials. The combinatorial approach allows simultaneous investigation of large numbers of different samples. The combinatorial laser molecular beam epitaxy is used to perform atomic layer controlled combinatorial synthesis of functional materials. Atomically controlled growth of unitcells are monitored in-situ using electron diffraction.

The Advanced Imaging and Microscopy Laboratory (AIM), located in 1237 Jeong H. Kim Building, houses the most electron powerful microscopes within any university in the Washington, DC metro area. The facility has a Field-emission Transmission Electron Microscope (TEM) with 1.4 angstrom resolution and can generate chemical-composition maps of materials using Energy-Dispersive X-Ray Spectroscopy (EDS) or Electron Energy-Loss Spectroscopy (EELS). Also housed in the lab are a thermionic TEM with 2.0 angstrom resolution (capable of in-situ electrical measurements and in-situ observations between -183 C and 1000C) and an electron microprobe with five Wavelength-Dispersion X-Ray Spectrometers (WDS).

Equipment available at other facilities include a Lakeshore vibrating scanning magnetometer and a scanning Auger spectrometer.

For additional information about the department's research facilities, please visit the following webpage: Materials Science and Engineering Research (http://www.mse.umd.edu/research/).

Materials Science and Engineering, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

The M.S. degree program offers thesis and non-thesis options. The thesis option requires 24 credit hours of course work plus a thesis. The non-thesis option requires 30 credit hours of course work and a scholarly research paper. All students must complete the Program Core requirements as well as all Graduate School requirements. The University of Maryland's Office of Advanced Engineering Education also offers a Professional Master of Engineering (M.E.) degree with a materials science and engineering option which requires 30 credits of graduate coursework and does not require a thesis.

Materials Science and Engineering (PMMS)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Materials Science and engineering degree programs empower students to solve important scientific and technical problems through advancements in the underlying materials systems. Multidisciplinary

courses and access to advanced laboratories also position graduates to become leaders in the field.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Materials Science and Engineering (Z060)

Graduate Certificate Program
College: Engineering

Abstract

The Graduate Certificate in Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Materials Science and engineering degree programs empower students to solve important scientific and technical problems through advancements in the underlying materials systems. Multidisciplinary

courses and access to advanced laboratories also position graduates to become leaders in the field.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Maternal and Child Health (MCHS)

Graduate Degree Program
College: Public Health

Abstract

Maternal and Child Health is an interdisciplinary field in which empirical research, epidemiological data, and policy analyses are used to understand individual, family, community, and sociocultural factors that influence health behaviors, health outcomes, and use of health services by mothers, children, adolescents, and their families (including fathers).

The MCH doctoral program prepares students to advance research, policy, and practice to improve the health, safety, and well-being of these groups, with a particular emphasis on low income and ethnic minority populations. The program equips students to address MCH issues at both the family and population levels. It is unique in its focus on the whole family system and family health policy.

Ph.D. graduates in MCH are prepared for academic and research positions in colleges and universities; high level administrative or research positions in city/county/state/national health and human service agencies; and leadership positions in nongovernmental and advocacy organizations. MCH graduates are also increasingly hired by private healthcare organizations such as hospitals, HMOs, and health insurers.

The Department of Family Science prepares students to describe, explain, and improve the quality of family life through applied research, education, therapy, human services, policy analysis, and advocacy. The approach is interdisciplinary, emphasizing individual, interpersonal, and social change. The program of study is based on a systems or ecological paradigm, combining the perspectives of interrelated professional fields of maternal and child health, family science, couple and family therapy, family policy, behavioral science, and human services. Graduates are prepared for careers in the public, non-profit and private sectors, including university teaching, research, family policy analysis, and administrative positions in human service and public health programs.

Financial Assistance

Fellowships and Graduate Assistantships are available to students admitted into the Ph.D. program in MCH

Courses: FMSC (https://umd-curr.courseleaf.com/graduate/courses/fmsc/)

Admissions

The **Ph.D. in Maternal and Child Health** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A master's degree in relevant field
- Minimum 3.0 undergraduate GPA
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and research areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Three letters of recommendation
- Resume or curriculum vitae
- A writing sample is required. Example writing samples include published manuscript, undergraduate or graduate thesis, research paper, etc. If you submit a published manuscript and you are not the first author describe the contributions you made to the publication.
- Fit between applicant's goals, expectations and research interests and program competencies and faculty expertise
- Please **do not** submit a GRE test score. The GRE requirement is **waived** for Fall 2023 admissions.

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application that transcripts issued in the original language with a literal English translation (http://globalmaryland.umd.edu/offices/international-students-scholar-services/translation-services/). Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://

sph.umd.edu/admissions/graduate-admissions/graduate-application-process/))

Requirements

- Maternal and Child Health, Doctor of Philosophy (Ph.D.) (p. 290)

Facilities and Special Resources

Center for Healthy Families: This Center is the training and research arm of the Couple and Family Therapy Program in the Department of Family Science. Departmental graduate students and faculty provide clinical and educational services to families from surrounding communities in this state-of-the-art facility. Master's and doctoral students use data collected at the Center for research projects.

The University's close proximity to the nation's capital, the state capital in Annapolis, federal executive departments, and headquarters of national professional and public interest associations provide research and internship placements for studying family policy unmatched by any other graduate program in the discipline. The Washington-Baltimore metropolitan area offers rich opportunities for research on culturally and socioeconomically diverse families. The campus and department have excellent computer facilities. Students have ready access to the University's extensive library systems, as well as holdings from the Library of Congress, the National Institutes of Health, National Library of Medicine, National Archives, and many other library collections.

Maternal and Child Health, Doctor of Philosophy (Ph.D.)

The MCH Ph.D. curriculum requires 57 graduate credit hours beyond the master's degree public health core (15 credits), including maternal and child health core courses (20 credits), research methods courses (16 credits), electives (6 credits), research internship (3 credits), and dissertation credits (12 credits).

This program provides interdisciplinary training in research, practice, and policy relevant to health problems and services for women, men, infants, children, adolescents, and their families. The MCH program prepares students to advance research, policy and practice to improve the health, safety, and well-being of these groups, with a particular emphasis on low income and ethnic minority populations. Students admitted full-time to the Ph.D. program post-master's can complete this program within three years, though this is uncommon.

Doctoral students are required to have completed five courses in the Public Health core during their Master's in Public Health (MPH) program and prior to matriculation to the Ph.D. program. These include:
• Biostatistics I
• Introduction to Health Systems
• Health Behavior
• Foundations of Environmental Health
• Foundations of Epidemiology

Knowledge of introductory epidemiologic methods is required for success in the program, including timely progress to degree. MCH students are expected to be well versed in concepts that are usually presented in introductory classes in epidemiology.

Advance to Candidacy: Students in the PhD program advance to candidacy after completing required coursework, including the research internship (FMSC 689), and passing a qualifying examination.

Post-candidacy: After advancement to candidacy, students must complete a dissertation proposal and oral defense, followed by doctoral dissertation and oral dissertation defense. In addition, students should complete at least 12 credits of FMSC899 Doctoral Dissertation Research.

Course	Title	Credits
Required courses:		
FMSC601	Doctoral Seminar in the Process of Inquiry	1
FMSC606	Ethnic Families and Health Disparities	3
FMSC660	Program Planning and Evaluation in Family Science	3
FMSC689	Research Internship	3
FMSC710	Maternal and Child Health from a Life Course Perspective	3
FMSC720	Study Design in Maternal Child Health Epidemiology	3
FMSC740	Reproductive and Perinatal Epidemiology	3
FMSC750	Family and Health Policy	3
FMSC780	Qualitative Methods in Family and Health Research	3
FMSC850	Maternal & Child Health Epidemiology	3
FMSC879	Preparing Future Faculty and Professionals Seminar	4
SPHL602	Foundations of Epidemiology and Biostatistics (Can waive by passing waiver exam before beginning of semester. Recommended if student has strong M.P.H.-level Biostatistics/epidemiology knowledge.)	4
EPIB651	Applied Regression Analysis	3
Electives approved by Graduate Director		6
Dissertation Research Requirements		
FMSC899	Doctoral Dissertation Research	12
Total Credits		**57**

Mathematical Statistics (STAT)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

The Statistics Program offers the Master of Arts and Doctor of Philosophy degrees for graduate study and research in statistics and probability. Areas of faculty research activity include high dimensional data, statistical decision and estimation theory, biostatistics, stochastic modeling, robust and nonparametric inference, semiparametric inference, categorical data analysis, theory and inference for stochastic processes, stochastic analysis, time series and spatial statistics. Students may concentrate in applied or theoretical statistics by selecting an appropriate sequence of courses and a research area to form an individual plan of study. The Program has been designed with sufficient flexibility to accommodate the student's background and interests. The Program also offers students from other disciplines an opportunity to select a variety of statistics courses to supplement their own study.

Biostatistics/Bioinformatics Specialization:

Biostatistics/Bioinformatics is an important research field in Statistics with immensely broad applications in public health, medical, and biological research. Bioinformatics is an emerging field with rapid development and has significant overlap with Biostatistics. The Bioinformatics/Biostatistics (STAT-BB) concentration addresses the increasing research opportunities and the educational needs of this burgeoning field. See (https://stat.umd.edu/grad-new/stat-bb.html)https://stat.umd.edu/grad-new/stat-bb.html (https://stat.umd.edu/stat-graduate/stat-bb.html)for details.

The Program is administratively affiliated with the Department of Mathematics, which maintains the records of all students in the Mathematical Statistics Program and handles correspondence with those applying for admission. However, any application for admission must indicate clearly that the student wishes to enter the Statistics (STAT) Program.

Employment prospects for statisticians are very good. All recent M.A. and Ph.D. graduates of Maryland's Statistics Program have found jobs in academia, industry and government agencies.

Financial Assistance

Graduate assistantships are awarded to Ph. D. students in the Statistics Program through the Mathematics Department. At present, the teaching load is six hours each semester, in addition to the duties of meeting with students and grading papers. There are approximately 20 graduate students in statistics with financial support. These are mostly teaching assistantships, but there are also a few research assistantships and fellowships. From time to time advanced students are placed into research assistantships as data analysts or statistical consultants with other campus units. Applications for financial aid are only processed once a year, for admission for the fall semester.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)): TOEFL/IELTS required even if eligible for waiver.

Program-Specific Requirements

- Letters of Recommendation (3)
- GRE Subject (Math): GRE Math Subject is highly recommended
- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationmathandstat.pdf)

M.A applicants can apply for spring or fall admission. Ph.D. applicants may only apply for the fall term. Spring admission does not offer financial support of any kind. If applicants have any questions, they should contact the department prior to submitting their application.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	January 11, 2023	December 9, 2022 (M.A. only)
International Applicants		
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	January 11, 2023	September 14, 2022 (M.A. only)

Other Deadlines: Please visit the program website at http://stat.umd.edu

Requirements

- Mathematical Statistics, Doctor of Philosophy (Ph.D.) (p. 292)
- Mathematical Statistics, Master of Arts (M.A.) (p. 292)

Facilities and Special Resources

The STAT Program cooperates closely with the Mathematics Department and the Applied Mathematics, Statistics and Scientific Computation (AMSC) Program. The Program's faculty are actively involved in research in applied and theoretical areas of statistics and maintain close ties with applied scientists in several federal agencies.

The Program sponsors weekly seminars in Statistics and in Probability. In addition, Research Interaction Teams (RIT's) cover topics of current statistical interest.

Computing is integrated into the applied courses, and the Program also offers a course "Computational Methods in Statistics"

By scheduling many of its applied and Master's level courses in late-afternoon time slots, the Program facilitates and invites part-time graduate study.

Mathematical Statistics, Master of Arts (M.A.)

Total credits required: 30 credits

For the M.A. degree program, a student must complete 30 credit hours with at least a 3.0 average GPA; at least 18 of these credits must be at the graduate level (600/700 level) and at least 15 of the graduate credits must be in statistics and probability (STAT). The student must also submit a satisfactory scholarly paper.

There is no foreign language requirement for MA students. Applicants should keep in mind that no financial aid is offered to MA students.

Course	Title	Credits
Core Requirements		
Select 30 credits of coursework [1]		30
Write a scholarly paper		
Total Credits		**30**

[1] At least 18 credits at the 600-700 level and at least 15 credits at the 600-700 level in statistics and probability.

Mathematical Statistics, Doctor of Philosophy (Ph.D.)

The M.A. degree is not required for admission to the Ph.D. program. A doctoral student must complete a minimum of 36 hours of formal courses (at least 27 at the 600/700 level) with an average of B or better; at least 18 of the graduate credits must be taken in Statistics. In addition, the university requires at least 12 hours of STAT899 (Doctoral Research).

Advance to Candidacy: In addition to completing the course requirements below, students must pass all 3 qualifying exams in statistics: Applied Statistics, Statistics, and Probability. Or, pass any 2 of the 3 qualifying exams: Applied Statistics, Statistics or Probability, and complete a course sequence of the exam you choose not to take, or complete two additional courses from an approved list. The qualifying requirements may be satisfied by passing three written exams or by satisfactory performance in a specified list of courses. These examinations are given by the Mathematics Department twice a year in January and August. A student may take one or more examinations at a time. The student must pass two examinations by January of his or her third year in the graduate program, and must complete the qualifying requirements by the end of the fourth year. Most full-time students complete the qualifying requirements by the end of the second year or middle of the third year.

If successful in the qualifying requirements, the student must pass an oral examination. Administered by the Statistics faculty, the oral examination usually takes place a year after the student passes the written examination. This examination serves as a test of the student's in-depth preparation in the area of specialization and the student's research potential. Successful completion of the oral exam indicates that the student is ready to begin writing the doctoral dissertation.

Post-Candidacy: Complete at least 12 credits of STAT899 Doctoral Dissertation Research and successfully defend a dissertation.

Course	Title	Credits
Core Requirements		
Select 36 credits of coursework [1]		36
Pass the written examination in three fields at the Ph.D. level, including probability and one statistics area		
Pass the final oral examination		
Dissertation Research Requirement		
STAT899	Doctoral Dissertation Research	12
Total Credits		**48**

[1] At least 27 credits at the 600-700 level and at least 18 credits at the 600-700 level in statistics and probability.

Mathematics of Advanced Industrial Technology (MAIT)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

This program is not accepting new students at this time. Please visit our graduate program listing (p. 20) for other related programs.

Abstract

The Norbert Wiener Center, a research and educational unit in the Department of Mathematics at the University of Maryland, College Park, offers a professional Masters degree focusing on the modern mathematical methods and algorithms that underlie today's cutting-edge engineering: The Mathematics of Advanced Industrial Technology (MAIT).

Our program is designed for individuals working in mathematical engineering who are looking for a fast track to understanding and applying the most up-to-date ideas in their current and future projects. Undergraduate degree holders can advance to the Masters level, and Masters degree holders can advance their applicable skills.

In addition to the professional Masters degree, we also offer two certificate programs. For students wishing to enhance their career skills in specific subject matter, the Center also offers a Graduate Certificate in

Mathematics of Advanced Industrial Technology to students completing 4 courses (12 credits) within the program. The Norbert Wiener Center also offers a specific Graduate Certificate concentration in Computational Harmonic Analysis. This 12-credit program is tailored to working engineers and scientists wishing to advance their understanding of the latest Fourier, Wavelet, and Time-Frequency Harmonic Analysis methods and algorithms.

Fields including RF and Optical Communications, Signal and Image Processing, Sensor Networks, RADAR and SONAR, Navigations and Avionics, Medical Imaging and Diagnostics, Control Systems, and Robotics, increasingly rely on fast, embedded mathematical algorithms executing on the latest microprocessors, micro-controllers, and DSP cores. Budding fields such as Bioinformatics, Nanotechnology, Data Mining, and Quantum Computing are likewise being built from the ground up around modern mathematical methods. Engineers and scientists that understand advanced mathematical toolsets will have the edge in creating tomorrow's technologies.

The Norbert Wiener Center's educational mission is to teach the mathematics of modern engineering in an accessible and applicable manner. Our faculty is drawn from both academia and industry in order to balance theoretical and "hands on" approaches in the most constructive way. Our courses offer the latest information while tying modern theory directly to application by incorporating industry standard tools. Graduates of the Norbert Wiener Center will be well equipped to apply the latest mathematical tools to advance both their projects and their careers.

The most up-to-date information about the MAIT program can be found on our website at www.mait.umd.edu (http://www.mait.umd.edu)

Mathematics of Advanced Industrial Technology, Post-Baccalaureate Certificate (P.B.C.)

For students wishing to enhance their career skills in specific subject matter, the Center also offers a Graduate Certificate in Mathematics of Advanced Industrial Technology to students completing 4 courses (12 credits) within the program. Coursework will include at least 2 of the core subjects and 2 listed electives to be completed with a GPA of 3.0 or higher.

Mathematics (MATH)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

Three programs are currently closely affiliated with the Mathematics Department: the Mathematics Program (MATH), the Applied Mathematics & Statistics, and Scientific Computation Program (AMSC), and the Mathematical Statistics Program (STAT). Students applying for admission should use the appropriate symbol to indicate their program of interest. The interdisciplinary Applied Mathematics & Statistics, and Scientific Computation Program offers three concentrations, one in Applied Mathematics, one in Scientific Computation, and one in Applied Statistics. The Statistics Program is concerned with mathematical statistics and probability. The AMSC and STAT programs are described in detail elsewhere in this catalog.

Students can earn a Doctor of Philosophy degree in the Mathematics Program. **The Master's degree is not offered** unless it is en route to a Ph.D. The master's degree is not required for entrance to the Ph.D. program.

The Mathematics Program offers graduate programs in Algebra and Algebraic Geometry, Complex Analysis, Dynamical Systems and Chaos, Geometry, Harmonic Analysis, Mathematical Logic, Number Theory, Numerical Analysis, Ordinary Differential Equations, Partial Differential Equations, Probability, Real and Functional Analysis, Representation Theory, Statistics and Topology.

Financial Assistance

The MATH program is expecting to support about 12 new doctoral students each Fall. Offers of support are generally made for up to five years, contingent on the student making satisfactory academic progress. Except for unusual circumstances, offers of financial aid will not be made to applicants seeking a Master's degree. The normal teaching load is four to six hours per week of classroom teaching in addition to the duties of meeting with students and grading papers. Sometimes fellowships and research assistantships are also available.

Facilities and Special Resources

The Department is actively involved in research in a number of areas, strengthened further by a complement of mathematicians from the Institute for Physical Science and Technology. The Department fosters a lively program of seminars and colloquia; about half of these talks are given by outside specialists. In addition the department has a tradition of

hosting distinguished long term visitors who give series of seminar talks or teach semester long courses.

The Engineering and Physical Sciences Library is located on the ground floor of the Mathematics Building and contains more than 95,000 volumes in mathematics, physics and engineering, and more than 280 journals in pure and applied mathematics. The Library of Congress, with its extensive collection of books and technical reports, is only a half hour from campus.

The Department has a large network of computers mostly running Linux. The Department houses a computer classroom and a Mathematical Visualization Lab, and similar labs are scattered across campus. There are computers in almost all graduate student offices, and many of the other computers on campus are available for student use.

The Department cooperates closely with the Institute for Physical Science and Technology and with the Department of Computer Science. Faculty members of both groups offer courses in the Department. Computer facilities are available to serve the research needs of both faculty and graduate students. Members of the Department participate actively in the interdisciplinary AMSC Program, and they also staff the Mathematical Statistics Program.

Mathematics, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

Please note: Students cannot apply to the M.A. degree. The M.A. can only be awarded on route to the Ph.D. All students interested in earning the M.A. must be doctoral students.

The M.A. degree program offers both a thesis and non-thesis option; most students choose the latter. The non-thesis option requires students to take 30 credit hours with an average of at least a B. At least 18 credits must be at the 600/700 level, including at least 12 hours in mathematics. Also, students must complete two full-year sequences at the 600/700 level, except that a suitable "Selected Topics" course may be substituted for the second part of one of these full-year courses. Additionally, students must pass Departmental written examinations in two different mathematical fields at the Master's level, and write a scholarly paper.

The thesis option requires a total of 24 hours of courses carrying graduate credit of which at least 15 are at the 600/700 level. Of these 15 hours at least 12 must be in mathematics. Of these 12 hours, at least 3 hours must be in each of two fields of mathematics distinct from the one in which the thesis is written, and must be passed with a grade of B or better. The student must also take 6 hours of thesis research, write a satisfactory thesis, and pass a final oral examination.

The M.A. degree includes no foreign language requirement. Generally it takes two to three years to earn the M.A., and approximately 20 degrees are granted each year in mathematics (MATH, STAT, and AMSC combined).

The department also has a 5-year program to earn a combined M.A./B.S. degree. The requirements for this program include the requirements for both the B.S. degree and the M.A. degree, with 9 hours of overlapping credits. Either the thesis or non-thesis option for the M.A. degree is available in this program.

Thesis Option

Course	Title	Credits
Core Requirements		
Select 24 credits of coursework [1]		24
MATH799	Master's Thesis Research	6
Pass a final oral examination		
Total Credits		**30**

[1] At least 15 credits at the 600-700 level and at least 12 credits at the 600-700 level in mathematics.

Non-Thesis Option

Course	Title	Credits
Core Requirements		
Select 30 credits of coursework [1]		30
Pass two written exams at the Master's level		
Complete the corresponding coursework		
Write a scholarly paper		
Pass a final oral examination		
Total Credits		**30**

[1] At least 18 credits at the 600-700 level and at least 12 credits at the 600-700 level in mathematics

Mathematics, Doctor of Philosophy (Ph.D.)

The Ph.D. program does not require an M.A. degree, but applicants who are accepted should show, on the basis of their undergraduate record and recommendations, that they possess not only marked promise in mathematical activities but the potential to perform on a creative level. Like the M.A. program, admission may be granted on a provisional basis.

Advance to Candidacy: In addition to completing the course requirements below, students must pass two qualifying exams, and in addition must take and pass four semesters of courses from a specific list with a grade of B or better, and an overall grade point average of at least 3.3 in these four courses. These four courses must be distinct from the ones supporting the qualifying exams and constitute the third and final qualifying exam requirement. The two qualifying exams and four additional courses, must be passed/completed by January of the student's third year in the graduate program. A student may alternatively take and pass a third (and possibly, a fourth) qualifying exam in place of two (or four) qualifying courses. If successful in these written examinations and courses, students must do advanced reading and coursework in their special area of interest before they can be admitted to candidacy and begin dissertation research.

The purpose of the written qualifying exams is to indicate that the student has the basic knowledge and mathematical ability to begin advanced study. Passing the exams is thus supposed to certify understanding of (selected) first-year graduate material. These examinations are given twice a year, in January and August. A student may take one or more examinations at a time.

Before advancing to candidacy, students must also obtain the consent of a faculty member who will accept the responsibility of directing a dissertation.

Post-Candidacy: Complete at least 12 credits of MATH899 Doctoral Dissertation Research and successfully defend a dissertation. The dissertation must represent an original contribution to mathematical knowledge and is usually published in a mathematical journal.

Course	Title	Credits
Core Requirements		
Select 36 credits of coursework [1]		30
Pass the written examination requirements		
Pass a final oral examination		
Dissertation Research Requirements		
MATH899	Doctoral Dissertation Research	12
Total Credits		**42**

[1] At least 27 credits at the 600-700 level and at least 18 credits in the Department of Mathematics.

Measurement, Statistics and Evaluation (EDMS)

Graduate Degree Program
College: Education

Abstract

Measurement, Statistics and Evaluation offers graduate study leading to the Master of Science or Doctor of Philosophy degrees for students with strong interests in research methods and their applications. Students pursuing Doctoral degrees in other programs may enroll in a dual degree program leading to the Master's degree in Measurement, Statistics and Evaluation, or there is also a 21-credit certificate program for doctoral students. For select undergraduates, there is a five-year Bachelor's/Master's program in Measurement, Statistics and Evaluation. Please note that for those PhD applicants who are hoping to receive a funding offer, you should adhere to the **preferred deadlines** on the program website and not the deadlines listed below.

Financial Assistance

Graduate teaching assistantships, research assistantships, and fellowships are available. The Department can usually aid students in locating part-time employment opportunities, both on and off campus, as well as providing funding from its own contracts and grants.

Courses: EDMS (p. 739). (p. 739)

Admissions General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- CV/Resume
- Writing Sample

In addition to Graduate School requirements, admission decisions are based on the quality of previous undergraduate and graduate work, strength of letters of recommendation from persons competent to judge the applicant's likelihood of success in graduate school, scores on the Graduate Record Examination, and the applicant's statement of academic and career objectives in relation to the program of study to be pursued. Students who seek admission should display strong evidence of aptitude and interest in quantitative methods. Programs of study may be designed to meet the individual needs of both full-time and part-time students since many courses are offered in the late afternoon or evening.

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	December 1, 2022	September 30, 2022
International Applicants

Requirements

- Measurement, Statistics and Evaluation, Certificate of Advanced Study (C.A.S.) (p. 298)
- Measurement, Statistics and Evaluation, Doctor of Philosophy (Ph.D.) (p. 297)
- Measurement, Statistics and Evaluation, Master of Education (M.Ed.) (p. 297)
- Measurement, Statistics and Evaluation, Master of Science (M.S.) (p. 297)

Facilities and Special Resources

The Department maintains computer equipment and high performance server with up-to-date statistical software packages. The faculty are actively engaged in a large variety of basic and applied research projects and students are encouraged to become involved in these activities. The Washington and Baltimore areas have numerous organizations that provide opportunities to become involved in projects that have national importance.

Measurement, Statistics and Evaluation, Master of Science (M.S.)

Thesis or Non-thesis option: 30 credits required

The Measurement, Statistics and Evaluation M.S. degree program requires a minimum of 30 credit hours. Both thesis and non-thesis options are available. A written comprehensive examination is required for both options and a research paper is required for the non-thesis option.

Measurement, Statistics and Evaluation, Master of Education (M.Ed.)

The M.Ed. option is not currently offered.

Measurement, Statistics and Evaluation, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 66 credits including 12 credits of EDMS899 and 21 credits of electives.

The Ph.D. program requires both preliminary and comprehensive examinations; the comprehensive examination is designed to assess broad, integrated understanding as well as the student's specialization. All students are expected to engage in research. Measurement, Statistics and Evaluation does not currently offer the Ed.D. degree.

Mechanical Engineering (ENME)

Graduate Degree Program
College: Engineering

Abstract

The Department of Mechanical Engineering offers graduate study leading to the Master of Science and Doctor of Philosophy degrees. In addition, students may pursue a Master of Engineering degree through the Professional Master's Program of the Office of Advanced Engineering Education. The Department's instruction and research are carried out through the following four divisions:

DESIGN and System Reliability

The focus of this area of concentration is the study of:

- Measuring, tracking, and predicting levels of reliability during systems' life cycles
- Understanding and mitigating the causes of component, system, and process failures
- Incorporating reliability, sustainment, and life-cycle considerations into design
- Microelectronic device and electronic system reliability and stress analysis
- Integrated product design and manufacturing
- Design and reliability of high temperature and high power electronic systems, electro-optics, sensors, and actuators
- Battery design, thermal management, and reliability
- Design formalisms
- Multi-criteria design decision making and optimization
- Statistical process control and improved manufacturing methods
- Human reliability analysis
- Cybersecurity
- Machine learning and data analytics

Mechanics, Materials, and manufacturing

This division concentrates on the study of analytical and experimental fundamentals of mechanics and materials. Areas of specialization include:

- Control systems in product development organization
- Dynamic deformation and fracture studies, including fracture and fragmentation by explosives
- Fiber optics
- Smart structures
- Vibration and acoustic control
- Vibro-acoustic heating and phonon transport
- Non-linear dynamics of milling of thin walled structures
- Control of crane-load oscillations
- Surgical robotics
- Development of creep-fatigue damage models for viscoplastic materials such as solder
- Micromechanics of advanced composite materials
- Characterization and optimization of mechanical properties of materials

- Methods for non-destructive detection of damage in structural systems
- Mechanical characterization of Micro-Electro-Mechanical Systems (MEMS) materials
- Manufacturing systems
- Additive manufacturing in micro-nano-bio systems

Thermal, Fluids, and Energy Sciences

This division encompasses two broad disciplines: thermal science and fluid mechanics. Areas of specialization include:

- Application of three-dimensional vortex methods to turbulent flow prediction
- Experimental, numerical, and theoretical analysis of scalar pollutant dispersion in turbulent boundary layers
- Experimental studies of the near surface atmospheric boundary layer
- Large-eddy and direct numerical simulation of 3-D and non-equilibrium boundary layers
- Experimental measurement and analysis of particle/turbulence interaction within turbulent, multi-phase flows
- Fundamental research into pool and flow boiling heat transfer
- Experimental investigation of steady and unsteady breaking waves
- Fouling and particulate deposition on low temperature surfaces
- Performance of water foaming agents in fire protection applications
- Mixing of boron diluted water slugs and nuclear reactor reactivity excursions
- Thermal management and characterization of electronic equipment
- Transport phenomena in manufacturing
- Study of absorption heat pumps and chillers
- Heat transfer enhancement of environmentally safe refrigerants
- Investigation of performance potential for natural refrigerant
- Simulation, analysis, and experimentation in heat pump and refrigeration systems
- Annular and post-annular flow in microchannels
- Two-phase thermofluid enhancement through flow regime modification
- Monolithic and thin-film thermoelectric microcoolers.

Financial Assistance

Financial assistance is available to highly qualified students in the form of research and teaching assistantships. The most outstanding applicants are offered fellowships. Students seeking financial assistance should submit with their applications a current resume or CV as well as a statement regarding their qualifications and/or past research or teaching experience. Financial assistance is sought for all worthy students.

Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Mechanical Engineering, Doctor of Philosophy (Ph.D.) (p. 300)
- Mechanical Engineering, Master of Science (M.S.) (p. 300)

Facilities and Special Resources

Mechanical engineering faculty, researchers, and students leverage state-of-the-art research equipment, technology, and systems to develop new methods, create innovative tools, and find practical solutions to the most pressing societal concerns. More information about our research labs and centers can be found here: https://enme.umd.edu/facilities (https://enme.umd.edu/facilities/).

Mechanical Engineering, Master of Science (M.S.)

Thesis only: 30 credits

Students enrolled in the M.S. program in Mechanical Engineering must complete at least 30 credits for graduation. This includes 24 credits of approved coursework and 6 credits of M.S. Thesis Research. The M.S. Coursework Plan sets forth the courses required to be taken by the student in partial fulfillment of the M.S. degree requirements. The coursework plan must be prepared in consultation with a faculty advisor in the student's technical area of interest, and submitted to the Graduate Office (2168 Glenn L. Martin Hall) for approval by the Director of Graduate Studies at the beginning of the first semester of study. Changes to the plan are permitted, but must be approved by the student's advisor and the Director of Graduate Studies prior to their implementation. A new coursework plan reflecting the changes must be filed with the ME Graduate Office every time changes are made.

Course	Title	Credits
Core Requirements		
Complete 24 hours of approved coursework [1]		24
ENME799	Master's Thesis Research	6
Specialization Requirements		
Select one of the following:		
Design and Reliability of Systems		
Thermal-Fluid Sciences		
Mechaniccs and Materials		
Total Credits		**30**

[1] At least 15 credits from courses taken at the 600 level or above.

Mechanical Engineering, Doctor of Philosophy (Ph.D.)

Students in the Ph.D. program must take a minimum of 36 credits of approved graduate coursework beyond the B.S. degree (a minimum of 12 credits of coursework at the University of Maryland) and 12 credits of dissertation research. Students currently holding an M.S. from an approved engineering, math, or science program may apply up to 24 credits from their previous degree towards their doctoral coursework requirement.

Advance to Candidacy: In addition to the course requirements below, students must successfully pass a qualifying exam, as well as present a Dissertation Topic Proposal. The proposal should be completed within two semesters of passing the qualifying exam

Post-Candidacy: Complete at least 12 credits of ENME899 Doctoral Dissertation Research and successfully defend and submit a dissertation on an original research topic.

Course	Title	Credits
Core Requirements		
Select a minimum of 36 credits of coursework beyond the Bachelor's degree [1]		36
Dissertation Research Requirements		
ENME899	Doctoral Dissertation Research	12

Mechanical Engineering (PMME)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Offered by the Department of Mechanical Engineering, our Mechanical degree programs give students the tools needed to expand their understanding of the fundamentals in this growing field while introducing them to modern technologies. Courses are taught by leaders in robotic control, advanced vehicle technologies, energy systems, and more, and students have access to state-of-the-art research facilities. Students in this program choose from 1 of 2 tracks: General Mechanical or Energy and the Environment.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus. In addition to in-person courses, you may have the option to take some course requirements in an online format. Course format offerings are subject to change.

Mechanical Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Students choose one of the two focus areas and take five core courses and five electives from that area. Electives must be approved by their advisor.

Course	Title	Credits
Select five core courses and five electives from one of the following focus areas:		30
General Mechanical core course options:		
ENME600	Engineering Design Methods	
ENME605	Advanced Systems Control	
ENME607	Engineering Decision Making and Risk Management	
or ENRE671	Risk Assessment in Engineering	
ENME610	Engineering Optimization	
ENME631	Advanced Conduction and Radiation Heat Transfer	
ENME632	Advanced Convection Heat Transfer	
ENME640	Fundamentals of Fluid Mechanics	
ENME662	Linear Vibrations	
ENPM652	Applied Finite Element Methods	
ENPM654	Energy Systems Management	
ENPM671	Advanced Mechanics of Materials	
ENME690	Mechanical Fundamentals of Electronic Systems	
ENME712	Measurement, Instrumentation and Data Analysis for Thermo-Fluid Processes	
Energy and The Environment core course options:		

ENME647	Multiphase Flow and Heat Transfer
ENPM621	Heat Pump and Refrigeration Systems Design Analysis
ENPM622	Energy Conversion I - Stationary Power
ENPM623	Engineering Combustion Emissions for Air Pollution Control
ENPM624	Renewable Energy Applications
ENPM625	Heating, Ventilation and Air Conditioning of Buildings
ENPM626	Waste and Biomass Energy Conversion
ENPM627	Environmental Risk Analysis
ENPM635	Thermal Systems Design Analysis
ENPM651	Heat Transfer for Modern Application
ENPM654	Energy Systems Management
ENPM656	Energy Conversion II -- Mobile Power
Total Credits	**30**

Requirements

- Mechanical Engineering, Post-Baccalaureate Certificate (P.B.C.) (p. 303)

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus. In addition to in-person courses, you may have the option to take some course requirements in an online format. Course format offerings are subject to change.

Mechanical Engineering, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

All Graduate Certificate in Engineering Programs consist of 4 courses/12 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Course	Title	Credits
Select 4 courses in either the Energy & Environment or General Mechanical track:		12
Energy and The Environment:		
ENME647	Multiphase Flow and Heat Transfer	
ENPM621	Heat Pump and Refrigeration Systems Design Analysis	
ENPM622	Energy Conversion I - Stationary Power	
ENPM623	Engineering Combustion Emissions for Air Pollution Control	
ENPM625	Heating, Ventilation and Air Conditioning of Buildings	
ENPM626	Waste and Biomass Energy Conversion	
ENPM627	Environmental Risk Analysis	
ENPM651	Heat Transfer for Modern Application	
ENPM654	Energy Systems Management	
ENPM656	Energy Conversion II -- Mobile Power	
ENPM635	Thermal Systems Design Analysis	
OR		
ENME635	Energy Systems Analysis for Sustainability and Decarbonization	
ENPM624	Renewable Energy Applications	
OR		
ENME701	Sustainable Energy Conversion and the Environment	
General Mechanical Engineering:		
ENME600	Engineering Design Methods	
ENME605	Advanced Systems Control	
ENME607	Engineering Decision Making and Risk Management	
ENME610	Engineering Optimization	
ENME631	Advanced Conduction and Radiation Heat Transfer	
ENME632	Advanced Convection Heat Transfer	
ENME640	Fundamentals of Fluid Mechanics	
ENME662	Linear Vibrations	
ENME690	Mechanical Fundamentals of Electronic Systems	
ENME712	Measurement, Instrumentation and Data Analysis for Thermo-Fluid Processes	
ENPM671	Advanced Mechanics of Materials	
ENPM654	Energy Systems Management	
ENPM652	Applied Finite Element Methods	
OR		
ENME674	Finite Element Methods

Multimedia Journalism (Z071)

Graduate Certificate Program
College: Journalism

Abstract

The 12-credit, four-course graduate certificate program is designed for working professionals and blends practical training in video, audio, photography, social media and interactive online publishing with the critical application of editorial, ethical and legal principles in digital media.

Music Education (MUED)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Music offers programs of study leading to the Master of Arts degree with areas of specialization in ethnomusicology, music history and literature (musicology), music education, and music theory; the Master of Music degree with areas in performance, composition, conducting, and music education; the Doctor of Philosophy degree with areas of specialization in ethnomusicology, musicology, music education, and music theory; and the Doctor of Musical Arts degree with areas of specialization in composition, performance, and conducting.

Financial Assistance

A number of competitive fellowships, graduate assistantships, teaching assistantships, opera assistantships, and orchestral assistantships are available. Preference for financial assistance will be given to those who have filed an application for admission to the University and the School of Music Supplemental Application by December 1 (for performance programs) and January 15 (for Music Education only) and have been officially admitted.

Courses: MUED (https://academiccatalog.umd.edu/graduate/courses/mued/) MUSC (https://academiccatalog.umd.edu/graduate/courses/musc/) MUSP (https://academiccatalog.umd.edu/graduate/courses/musp/)

Admissions

General Requirements

- Statement of Purpose and Letters of Recommendation: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application (Acceptd (https://music.umd.edu/admissions/graduate/)), not the Graduate School's application.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Acceptd (https://music.umd.edu/admissions/graduate/) School of Music Application

Admission to the graduate degree programs in music is highly selective. It is determined primarily by a performance audition, tapes and scores of original compositions, scholarly research papers, letters of recommendation, and/or successful teaching experience; additionally, in some academic areas, the general GRE scores are considered.
All non-native English-speaking students must achieve a score of 575/233/100 on the TOEFL to be invited for audition/admission (see the School of Music's admission website (http://www.music.umd.edu/prospective_students/application_materials/#international) for detailed English language requirements).

We require a passing TOEFL score (minimum 100 IBT, 233 CBT, 575 PBT) for all applicants whose primary language is not English before we will process your application or consider you for a live audition. The requirement will be waived for applicants who have earned an undergraduate degree from an institution in the United States or another approved English-speaking country. Waivers will only be granted if at least three years of the undergraduate education or at least two years of the graduate education in a non-performance related field took place at an English-speaking institution. Graduate degrees in performance-related fields or performance certificates or diplomas will not exempt an applicant from submitting a passing TOEFL score.

Requirements

- Music Education, Doctor of Philosophy (Ph.D.) (p. 307)
- Music Education, Master of Arts (M.A.) (p. 306)
- Music Education, Master of Music (M.Mus.) (p. 306)

Facilities and Special Resources

With approximately 300 public performances each year—including student recitals and more than thirty ensembles—School of Music students have robust performance opportunities The School of Music also hosts numerous guest clinicians each year and presents the Renegade Series, which brings to campus some of the most visionary artists in our field. As one of the nation's leading public research universities, the University of Maryland provides a wealth of opportunities to learn from and collaborate with scholars in a variety of disciplines. The School of Music makes its home in the Clarice Smith Performing Arts Center, which serves as an inter-disciplinary laboratory for the arts. The building's six performance halls, the Michelle Smith Performing Arts Library, specialized rehearsal rooms, and classrooms provide students with all the resources needed to become twenty-first century artist-citizens. The Clarice's presenting arm provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent artists-in-residence have included the St. Lawrence String Quartet, the Cappella Pratensis, Etienne Charles, Tine Thing Helseth, Jeremy Denk, and Dawn Upshaw. The Michelle Smith Performing Arts Library (MSPAL) ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

The surrounding DC-Baltimore region offers a host of community engagement opportunities. Our students can often be seen performing at major venues such as The John F. Kennedy Center for the Performing Arts, Strathmore Hall and the Phillips Collection. We also present at intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre. Within a few miles of our home in College Park are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

Music Education, Master of Arts (M.A.)

Thesis only: 30 credits required

The Master of Arts Degree (Thesis Option in Ethnomusicology, Music Education, Music History and Literature [Musicology], or Music Theory; Non-Thesis Option in Ethnomusicology or Music History and Literature [Musicology]) requires a minimum of 30 credit hours (35 for Ethnomusicology), with a minimum of 12 credit hours in Major Studies, 9 credit hours in Studies in Areas Supporting the Major (14 for Ethnomusicology), and 9 credit hours in Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a Thesis must be written (Ethnomusicology Non-Thesis Option requires two scholarly research papers), an oral defense of the Thesis (or research papers) must be passed; and a written comprehensive examination must be passed. Specific courses are required in each area of specialization.

Total Credits		**30**

Music Education, Master of Music (M.Mus.)

Non-thesis only (scholarly paper required): 30 credits required

The Master of Music Degree (Non-Thesis Option in Composition, Conducting, Music Education, or Performance) requires a minimum of between 30 and 36 credit hours depending on the specific program. Required coursework is distributed among three areas of study: Major studies, Studies in Areas Supporting the Major, and Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a scholarly research paper must be written as part of MUSC648 or MUED690; a Final Project must be completed satisfactorily; and an oral comprehensive examination of courses required in Major Studies and in Studies in Areas Supporting

the Major must be passed. Specific courses are required in each area of specialization.

Music Education, Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy degree requires the satisfactory completion of a significant body of coursework that, in the student's and Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy, as well as certain specific courses required in each area of specialization. The Ph.D. in Music Education requires a minimum of 48 credits beyond the master's degree, including 12 credits of doctoral dissertation research. . A grade of B- or better is required in all courses used to fulfill requirements for the degree. A Principal Advisor for the dissertation will be chosen by the student and the academic advisor; the Principal Advisor and the student will then nominate the remaining members of the dissertation committee. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Philosophy degree requires a Written Dissertation.

Advance to Candidacy: In addition to completing the course requirements below, students must complete a pre-candidacy portfolio. The portfolio should include a first year paper, second year paper, public lecture, and teaching demonstrations. Students must also pass a preliminary examination, successfully defend the dissertation prospectus, and obtain IRB approval in order to advance to candidacy.

Post-Candidacy: Complete at least 12 credits of MUSC899 doctoral dissertation research and successfully defend and submit an original dissertation.

Admissions

General Requirements

- Statement of Purpose and Letters of Recommendation: The statement of purpose and three letters of recommendation will be required to be uploaded in the Supplementary Application, not the Graduate School's application.
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- School of Music Application (https://music.umd.edu/admissions/graduate/)
- Additional requirements depending on instrument/major. For more information, please visit the School of Music website (https://www.music.umd.edu/prospective_students/auditions/)

Admission to the graduate degree programs in music is highly selective. It is determined primarily by a performance audition, tapes and scores of original compositions, scholarly research papers, letters of recommendation, and/or successful teaching experience; additionally, in some academic areas, the general GRE scores are considered. All non-native English-speaking students must achieve a score of 575/233/100 on the TOEFL to be invited for audition/admission (see the School of Music's admission website (http://www.music.umd.edu/prospective_students/application_materials/#international) for detailed English language requirements).

We require a passing TOEFL score (minimum 100 IBT, 233 CBT, 575 PBT) for all applicants whose primary language is not English before we will process your application or consider you for a live audition. The requirement will be waived for applicants who have earned an undergraduate degree from an institution in the United States or another approved English-speaking country. Waivers will only be granted if at least three years of the undergraduate education took place at an English-speaking institution. Graduate degrees or performance certificates or diplomas will not exempt an applicant from submitting a passing TOEFL score. Please go here (http://www.music.umd.edu/prospective_students/application_materials/#international) for more specific information.

The School of Music will allow all graduate applicants whose overall TOEFL score is 90 or higher to audition, but in order to be considered for admission a fully passing TOEFL score must be submitted no later than February 15. Auditions will not be scheduled for applicants with an overall TOEFL score lower than 90.

APPLICATION DEADLINES

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 1, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	December 1, 2022

Requirements

- Music: Performance and Composition, Doctor of Musical Arts (D.M.A.) (p. 311)
- Music: Performance and Composition, Master of Music (M.Mus.) (p. 314)

Facilities and Special Resources

With approximately 300 public performances each year—including student recitals and more than thirty ensembles—School of Music students have robust performance opportunities The School of Music also hosts numerous guest clinicians each year and presents the Renegade Series, which brings to campus some of the most visionary artists in our field. As one of the nation's leading public research universities, the University of Maryland provides a wealth of opportunities to learn from and collaborate with scholars in a variety of disciplines. The School of Music makes its home in the Clarice Smith Performing Arts Center, which serves as an inter-disciplinary laboratory for the arts. The building's six performance halls, the Michelle Smith Performing Arts Library, specialized rehearsal rooms, and classrooms provide students with all the resources needed to become twenty-first century artist-citizens. The Clarice's presenting arm provides School of Music students with the opportunity to collaborate and learn from internationally recognized artists and scholars. Recent artists-in-residence have included the St. Lawrence String Quartet, the Cappella Pratensis, Etienne Charles, Tine Thing Helseth, Jeremy Denk, and Dawn Upshaw. The Michelle Smith Performing Arts Library (MSPAL) ranks among the top twenty university music libraries in the United States, and it offers a variety of archives, special collections, and other research resources that give it international stature among scholars in a broad spectrum of music disciplines. The total music collection includes approximately 50,000 books, 150,000 scores, 140,000 recordings, and 4,500 linear feet of archival materials. The International Piano Archives at Maryland (IPAM) is the only institutional collection in existence devoted to historic piano performance. IPAM contains 40,000 recordings, 8,500 music scores, 2,500 books, and a collection of reproducing pianos with 8,000 piano rolls. To date, IPAM has acquired the collections of more than 40 eminent pianists. The MSPAL Special Collections in Performing Arts embrace a growing number of national and international music organization archives representing music education, band history, solo and ensemble instrumental performance, music librarianship, and ethnomusicology. Materials in these archives include papers, music scores, recordings, books, magazines, photographs, and oral histories. MSPAL also features important archival and manuscript collections on music criticism and American music, the Charles Fowler Papers supporting the study of

arts education, a significant Leopold Stokowski Collection, the Jacob Coopersmith Collection of Handeliana, the Radio Station WOR/Alfred Wallen stein Collection of 26,000 orchestral scores, and the performance parts of the Andre Kostelanetz Orchestra.

The surrounding DC-Baltimore region offers a host of community engagement opportunities. Our students can often be seen performing at major venues such as The John F. Kennedy Center for the Performing Arts, Strathmore Hall and the Phillips Collection. We also present at intimate community spaces such as Riversdale Mansion and the historical Greenbelt Theatre. Within a few miles of our home in College Park are research opportunities offered by Dumbarton Oaks, the Enoch Pratt Free Library of Baltimore, the Folger Shakespeare Library, the Library of Congress, the National Archives, the Smithsonian Institution, and many other specialized libraries.

Music: Performance and Composition, Doctor of Musical Arts (D.M.A.)

The Doctor of Musical Arts degree requires the satisfactory completion of a significant body of coursework that, in the student's and Graduate Advisor's judgement, prepares the student for the preliminary examination that leads to admission to candidacy, as well as certain specific courses required in each area of specialization. A grade of B- or better is required in all courses used to fulfill requirements for the degree. A dissertation (whether written, or in project form) is required for all doctoral degrees in music. A principal advisor for the dissertation will be chosen by the student and the academic advisor; the principal advisor and the student will then nominate the remaining members of the dissertation committee. The student must submit a detailed prospectus of the dissertation to the members of the dissertation committee and the graduate director, and must be admitted to candidacy prior to the approval of the dissertation committee by the Graduate School. The dissertation must be successfully defended before the entire dissertation committee. The Doctor of Musical Arts degree requires a Written Dissertation, a Recording Project, a Performance Project, or a Musical Composition. Some Doctoral of Musical Arts degrees have an option of a Written Dissertation or a Performance Dissertation.

D.M.A. in Composition

Non-course requirements for composition students include a pre-candidacy scholarly paper and a recital presentation of original music composed while in the degree program at Maryland. The recital presentation must take place prior to the defense of the dissertation project.

Music: Performance and Composition, Master of Music (M.Mus.)

The Master of Music Degree (Non-Thesis Option in Composition, Conducting, Music Education, or Performance) requires a minimum of between 31 and 36 credit hours depending on the specific program. Required coursework is distributed among three areas of study: Major studies, Studies in Areas Supporting the Major, and Other Studies in Music. In addition, a grade of B- or better is required in all courses used to fulfill requirements for the degree; a scholarly research paper must be written as part of MUSC648 or MUED690; a Final Project must be completed satisfactorily; and an oral comprehensive examination of courses required in Major Studies and in Studies in Areas Supporting the Major must be passed. Specific courses are required in each area of specialization.

M.M. in Composition

(minimum of 30 credits beyond the Bachelor's degree)

Course	Title	Credits
Core Requirements		
Major Studies in Music		10
Studies in Areas Supporting the Major		15
Other Courses in Music		6
Scholarly paper		
Total Credits		**31**

M.M. in Conducting

(minimum of 30 credits beyond the Bachelor's degree)

Course	Title	Credits
Specialization Requirements		
Select one of the following:		32-34
Choral Conducting specialization:		
Major Studies in Music (10 credits minimum)		
Studies in Areas Supporting the Major (15 credits minimum)		
Academic Courses in Music (9 credits minimum) [1]		
Scholarly paper		
Instrumental Conducting specialization:		
Major Studies in Music (10 credits minimum)		
Studies in Areas Supporting the Major (13-14 credits minimum)		
Advanced Courses in Music (9 credits minimum) [1]		
Scholarly paper		
Total Credits		**32-34**

[1] Including MUSC648

M.M. in Performance

(minimum of 30 credits beyond the Bachelor's degree)

Course	Title	Credits
Core Requirements		
Major Studies in Music (10 credits minimum)		10
Studies in Areas Supporting the Major (credits may vary per specialization)		12-17
Academic Courses in Music (9 credits minimum) [1]		9

Networking Software Development (Z119)

Graduate Certificate Program
College: Engineering

ABSTRACT

The aim of the Graduate Certificate in Networking Software Development is to encourage the students to acquire specialized knowledge and skills in the technical areas of networking and software development. We have positioned this Certificate to expose the students to both computer networking and software development, which will allow them to go through a well-balanced coursework in excess of the Master's degree requirements. While completing the certificate program, students will also acquire/develop additional practical problem-solving, programming and analytical skills. Typical industry positions our students take after graduation that would benefit from this Certificate include: software engineer or software quality engineer (for a networking device vendor such as Cisco or a cloud service provider such as Amazon), system engineer, or cloud engineer.

Neuroscience and Cognitive Science (Z037)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Neuroscience and Cognitive Science (NACS) Program offers a Post-Baccalaureate Certificate for students pursuing graduate degrees in related departmental programs. This certificate program allows students to obtain significant interdisciplinary training that complements their graduate degree in a NACS-related discipline. The NACS Certificate serves to acknowledge this training.

Contact

Pam Komarek
Assistant Director
0219 Cole Student Activities Building
4095 Union Drive
University of Maryland
College Park, MD 20742
Telephone: 301.405.8910
Email: pkomarek@umd.edu

Website: http://www.nacs.umd.edu

Courses: NACS (https://academiccatalog.umd.edu/graduate/courses/nacs/)

Admissions

Only students enrolled in a Ph.D. degree program at the University of Maryland, College Park will be eligible for the NACS Certificate. Students enrolled in the NACS Ph.D. program are not eligible. Interested students are encouraged to contact the NACS office for advisement on coordinating the NACS Certificate requirements with their Ph.D.

requirements. Admission will be at the discretion of the NACS Graduate Director, with the advice and consent of the NACS Executive Committee. Students must submit a letter to the NACS Graduate Director requesting admission to the Certificate Program and outlining their plan of study for the NACS Certificate. Students must also identify a NACS faculty member to serve as their Certificate advisor. In many cases this may be the student's existing departmental Ph.D. advisor. Study for the Certificate must be completed by the end of the fifth year after admission to the program.

1. Completed application to the NACS Certificate program.
2. PDF copy of unofficial UM transcript.
3. Letter from primary advisor endorsing the application to the NACS Certificate program.

All files should be submitted electronically, with a strong preference for PDF files. Please use transparent file names that start with your name, i.e., smith_application.pdf, smith_transcript.pdf, smith_endorsement.pdf. Send files together in **one** email message to Pam Komarek, NACS Assistant Director, at pkomarek@umd.edu.

Requirements

- Neuroscience and Cognitive Science, Post-Baccalaureate Certificate (P.B.C.) (p. 316)

Neuroscience and Cognitive Science, Post-Baccalaureate Certificate (P.B.C.)

16 credits required

Students must complete the following courses with a grade of B (3.0) or better in each class.

1. Students must complete a core of 10 credits, in addition to their Ph.D. course requirements, comprising at least two of the courses within the NACS core curriculum (NACS641, NACS642, NACS643, NACS644, NACS645, all 4 credit courses) and two semesters of NACS608, one credit per semester.
2. Students must complete at least 6 additional credits from graduate courses approved by the NACS program. The student's NACS advisor and the NACS Graduate Director must approve the courses taken to fulfill these credits. Courses taken at the 400-level require the approval of the NACS Graduate Director.

Course	Title	Credits
NACS608	Neuroscience and Cognitive Science Seminar [1]	2
Select 6 credits of Electives approved by advisor		6
Select two of the following:		8
NACS641	Introduction to Neurosciences	
NACS642	Cognitive Neuroscience	
NACS643	Computational Neuroscience	
NACS644	Cellular and Molecular Neuroscience	
NACS645	Cognitive Science	
Total Credits		**16**

[1] 1 credit per semester, 2 credits total.

Neuroscience and Cognitive Science (NACS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The NACS program offers a wide range of research and training opportunities for students who are interested in pursuing doctoral-level research in a variety of areas within neuroscience and cognitive science. Faculty research interests center around seven main areas: Cellular & Molecular, Sensory & Motor Systems, Computational Modeling & Theory, Language & Speech, Cognition & Emotion, Development & Aging, and Disorders & Treatment. Research approaches include both the theoretical and experimental, with several laboratories doing both. Research and training activities of NACS take place within the laboratories of faculty in 20 participating departments and units: Aerospace Engineering, Animal and Avian Sciences, Biology, Computer Science, Electrical and Computer Engineering, English, Entomology, Epidemiology & Biostatistics, Hearing and Speech Sciences, Human Development, Kinesiology, Linguistics, Philosophy, Psychology, and Teaching and Learning, Policy and Leadership, as well as the Center for Advanced Study of Language, the Institute for Advanced Computer Studies, the Institute for Systems Research, the Maryland Neuroimaging Center, and the Second Language Acquisition program. The NACS program requires the completion of two required core courses and three out of five core courses, including introduction to neurosciences, cognitive neuroscience, computational neuroscience, cellular and molecular neuroscience, and cognitive science. The goal of the Program is to bring together the diverse perspectives and strengths of all the included disciplines in order to understand the working of the nervous system, the mind, and behavior. For more information, please visit our website: http://www.nacs.umd.edu.

Financial Assistance

Fellowships are available on a competitive basis to both entering and continuing students, while qualified students may also receive teaching assistantships. In addition, some faculty have research assistantships for their students.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 1, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	December 1, 2022

Other Deadlines: Please visit the program website at http://www.nacs.umd.edu

Requirements

- Neuroscience and Cognitive Science, Doctor of Philosophy (Ph.D.) (p. 317)
- Neuroscience and Cognitive Science, Master of Science (M.S.) (p. 317)

Facilities and Special Resources

The Program, by virtue of its breadth, has access to the facilities of all the departments, institutes, and centers of its faculty members. These include the Institute for Systems Research, the Institute for Advanced Computer Studies, the Center for Advanced Study of Language, the Maryland Neuroimaging Center, and the various well-equipped research laboratories and department facilities of the faculty. Animal facilities are available where necessary. NACS has developed close collaborations with the National Institutes of Health (NIH), Children's National Medical Center (CNMC), and Walter Reed National Military Medical Center (WRNMMC). NACS students can conduct research in laboratories with NACS adjunct faculty at these institutions. Thus, these relationships extend research and training opportunities for students while they get their degrees from the NACS program.

Neuroscience and Cognitive Science, Master of Science (M.S.)

Thesis option: 31 credits required
Non-thesis option: 31 credits required

Please note, students are not directly admitted into the master's program. The M.S. in NACS is awarded en route to the Ph.D.

Course	Title	Credits
NACS600	Ethics in Scientific Research	2
NACS640	Foundational Readings Seminar	2
Select 12 credits of Electives		12
Select three courses, with at least one in each area:		9
Cognitive Area:		
NACS642	Cognitive Neuroscience	
NACS645	Cognitive Science	
Neuroscience Area:		
NACS641	Introduction to Neurosciences	
NACS643	Computational Neuroscience	
NACS644	Cellular and Molecular Neuroscience	
Thesis or Non-Thesis Requirements		**6**
Thesis:		
NACS799	Master's Thesis Research	
Non-Thesis:		
NACS798	Master's Non-Thesis Research	
Total Credits		**31**

Neuroscience and Cognitive Science, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 37 credits, including 12 credits of NACS899. Specific course requirements include two core courses--a scientific ethics course and a foundational readings course--and three out of five core courses from among introduction to neuroscience, cognitive neuroscience, computational neuroscience, cellular and molecular neuroscience, and cognitive science. Non-course requirements include completing a First Year Research Project, pass the Qualifying Exam, submit a Dissertation Proposal, and pass the Ph.D. Defense.

A qualifying examination is given at the beginning of the third year to ensure that all students have a core knowledge of basic neuroscience

and cognitive science and know how to apply it to their own research area, and that each student has the knowledge and skills necessary to develop a dissertation proposal.

Effective Spring 2021: Students are admitted to candidacy upon passing the Qualifying Exam. By the end of their fourth year, students formally present their dissertation proposal. The dissertation is normally completed within one year of the proposal defense, and within five years of entering the program.

Nonprofit Management and Leadership (Z116)

Graduate Certificate Program
College: Public Policy

Abstract

The Nonprofit Management and Leadership Certificate is a four-course (twelve-credit) graduate certificate program that is designed to provide invaluable skills and experiences to enable students to delve deeply into the complex challenges facing nonprofit leaders. The certificate will equip students to be able to formulate innovative strategies, negotiate the complexities of global philanthropy and NGO leadership, develop entrepreneurial skills, engage in major international issues in the developing world, employ their skills to advance the work of nonprofit organizations, and make a significant difference around the globe.

Nutrition and Food Science (NUTR/FDSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Graduate Program in Nutrition and Food Science is an interdisciplinary and interdepartmental program administered by the Department of Nutrition and Food Science (NFSC). The program draws upon faculty and scientists from numerous schools, departments, and organizations. These include the Departments of Animal and Avian Sciences, Anthropology, Cell Biology and Molecular Genetics, Chemistry and Biochemistry, Nutrition and Food Science, and Plant Science and Landscape Architecture; the School of Public Health; and nearby research institutions. The Director of the Graduate Program in Nutrition and Food Science is selected from amongst faculty to administer the program.

The program offers graduate study leading to the Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) degrees in Nutrition and Food Science with specialization in either Nutrition or Food Science. All programs require completion of a research project (thesis or dissertation). Programs of research are individually planned with the student, an advisor and an appropriate Graduate Advisory Committee. Research interests of faculty members specializing in Nutrition include the genetic and metabolic basis for dietary requirements of animals and humans, nutritional biochemistry, nutritional aspects of chronic disease, international nutrition, community nutrition, epidemiology, neuroscience, health behavior and health promotion. Research interests of faculty members specializing in Food Science include food chemistry, food processing and engineering, food microbiology, food safety, food nanotechnology, food toxicology, public policy, risk assessment and functional and nutraceutical foods.

Financial Assistance

Financial support for graduate students is available on a competitive basis. The Department of Nutrition and Food Science offers a number of graduate teaching assistantships that support students in the program. A limited number of research assistantships are also available. Applications for teaching assistantships for the fall semester are due around mid-February for continuing students. New students who are interested in a teaching position should contact their advisor for information. International students who wish to be considered for a teaching assistantship and are not native speakers of English are required by the university to take part in the International Teaching Assistant (ITA) evaluation prior to the start of classes. This includes taking the Test of Spoken English (TSE) and submitting official test scores. International teaching assistants who may have been educated entirely in English and those with a bachelor's and/or master's degree from universities in English-speaking countries must also be evaluated. Decisions regarding teaching assistantships are usually reached by April 1. Graduate teaching assistants receive a stipend plus health insurance. Tuition fees (up to 10 credits per semester) for teaching assistants are waived by the university. Programs in Biochemistry, Chemistry, and Cellular Biology and Molecular Genetics, administered in the corresponding departments, also offer teaching assistantships to qualified students in the Graduate Program in Nutrition and Food Science. Students are encouraged to submit teaching assistantship applications to those programs. A limited number of research assistantships are available from grant funds, with the student assisting in the research supported under the grant. The research often may be applicable to the thesis or dissertation. The tuition for graduate research assistants is charged at the in-state rate and often is paid directly by the supporting grant. In addition, research assistants receive health insurance. Research assistantships generally are not awarded until after students have attended classes and are known to faculty. Additional types of financial aid are available, including a work-study program, grants, fellowships and loans. For more information regarding financial support, please refer to the Graduate School website at www.gradschool.umd.edu (http://www.gradschool.umd.edu).

- Nutrition and Food Science, Master of Science (M.S.) (p. 320)

Facilities and Special Resources

The Graduate Program office is housed within the Department of Nutrition and Food Science in Room 0112 in the Skinner Building.

Program facilities are located in the Departments of Nutrition and Food Science, Animal and Avian Sciences, Anthropology, Cell Biology and Molecular Genetics, Chemistry and Biochemistry, and Plant Science and Landscape Architecture. There are also collaborative arrangements with the National Institutes of Health (NIH), Food and Drug Administration (FDA), and U.S. Department of Agriculture (USDA). Additionally, opportunities exist for collaborative research with scientists at the FDA through the Joint Institute for Food Safety and Applied Nutrition.

Library facilities and resources are extensive. In addition to campus libraries, the National Archives, the National Agricultural Library, the Library of Congress, and the National Library of Medicine are all within 10 miles of campus and are available to students.

Nutrition and Food Science, Master of Science (M.S.)

Thesis only: 30 credits

Requirements for the M.S. degree in Nutrition and Food Science are a minimum of 30 graduate credits of course work including a minimum of 12 credits of 600 level courses and a minimum of 6 graduate credits of masters thesis research (NFSC799). A minimum GPA of 3.0 is required to maintain good academic progress for graduation. The student must complete a thesis and successfully defend their research before a graduate faculty advisory committee approved by the Graduate School. An average duration of a Master's project is 2-3 years depending upon prior education and experience.

Nutrition and Food Science, Doctor of Philosophy (Ph.D.)

Requirements for the Ph.D. degree in Nutrition and Food Science include a mastery of the broad fundamentals of area of specialty, as well as the demonstrated ability to conduct independent research. Course requirements include: a minimum of 27 graduate credits of coursework including 9 credits of advanced nutrition/food science courses, beyond the M.S. degree and 12 credits of NFSC899. A minimum GPA of 3.0 is required to maintain good academic progress for graduation. The average duration of a Ph.D. degree program is 4-5 years, depending upon prior education and experience.

Advance to Candidacy: In addition to course requirements, students are admitted to full candidacy for the Ph.D. upon passing a comprehensive exam on core knowledge of nutrition/food science and submitting and presenting a research proposal.

Post-Candidacy: The student must complete at least 12 credits of NFSC899 Doctoral Dissertation Research as well as successfully defend an original dissertation before their graduate faculty advisory committee.

Organic and Sustainable Agriculture (Z090)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Graduate Certificate in Organic and Sustainable Agriculture (GC-OSA) is a 12-credit graduate program that can be completed in twelve months of continuous study. The GC-OSA focuses on sustainability through examining both the ecosystem services provided by beneficial insects, as well as the management of injurious insects. Ecological functions of insects in the natural and anthropogenic landscape is illustrated and discussed. The program includes the development of a list of sustainable practices for conserving and managing insects in the landscape. Students learn pest management options that do not require the use of synthetic chemical pesticides and focuses on organic alternative.

Performance (MFAP)

Graduate Degree Program
College: Arts and Humanities

Abstract

The three-year M.F.A. in Performance will offer admission once every three years to experienced performers. This unique world-class graduate program offers an array of studies and opportunities designed to explore the broad spectrum of American and International performance traditions while laying the foundation for individual ground-breaking approaches to personalized expression and teaching skills. We are looking for motivated visionaries with unique voices who would appreciate a performance-based graduate program designed to guide and support them on their journey from idea to revelation, from exploration to ownership. Currently the M.F.A. in Performance program is not accepting applications.

Financial Assistance

The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The

Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Performance, Master of Fine Arts (M.F.A.)

M.F.A. in Performance applicants must provide CV; One page statement of goals in relation to your creative and research interests; teaching resume; video of introduction and creative work; and three letters of recommendation from professional directors, teachers or artistic collaborators. Callbacks are held in February.

The MFA in Performance is currently on hiatus. Please contact the School of Theatre, Dance, and Performance Studies regarding future recruitment.

Philosophy (PHIL)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Department of Philosophy offers graduate study leading to the Master of Arts and Doctor of Philosophy degrees with emphasis on contemporary Anglo-American philosophy and the interaction of philosophy with other disciplines. Students often enter the doctorate program without an M.A. degree, but the M.A. may be earned on the way to the Ph.D. While the Ph.D. program is suitable primarily for students who wish to enter a career in teaching and research at the college or university level, the M.A. program is appropriate for those who want to deepen and expand the knowledge they gained as undergraduates or who wish to develop competence in philosophy to apply to some other professional field.

Financial Assistance

The Department administers a number of graduate assistantships and fellowships. Virtually all applicants admitted to the doctoral program are offered support, typically a combination of teaching assistantships and fellowships.

- Philosophy, Doctor of Philosophy (Ph.D.) (p. 323)
- Philosophy, Master of Arts (M.A.) (p. 323)

Facilities and Special Resources

A number of other departments and programs at the University offer graduate students additional opportunities for coursework and research.

In addition to the excellent libraries on campus, students may use other libraries in the Washington/Baltimore metropolitan area, such as the Library of Congress, the Center for Hellenic Studies, and the Eisenhower Library on the campus of Johns Hopkins University.

The Department sponsors a series of colloquia by visiting and local speakers throughout the academic year.

Philosophy, Master of Arts (M.A.)

Non-thesis only: 30 credits required

Students must complete ten three-hour courses, or a total of thirty hours of course work. Two of these courses must be Core Courses, the remaining eight graduate seminars offered by the Department. Additional details may be found in the Graduate Handbook on the Department's www site: http://www.philosophy.umd.edu.

Course	Title	Credits

PHIL660	Metaphysics, Mind, and Language	3
PHIL640	Value Theory	3
Select remainder of coursework		24
Fulfill a Logic Requirement		
Complete a Scholarly paper		
Total Credits		**30**

Philosophy, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 36 credits in addition to 12 credits of PHIL899. Students are also required to complete a History requirement and a Logic requirement which does not count towards the total course or credit total. For the Prospectus Requirement, students must form a Prospectus Examining Committee, write a Dissertation Prospectus, and have the Prospectus approved by the Prospectus Examining Committee at a formal Prospectus Meeting. In addition all students who have completed the coursework component of the program are required to audit at least one course in each semester thereafter.

Students who seek admission to the Ph.D. program normally should intend to pursue only full-time study toward that degree.

In addition to the Graduate School requirements, students must complete twelve three-hour courses, or a total of thirty-six hours of course work. Two of these courses must be Core Courses, the remaining ten graduate seminars offered by the Department. Additional details may be found in the Graduate Handbook on the Department's www site. Foreign language skills are required only as demanded by the individual student's research.

Partial credit toward the Ph.D. requirements may be awarded for relevant work done at other graduate institutions. The Director of Graduate Studies will make a specific determination in each case.

Physical Activity (PHAC)

Graduate Degree Program
College: Public Health

Abstract

The Master of Public Health (MPH) degree with a concentration in Physical Activity is a 45-credit professional degree, administered by the Department of Kinesiology. All MPH students with a concentration in Physical Activity will complete five public health core courses, eight courses in the physical activity and related cognate area, an internship, and a capstone project.

Contact

Shannon Jette
Graduate Director
Department of Kinesiology
2363 School of Public Health Building

4200 Valley Drive
University of Maryland
College Park, MD 20742
Telephone: 301.405.2497
Email: jette@umd.edu

Website: http://www.sph.umd.edu
Courses: KNES (p. 900)

Admissions

The MPH in Physical Activity program has a two-step application process. Applicants first submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health (Step 1). Once the SOPHAS application has been verified applicants will submit their UMD Supplemental application (Step 2). Applicants will receive an email from the SPH Admissions team with instructions for how to complete the UMD Supplemental Application. Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application (Step 1) & UMD Supplemental application (Step 2)
- Three letters of recommendation
- Resume or curriculum vitae
- Official GRE Test Score submission is not required. GRE scores won't be reviewed.
- Applicants being considered for the program may be invited for a virtual interview via Zoom.

For detailed instructions on how to submit your application, please visit the School of Public Health Website: (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/))

Requirements

- Physical Activity, Master of Public Health (M.P.H.) (p. 324)

Facilities and Special Resources

The Department of Kinesiology has three areas of specialization: Cognitive Motor Neuroscience, Exercise Physiology, and Physical Cultural Studies. Laboratories are maintained, which support original investigations in each of the three areas. Laboratories include equipment for measuring metabolic parameters, strength, body composition, postural sway, ground reaction forces, amount of physical activity in daily life, as well as muscle biopsies and movement analysis. The response of the human body to physical activity/exercise can be viewed through ECG, EEG, EMG and systematic behavior observation systems. Each of the three research areas has interfaced computer hardware and software to support data collection and analysis. Collaborations with the School of Medicine at the Baltimore campus and with NIH often result in the availability of other facilities and equipment. All graduate students have access to computers and other forms of technology. Details and pictures of current facilities and equipment are available at our website: www.sph.umd.edu/KNES/ (http://www.sph.umd.edu/KNES/).

Physical Activity, Master of Public Health (M.P.H.)

Non-thesis only (capstone project required): 45 credits

The Master of Public Health (MPH) degree with a concentration in Physical Activity is a 45-credit professional degree, administered by the Department of Kinesiology.

Course	Title	Credits
Required courses:		
SPHL601	Core Concepts in Public Health	1
SPHL602	Foundations of Epidemiology and Biostatistics	4
SPHL603	Public Health Data Laboratory	1
SPHL610	Program and Policy Planning, Implementation, and Evaluation	5
SPHL611	Public Health Ethics	1
SPHL620	Leadership, Teams, and Coalitions: Policy to Advocacy	2
KNES600	Kinesiology in Public Health	3
KNES601	Epidemiology of Physical Activity	3
KNES602	Physical Activity Program Planning and Evaluation	3

Research Methods course:		3
EPIB710	Grantsmanship for Epidemiologic Research	
or FMSC780	Qualitative Methods in Family and Health Research	
or HLTH625	Community Assessment through Qualitative Methods	
or HLTH710	Methods and Techniques of Research	
or KNES610	Methods and Techniques of Research	
Electives		12
KNES778	Internship in Physical Activity and Public Health	4
KNES786	Capstone Project in Physical Activity and Public Health	3
Total Credits		**45**

Physics (PHYS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

Abstract

A fuller picture of the Department of Physics can be found on the department's home page, http://umdphysics.umd.edu; only a summary is provided here. The Department of Physics offers graduate courses on general and specialized topics in advanced physics, and has active research programs in many areas of current interest. The various research groups can be browsed at http://umdphysics.umd.edu/research/research-areas.html.

Financial Assistance

The Department offers both teaching and research assistantships. Combined with fellowships in some cases, virtually all Ph.D. students have full financial support for the duration of their graduate studies. In a typical semester, approximately 50 teaching assistants and 160 research assistants work in the Department, while some others are supported by nearby government and industry facilities at which they are doing their research. Summer research stipends for advanced graduate students are customary, and a few summer teaching assistantships are available.

- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationphys1.pdf)

The University of Maryland Department of Physics has a strong national and international reputation, and receives a large number of applications each year from well-qualified students. Consequently, admission to the graduate degree program is quite selective.

Students who enter the graduate program are normally expected to have strong backgrounds in physics, including intermediate-level courses in mechanics, electricity and magnetism, physical optics, quantum physics, and thermodynamics. Prior research experience and strong letters of recommendation are highly valued. Good preparation in mathematics is also desirable, especially for students who may pursue theoretical physics research.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 9, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	December 9, 2022

RESOURCES AND LINKS:

Program Website: http://www.umdphysics.umd.edu
Application Process: https://gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Physics, Doctor of Philosophy (Ph.D.) (p. 326)
- Physics, Master of Science (M.S.) (p. 326)

Facilities and Special Resources

Current research in the Department spans an immense range of theoretical and experimental work on the forefront of knowledge, far too large to describe here. Details of current research in the various fields, faculty, and facilities involved can be found at the Departmental web site, http://umdphysics.umd.edu.

There are close academic ties with the Institute for Physical Science and Technology on the campus; members of the Institute supervise graduate research and also teach physics courses. Faculty members in the departments of Astronomy and Electrical & Computer Engineering also frequently direct thesis research.

The University of Maryland is located within the metropolitan area of Washington, D.C., where it enjoys the proximity of a large number of

outstanding institutions, such as NASA's Goddard Space Flight Center, the Naval Research Laboratory, the National Institute of Standards and Technology, the Johns Hopkins Applied Physics Laboratory, the Department of Energy, the National Institutes of Health, the Library of Congress, and other federal institutions. The Department works closely with certain research groups at some of these institutions, and a significant fraction of graduate students do their primary research at off-campus facilities, co-directed by a member of the graduate faculty in the Department. In order to facilitate graduate study in the Washington area, the Department of Physics also has adjunct professors from certain government laboratories.

Physics, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly report): 30 credits

The Department offers both thesis and non-thesis options in its Master of Science program. However, virtually all physics graduate students are admitted directly to the Ph.D. program, and may, if they choose, obtain a Master's naturally in the course of their Ph.D. studies. A student interested instead in a terminal Master's degree should consult with the Physics Department. The Departmental requirements for the non-thesis option include: a total of 30 credits excluding research credits; four courses covering core graduate-level physics (this requirement may be waived based on a student's performance on the Ph.D. qualifying exam); a paper as evidence of ability to organize and present a written scholarly report on contemporary research. The thesis option replaces the scholarly paper requirement with the writing of a thesis and the passing of an oral examination in defense of the thesis.

Course	Title	Credits
Core Requirements		**30**
Four courses covering core graduate-level physics [1]		
Thesis or Non-Thesis Option		
Thesis:		
PHYS799	Master's Thesis Research	
Pass an oral examination		
Non-Thesis:		
Complete a scholarly report		
Total Credits		**30**

[1] This requirement may be waived based on a student's performance on Ph.D. qualifying exam.

Physics, Doctor of Philosophy (Ph.D.)

The requirements for the Doctor of Philosophy degree in physics are set in general terms to allow the individual student as much freedom as possible to prepare a course of study suited to individual needs. These requirements are: competence in standard topics of graduate-level physics indicated by a satisfactory performance on a qualifying examination—the qualifying exam requirement may be waived by the Department if competence in these topics is demonstrated through performance in courses covering core graduate physics topics; the giving of an oral Preliminary Research Presentation demonstrating the ability to organize and orally present a topic of current research interest in physics; a paper showing the student's ability to organize and present a written scholarly report on contemporary research prior to candidacy; advanced course study consisting of at least three courses at the 600-level or above (of at least 3 credits each) excluding courses covering core graduate physics subjects, seminar courses or independent studies; active participation in at least two hours of seminar, 12 hours of thesis research, and the presentation and defense of an original dissertation.

Course	Title	Credits
Any three graduate-level courses of three credits or more excluding seminars, independent study courses, or courses on core graduate-level physics subjects		
Non-credit Foundations and Frontiers of Physics seminar		
Select two semesters of a physics seminar course		
Pass the qualifying exam or have this exam requirement wavied on the basis of performance in course work		
Give a Preliminary Research presentation after passing the qualifying exam		
Submit a scholarly paper		
Dissertation Research Requirements		
PHYS899	Doctoral Dissertation Research	12
Total Credits		**12**

Plant Science (PLSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Plant Science (PLSC) graduate program is a diverse and dynamic program that prepares graduates for careers that address issues facing modern-day society. The program offers training in diverse concentrations that include Agronomy, Cell Biology, Functional Genomics, Molecular Physiology, Conservation Biology and Ecology, Pathology, Food Safety and Quality, and Landscape Ecosystems Management. Students are trained and mentored by graduate faculty that focus on interdisciplinary education, mastery and application to their chosen area of study. All PLSC graduate training is thesis-based, and an emphasis is placed on research, discovery learning and critical thinking, rather than coursework. Students work directly with internationally-recognized graduate faculty who are leaders in their disciplines. Students are guided in their studies by a major professor as well as a graduate advisory committee selected by the student from experts on campus, at nearby research institutions, and at other universities. The program offers Master of Science and Doctor of Philosophy degrees. The goal of the Plant Science graduate program is to (1) provide students with the skills in analyzing and interpreting quantitative and qualitative information; using inductive and deductive reasoning; and communicating in both verbal and written form; (2) train the next generation of plant science researchers using cutting edge methodologies and approaches to lead public and private efforts to provide a secure, safe and nutritious food and fiber supply, maintain and restore ecosystems, combat the challenges of climate change on our food and fiber supply, and provide high quality plant science education; (3) advance knowledge in plant sciences that is critical to the improvement of the efficiency, profitability and sustainability of global and national agricultural and natural resources. The Plant Science graduate program seeks to maximize the close association of the many national laboratories (USDA, FDA, NASA, NIST, NIH, DOE, etc.) through collaborations and cooperative agreements with the department and the University of Maryland. As a result, graduates of the program are particularly well trained for employment in public and private sector research and leadership positions.

Financial Assistance

A limited number of research assistantships and teaching assistantships are available for qualified applicants. There is strong competition for these awards, and candidates are encouraged to submit their applications as early as possible in the semester preceding anticipated enrollment in the Department.

Requirements

- Plant Science, Doctor of Philosophy (Ph.D.) (p. 328)
- Plant Science, Master of Science (M.S.) (p. 328)

Facilities and Special Resources

Department facilities for conducting research in plant science are located at the College Park campus in the Plant Science Building and Research Greenhouse Complex. Modern laboratories are equipped for genomic, molecular genetic, cell biological, physiological, microbiological and biochemical research in plant science. Equipment and expertise for next generation sequencing, life science imaging, bioinformatics, genomics, proteomics, and metabolomics are available either in the department or on campus. Extensive controlled-environment facilities, including growth chambers and a large and modern greenhouse complex are complemented by a large network of field research facilities located strategically across the state representing various environments with different climates and soil types. Students have access to computer labs and shared processing arrays and a comprehensive computer center

located on campus. The University Libraries on campus and both the National Agriculture Library and Library of Congress located nearby make the library resources accessible to students among the best in the nation. Many of the Department's projects are conducted in cooperation with other departments on campus and with professionals at the Food and Drug Administration facility near the campus and the headquarters of the USDA Agricultural Research Service located three miles from campus in Beltsville. Scientists at the Geologic Survey, the National Academy of Sciences, NASA, National Institutes of Health, Department of Energy, Smithsonian, and National Park Service, as well as other agencies, have cooperated with the Department's faculty on various projects. Scientists from some of these agencies have adjunct appointments in the Department, have taught special courses at the University, and participate on graduate committees.

Plant Science, Master of Science (M.S.)

Thesis only: 30 credits

A program of study approved by the Advisor must be completed prior to the second semester of enrollment. This plan must be filed with the Graduate Director. The program requires a minimum of 30 semester hours of course work beyond the B.S. degree, including 6 hours of thesis research credits (799). A minimum of 12 credit hours must be earned in course-work at the 600 level or higher. Students are also required to complete one semester hour of PLSC618 and one semester hour of PLSC619. Students must also complete one semester each of 400-level (or higher) biochemistry, plant physiology, and statistics which may be completed as part of a B.S. or M.S. degree program.

A thesis must be submitted to the Graduate School. This thesis is approved by the Thesis Examining Committee appointed by the Dean of the Graduate School upon the recommendation of the student's advisor. The advisor serves as the chairperson of the examining committee and the student's advisory committee typically serves as members of the examining committee. Committee membership must comply with Graduate School requirements for membership. The submitted thesis must comply with the University of Maryland Thesis and Dissertation Style Guide.

It is the responsibility of the Advisor and Student to ensure that all University Research Assurances are followed. Research involving human subjects must be approved in advance by the Institutional Review Board (IRB). Research involving the use of vertebrate animals must be approved in advance by the Animal Care and Use Committee. Research using hazardous materials (chemical or biological), recombinant RNA/DNA must be approved in advance by the appropriate University committee

Course	Title	Credits
Core Requirements		
PLSC608	Research Methods	2
PLSC618	Advances in Research; Critiquing Primary Plant Science Literature	1
PLSC619	Seminars in Plant Science and Landscape Architecture	1
PLSC799	Master's Thesis Research	6
Additional coursework		20
Total Credits		**30**

Plant Science, Doctor of Philosophy (Ph.D.)

A program of study approved by the Advisor must be completed by the end of the third semester of enrollment. This plan must be filed with the Graduate Director. The Graduate School requires that every student seeking the Ph.D. satisfactorily complete a minimum of 12 semester hours of dissertation credits (899). Students are also required to complete one semester hour of PLSC618 and one semester hour of PLSC619. Students are also required to complete 2 semester hours of PLSC608. In addition students admitted to the PhD program that lack the MS degree must complete the course requirements of the MS degree (24 credit hours of coursework). Students must also complete one semester each of 400-level (or higher) biochemistry, plant physiology, and statistics which may be completed as part of a B.S. or M.S. degree program and an additional graduate level course in biochemistry or statistics.

An oral qualifying examination must be completed satisfactorily before a student is admitted to candidacy. At the discretion of the advisor and advisory/examining committee a written exam may also be conducted. The examination must be attempted by the end of the fifth semester of study. Under extenuating circumstances and with written permission of the Program Director, this time frame may be extended. The examining committee corresponds to the student's Advisory committee. To be eligible to take the candidacy examination, the student must have submitted a research proposal that has been approved by the student's advisor and Advisory Committee prior to the formal qualifying examination. The completed proposal must be given to the committee at least two weeks before the scheduled date for the qualifying examination. The qualifying examination focuses principally on the written proposal. However, the student's mastery of general knowledge of Plant Science may also be examined. At the end of the examination, all members of the committee vote on the student's performance. Two negative votes constitute failure. Upon successful completion of the examination, the committee recommends to the Director that the student by admitted to candidacy based on satisfactory performance during the examination. It is the responsibility of the student to submit an application for admission to candidacy when all the requirements for candidacy have been fulfilled. Students failing the qualifying examination may be re-examined once within 6 months of the first examination date. Students may be re-examined only once. Failure to pass the qualifying examination a second time will result in termination of the student's program.

A dissertation based on independent, original research must be submitted to the Program and the Graduate School. This dissertation is approved by the Dissertation Examining Committee appointed by the Dean of the Graduate School upon the recommendation of the student's advisor. The advisor serves as the chairperson of the examining committee and the student's advisory committee typically serves as members of the examining committee. Committee membership must comply with Graduate School requirements for membership. The submitted dissertation must comply with the University of Maryland Thesis and Dissertation Style Guide.

It is the responsibility of the Advisor and Student to ensure that all University Research Assurances are followed. Research involving human subjects must be approved in advance by the Institutional Review Board (IRB). Research involving the use of vertebrate animals must be approved in advance by the Animal Care and Use Committee. Research using hazardous materials (chemical or biological), recombinant RNA/DNA must be approved in advance by the appropriate University committee

Policy Studies (POSI)

Graduate Degree Program
College: Public Policy

Abstract

The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, international development, international security and economic policy, social policy, non-profit management, public management and leadership, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research. The Ph.D. program trains policy analysts who will make their marks in the practice and teaching of public policy. To this end, a limited number of applicants are admitted annually. In their first year, students develop and demonstrate proficiency in economic, normative, political, and quantitative analysis. They then pursue advanced study within their chosen specialization. Finally, they complete and defend a doctoral dissertation. Those awarded the degree move on to public policy careers in government, research, academia, and the private sector.

Financial Assistance

The School has financial aid available in the form of fellowships, graduate assistantships, and employment. All qualified applicants meeting appropriate deadlines are considered.

Requirements

- Policy Studies, Doctor of Philosophy (Ph.D.) (p. 330)

Policy Studies, Doctor of Philosophy (Ph.D.)

All students are required to choose an advisor within their first year.

The Ph.D. in Policy Studies program enables students to develop in-depth knowledge of the field and to conduct cutting-edge research on public policy and management issues. Students are required to complete at least 24 credits of appropriate coursework, including two required research methods courses. In addition, students must take 12 credits of dissertation research. Students are required to pass exams in the basic disciplines of public policy and two field exams, usually with both a written and oral component, in broad topics relevant to their proposed thesis topics. They then develop and defend a dissertation prospectus followed by the dissertation itself.

The Ph.D. in Policy Studies is principally directed at students who have a master's degree in public policy or a related field, such as economics, statistics, education or international relations, from a program comparable in quality and content to one of the School's own master's programs. Students may apply while in the final year of such a program. Applications will also be considered from recent college graduates without a master's degree who have an outstanding academic record.

Most students will be required to maintain full-time status through completion of the course work leading up to their exams and thesis proposal; this typically requires two to three years. Some students will be admitted on a part-time basis with an agreed schedule to ensure timely completion. A faculty member at the School must agree to serve as the Ph.D. applicant's academic sponsor at the time of admission into the program. To facilitate the selection of a sponsor, applicants should include, as part of their application, a description of the general areas in which they want to study and write their dissertation.

Population Studies (Z036)

Graduate Certificate Program
College: Behavioral and Social Sciences

Abstract

The Certificate Program in Population Studies provides interdisciplinary training in demographic methods, theory, and research for graduate students in departments affiliated with the Maryland Population Research Center (MPRC), culminating in a Certificate in Population Studies for graduate students who complete the required coursework. Historically, the Population Sciences were born out of the discipline of Demography, a field that boomed during the 1950s around fears of a world-wide population explosion and its consequences. Demography was taught largely within departments of Sociology. Today the field has changed a great deal and researchers worry about issues of low fertility and underpopulation as much as overpopulation. What demographers of the 1950s missed in their dire predictions were unprecedented behavioral changes of families to changing economic circumstances, changing social pressures, and changing ideas of what constituted a family. Today, the core of the population sciences is not forecasting population growth and its components (mortality, fertility and immigration) but instead understanding what economic, social, and ideational factors affect these components and how changing mortality, fertility, and immigration may affect other family choices. With the growing emphasis on choice and on the consequences of population change, and with the shift from being a field focusing on forecasting to one focusing on understanding causal relationships, training across several fields of study has become necessary.

Requirements

- Population Studies, Post-Baccalaureate Certificate (P.B.C.) (p. 331)

Facilities and Special Resources

The Maryland Population Research Center (MPRC) is a multidisciplinary center dedicated to the support and advancement of population research. We provide a research environment conducive to interdisciplinary collaboration among our diverse Faculty Associates and to the development of young scholars through cross-disciplinary training and mentoring. Our proximity to Washington DC allows us to develop strong relationships with the U.S. federal statistical agencies and with policy communities. These ties provide our researchers access to under-utilized or restricted-use government data, allow them to partner with agencies on research and data improvement projects, and allow them to provide policy makers with non-partisan, scientific evidence on population-related issues. MPRC provides work and collaboration spaces, computers loaded with specialized software for statistical analysis, SAS, Stata, and other training courses, and administrative and financial support for associated graduate students.

Population Studies, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

The Certificate requires a minimum of four courses (12 credits) including two required core courses and two electives. At least one course taken for the Certificate must be from a department other than the student's home unit. (See the Certificate information page on the MPRC website (http://www.popcenter.umd.edu/resources/scholar-dev/demography-cert/certificate/) for details.) Students must achieve a GPA of 3.0 or higher in these four courses. Previously earned credits may be retroactively applied toward the Certificate. Students may apply to participate in the Certificate Program at any time up until the semester before they intend to graduate. Applications may be accessed by following the link above.

Project Management (online) (MEPM)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our high quality, challenging project management degree programs encompass technical expertise, behavioral competence, and strategic awareness. Courses are taught not only by esteemed faculty but also by industry experts. As the first project management program in an engineering school to be accredited by the Project Management Institute's Global Accreditation Center, the University of Maryland empowers students to put high-demand project management methods into everyday practice.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose (https://advancedengineering.umd.edu/application-process/)
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Psychology (PSYC)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

Psychology is a remarkably broad field that studies mind and behavior at all levels of analysis ranging from the micro to the macro; from single cells to complex systems; from individuals to groups and cultures; and from invertebrates to humans. Some of these endeavors connect with the biological sciences and others with the social sciences. As analytical, methodological, and theoretical advances in one domain increasingly influence developments in another, psychologists collaborate in ever greater numbers with scientists in neighboring disciplines, resulting in new subfields that blend the biological and social sciences.

Our department reflects well this combined diversity of and collaborations among approaches. In recognition of this fact, we organized our training structure into 5 Ph.D. Specialty Areas:

- Clinical (CLIN)
- Cognitive and Neural Systems (CNS)
- Counseling (COUN)
- Developmental (DEV)
- Social, Decision, and Organizational Science (SDOS)

Research collaborations across areas are common and we encourage students to consider training across areas as well. The Department's doctoral programs in both Clinical and Counseling Psychology have been approved by the American Psychological Association. School Psychology, also an APA approved program, is offered in the College of Education.

Financial Assistance

The Department attempts to provide financial aid for all incoming students, although aid is not guaranteed. The different possible types of financial support include fellowships (nominated by the department), teaching assistantships, research assistantships, work on campus, and funded externships.

- Description of Research/Work Experience (optional)
- Writing Sample (optional)

The Department accepts only those applicants who have demonstrated competence for completing the requirements of the doctoral degree. The typical student admitted to the graduate program has an overall undergraduate grade point average of 3.5 or above, a psychology grade point average over 3.5, GRE scores of 155 and above for Verbal and 147 and above for Quantitative, appropriate background experiences, outstanding letters of recommendation, research experience and/or previous relevant work experience, and goals congruent with the program. The Department of Psychology encourages applications from members of racial/ethnic minority groups.

Students admitted to the graduate program often earn the M.S. en route to the Ph.D., however, this varies across specialty areas and the specific requirements within a given specialty area should be consulted. All students must be full-time until completion of all requirements of the doctoral program other than the dissertation has been met.

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Psychology, Doctor of Philosophy (Ph.D.) (p. 337)
- Psychology, Master of Science (M.S.) (p. 337)

Facilities and Special Resources

The Department of Psychology shares a building with the Biology Department and is centrally situated on campus near three libraries and the student union. The Department has state-of-the-art laboratories, computer facilities, and video equipment. The geographic location in a suburb of Washington, D.C. provides access to a wide variety of laboratory and training facilities in governmental and other agencies. In addition, we are near the national headquarters for The American Psychological Association and Association for Psychological Science.

The Department follows all regulations involved in the use of human subjects and animals.

Psychology, Master of Science (M.S.)

The department does not offer a terminal M.S. Rather, students admitted to the graduate program often earn the M.S. en route to the Ph.D.

Public Administration (MPPA)

Graduate Degree Program
College: Public Policy

Abstract

The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

- Public Administration, Master of Professional Studies (M.P.S.) (p. 338)

Public Administration, Master of Professional Studies (M.P.S.)

Non-thesis only: 36 credits required

The Master's of Professional Studies in Public Administration (MPPA) program provides an in-depth education for students seeking professional careers in public administration. The MPPA requires the completion of 36 credit hours in various aspects of public administration and policy. The program can be completed in either 16 months or 21 months. It is particularly appropriate for international students and uses numerous examples and case studies from around the world. It is cohort-based, with all students in a cohort taking the same courses. Please check the School's website to find out when the next cohort is expected to be formed.

Between the first and second year, and/or during the academic year, most students engage in internships in international, federal, state or

local government agencies, non-profit organizations, or private firms that are engaged in public administration. In addition to offering practical experiences and the opportunity to further develop skills acquired during the first year, these internships provide students with contacts and relationships useful for future projects and job placement.

Public Health Practice and Policy (PHPP)

Graduate Degree Program
College: Public Health

Abstract

Healthcare is the largest industry in the U.S. and employs over 11 million workers. 21st century health care professionals require cutting-edge knowledge and exemplary leadership skills to enable their organizations to rise to societal, technological, ethical, financial, and public health challenges. To meet the growing demand for skilled health care professionals, the Department of Health Services Administration, School of Public Health, at the University of Maryland offers an exceptional professional learning opportunity in Public Health Practice. The Master of Public Health in Public Health Practice and Policy (MPH-PHPP) is designed to provide working professionals with the broad range of knowledge and skill-based competencies needed to assume leadership roles in addressing important public health practice and policy issues nationally and globally. The program offer courses in the fall and spring semester (16 weeks each) and Summer Term (two 6-week sessions). The curriculum and degree has the same content, quality, and high standards as the University's traditional on-site curriculum and reflects the broad range of knowledge and skill-based competencies germane to public health practice in the 21st century. Instruction is delivered by School of Public Health faculty and experts from prominent public health organizations. The School of Public Health is accredited by the Council on Education for Public Health.

Courses: SPHL (https://academiccatalog.umd.edu/graduate/courses/sphl/) HLSA (https://academiccatalog.umd.edu/graduate/courses/hlsa/)

Admissions

The **MPH in Public Health Practice and Policy** program has a two-part application process: applicants must submit the SOPHAS application (www.sophas.org (https://sophas.org/)), the centralized application service for schools and programs of public health, and the UMD Supplemental application (http://terpengage.force.com/community/CustomLoginPage/?GradApp=True). Applications will not be reviewed until both the SOPHAS and UMD Supplemental applications are completed.

GENERAL ADMISSION REQUIREMENTS

- A Bachelor's degree
- Minimum 3.0 undergraduate GPA
- At least one undergraduate math course
- Transcripts from all previous coursework
- English proficiency test score (TOEFL, IELTS or PTE) (international applicants (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))
- Statement of purpose and objectives including career and educational goals, professional experience, and areas of interest

PROGRAM SPECIFIC REQUIREMENTS

- SOPHAS application & UMD Supplemental application
- Three letters of recommendation
- Resume or curriculum vitae
- Fit between applicant's goals and expectations and program degree competencies
- GRE scores are **not required** for this program.

Note for applicants with foreign credentials:

- The SOPHAS application requires that applicants submit a WES credential evaluation (https://help.liaisonedu.com/SOPHAS_Applicant_Help_Center/Sending_Your_Official_Transcripts_and_Test_Scores_to_SOPHAS/Sending_Official_Transcripts_to_SOPHAS/2_Foreign_and_French-Canadian_Transcripts/).
- The UMD supplemental application requires the upload of unofficial transcripts issued in the original language with a literal English translation. Visit the Graduate School website for additional information (https://gradschool.umd.edu/admissions/international-admissions/)
- Evidence of English Language proficiency is required if the applicant does not hold a degree from a U.S. institution or from one of the English speaking countries listed on the Graduate School website

(https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/)

For detailed instructions on how to submit your application, please visit the School of Public Health Website: https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process (https://sph.umd.edu/admissions/graduate-admissions/graduate-application-process/).

Application Deadlines

Public Management (MAMG)

Graduate Degree Program
College: Public Policy

Abstract

The School of Public Policy is one of the nation's leading graduate programs devoted to the study of public policy, management and international affairs, with particular expertise in the fields of environmental policy, energy policy, international development, international security and economic policy, health policy, education policy, social policy, non-profit management, public management and leadership,acquisitions, and public finance. The School offers a wide variety of master's programs, joint degree programs, graduate certificate programs, and one of the nation's premier doctorate programs. The School's location just outside of Washington, D.C. attracts a stellar faculty of scholar-practitioners who are experts in the theory and practice of public policy and management and influential participants in the nation's policy-making process. The location and faculty in turn attract outstanding students by providing them, not only an in-depth, rich curriculum, but extensive exposure to and interaction with the real-life world of policy-making, the federal government, the international diplomatic community, state and local governments, and a host of non-governmental and multinational organizations. It is one of the few policy

schools to combine state, national and international policy study under one roof, and to take into account policy interests in all sectors of the economy, thus allowing both faculty and students to study the full range of issues in all courses and in all research.

Requirements

- Public Management, Master of Public Management (M.P.M.) (p. 342)

Public Management, Master of Public Management (M.P.M.)

Non-thesis only: 36 credits required

The Master of Public Management (MPM) policy track is a 36 credit degree program for professionals with at least 5 years of policy and management experience. The program is identical to the MPP program except that students take four fewer general electives and may substitute a policy or management elective for the capstone course required in the MPP program.

Courses are offered throughout the day, but it is sometimes possible to complete the program by taking only courses beginning no earlier than 4:15pm. Students usually finish the program in three years by taking two courses each fall and spring semester, but can finish in as many as five years, or as few as one year by taking four courses in the fall and spring semesters, 1 during the winter semester, and 3 during the summer semester.

Requirements

- Public Policy and Law, Master of Public Policy and Juris Doctorate (dual degree) (M.P.P. and J.D.) (p. 344)

Public Policy and Law, Master of Public Policy and Juris Doctorate (dual degree) (M.P.P. and J.D.)

Students are required to complete 114 total credits with 39 credits in Public Policy and 75 credits taken in Law.

The University of Maryland School of Law (located in Baltimore) and the School of Public Policy offer a dual program of studies leading to both the MPP and JD degrees, in less time (often four years) and at less cost than if the degrees were obtained separately. Because they can double-count 9 credits taken at each school towards the other school, students complete 75 (versus 84) credits at the law school and 39 (versus 48) credits in the policy school, thus saving 18 credits.

Candidates must separately apply to the dual degree program in both the law school and the policy school. If admitted by only one program, the student may enroll in that program.

For further discussion of admission and degree requirements, students may consult each school's website.

Requirements

- Public Policy, Master of Public Policy (M.P.P.) (p. 345)

Public Policy, Master of Public Policy (M.P.P.)

Non-thesis only: 48 credits required

Most MPP students take 4 courses per semester and finish the program in two years. Students may instead take 1-4 courses each semester and complete the degree in two-five years.

Between the first and second year, and/or during the academic year, most full-time students engage in internships in international, federal, state or local government agencies, non-profit organizations, or private firms that are engaged in the policy process. In addition to offering practical experiences and the opportunity to further develop skills acquired during the first year, these internships provide students with contacts and relationships useful for future projects and job placement.

About 150 students from a wide variety of undergraduate schools and majors, from all parts of the country, and from around the world enter the program each fall. The mean undergraduate grade point average of entering students is 3.6 and GRE scores average in the low to mid 600s.

Requirements

- Public Policy and Sustainable Development & Conservation Biology, Master of Public Policy and Master of Science (dual degree) (M.P.P. and M.S.) (p. 346)

Public Policy and Sustainable Development & Conservation Biology, Master of Public Policy and Master of Science (dual degree) (M.P.P. and M.S.)

As environmental problems become more scientifically and politically complex, employers and researchers in the environmental analysis and policy fields are increasingly looking to hire graduates who are well-grounded in the natural and life sciences, the workings of the public, private and non-government sectors, and the key policy analysis tools and concepts. The College of Computer, Mathematical and Natural Sciences and the School of Public Policy offer a dual program of studies leading to both the MPP and the Master of Science in Sustainable Development & Conservation Biology in less time and at less cost than if the degrees were obtained separately. Because they can double-count some credits taken in one program towards the other program, students complete a total of 60 credits in the dual program versus 48 in the policy school and 39 in the M.S. program, thus saving 27 credits. Otherwise the requirements of both degree programs must be met.

Candidates must separately apply to the dual degree program in both the M.S. program and the policy school. If admitted by only one program, the student may enroll in that program.

For further discussion of admission and degree requirements, students may consult each school's website.

Quantitative Finance (BMQF)

ABSTRACT

Maryland Smith's Master of Quantitative Finance program allows you to put your quantitative, technology and problem solving skills to full use as you guide companies toward making strategic financial decisions.

Gain access to cutting-edge analytics resources to refine your programming, data management and global investment skills. Advance your skills under the guidance of expert faculty and with a community of talented peers from diverse academic backgrounds. Solve complex finance challenges for real companies, participate in case competitions and network with major employers who hire our students.

Real Estate Development (RDEV)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The Graduate Program leading to a Master of Real Estate Development is based in the School of Architecture, Planning & Preservation, but it is NOT a design degree. It was the 6th program in the country to offer a comprehensive business based, but multi-disciplinary, approach to real estate development education. There are now more than 20 of these programs offered across the US that recognize that real estate development in its actual practice is multi-disciplinary and requires weighing the financing and investment options in conjunction with consideration of the construction, design, planning and asset management of real estate. In sum -- Real Estate Development -- is all of the above: Finance Plus!! And education for everyone who has an interest in the regulation, development, acquisition, financing or management of real estate will be more effective if they have completed a comprehensive degree about real estate, and not simply 2 or 3 courses about finance and valuation.

The 33-42 credit MRED program stresses a comprehensive approach to real estate development, broadly defined, and encompasses traditional real estate finance topics but goes on to address the full range of development issues--from property acquisition, to planning and permitting, contract and property law, investment and finance, design and construction, as well as marketing, commercial leasing, property, portfolio and asset management. The program aims to assure that graduates can effectively engage lenders, investors, architects, contractors, lawyers, accountants, and public officials as well as how to bring a project in on time with dynamic marketing and efficient property management thereafter.

The program uses three key teaching/learning approaches:

1. the traditional graduate reading and research mode,

2. the popular case study review and discussion method, and

3. the active learning, or practice method, engaging the professional development community as partners in class and in the field to enliven the concepts presented in the classroom.

All of the instructors for the program are active professionals in the real estate field. Graduates are not only provided foundational real estate knowledge, but are prepared to enter the real estate industry with important skills in business writing, presentation, leadership and negotiation as well as a keen awareness of the MRED Quadruple Bottom Line and ability to develop real estate properties that are: Economically Viable, Environmentally Respectful, Socially Responsible and Beautifully Designed.

The sequence of courses and number of semesters to complete the program can be tailored to the academic preparation and any work experience of each student. There is no requirement for work experience. Students may elect an:

Accelerated Path--12 months (for students with real estate education or extensive experience);
Full time Path--15-18 months (for students not working more than 10 hours a week); or
Part Time Path--24-60 months (for students working 20 hours or more a week).
The program admits up to 30 new students in each of the Fall (late August) and Spring (late January) terms. Students have up to 5 years to complete all their coursework, although the average time for part time students is 24 months, 18 months for full time students.

The program admits up to 30 new students in each of the Fall (late August) and Spring (late January) terms. Students have up to 5 years to complete all their coursework, although the average time for part time students is 24 months, 18 months for full time students.

All real estate (RDEV) courses are offered in the evenings on one night a week, with courses scheduled Mondays through Fridays in the Spring and Fall terms. Some courses are delivered in executive-style workshop format over long weekends. Limited courses are offered evenings in Summer and Winter on more intensive schedules. Electives in other programs may be scheduled late afternoon or on multiple days. Students may use one elective course to take a study abroad course offered by any of the programs in the School, provided the academic advisor verifies sufficient real estate content to the course. Additional reduced fee courses in desirable skills are periodically offered through the Colvin Institute, such as preparation for the LEED exams, ARGUS, Co-Star and REFM Financial Modeling.

While the program is quite flexible, there are some restrictions to consider. Students who are working full time are not permitted to take more than two courses in any one semester. Course offerings in the Winter and Summer term are very limited, and students may not enroll in more than one course in the Winter and two in the Summer. Scholarship funds are not available for Winter, Summer, and Study Abroad courses. Students desiring to follow the accelerated path (4 courses per term) need to request early advising and plan their course sequence carefully and may not be working even part time. Completion of the degree in 12 months is only guaranteed to be available for students starting in the Fall term and only for those who have real estate finance education or experience.

Financial Assistance

The Program provides scholarship funds to a number of qualified students, both part time and full time, each term. Scholarship determinations are made at the time of application and admission. Scholarships are awarded on a per course basis and commitments are made at the time of admission and apply to the entire program (other than Study Abroad, Summer and Winter courses), subject to academic performance.

The Colvin Institute offers a limited number of administrative positions to full-time MRED students. Contact the Program Director to apply.

Periodically there are named scholarships provided by various real estate organizations or development companies.

In addition, there are work opportunities both on, and off campus, and they are relatively plentiful. Students in the past have been successful in finding part time internships and full-time work with local real estate companies. The MRED student listserv posts openings periodically as they are brought to the attention of the Program by alumni, friends, faculty, and sponsors.

Applicants should inquire as to the availability of funding for the term they are starting. Scholarships are typically for a portion of tuition only, and are paid on a per course basis as a student progresses through the program. Scholarships are available to part time, full time, and accelerated students.

If tuition costs are a major factor in your choice of real estate program, please contact us about financing possibilities. The total cost of the MRED degree is the most competitive in the region, and one of the lowest nationally, with a cost-benefit ratio that is unparalleled. There are also significant University and Colvin Institute resources available for student enrichment activities such as support for competitions, site visits, and attendance at local, regional and national real estate events.

The MRED program is known for sending 6 teams to the Final Four of the international ULI/Hines Competition, and taking first prize twice. It is also known for sending 2 teams to the Final Four of the HUD Innovation in Affordable Housing Competition, and taking first prize once. It should be noted that the HUD Competition is only 5 years old.

Contact

To arrange a visit, phone interview, or for more information, please contact the Program Director, Maria Day-Marshall, at mdaymars@umd.edu. Additional information on case competitions, samples of student work, as well as syllabi and adjunct faculty bios can be found at the MRED Program's Web site (http://arch.umd.edu/rdev/real-estate-development (http://arch.umd.edu/rdev/real-estate-development/)) and the Colvin Institute site at http://colvininstitute.org. For information about our industry supporters and Colvin Institute activities go to http://colvininstitute.org. You will also find the Colvin Institute providing outreach and information at the ICSC in Las Vegas each May, at the ULI or NAIOP National Conference each Fall, and at many local events of Bisnow, ICSC, ULI, CREW, NAIOP, AAREP, and HAND.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letter of Recommendation (1) (optional)
- CV/Resume
- Skills Assessment: This assessment is not used in determining your admission to the program. Self assessments are used for placing students into the proper sequence of courses once admitted. (This is a section within the online application.)
- Writing Sample: (A writing sample of 3-5 pages in business style writing related to real estate. This can be previous individual academic or professional work. Any confidential information should be redacted.)
- Description of Research/Work Experience (optional)

Acceptance to the program is on a competitive basis. Applicants are required to have a minimum undergraduate grade point average (GPA) of 3.0 on a 4.0 scale from an accredited University. Applicants who demonstrate a strong interest and aptitude with a GPA below 3.0 may be considered based on recommendations or proven success in the field. Such applicants are admitted provisionally and may be required to do additional course work.

Requirements

- Real Estate Development, Master of Real Estate Development (M.R.E.D.) (p. 350)

Facilities and Special Resources

The University of Maryland is an exceptional location for the pursuit of graduate studies in the field of real estate development, and graduate students are encouraged to take advantage of the opportunities. The University is eight miles from the incomparable library and research facilities of Washington, D.C. In the nation's capital, MRED graduate students have access to the Library of Congress, as well as the specialized collections of professional associations and international organizations, such as the National Association of Home Builders, the Urban Land Institute, the American Institute of Architects, and the National Building Museum. Access to agencies at all levels of government---municipal, county, state and federal--which regulate various aspects of real estate are all available and engaged with the program.

Close by the University are key historically important and interesting places in the development of U.S. communities, including the 4th settlement in America at Historic St. Mary's City in Southern Maryland, which was the first planned city in America. Just 10 minutes from campus is the 1930s iconic new town (cooperative) of Greenbelt, Maryland, and within 45 minutes are the 1960's new towns of Columbia, Maryland, St. Charles, Maryland and Reston, Virginia. One of the best examples of New Urbanism is the Kentlands development less than 30 minutes away in Gaithersburg, MD. And not to be missed are the major redevelopment and urban living revivals in the Port City of Baltimore and the historic neighborhoods of Anacostia and Columbia Heights in the District of Columbia, as well as the suburbs that are reinventing themselves in the close in suburbs to the District in Northern Virginia and Maryland.

The program is also the home of the Colvin Institute of Real Estate Development, endowed by the late John Colvin and his wife and Karen. The Institute supports the outreach to the industry through a Council of Advisors, as well as various networking and high profile real estate events on and off campus. Also associated with the School is the National Center for Smart Growth Research and Education, which involves faculty and graduate students from several campus units in multi-disciplinary research on the fiscal, environmental and social impacts of alternative development patterns; evaluation of growth management strategies, transportation patterns and planning therefor, as well as technical assistance to state agencies and local jurisdictions.

The program's location in College Park, Maryland, with direct Metro access to downtown Washington, D.C. and easy access up the Baltimore-Washington Parkway to Baltimore City, makes field work, site visits and interaction with ongoing real estate developments and developers one of the signature features of the MRED program.

The MRED Council of Advisors, as well as adjunct faculty who are active professionals in all aspects of real estate development, are eager to engage with students in the program which offers formal and informal occasions for advice about the current trends in the industry as well as the possibility of full- or part- time employment or internships.

There is an active student real estate club, SoRED, and also a strong MRED alumni group who are very effective in helping each other find positions as well as post jobs from where they are for current MRED students to consider. Announcements about full time and intern positions are posted to the MRED list serve frequently. Adjunct faculty and guest speakers also are generally very willing to help students network and connect with employment resources once they have completed their core courses. The School also has a placement officer who is available by appointment to help students in their search.

Real Estate Development, Master of Real Estate Development (M.R.E.D.)

Non-thesis only (capstone project required): 33 credits-42 credits

MRED is a 33-42 credit hour professional masters degree in real estate development. There are 3 core required courses in Development Law, Fundamentals of Finance and the Capstone final course. There are

5 cognate areas from which a course must be taken to fulfill degree requirements.

Electives may be selected in focus areas of: Advanced Finance, Sustainability, Affordable Housing, Historic Preservation and Urban Planning. There are also electives in types of real estate such as retail, hospitality, and leadership and negotiation skills. Electives may also be taken in any of the cognate areas of Construction, Valuation, and Asset Management.

Applicants without education or work experience in real estate, particularly real estate finance, accounting and valuation are admitted subject to adding 3 to 9 credits of additional RDEV course work in the first or second term of their MRED degree program. Students with no background can expect to be subject to the full 9 credits; most applicants have 3 - 6 additional credits to complete.

Admitted Students are required to attend a 2 1/2-day Bootcamp (Assessment and Orientation Program) (Friday night through Sunday afternoon) prior to their first semester of taking RDEV courses.

Students may be required, based on the introductory Assessment sessions or subsequent classwork, to take additional evening or weekend coaching courses/sessions in Excel skills, business writing or oral presentation. Successful completion of all supplemental coaching sessions is required for graduation.

Graduates must achieve a 3.0 GPA in all coursework, including the final capstone course or research project and publicly present their capstone work to a jury in order to be awarded the MRED degree.

Students must meet minimum professional writing and presentation standards, and complete successfully all excel, business writing, and oral presentation and skills non-credit courses or coaching as are offered and required during the period of enrollment. These courses may incur an additional charge paid to the Colvin Institute.

International Students also must test out or successfully complete within two semesters the University English writing courses as determined by the Office of International Student and Scholar Services (ISSS).

The MRED program is highly flexible which allows for tailoring the required core and cognate courses to a student's background and interest, such that a student with a strong background in architecture, law, planning, public policy or finance, could substitute out of the core/cognate course in their area of expertise and add a more advanced course or an unrelated RDEV elective with the advice and approval of the Director. The course work for the core courses is very intense, and off site visits are required in most courses anywhere from 1 to 3 times per semester some of which are scheduled for weekend hours, and some during working hours in limited instances.

Limited Courses are offered during Summer and Winter terms. Students may take no more than two courses over the Summer terms and one course in Winter term. The maximum number of credits toward the MRED degree that may be taken in Summer/Winter terms is twelve (12). One course (no more than 3 credits) may be credited toward the MRED degree for program approved Study Abroad courses. See the Program Director for details before applying for any Study Abroad course. Certificate students are subject to the same requirements as above, but may not take elective or advanced courses or apply a Study Abroad course to the certificate.

Course	Title	Credits

RDEV615	Principles, Process and Politics of Planning for Real Property Development	3
RDEV620	Market Analysis for Real Property Development	3
RDEV640	Principles of Urban Design for Real Property Developers	3
RDEV650	Essentials of Design and Construction Management for Development Professionals	3
RDEV660	Commercial Leasing for Real Property Developers	3
Select 9 credits of electives		9
Additional credits [1]		0-9
Total Credits		**33-42**

[1] Up to 9 additional credits may be required if there is not adequate educational background. Students should check with their advisor.

Real Estate Development (Z029)

Graduate Certificate Program
College: Architecture

Abstract

The Graduate Certificate in Real Estate Development is a 12 - 21 credit program, depending on the work experience and academic preparation of the applicant. The Certificate is primarily designed for obtaining the introductory basics of real estate development for those who may not yet have determined to make their career in the field. However, the courses required may be adapted to prior experience or level of expertise for those who are looking for advanced work. The Certificate is comprised of the two fundamental courses for the Master's degree plus two cognate courses, as well as any courses (3 - 9 credits) that would be additional preparation courses as specified in an admission letter. The basic and preparatory courses are all offered to Masters students as well, and Certificate students are not in separate courses for either preparatory courses or for the RDEV (real estate development) courses.

Up to four courses taken as part of the Certificate may be counted toward the MRED degree upon completion of the certificate if the student applies and is accepted into the MRED degree program. Successful completion of the Certificate with grades of B or better assures admission to the MRED program. Up to additional 9 credits of leveling coursework may be required before a Certificate student may move on to the core real estate certificate courses, depending on the background and experience of the applicant.

Students subsequent to admission are subject to three assessments: of Excel Skills, Business Writing and Oral Presentation skills. Students who do not meet minimum standards in the Orientation assessments, or if determined during early coursework that skills are insufficient, may be required to take additional evening or weekend coaching courses in order to meet the Program's Professional Skills Standards.

Generally, Certificate Students take 6 credits (2 courses) per term, and can finish in two terms, if no additional leveling preparatory

courses are required. Students required to complete a full 21 credits, can still finish in 15 months by taking classes through two summer sessions as well as 3 spring and fall terms. However, a Certificate student may, if they are not working, take a maximum of four courses per term. There is no guarantee that the four required courses for the Certificate, however, will be offered in each term. There is more information about the courses and teaching methods used for the Graduate Certificate Real Estate Development sequence at the catalogue entry for RDEV -- Real Estate Development. There is also information on all the real estate graduate programs, including dual degrees available with business,l historic preservation, and architecture at the website www.arch.umd.edu/real_estate_development (http://www.arch.umd.edu/real_estate_development/).

Certificate students are not eligible to take elective RDEV courses or the Capstone course prior to admission to the Master's program. Certificate students may, on a space available basis, participate in Study Abroad courses, but not for credit towards the Certificate degree.

Financial Assistance

Financial aid through the University administered federal loan programs is now available for Certificate students. This is an exception to the general rule, and is based on application and approval received from the federal government as to the standards of admission and requirements of the program. Contact the Program Director after application as to any available Program scholarship assistance, which, depending on the term, may or may not be available for Certificate students. Scholarship awards from the Program are never available for Summer and Winter term courses or for Study Abroad.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample (required)
- Description of Research/Work Experience (optional)
- Skills Assessment: This assessment is not used in determining your admission to the program. Self assessments are used for placing students into the proper sequence of courses once admitted. (This is a section in the online application.)

Acceptance to the Certificate program is competitive. Applicants are required to have a minimum undergraduate grade point average (GPA) of 3.0 on a 4.0 scale from an accredited University. Applicants who demonstrate a strong interest and aptitude with a GPA below 3.0 may be considered on a case by case basis if they show a strong aptitude and/or experience in the field. Such applicants are admitted provisionally based on meeting grade expectations in the program and likely will be required to take additional courses.

No transfer credits from graduate work in other programs at the University of Maryland, or other academic institutions, are accepted towards the Certificate.

Incoming students are required to attend a two day Bootcamp (Orientation and Assessment Program) on the Saturday and Sunday before the beginning of the term in which they take their first course. Based upon Assessments of Professional Skills, additional coaching sessions on Saturdays or late afternoons (5:00 - 7:00pm) may be required for those who do not meet minimum skills in Excel, Business Writing and Oral Presentation. Fees may be charged for such courses, although currently the Colvin Institute covers the cost. Attendance at the Assessment sessions and any follow-up coaching is required to be awarded the Certificate, although the grading is on a pass/fail basis.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Real Estate Development, Post-Baccalaureate Certificate (P.B.C.) (p. 353)

Facilities and Special Resources

The Facilities and Special Resources available to RDEV (Master of Real Estate Development students) are generally available to Graduate Certificate students. Although, Certificate students may not participate in supported competitions, and financial aid may be more limited. Certificate students are not eligible to take the Capstone course, without applying and completing the Master's requirements. To read

about the extent of the facilities and special resources available please check the catalogue of the RDEV program or the web site at www.arch.umd.edu/real_estate_development (http://www.arch.umd.edu/real_estate_development/)

Real Estate Development, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

A 12 - 21 credit introductory program to real estate development. Recommended for those considering whether to move into the real estate development field full time. Courses may be applied to the Master of Real Estate Development Program, if a student desires to go on to full professional preparation

The 4 required courses of the Certificate are Development Law, Process and Ethics; Fundamentals of Development Finance, and 1 course from two of the following groups: Urban Design, Asset and Property Management, Planning and Entitlements Policy and Practice, and Design and Construction Management. For students without academic preparation in finance, accounting and economics additional leveling courses are required in those areas before proceeding to the required courses. Students may begin the Certificate program in either the Fall or Spring terms. Applications are reviewed and admission decisions are issued on a rolling basis

Waivers of the deadline for domestic applicants may be available depending on the number of applicants already admitted.

Course	Title	Credits

Total Credits		**12**

[1] Students without finance and real estate education or experience typically take an additional 5-9 credits

Reliability Engineering (ENRE)

Graduate Degree Program
College: Engineering

Abstract

Reliability Engineering is an interdisciplinary program of the Department of Mechanical Engineering. The academic and research programs are based upon the recognition that the performance of a complex system is affected by engineering inputs that begin at conception and extend throughout its lifetime. Students may specialize in Assessment (Root-Cause Failure Analysis, Probabilistic Risk Assessment, Common-Cause Failures); Testing and Operation (Operator Advisory Systems, Human Reliability, Software Reliability); Manufacturing (Statistical Process Control, Improved Manufacturing Methods); Component and Structures Reliability (Microelectronics and Materials); or Electronic Packaging Reliability.

Financial Assistance

Financial assistance is available to highly qualified students in the form of research and teaching assistantships. The most outstanding applicants are offered fellowships. Students seeking financial assistance are asked to submit with their applications a current resume or CV as well as a statement regarding their qualifications and/or past research or teaching experience. Financial assistance is sought for all worthy students.

- Description of Research/Work Experience (optional)
- Writing Sample (optional)

The Program offers graduate study leading to the Master of Science, Professional Master of Engineering (offered through the Office of Advanced Engineering Education), and Doctor of Philosophy degrees and is open to students who have a Bachelor of Science degree in engineering, physics, or mathematics and obtained a GPA of at least 3.0 on a 4.0 scale from accredited programs. An individual plan of graduate study compatible with the student's interest and background is established by the student in consultation with an advisor. In some cases, it may be necessary to require background courses to fulfill prerequisites.

APPLICATION DEADLINES

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	May 12, 2023	October 14, 2022
International Applicants		
F (student) or J (exchange visitor) visas; A, E, G, H, I and L visas and immigrants	March 10, 2023	September 23, 2022

RESOURCES AND LINKS:

Program Website: http://www.enme.umd.edu
Application Process: gradschool.umd.edu/admissions/application-process/step-step-guide-applying (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/)

Requirements

- Reliability Engineering, Doctor of Philosophy (Ph.D.) (p. 354)
- Reliability Engineering, Master of Science (M.S.) (p. 354)

Facilities and Special Resources

Reliability engineering faculty, researchers, and students leverage state-of-the-art research equipment, technology, and systems to develop new methods, create innovative tools, and find practical solutions to the most pressing societal concerns. More information about our research labs and centers can be found here: https://enme.umd.edu/facilities (https://enme.umd.edu/facilities/).

Reliability Engineering, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

The M.S. degree program offers thesis and non-thesis options. The thesis option requires 24 credit hours of coursework and 6 credits of thesis research. Students who enroll directly in the Ph.D. program or students who transfer into the Ph.D. program from the M.S. program by passing the Ph.D. qualifying examination may obtain a non-thesis M.S. degree upon advancing to doctoral candidacy. The non-thesis option requires 30 credit hours of coursework, a scholarly paper, and presentation. All students must complete the Program Core requirements as well as all of the Graduate School requirements.

The Professional Master of Engineering (M.Eng.) program in Reliability does not require a thesis, but students must complete at least 30 credits of approved coursework.

Course	Title	Credits
Core Requirements		
ENRE600	Fundamentals of Failure Mechanisms	3
ENRE602	Principles of Reliability Analysis	3
Thesis or Non-Thesis Requirements		
Select one of the following options:		24
Thesis:		
Select 24 credits of coursework		
ENRE799	Master's Thesis Research (6 credits)	
Non-Thesis:		
Select 30 credits of coursework		
Scholarly paper		
Total Credits		**30**

Reliability Engineering, Doctor of Philosophy (Ph.D.)

Doctoral students compile a program of study with their advisor, which is then submitted to the Graduate Studies Office of the Department of Reliability Engineering for approval. This should be submitted in the first semester of study. Students must complete 36 credits of courses with at least 30 credits at the 600 level or above, including the required courses for the M.S. degree (ENRE600 and ENRE602) with a minimum 3.0 GPA overall.

Advance to Candidacy: After completion of the two core courses and two additional electives with a minimum GPA of 3.5, students must successfully pass a qualifying exam, as well as present a Dissertation Topic Proposal. The proposal should be completed within two semesters of passing the qualifying exam

Post-Candidacy: Complete at least 12 credits of ENRE899 Doctoral Dissertation Research and successfully defend and submit a dissertation on an original research topic.

Course	Title	Credits
Required courses:		
ENRE600	Fundamentals of Failure Mechanisms	3
ENRE602	Principles of Reliability Analysis	3

Select 30 credits of additional courses		30
Dissertation Research Requirements		
ENRE899	Doctoral Dissertation Research	12
Total Credits		**48**

Reliability Engineering (online) (MERE)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our reliability engineering degree program provides qualified engineers with the tools they will need to better understand the factors that cause components and systems to fail. This interdisciplinary option is offered by the Department of Mechanical Engineering. Students pursuing a reliability engineering masters degree will study topics such as the mechanisms and physics of failure, methods for reliability, maintainability engineering, life cycle costing, and equipment sparing policies.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose (https://advancedengineering.umd.edu/application-process/)
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- Graduate Record Examination (GRE) (optional)
- CV/Resume (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland. For anyone needing these documents, consider applying for a full-time master's program offered on campus (https://gradschool.umd.edu/engineering/meng-campus/).

Applicants with an undergraduate GPA of less than 3.0 may be admitted on a provisional basis if they have demonstrated satisfactory performance in another graduate program and/or their work has been salutary.

Applicants with foreign credentials must submit academic records in the original language with literal English translations. Allow at least three months for evaluation of foreign credentials. International applicants are advised to review the Graduate School English requirements to learn whether or not the submission of TOEFL or IELTS scores is required.

Requirements

- Risk, Compliance, and the Law, Post-Baccalaureate Certificate (P.B.C.) (p. 360)

Facilities and Special Resources

To serve the needs of working professionals, courses in Risk, Compliance, and the Law Certificate program are currently offered 100% online in a hybrid format where students will be expected to work both individually and in teams to complete course requirements asynchronously, as well as to participate once per week in a synchronous lecture.

Risk, Compliance, and the Law, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

Full-time students complete the 12-credit program in one year by taking three credits (one course) in each of the four 12-week terms. A minimum 3.0 GPA is required to maintain good academic progress for graduation. Students are responsible for keeping track of their progress and should review their academic record to ensure accuracy.

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Robotics Engineering, Master of Engineering (M.Eng.) (p. 362)

Facilities and Special Resources

This program is currently offered in-person at the College Park Campus. In addition to in-person courses, you may have the option to take some

course requirements in an online format. Course format offerings are subject to change.

This program is also offered 100% online. Please see Robotics Engineering (MERO) for more information.

Robotics Engineering, Master of Engineering (M.Eng.)

Non-thesis only: 30 credits required

All Professional Master of Engineering Programs consist of 10 courses/30 credits. All students are expected to complete a preliminary course plan for their intended degree program. Degree planning worksheets can be found here: https://mage.umd.edu/degree-planning-sheets (https://mage.umd.edu/degree-planning-sheets/)

Course	Title	Credits
Required courses (Take 4 courses):		12
ENPM661	Planning for Autonomous Robots	
ENPM662	Introduction to Robot Modeling	
ENPM667	Control of Robotic Systems	
ENPM673	Perception for Autonomous Robots	
Robotics Programming Elective (Choose at least 1 course):		3
ENPM808	Advanced Topics in Engineering (ENPM808X - Software Development for Robotics)	
ENPM809	Special Topics in Engineering (ENPM809E Python Applications for Robotics)	
ENPM809	Special Topics in Engineering (ENPM809Y Introductory Robot Programming)	
Robotics Electives (Choose at least 2):		6
ENPM808	Advanced Topics in Engineering (ENPM809T Autonomous Robots)	
ENPM640	Rehabilitation Robotics	
ENPM808	Advanced Topics in Engineering (ENPM808F Robot Learning)	
ENPM808	Advanced Topics in Engineering (ENPM808P Manufacturing and Automation)	
ENPM645	Human-Robot Interaction	
ENPM663	Building a Manufacturing Robotic Software System	
Other Electives listed above or approved by advisor (Choose 3 courses. See Plan.))		9
Total Credits		**30**

School Counseling (COSC)

Graduate Degree Program
College: Education

Abstract

The master's level professional entry-level training program in School Counseling prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students. The program is accredited by the Association for Advancing Quality in Educator Preparation and is approved by the Maryland State Department of Education. Therefore, graduates of our School Counseling Program are eligible for certification as school counselors in Maryland and other states. The School Counseling Program at the University of Maryland resides in the number one ranked counseling department (U.S. News and World Report). Our program specializes in preparing professional school counselors who will be *leaders, advocates,* and *systemic change agents* in K-12 urban educational settings.

Financial Assistance

Graduate Assistantships (GAs) are not available for masters level students in the Department. However, there are a number of GAs offered throughout the university, which provide tuition support and a living allowance. Once admitted into the program, students will receive guidance and information on how to secure GAs on campus.

Requirements

- School Counseling, Master of Education (M.Ed.) (p. 363)

Facilities and Special Resources

All master's, A.G.S., and doctoral students are required to include supervised fieldwork experiences in their degree programs. The CoPE programs have excellent cooperative relationships with on-campus facilities, such as the Counseling Center and Health Center. Fieldwork may also be done at a wide variety of school systems, colleges and universities, and counseling services and mental health agencies in the Baltimore/Washington metropolitan area, or nationally.

In addition to campus and program resources, students utilize the many major research and professional institutions that are easily accessible to the campus. These include the Library of Congress, the National Library of Medicine, the National Institutes of Health, the Institute of Education Sciences, professional associations such as the American Counseling Association, the American Psychological Association, and the National Association of School Psychologists.

School Counseling, Master of Education (M.Ed.)

Non-thesis only: 60 credits required

Professional entry-level program is offered: a Master of Education (M.Ed.) without thesis in School Counseling. Coursework includes one 100-hour practicum and two 300-hour internships in schools in Prince George's County, District of Columbia, Baltimore City, and other urban public school systems. Students also take courses in counseling, school counseling, research methods, and special education. Students are typically full-time and complete the program in two years.

For more information, please contact Shannon Martin (shmartin@umd.edu), Graduate Assistant, School Counseling.

School Librarianship (Z114)

Graduate Certificate Program
College: Information Studies

Abstract

The Certificate of Professional Studies in School Librarianship will provide individuals with the coursework required to qualify for certification as a school librarian (library media specialist) in Maryland and in other states with similar certification requirements. The eight required courses, all offered online, may be completed within an 18 month period.

In order to enroll in the certificate program, individuals must have a Master's of Library and Information Science degree or a Master's degree

in another field of study and a degree in Education or substantial K-12 teaching experience.

School Psychology (COSP)

Graduate Degree Program
College: Education

Abstract

The graduate programs in Counseling Psychology, School Psychology, and Counselor Education (CoPE) include several distinct areas of specialization that are designed to provide the knowledge and skills needed for practice and scholarship in counseling and related human service professions. These fields are concerned with assisting people individually, in groups, and in organizations to attain their optimal level of personal, social, educational, and career functioning. Graduates are employed in a variety of settings including schools, colleges and universities, mental health agencies, business and industry, government agencies, and other community service and practice facilities. Depending on the specific area of specialization and level of training, program graduates may serve as researchers, educators, supervisors, psychologists, counselors, or program administrators.

Master's level professional entry-level training is offered in the School Counseling program, which prepares students to become school counselors in elementary, middle, and high school settings. School counselors are leaders, advocates, and systemic change agents who provide individual and group counseling to school-aged children, develop and implement comprehensive developmental school counseling programs, and collaborate with all key stakeholders, including classroom teachers, school administrators, parents, and community members, to ensure the academic, personal-social, and college-career development of students.

The Ph.D. degree is offered in two areas of specialization: Counseling Psychology (in collaboration with the Psychology Department) and School Psychology. Doctoral studies prepare students to achieve exceptional competence in the theory and practice of their field; to develop a high level of skills as researchers, educators and administrators; and to assume positions of leadership in relevant settings. Students in the specialization of Counseling Psychology are prepared to work as researchers, educators, psychologists, and supervisors in such settings as academic departments, college and university counseling centers, and community mental health agencies. Doctoral-level school psychologists serve as researchers, university faculty, supervisors, administrators, and advanced level practitioners. Program accreditation within CoPE includes: The School Psychology

and Counseling Psychology doctoral programs are accredited by the American Psychological Association (APA). The School Psychology doctoral program is approved by the National Association of School Psychologists (NASP), and is also approved for certification by the Maryland State Department of Education. The School Counseling masters program is approved by the Maryland State Department of Education.

Note that, since 2012, the CoPE graduate programs have been part of a new department, the Department of Counseling, Higher Education, and Special Education. The CoPE programs were previously housed in the Department of Counseling and Personnel Services.

The School Psychology **(**http://www.education.umd.edu/CHSE/academics/specialization/SchoolPsychology.html**)** Program is an APA-accredited, research-intensive Ph.D. program in professional psychology that embodies the scientist-practitioner model. Program graduates pursue academic/research- and practice-oriented careers. Graduates of the Program are eligible for licensure as professional psychologists in Maryland and other states, and are also eligible for the Nationally Certified School Psychologist credential awarded by NASP. Graduates are automatically eligible for Maryland State Dept. of Education certification as a School Psychologist.

Financial Assistance

The Department of Counseling, Higher Education, and Special Education offers graduate research, teaching, and administrative assistantships on a selective basis to doctoral students. The Department also assists its students in finding assistantship placements with a variety of on-campus and off-campus units. In addition, a small number of new Ph.D. students are offered highly selective fellowships funded jointly by the Department and the University.

School Psychology, Master of Arts (M.A.)

Students pursing doctoral degrees may earn the M.A. with thesis within the doctoral program while progressing to the Ph.D. Please contact your advisor for more information.

School Psychology, Doctor of Philosophy (Ph.D.)

The Doctoral program in School Psychology requires the completion of 102 credits, including 12 credits of EDCP899.

Advance to Candidacy: In addition to the course requirements below, students must pass all Comprehensive Exam requirements. Comprehensive Exam requirements include the following:

- Research Review
- Conference Paper/Presentation
- Dissemination of Psychological Science to Practitioner or Lay Audience
- Praxis II School Psychology Exam
- Case Conceptualization Report

Post-Candidacy: Complete a first or co-authored chapter or manuscript submitted for publication with advisor approval. Complete at least 12 credits of EDCP899 Doctoral Dissertation Research in addition to defending and submitting an original dissertation.

School System Leadership (EDUC)

Graduate Degree Program
College: Education

Abstract

The Doctorate of Education (Ed.D.) in School System Leadership is a “Practice Based” doctoral program designed to develop leaders who can develop and lead collaborative and inclusive system improvement initiatives.

The program enrolls cohorts of students who work together over 36 months to identify, investigate and solve real school system problems. The Ed.D. in School System Leadership is approved by the Maryland State Department of Education for Superintendent II certification.

Second Language Acquisition (SLMA)

Graduate Degree Program
College: Arts and Humanities

Abstract

The M.A. is intended primarily as a two-year program for full-time students. A very limited number of part-time students would also be admitted. It will provide students with rigorous, comprehensive training in the theory and research of second (including foreign) language learning, teaching and testing, and related areas. A major program focus includes preparation for those working, or intending to work, in programs for tertiary students and adults studying less commonly taught languages (LCTLs), e.g., East-Asian and Middle-Eastern languages, and such modern European languages as Spanish, French, Italian and German. Areas of particular faculty expertise include cognitive processes in SLA; language teaching methodology and pedagogy; psycholinguistics; language processing; individual differences in such factors as age, aptitude, and working memory; second language analysis; interlanguage studies; heritage learners; needs analysis; syllabus design; materials writing; learner training; language assessment; program evaluation; second language research methods; task-based language teaching; and uses of technology in language learning and testing.

Financial Assistance

Masters Degree and Certificate students in the College of Arts and Humanities are rarely offered funding. It is expected that students admitted to the SLA M.A. or Certificate Program will come with outside sponsorship.

Requirements

- Second Language Acquisition, Master of Arts (M.A.) (p. 369)

Facilities and Special Resources

In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House (http://www.languages.umd.edu/lh/), The Center for Innovative Teaching and Learning (http://sllc.umd.edu/citl/), the Office of Information Technology (http://www.oit.umd.edu/), and the Center for Teaching Excellence (http://www.cte.umd.edu/).

Students completing coursework with affiliate faculty in the Departments of Psychology, Communication (http://www.comm.umd.edu/), Linguistics (http://www.ling.umd.edu/), and Education (http://www.education.umd.edu/) as well as the Center for Advanced Study of Languages (http://www.casl.umd.edu/) may have access to their respective resources.

Second Language Acquisition, Master of Arts (M.A.)

Thesis option: 30 credits
Non-thesis option: 30 credits

The M.A. in SLA is a 30-credit program, with two tracks: Plan A, by coursework and thesis, and Plan B, by coursework only. These two tracks are meant to accommodate two slightly different populations, those planning on going on for the Ph.D. at Maryland or elsewhere (Plan A) and those who will be consumers and interpreters rather than producers of research and for whom the M.A. will be a terminal degree (Plan B). A Certificate in SLA will also be offered. The Certificate requires 18 credit hours of course work from the Plan B curriculum.

Second Language Acquisition (SLPH)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Ph.D. program in SLA at the University of Maryland aims to train students to conduct research on second language acquisition processes. It has a strong cognitive focus. The program draws upon the expertise of a distinguished cadre of faculty in the School of Languages, Literatures and Cultures (http://www.languages.umd.edu/), and in affiliate departments such as Human Development, Linguistics (http://ling.umd.edu//); Measurement, Statistics, and Evaluation (http://www.education.umd.edu/EDMS/); Hearing and Speech (http://www.bsos.umd.edu/hesp/); Philosophy (http://www.philosophy.umd.edu/); Psychology (http://www.bsos.umd.edu/psyc/); and Curriculum and Instruction (http://www.education.umd.edu/EDCI/)

Financial Assistance

Most students admitted to the Ph.D. program will be funded, either via graduate or teaching assistantships or via research assistantship on grants and contracts, all providing tuition waiver plus stipend. Some students may receive a Graduate Assistantship from the UMCP-affiliated Center for the Advanced Study of Language (CASL) (http://www.casl.umd.edu/) or the National Foreign Language Center (NFLC (http://www.nflc.org), a unit within the College of Arts and Humanities (ARHU).

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- Graduate Record Examination (GRE)
- Writing Sample: Demonstrated evidence of ability and interest in undertaking scholarly research; could be published paper or M.A. thesis. (one required, up to one more optional)
- CV/Resume
- Publications/Presentations

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline
Domestic Applicants		
US Citizens and Permanent Residents	January 13, 2023	September 29, 2022
International Applicants		
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants.	January 13, 2023	September 29, 2022

Other Deadlines: Please visit the program website at http://www.sllc.umd.edu

Requirements

- Second Language Acquisition, Doctor of Philosophy (Ph.D.) (p. 370)

Facilities and Special Resources

In addition to the University graduate library, the SLA program offers research facilities and resources to facilitate research and materials development, including a multimedia SLA Lab, the Language House (http://www.languages.umd.edu/lh/), The Center for Innovative Teaching and Learning (http://sllc.umd.edu/citl/), the Office of Information Technology (http://www.oit.umd.edu/), and the Center for Teaching Excellence (http://www.cte.umd.edu/).

Students completing coursework with affiliate faculty in the Departments of Psychology, Communication (http://www.comm.umd.edu/), Linguistics (http://www.ling.umd.edu/), and Education (http://www.education.umd.edu/) as well as the Center for Advanced Study of Languages (http://www.casl.umd.edu/) may have access to their respective resources.

Second Language Acquisition, Doctor of Philosophy (Ph.D.)

Doctoral students are required to take 3 credits of SLAA649 (SLAA649R - Research Critique) within their first year. In addition, students choose two courses from two different specializations for a total of 4 courses. Specializations available include Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment, and Second Language Use. Students are also required to complete 2 courses in quantitative and/or qualitative research methods, as well as 12 credits of SLAA899.

The Ph.D. has 4 areas of specialization: **Second Language Learning, Second Language Instruction, Second Language Measurement and Assessment,** and **Second Language Use**. Students select 2 courses each from 2 of these areas (for a total of 4 courses) and are expected to take 2 additional electives in the area of their proposed dissertation work. In addition, all students are expected to take 2 courses in quantitative and/or qualitative research methods. The 8 courses (total) represent the minimum coursework requirement. Some students may need remedial coursework prior to undertaking their 8 courses, and many will wish to take courses beyond the minimum 8 based on their interests. Additionally, all students are strongly encouraged to take a course in the philosophy of science. Before graduation, all students completing the PhD in Second Language Acquisition must demonstrate three types of experience with non-native language: learning a non-native language, using a non-native language, and teaching a language to non-native speakers of that language. All three types of experience will be verified through official documentation and/or assessment as follows:

1. Language Learning. Students must have spent at least two semesters as a student of a non-native language in a post-secondary classroom environment (6 total credits minimum). Verified through transcript. SLLC will provide this experience for any student who needs it.
2. Language Teaching. Students must have taught a language to non-native speakers of that language for at least 1 semester, or the equivalent of 45 hours. Verified through contract, letter, etc. SLLC will provide this experience for any student who needs it.
3. Language use. Students must show that they are able to communicate in a non-native language at the intermediate-low level on the ACTFL scale through an Oral Proficiency Interview (OPI). Students whose native language is not English will be able to satisfy this requirement through their competency in English. These three requirements do not necessarily have to be met in the same language. Before the PhD dissertation, two qualifying papers are required. Please see the program website (http://www.languages.umd.edu/slaa/) for more details.

Sociology (SOCY)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Graduate Program in Sociology is designed for students seeking a Ph.D. degree. However, the M.A. option is available to students who either

wish to obtain a master's degree while continuing in the Ph.D. program, or who leave the program before finishing the PhD. The graduate program is organized into four specialty areas: Demography, Political Sociology, Social Psychology, and Social Inequality & Mobility.

Typically, about half the students finishing Ph.D. degrees in the Sociology Department work as faculty members at colleges and universities, and about half are working in research, administration, and consulting in federal, state, or private organizations. Our location in the Washington, D.C., area offers an unusual number of full-time research opportunities for our graduates.

Financial Assistance

Financial assistance for graduate students is available through teaching and research assistantships, and for advanced students through part-time instructorships. We also have several special fellowships for outstanding applicants that provide additional support tailored to the applicants needs. All carry a stipend plus tuition remission, and most include health benefits.

- CV/Resume
- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationsocy.pdf)
- Writing Sample: Limited to 35 pages with references, tables, and figures.
- Description of Research/Work Experience (optional)

Please note, the Master's program is for current University of Maryland undergraduates only. Any UMD applicant needs to have SAT scores of verbal plus math scores totaling at least 1270. In addition he/she subject to an academic audit by the Academic/Departmental Advisor.

Admission to the graduate program is based upon the student's academic record, GRE scores, letters of recommendation, and other information relevant to the applicant's chances of being successful in the program. Although a previous major in Sociology is not required, students entering the graduate program should have had the following in undergraduate courses: mathematics through college algebra, elementary statistics, sociological theory, and sociological research methods. Students who have completed prior graduate coursework in Sociology may petition to waive one or more courses in Social Theory, Statistics, or Research Methods. New graduate students are assigned temporary advisors upon arrival, and are then expected to select a permanent advisor who will direct their dissertation research. For consideration for departmental fellowships or assistantships, applications should be received by the preferred deadlines.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Sociology, Doctor of Philosophy (Ph.D.) (p. 373)
- Sociology, Master of Arts (M.A.) (p. 373)

Facilities and Special Resources

In addition to these programs, the department is closely involved with the following research centers: the Center for Research on Military Organization, the Maryland Population Research Center (MPRC), the Center for Innovation, and the Program for Society and the Environment. Collectively, these centers account for over five million dollars in

annual research funding. The Department is also affiliated with an interdisciplinary Joint Program on Survey Methods (JPSM). The campus has excellent computer facilities and computer resources are available to faculty and graduate students.

Sociology, Master of Arts (M.A.)

The graduate program in the Department of Sociology is designed for Ph.D. students. We do not offer a terminal Masters program and we will not accept or enroll students for the single purpose of acquiring a Masters degree. However, doctoral students may obtain a Master of Arts degree during their course of doctoral study by completing 30 credit hours.

Course	Title	Credits

Software Engineering (PMES)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Software Engineering program is concerned with developing and maintaining software systems that behave reliably and efficiently, are affordable to develop and maintain, and satisfy all the requirements that customers have defined for them. Our faculty consists of world class researchers and practitioners who apply the latest Software Engineering principles at large projects at NASA, DARPA, Raytheon, and Lockheed Martin. Courses focus on three technical areas—cybersecurity, computer engineering, and systems engineering—preparing students to help solve pressing real-world problems.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Spanish Language and Literature (SPAP)

Graduate Degree Program
College: Arts and Humanities

Abstract

The Faculty of the Department of Spanish and Portuguese is committed to excellence in teaching and mentoring, along with the production of new knowledge that is the hallmark of a strong department. We are known for our focus on intersections between language, literature, culture, and politics, our community engagement, and our MA track in Hispanic Applied Linguistics. We bridge several intellectual fields across Spain and Spanish America and between North, Central and South America, the Caribbean, and Brazil, as we rethink the specificity of our cultures. The Department has been the home of major Latin American and Spanish literary figures, to include Juan Ramon Jimenez, who taught at the University between 1943 and 1951 and who, after being nominated by the Department, received the Nobel Prize for Literature in 1956. His legacy, as well as that of cultural critic Angel Rama, award-winning poet Jose Emilio Pacheco, award winning writer and Professor Emeritus, Jorge Aguilar Mora, and Professor Emerita, Graciela Palau de Nemes, among others, continues to shape our thought, vision, and mission.

The Department is renowned for its multidisciplinary strengths in Latin American and Lusophone literatures and cultures as well as its faculty research in the areas of the history of ideas, Southern Cone literature, Judeo-Latin American literature, Mexican literature, theater, and performance, Latin American modernismo, colonial and transatlantic discourses, Central American transnational cultures, U.S. Latinidades, Quechua language and indigenous literatures, Caribbean-Archipelagic poetics/politics, salsa and sabor, Brazilian cinema, Lusophone Africa and African diaspora studies, deconstruction of the Cuban Revolution, and contemporary reinscriptions of the nineteenth century.

Faculty members in the area of Spanish literature are recognized for their work in the history of the Spanish language and philology from the Middle Ages to the present, Medieval historiography and women narratives, Golden Age poetics, Cervantes and Quevedo traditions, revisions of the Enlightenment, romanticism (journalism and costumbrismo) and realism

(philosophical traditions), modern and postmodern narrative and poetics, as well as representations of the Spanish Civil War and exile, particularly in Latin America.

The Department is also at the forefront of Spanish Applied Linguistics, language teaching pedagogy, language teacher education, language use and identity, social and political issues in foreign language teaching and learning, instructional technology, learner variables and learning disabilities, language for specific purposes, cross-cultural communication, and heritage language learning.

Mission

The Department of Spanish and Portuguese seeks to forge a strong dialogue between, and within, our areas of specialization pertaining to Latin America, Spain, and Portugal. To that end, we offer thorough instruction in the diverse, complex, and globalized literatures, cultures, and linguistics of the Spanish and Portuguese-speaking world. Our students not only develop the critical language skills to communicate in the target language but also gain an understanding of the cultures, politics, histories, and literatures of the communities and national spaces of the Americas, Spain, and Portugal.

Our goal is to foster learning and thought, develop critical perspectives, and promote intellectual growth in our students. We teach across interdisciplinary fields such as literature, film, popular and visual culture, theatre, history, philosophy, critical theory, gender and queer studies, philology, and linguistics in different cultural and geographic contexts. We strive for the creation and discussion of new forms of knowledge and the effective engagement of our students and faculty with the world. We prepare students to become promising professionals in their chosen careers.

Our M.A. and Ph.D. graduates are mentored by our faculty, engage in substantive research projects, and benefit from rigorous training in the teaching skills required by the profession. They are prepared to meet the professional demands of highly competitive academic positions in the United States and Latin America.

Financial Assistance

Financial assistance in the form of fellowships and assistantships is available for qualified applicants.

- CV/Resume
- Description of Research/Work Experience (optional)
- Portfolio PDF Upload (optional)

In addition to Graduate School requirements, candidates must have a bachelor's degree with a major in Spanish Language and Literature, or the equivalent in a related field with near native fluency in the written and spoken language.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 18, 2023
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	January 18, 2023

Other Deadlines: Please visit the program website at http://sllc.umd.edu/spanish (http://sllc.umd.edu/spanish/)

Requirements

- Spanish Language and Literature, Doctor of Philosophy (Ph.D.) (p. 377)
- Spanish Language and Literature, Master of Arts (M.A.) (p. 377)

Facilities and Special Resources

In addition to the resources of the University libraries, students have easy access to the Library of Congress, the Smithsonian Institution and other Washington-based libraries and archives. National Archives-II, located on University grounds, is readily accessible to the Campus community. Dr. Sosnowski is the founder and editor of the literary journal *Hispamérica*. The graduate students publish *Animal de fondo*.

In association with the Latin American Studies Center, the Department promotes original initiatives on Latin American topics. Postdoctoral Fellows and Visiting Professors are an integral part of our academic program. Also the Department hosts the Juan Ramón Jiménez Distinguished Lectures, the José Emilio Pacheco Distinguished Series, the interdisciplinary seminar "Hoy: Interdisciplinary Approaches to the Present", and a series of lectures. In recent years, our faculty has been the recipient of major grants and fellowships from The Rockefeller Foundation, the National Endowment for the Humanities and the John Simon Guggenheim Foundation.

Spanish Language and Literature, Master of Arts (M.A.)

Thesis or Non-thesis option: 30 credits

Students can specialize in either Spanish Literature, Latin American Literature, or Hispanic Applied Linguistics. For either option, students must also pass three comprehensive exams and pass a language exam. All students must submit a scholarly paper in their final semester of the program.

The Department offers three areas of specialization within the 30-credit MA: Spanish literature, Latin American literature, and Hispanic applied linguistics. All areas offer a non-thesis option and a thesis option, and all include a comprehensive examination. A one-credit course in methodology is required of all teaching assistants.

See the website of the Department of Spanish and Portuguese for more details: http://sllc.umd.edu/spanish/graduate (http://sllc.umd.edu/spanish/graduate/).

Spanish Literature track

Course	Title	Credits
Core Requirements		
Linguistics course		3
Literary theory and/or criticism course		3
Non-major literature courses		9
Thesis or Non-Thesis Requirements		
Select one of the following options:		15
Non-Thesis:		
Select 15 credits of Spanish Literature		
Thesis:		
Select 9 credits of Spanish Literature		
SPAN799	Master's Thesis Research	
Total Credits		**30**

LATIN AMERICAN LITERATURE track

Course	Title	Credits

Select 3 credits of Electives		
Total Credits		**36**

Spanish Language and Literature, Doctor of Philosophy (Ph.D.)

The doctoral degree is a research and specialized degree and the Graduate School does not require a fixed number of credit hours. However, the Department of Spanish and Portuguese requires a total of 36 credits. Before admission to candidacy, the student must demonstrate:

1. a thorough knowledge of the literary production in the chosen area (Spanish or Spanish-American Literature);
2. an in-depth knowledge of the field of specialization;
3. proficiency in at least one field of the others Hispanic literatures;
4. a reading knowledge of a language other than Spanish and English, to be used as a research tool in the field of specialization;
5. one course in linguistics, such as 'History of the Spanish Language';
6. a minimum of one course in Literary Theory and/or Criticism;
7. acquaintance with a third literature (e.g. Luso-Brazilian, French, or English); and
8. a background in supporting fields to be used as research tools (e.g. history, philosophy, political science, sociology, or art). Students must

pass a comprehensive examination, a translation exam (in a language other than English and Spanish), have their dissertation proposal approved for admission to candidacy, and defend a dissertation.

Doctoral students are required to complete 36 credits of coursework in addition to 12 credits of SPAN899. Students must also pass the comprehensive exam, a language reading exam, and the dissertation proposal and defense.

Course	Title	Credits

Select 36 credits of coursework including:		36
Two courses in a secondary area		
A graduate course in the History of the Spanish Language		
A minimum of one course in literary theory and/or criticism		
Dissertation Research Requirements		
SPAN899	Doctoral Dissertation Research	12
Total Credits		**48**

Special Education (EDSP)

Graduate Degree Program
College: Education

Abstract

Graduate programs in special education are designed to prepare highly qualified teachers, to provide graduate level content, and to prepare researchers, teacher educators, and leaders in the field of special education. We offer the following graduate program options:

- M.Ed. in Special Education with Generic Elementary/Middle age based certification
- M.Ed. in Special Education with Generic Elementary/Middle age based and severe disabilities certification
- M.Ed. in Special Education with severe disabilities certification only
- M.Ed. in Specialty Program (30 credits)
- M.A. in Special Education (36 credits)
- Advanced Graduate Specialist Certificate (30 credits beyond the master's degree) (p. 381)
- Ph.D. program

Note that, as of 2012, the EDSP graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. The EDSP degree programs were previously housed in the Department of Special Education.

Financial Assistance

A limited number of fellowships, assistantships and/or grants are available to qualified applicants.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- M.A. and Ph.D. admissions requirements (https://gradschool.umd.edu/education/edsp-ma-phd/)
- M.Ed. admissions requirements (https://gradschool.umd.edu/education/edsp-med/)

For the M.Ed. programs, students must submit scores on the Praxis Core Academic Skills for Educators test (meeting the State of Maryland passing scores) prior to admission into the program and have an undergraduate 3.0 GPA. The Master's of Arts program requires a 3.0 undergraduate GPA and the submission of the Miller Analogies Test or the Graduate Record Examination test scores at or above the 40th percentile rank. The AGS program requires a 3.0 undergraduate GPA, a master's GPA of 3.5, and submission of scores on the MAT, GRE, or Praxis Core Academic Skills for Educators test. Admission to the Ph.D. program requires:

1. Master's degree or equivalent in Special Education or a related field from an accredited institution with a GPA of 3.5 or better;
2. An undergraduate GPA of 3.0 or better;
3. A score on the Graduate Record Exam placing the student at or above the 50th percentile on verbal, quantitative, and analytic subtests;
4. Two years of research or work experience with exceptional populations;
5. Three letters of recommendation from individuals who have direct knowledge of the applicant's academic capabilities, work experience, and professional characteristics;
6. A statement of academic and research goals including intended area of study, research interests, and plans for future employment;
7. Evidence of writing skills shown in the statement of academic and research goals;
8. EDMS Research Methods I or equivalent.

Students pursuing teacher certification in special education are required to take courses required by the Maryland State Department of Education which lead to certification in the State of Maryland. Programs for the Master's specialty program, the AGS, and the Ph.D. are planned individually by the students and advisor to reflect each student's background and goals.

A TOEFL score of 100 is required for international students who are not native speakers of English.

1. GRE for Ph.D., Miller Analogies or GRE for M.A., Praxis Core Academic Skills for Educators for M.Ed., MAT, GRE or Praxis Core Academic Skills for Educators for A.G.S. (at State of Maryland cut scores)
2. Three Letters of Recommendation
3. Statement of Goals
4. Transcripts from all previously attended colleges and universities
5. Interview required for Ph.D. and M.Ed. with teacher certification

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	M.Ed. (with Certification): March 9, 2023
	M.Ed. (without Certification): March 9, 2023
	M.A. or Ph.D.: Dec 15, 2022
International Applicants

	M.Ed. (without Certification): March 10, 2023
	M.A. or Ph.D.: Dec 15, 2022

RESOURCES AND LINKS:
Program Website: http://www.education.umd.edu/CHSE/SE_overview.html
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Special Education, Certificate of Advanced Study (C.A.S.) (p. 381)
- Special Education, Doctor of Philosophy (Ph.D.) (p. 380)
- Special Education, Master of Arts (M.A.) (p. 379)
- Special Education, Master of Education (M.Ed.) (p. 379)

Facilities and Special Resources

The Special Education program provides an unparalleled setting for graduate study. The program's proximity to outstanding public schools in Maryland provides students who wish to pursue teacher certification the chance to gain experience with a culturally and linguistically diverse student population in urban, suburban, and rural settings.

Additionally, students pursuing a doctoral degree can have experiences in advocacy and professional organizations, government agencies, including the US Department of Education in addition to the coursework they take at the University.

Special Education, Master of Arts (M.A.)

Thesis option only: 36 credits required

Students enrolled in the master's program in special education may earn the Master of Arts degree which requires a thesis or the Master of Education degree which may or may not include teacher certification.

Students complete the following courses:

Course	Title	Credits
Core Requirements		
EDSP600	Issues and Trends in Educating Individuals with Disabilities	3
EDSP799	Master's Thesis Research	6
Select two of the following:		6
EDMS645	Quantitative Research Methods I	
EDSP670	Single Subject Research Designs	
EDSP671	Qualitative Methodologies in Special Education	
EDSP673	Evaluating Evidence-Based Practices in Special Education	3
or EDSP625	Seminar on Severely Handicapping Conditions	
Remainder of coursework approved by advisor		18
Total Credits		**36**

Special Education, Master of Education (M.Ed.)

All tracks within the Special Education M.Ed. require that students successfully complete a master's seminar paper.

Special Education (Non-Certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
Core Requirements		
EDSP600	Issues and Trends in Educating Individuals with Disabilities	3
Select two of the following:		6
EDMS645	Quantitative Research Methods I	
EDSP670	Single Subject Research Designs	
EDSP671	Qualitative Methodologies in Special Education	
EDSP673	Evaluating Evidence-Based Practices in Special Education	3
or EDSP625	Seminar on Severely Handicapping Conditions	
Remainder of coursework approved by advisor		18
Total Credits		**30**

Elementary/Middle School Special Education (certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP470	Introduction to Special Education	3
EDSP443	Language and Literacy Acquisition in Children with Disabilities	3
EDSP615	Evaluation and Measurement of Exceptional Children and Youth	3
EDSP616	Reading and Writing Instruction in Special Education I	3
EDSP692	Graduate Internship I: Elementary/Middle Special Education	2

EDSP684	Reading and Writing Instruction in Special Education II	3
EDSP613	Behavior and Classroom Management in Special Education	3
EDSP652	Curriculum and Instruction: Elementary Special Education	3
EDSP687	Family Partnerships in Special Education	3
EDSP695	Graduate Internship II: Elementary/Middle Special Education	6
EDSP690	Teacher Candidate Research Seminar in Special Education	3
EDSP683	Assessment and Instruction in Mathematics in Special Education	3
Total Credits		**38**

Elementary/Middle School and Severe Disabilities (Certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP470	Introduction to Special Education	3
or EDSP411	Universal Design for Learning	
EDSP613	Behavior and Classroom Management in Special Education	3
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP443	Language and Literacy Acquisition in Children with Disabilities	3
EDSP652	Curriculum and Instruction: Elementary Special Education	3
EDSP615	Evaluation and Measurement of Exceptional Children and Youth	3
EDSP616	Reading and Writing Instruction in Special Education I	3
EDSP603	Instruction of Students with Physical Disabilities	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP683	Assessment and Instruction in Mathematics in Special Education	3
EDSP692	Graduate Internship I: Elementary/Middle Special Education	2
EDSP684	Reading and Writing Instruction in Special Education II	3
EDSP604	Education of Students with Autism Spectrum Disorder	3
EDSP687	Family Partnerships in Special Education	3
EDSP695	Graduate Internship II: Elementary/Middle Special Education	6
EDSP690	Teacher Candidate Research Seminar in Special Education	3
Total Credits		**50**

Severe Disabilities (certification)

The following courses are completed on the College Park campus:

Course	Title	Credits
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP604	Education of Students with Autism Spectrum Disorder	3
EDSP625	Seminar on Severely Handicapping Conditions	3
EDSP687	Family Partnerships in Special Education	3
EDSP402	Field Placement: Severe Disabilities I	3
or EDSP411	Universal Design for Learning	
EDSP603	Instruction of Students with Physical Disabilities	3
EDSP606	Advanced Study in Inclusive Practices in The Schools	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP670	Single Subject Research Designs	3
Electives		6
Total Credits		**33**

Severe Disabilities with Focus Autism Spectrum Disorder (Certification)

The following courses are completed off-campus:

Course	Title	Credits
EDSP602	Instruction of Students with Severe Disabilities I	3
EDSP603	Instruction of Students with Physical Disabilities	3
EDSP604	Education of Students with Autism Spectrum Disorder	3
EDSP606	Advanced Study in Inclusive Practices in The Schools	3
EDSP614	Instruction of Students with Severe Disabilities II	3
EDSP687	Family Partnerships in Special Education	3
EDSP690	Teacher Candidate Research Seminar in Special Education	3
EDSP612	Transition Methods and Disability Systems	3
EDSP613	Behavior and Classroom Management in Special Education	3
EDSP670	Single Subject Research Designs	3
or HESP627	Augmentative and Alternative Communication	
EDSP678	Seminar in Special Education ((Technology with ASD))	3
EDSP625	Seminar on Severely Handicapping Conditions	3
Total Credits		**36**

Special Education, Doctor of Philosophy (Ph.D.)

The Doctor of Philosophy (PhD) degree in Special Education prepares researchers, teacher educators, and leaders who will advance the education of children and adults with disabilities. The program is intended for full-time students and requires a minimum of 60 post-Master's credits in courses that address special education issues and trends, policies, current research and practice as well as research methods and design. Doctoral students will, with their advisor, identify a sequence of courses and experiences to advance their knowledge in an area of specialization. Students pursuing the doctoral program in special education must have completed a Master of Arts degree or the Master of Education degree in special education or a related area.

Students should consult the Department website on Graduate Programs for more information. https://education.umd.edu/academics/programs/graduate/special-education-phd (https://education.umd.edu/academics/programs/graduate/special-education-phd/)

Advance to Candidacy: Doctoral students are required to complete 60 credits of coursework as well as a Comprehensive Portfolio. The portfolio should include the following:

- CV
- Synthesis Paper
- Evaluation of Research and Scholarship
- Evaluation of Leadership and Professional Knowledge
- At least 3 credits of EDSP898.

Post-Candidacy: Students must complete a minimum of 12 credits of EDSP899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits
Core Requirements		
Select 5 of the following courses (or other courses with advisor approval):		15
EDSP600	Issues and Trends in Educating Individuals with Disabilities	
EDSP675	Legal and Policy Foundations for Individuals with Disabilities	
EDSP798	Special Problems in Special Education (EDSP798x Special Problems in Special Education)	
EDSP872	Theory and Empirical Design in Educational Research	
EDSP888	Apprenticeship in Special Education	
EDSP670	Single Subject Research Designs	
Research Methodology and Design Courses:		
EDMS646	General Linear Models I	3
EDMS651	General Linear Models II	3
Select three additional courses approved with advisor		9
Remaining Coursework:		
EDSP898	Pre-Candidacy Research	3
Electives		15
Dissertation Research Requirements		
EDSP899	Doctoral Dissertation Research	12
Total Credits		**60**

Special Education, Certificate of Advanced Study (C.A.S.)

The Certificate of Advanced Study (https://academiccatalog.umd.edu/graduate/programs/special-education-z905/) in Special Education is available to students who wish to take graduate courses beyond the master's degree. The minimum number of graduate hours is 60 (of which no more than 30 credits can be applied from another institution). The core of the program consists of special education courses in addition to other coursework within the university as approved by the student's adviser and the special education graduate faculty. The College of Education awards the certificate. http://www.education.umd.edu/CHSE/academics/degree_programs/agsEDSP.html

Speech Language Pathology (SPLA)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The M.A. program in Speech-Language Pathology is offered by the Department of Hearing and Speech Sciences. This program is available to post-baccalaureate students who have completed undergraduate pre-requisites in hearing and speech sciences/communication sciences and disorders. The SPLA program is an academically based, clinically oriented program designed primarily to prepare professional Speech-Language Pathologists. While information pertaining to communication disorders comprises the central focus of the degree, education about the normal processes of communication, as well as about research methods, is considered an integral part of the program.

Students completing the program are eligible to obtain the Certificate of Clinical Competence in Audiology (CCC-A) of the American-Speech-Language-Hearing Association, and licensure in the State of Maryland and other states. The program typically takes 2 years of study (5 semesters, including the intervening summer and winter semesters). Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree. Additionally, students can concurrently pursue a post-baccalaureate Bilingual Certificate Program in Speech-Language Pathology.

The department also offers two additional graduate degree programs. At the doctoral level, the Ph.D. in Hearing and Speech Sciences (p. 232) is offered, with concentrations in Hearing, Speech or Language (see HESP (p. 232) program code). Students applying to the Ph.D. program can opt to receive an MA in Speech-Language Pathology en route to the final degree. For this M.A-Ph.D. dual degree route, applicants should use the program code HESP when applying. Students who wish to pursue the MA degree and Ph.D. successively should apply to the MA program using the degree code SPLA. Second, a clinical doctorate in Audiology (p. 126) is offered, leading either to an Au.D. degree or a combined Au.D./Ph.D (see CAUD (p. 126)).

Financial Assistance

A limited number of graduate assistantships and fellowships are available through the Department. Assistantships that carry teaching, research or clinical responsibilities are awarded on a competitive basis. Students may also seek assistantships elsewhere on campus (such as through the Dean's office or through other departments) or fellowships sponsored by private foundations (e.g., American Speech-Language-Hearing Foundation). During most years, a limited number of scholarships are offered by Montgomery County Public Schools, which involve a post-graduation commitment to work for the school system.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/education/z069/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Supplemental Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/umdsupplementaryapplicationcaudsplahespcert.pdf)
- Completion of at least 60% of undergraduate pre-requisite courses prior to application. For a list of pre-requisite courses, please visit here (https://hesp.umd.edu/content/application-faqs/).

Admission to the M.A. program is on a very competitive basis. Each year, the Department receives approximately 250-300 applications for 25 anticipated spaces in the M.A. program in Speech-Language Pathology. Successful M.A. applicants typically have earned at least a 3.5 undergraduate GPA (with 3.7-3.8 being the average), and have strong GRE scores and letters of recommendation and a Resume. In addition to the Graduate School requirements, the Department requires applicants to furnish scores on the Graduate Record Examination. Admission to the M.A. and CAUD programs is solely confined to fall matriculation. All students must finish their undergraduate program-specific prerequisite classes before matriculating in the fall. Prospective applicants should note that decisions on admissions are made in early March. Only full-time students are admitted.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Requirements

- Speech Language Pathology, Master of Arts (M.A.) (p. 383)

Facilities and Special Resources

The Department's facilities include

1) Numerous modern research laboratories equipped to support research in the areas of: acoustic phonetics, psychoacoustics, cochlear implants, infant and adult speech perception, neuropsychology, language disorders, bilingualism, and language development, voice, fluency and electrophysiology.

2) The Hearing and Speech Clinic at UMCP. this clinic serves as the initial practicum site for all students pursuing clinical training. The Clinic includes multiple audiological test suites equipped for diagnostic testing, a complete hearing aid dispensary, a group rehabilitation room, and state-of-the-art equipment for behavioral and electrophysiological diagnostic testing, as well as hearing aid selection and fitting. Ten speech and language diagnostic and therapy rooms are integrated with observation areas; and an on-site language pre-school (LEAP, the Language-Learning Early Advantage Program), also equipped for observation.

All of the clinical and research facilities are potentially available for the conduct of student-directed research projects, or for student participation in faculty-initiated research projects. Additional research and clinical facilities are available in the Washington and Baltimore metropolitan areas. The Library of Congress, the National Library of Medicine and the libraries of various medical schools in the Washington-Baltimore area supplement the University's extensive libraries at College Park.

The Department of Hearing and Speech Sciences participates in the Neuroscience and Cognitive Sciences graduate program (see NACS; https://nacs.umd.edu/), the Comparative and Evolutionary Biology of Hearing Training Grant, and the Maryland Language Science Center (http://languagescience.umd.edu), and has ties to the Center for Advanced Study of Language (CASL); these connections afford students the opportunity to work with faculty in other departments at the University of Maryland, College Park, or at UMB.

Speech Language Pathology, Master of Arts (M.A.)

Thesis or Non-thesis option: 35 credits in addition to Practical Experience

The Department of Hearing and Speech Sciences offers the Master of Arts degree with major emphasis in Speech-Language Pathology with either the thesis or the non-thesis option. The Master's degree is required by national credentialing standards for individuals intending to practice as speech pathologists in schools, hospitals, rehabilitation facilities, hearing and speech centers or in other clinical settings. Academic course work, which includes a minimum of 35 credits, is supplemented by additional credit registrations in supervised clinical practica in the University Speech and Hearing Clinic and in selected outside clinical facilities so that the graduate will meet the academic and practicum requirements for the Certificate of Clinical Competence (C.C.C.) issued by the American Speech-Language-Hearing Association, and be eligible for licensure in the State of Maryland and other jurisdictions. The Master's degree program is accredited by the Council on Academic Accreditation, the national accrediting agency which oversees graduate programs in Speech-Language Pathology and Audiology. A full description of the Master's degree program is available at our web site, listed below. Students have the option of pursuing a Cultural and Linguistic Diversity Emphasis track as part of their M.A. degree.

Additionally, students can concurrently pursue a post-baccalaureate Bilingual Certificate Program in Speech-Language Pathology.

Student Affairs (HISA)

Graduate Degree Program
College: Education

Abstract

The Student Affairs Concentration is committed to the professional preparation of student affairs educators in higher education environments. The concentration is modeled and directed by the core values of student development, multiculturalism/social justice, leadership, scholarship and research, and ethical practices. We maintain a strong relationship with the Division of Student Affairs at the University of Maryland, College Park, which has a historic commitment to supporting scholar-practitioners. Master's graduates commonly work in settings such as student activities centers, academic advising offices, career services offices, offices of resident life, orientation, leadership programs, and multicultural centers. Doctoral graduates often become graduate faculty and/or senior administrators, directing such offices as academic advising centers, student activities, offices of student life, multicultural centers, assessment and research, learning support services, and career centers. Our location near Washington DC provides students with an abundance of opportunities to work in various higher education institutions, policy organizations, and associations in the area.

Student Affairs is a an area of concentration within The Higher Education, Student Affairs, and International Education (HESI) graduate program. In addition to Student Affairs, HESI programs offers concentrations in Higher Education and International Education Policy. Please only include one area of concentration on your application. Before applying students should familiarize themselves with each concentration area and choose the one that most closely fits their own particular needs and aspirations. The College of Education website (http://www.education.umd.edu/) offers descriptions of all the concentrations, faculty profiles and contact information, and is an essential resource for all applicants.

HESI graduate programs are part of a new department, the Department of Counseling, Higher Education, and Special Education. Previously, Student Affairs was part of the Department of Counseling and Personnel Services and Higher Education and International Education Policy were part of the Department of Education Leadership, Higher Education and International Education. HESI is committed to advancing the positive role education can have in society. Our faculty and students study core facets of the education system; this includes the functioning and impact of colleges and universities, student learning and development in higher education, and the enactment and implementation of K-18 and nonformal education policies in an international context. HESI offerings are characterized by a particular emphasis on social justice, diversity, policy, and system change. Our students and faculty are scholars, practitioners, change agents, and innovative leaders active in universities, as well as in national and international organizations and policy-making bodies. The program is a collaborative community that develops theory, conducts research and translates these to practice, and engages students, educators, and professionals in the advancement of education.

Graduate Degrees Offered: M.A., M.Ed., Ph.D

The Master's program is designed to meet the Council for the Advancement of Standards in Higher Education criteria for Master's programs with emphasis on the college student population and multicultural issues. The Council for the Advancement of Standards (CAS) is a cooperative effort of over 40 professional associations in Student Affairs Administration who have designed standards of preparation and practice for the profession.

Financial Assistance

The Department has a very limited number of merit-based fellowships and graduate assistantships available to students. Fellowships are awarded to doctoral students in March only for the following fall semester. A large number of assistantships are also available throughout campus, and many students regularly find assistantships in other departments and offices on campus. Assistantships are most often awarded in the spring for the following fall semester, but occasionally an assistantship may become available at another time of year.

Both fellowships and assistantships are awarded on a competitive basis. It is to the student's advantage to apply well before the published application deadlines and to submit a complete application package if they intend to be considered for a fellowship, assistantship, or other form of financial aid. It is a requirement that a student be admitted as a condition of eligibility.

International students' applications are not considered complete and are not reviewed by the Department until they have received clearance from the Office of International Student and Scholar Services (ISSS), which can take additional time. If you need information about ISSS clearance visit the ISSS website at http://www.umd.edu/ies. For more information on financial assistance, see the department web site: http://www.education.umd.edu/chse/admissions/finance (http://www.education.umd.edu/chse/admissions/finance/).

Supply Chain Management (BMSC)

ABSTRACT

Maryland Smith's Master of Science in Supply Chain Management program gives you the skills needed to efficiently manage the flow of goods from the beginning to end phases of a supply chain.

- Refine your problem-solving, analytical and communication skills as you simulate real supply chain scenarios.
- Use cutting-edge tools, including blockchain technology and SAS, to identify trends, forecast consumer behavior and improve operations.
- Position yourself to earn valuable credentials that will help you stand out in the job market, such as the Lean Six Sigma Yellow Belt and APICS certifications.

Financial aid is available to qualified students in the form of fellowships, graduate assistantships, and scholarships.

- Supply Chain Management, Master of Science (M.S.) (p. 387)

Facilities and Special Resources

The Office of Career Services (OCS) provides dedicated, professional support to help students launch their careers. The center links students directly to recruiters through a variety of services, including on- and off-campus recruitment and the online resume database. The OCS also participates in regional and national career forums and job fairs.

The Smith School is located in the Baltimore/Washington, D.C./Northern Virginia corridor. This region offers one of the highest concentrations of culture, diversity, and career opportunities in the country.

Supply Chain Management, Master of Science (M.S.)

Non-thesis only: 30 credits

The MS in Supply Chain Management program will prepare you to discover emerging opportunities and lead innovation on a global scale. Whether you're a recent graduate with an interest in how goods move around the world or a manager who would like to broaden your understanding of the global supply chain, our curriculum will prepare you for new and growing career options in this dynamic industry.

Survey and Data Science (online) (MPDS)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Joint Program in Survey Methodology (JPSM) blends together faculty with diverse disciplinary backgrounds all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys and data. The program's faculty primarily come from the University of Maryland, University of Michigan and Westat, supplemented by instructors from a number of federal statistical agencies. Many of these faculty are leading researchers and statisticians in the field of survey methodology, thereby providing an unparalleled educational experience to the students. JPSM's offerings include onsite PhD and Master's degrees as well as online Certificates and a Professional Master's degree.

Admissions
General Requirements

- Statement of Purpose: Complete a one-page essay describing relevant work experience, interest in survey and/or data science, and expected benefits of enrolling in this degree program. (Uploaded to the Statement of Purpose in the application.)
- Transcript(s): Should show previous coursework or knowledge in mathematical/applied statistics demonstrated by completion of 6 credits of applied statistical methods courses covering content from probability theory through basic regression techniques (including both OLS and logistic regression)

- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- CV/Resume
- Supplementary Application (https://gradschool.umd.edu/sites/gradschool.umd.edu/files/uploads/admissionsforms/umdsupplementaryapplicationmpds.pdf)
- Supplementary Application Two: Prerequisites
- Description of Research/Work Experience (optional)

***Visa Eligibility:** This program is not eligible for I-20 or DS-2019 issuance by the University of Maryland.

Applicants must have earned a four-year baccalaureate degree from a regionally accredited U.S. institution, or an equivalent degree from a non-U.S. institution. Applicants must have earned a 3.0 GPA (on a 4.0 scale) in all prior undergraduate and graduate coursework.

Application Deadlines

Type of Applicant	Fall Deadline	Spring Deadline

Application Process: www.gradschool.umd.edu/admissions (http://www.gradschool.umd.edu/admissions/)

Requirements

- Survey and Data Science, Master of Professional Studies (M.P.S.) (p. 388)

Facilities and Special Resources

Training will be provided by permanent and adjunct faculty in the University of Maryland's Joint Program in Survey Methodology. Online lectures will be conducted via accessible video conference systems and Webinar tools.

Students will be instructed that to fully participate, they will need to purchase a webcam and headset with a microphone, and have a reliable computer and Internet access. Recorded lectures will be posted online at announced times and will be available online at any time thereafter during the course. Weekly discussions or help sessions will be held at scheduled, fixed times once per week.

As officially admitted students to the University of Maryland, students in this program will have access to all University resources that are accessible in the online environment. Students in online programs are assessed an online student services mandatory fee which supports access to these University resources.

Survey and Data Science, Master of Professional Studies (M.P.S.)

Non-thesis only: 30 credits required

The online *International Master of Professional Studies in Survey and Data Science* will provide post-baccalaureate training for individuals interested in broadening their knowledge and understanding of the emerging field of data science, the conduct of sample surveys, practical applications of data analysis and survey methodology, and data management, along with the skills needed to communicate results.

Survey methodology, which is already an interdisciplinary field drawing upon statistics, sociology, economics, political science, informatics, public health (e.g., physical measures taken on respondents), and the geographic sciences (e.g., geographic information systems), is now intersecting with the big data world. As public and private organizations are increasingly combining various data sources, including survey data, for the purpose of decision making, the need for professional development in data generation, quality and analysis is on the rise. The online environment is convenient for working professionals who cannot easily travel to a traditional campus. In addition, courses will be shared with our international partners, providing a rich perspective to class discussions.

Survey and Data Science (SURV)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The Survey and Data Science PhD Program blends together faculty with diverse disciplinary backgrounds, all devoted to teaching state-of-the-art practices in the statistical and methodological aspects of surveys. The program's faculty come primarily from the University of Maryland, University of Michigan, and Westat, supplemented by instructors from a number of federal statistical agencies.

Both the Master of Science (program code: SUDS (https://academiccatalog.umd.edu/graduate/programs/survey-data-science-suds/)) and PhD in Survey and Data Science degree programs have three areas of concentration: Statistical Science , Social and Psychological Science and Data Science.

The **statistical science** area of concentration is designed for students who wish to specialize in areas such as sample design, estimation in complex samples, variance estimation, statistical measurement error models, and statistical adjustments for missing data.

The **social science** area of concentration is designed for students who wish to specialize in areas such as questionnaire design, design of interviewing systems, computer assistance in data collection, effects of mode of data collection, cognitive psychological insights into survey measurement, and efforts to reduce various nonsampling errors in data collection.

The **data science** area of concentration is designed for students who wish to specialize in the more computational aspects of survey methodology and research involving "big data," including data visualization, management and analysis of large and messy data sets, human-computer interaction in survey research, and machine learning algorithms.

The three areas of specialization share a set of courses in the core curriculum (https://jpsm.umd.edu/graduate/masters-sample-curricula/), including a two term survey practicum, a course in data collection methods, two terms of statistical methods, a two term course in total survey quality, and a survey design seminar.

Financial Assistance

Financial assistance is available in the form of competitive fellowships and graduate assistantships for teaching or research.

Fellowships in Support of Diversity and Inclusion (https://jpsm.umd.edu/graduate/phd-admissions/): Financial support option for Ph.D. students only. If you're interested in applying for the Fellowships in Support of Diversity and Inclusion in the Behavioral and Social Sciences (2017-18), please be sure to upload your materials under "4. Supplementary Application Two" when submitting your online admissions application.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/education/z069/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Description of Research/Work Experience (optional)

Applicants to the M.S. program are expected to hold a baccalaureate degree from a regionally accredited institution with a minimum of a 'B' average. Post-baccalaureate coursework and relevant work experience will also be used in the application evaluation. Entry to the statistical science concentration requires three undergraduate courses in calculus, one in linear algebra, and one in statistics. Entry to the social science concentration requires two undergraduate quantitative courses, at least one of which is in statistics, and at least two undergraduate courses in the social sciences. Entry to the data science concentration requires some background in computer science, with a minimum of two semesters of programming coursework, and also at least one semester of statistics.

Applicants to the Ph.D. program are expected to have a graduate degree in some field (such as statistics or psychology) that is related to survey methodology. Applicants must also demonstrate an appropriate quantitative background.

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	January 13, 2023
International Applicants

Requirements

- Survey and Data Science, Doctor of Philosophy (Ph.D.) (p. 390)

Facilities and Special Resources

SURV has the goal of offering training to all qualified students, regardless of the employment sector of interest to them. Several features of the program are designed with the working student in mind. Many class times are tailored to be compatible with the work day; a 12-month curriculum offers core courses throughout the year; and research experience requirements are integrated with work activities.

Courses have been offered at a Federal agency facility located in Washington, D.C. and interactive 2-way audio/video transmission equipment is used to transmit some courses between the College Park campus and the Ann Arbor campus of the University of Michigan,also - between College Park and the Census headquarters in Suitland, MD.

Survey and Data Science, Doctor of Philosophy (Ph.D.)

Students must participate in the Ph.D. seminar for four semesters by enrolling in SURV829 for a total of 12 credits. Students must also complete 12 credits of SURV899.

There are five major requirements for the Ph.D. Students must pass a qualifying examination (normally at the end of their first year) and a comprehensive examination (normally at the end of their second year). They must participate in the Ph.D. seminar for four semesters. They must meet a residency requirement which consists of spending at least two days per week at JPSM for a period of three semesters. Finally, they must complete a dissertation.

Course	Title	Credits

Sustainable Development and Conservation Biology (CONS)

Graduate Degree Program
College: Computer, Mathematical, and Natural Sciences

This program is not currently accepting applications. Please visit our graduate program listing (p. 20) for information on other programs.

Abstract

The principal objective of the CONS Program is to provide graduate training in Sustainable Development and Conservation Biology. CONS is an interdisciplinary and experiential approach to the problems of biological conservation in relation to economic development necessary to meet human needs.

The primary goals of the CONS program are:

1. to provide students with the knowledge and problem-solving skills necessary to research and communicate solutions to global environmental issues;
2. to expand the reach of biodiversity conservation and increasing sustainability;
3. to produce leaders and decision-makers in conservation science that are employed by academia, in government, or non-governmental agencies (NGOs); and
4. to provide a service role to the state of Maryland, the nation, local communities, and national and international NGOs and government agencies.

Specifically the program's objectives are to: provide broad, multidisciplinary training in the core areas of biological conservation, resource economics, and policy analysis; and explicitly link the conflicting topics of sound conservation of natural resources with sustainable development to meet human needs.

CONS graduates are well-prepared to address conservation issues for employers in the private sector and in local, state and national government posts; and to enter Ph.D. programs for further, specialized training.

CONS offers a dual-degree program (PPCN) with the School of Public Policy, wherein students receive both Master of Science and Master of Public Policy degrees. For more information on our degree programs and academic requirements, please see our website at http://cons.umd.edu/cons (http://cons.umd.edu/cons/)

Financial Assistance

Students applying to the Program may be nominated for graduate fellowships or may be supported by teaching or graduate assistantships. Fellowship and assistantship offers are made on the basis of past academic performance, financial need, and potential to contribute to the program.

Contact

Website: http://cons.umd.edu/cons (http://cons.umd.edu/cons/)

Keywords: Inter-disciplinary Training in Ecology, Resource Economics, Public Policy issues and Problem Solving related to Conservation of Biodiversity and the Continued Functioning of Natural Systems.

Relationships: Biological Sciences (BISI) (p. 85) Marine, Estuarine, and Environmental Sciences (MEES) (p. 281)

Admissions

This program is not currently accepting applications.

Requirements

- Sustainable Development and Conservation Biology, Master of Science (M.S.) (p. 391)

Facilities and Special Resources

The program is housed within the Department of Biology but is campus-wide in scope. We have strong connections with the School of Public Policy because ~30% of CONS students are enrolled in the dual degree PPCN program. We have strong connections with AREC because CONS students take a required course in natural resource economics. All CONS students complete an internship - either in a research lab, with an NGO, or with an agency - either in the DC area or further abroad. All CONS students select a faculty advisor relevant to the topic of their scholarly paper, which results in many interactions with environmental faculty in Anthropology, Entomology, Environmental Science & Technology, Latin American Studies, MEES, Public Policy, Plant Sciences and Landscape Architecture, and other departments.

Sustainable Development and Conservation Biology, Master of Science (M.S.)

This Master of Science Program was initiated in 1991 to provide new training and educational emphasis in the areas of sustainable development and conservation biology. The program applies an interdisciplinary and experiential approach to the challenges of biological conservation in relation to the economic development necessary to meet human needs. It includes four components:

1. core courses in the areas of ecology and conservation biology, resource economics, public policy, and multi-disciplinary problem solving;
2. elective courses from a wide array of disciplines;
3. an internship experience relevant to the student's career interests;
4. a Scholarly Paper - a rigorous, quantitative analysis of an Environmental Problem that synthesizes the student's coursework, internship experience, and career interests.

Course requirements for the program total 39 credits. This is intended to be a two-year program. Please contact the department for more information.

Systems Engineering (ENSE)

Graduate Degree Program
College: Engineering

Abstract

Students in the broadly-based, cross-disciplinary Master of Science in Systems Engineering (ENSE) program at ISR benefit both academically and professionally by:

- Being exposed to a wide range of systems engineering principles and software tools tailored toward support for visual modeling of systems, requirements engineering, system-level modeling, optimization and trade-off analysis, and human factors engineering.
- Becoming familiar with the financial and management issues associated with complex engineering systems.
- Acquiring a deep understanding of one particular application area.
- Becoming familiar for opportunities for leadership within the systems engineering profession.
- Designed with substantial industry input, the ENSE curriculum represents the University of Maryland's first multi-college graduate degree program involving the A. James Clark School of Engineering.

In addition to the technical management of systems projects, the ENSE program covers a wide range of topics, from systems definition, requirements and specifications, to systems design, implementation, and operation. Students specialize in one technical area, selected from computer and software systems, communication and networking systems, signal processing systems, control systems, manufacturing systems, operations research, transportation systems, and robotics. The ENSE program draws upon the extensive engineering, computer science and management experience of the of University of Maryland faculty. The program makes optimum use of the university's advanced facilities, including extensive libraries of numerical, symbolic, and visualization software, engineering workstations, and wireless communication networks.

Financial Assistance

Prospective and current students may seek support for their studies through graduate research assistantships with ISR faculty or graduate fellowships. Students currently working in industry, the military, or the government, who plan to pursue their graduate studies part-time, might ask their employers about tuition assistance. All applicants are encouraged to explore sources of external funding; a number of comprehensive Internet sites, such as fastweb.com, offer detailed information and application instructions.

Facilities and Special Resources

Modern laboratory, computation, and networking environments play an indispensable role in both the development and day-to-day operation of the research and education programs at the Institute for Systems Research. In all of the ISR laboratories, real-life experiments and associated research studies are enabled through the integrated design of automation and information engineering systems. Computational environments support advanced numerical simulation, sensing and control, and automated design of complex heterogeneous engineering systems. Networking environments play an indispensible role in enabling of interdisciplinary teams of faculty and students to work together. Prototype designs in both hardware and software have led to technological discoveries and patentable inventions.

ISR was established in 1985 as one of the first six National Science Foundation Engineering Research Centers (ERCs). Now a self-sustaining ERC, it is a permanent state-supported institute of the University of Maryland, within the A. James Clark School of Engineering. ISR faculty and graduate students perform basic and applied research with an emphasis on six major research directions: systems engineering methodologies and tools, global communications systems, sensor-actuated networks, next generation product-realization systems, societal infrastructure systems, and cross-disciplinary systems engineering education. ISR seeks a cohesive and balanced approach to the modeling, design, and control of large heterogeneous systems, bringing together a diversified team of outstanding engineers, scientists, and students to research, develop, and implement advances in systems engineering.

Systems Engineering, Master of Science (M.S.)

Thesis option: 30 credits
Non-thesis option (scholarly paper): 30 credits

Course	Title	Credits
Required courses:		
ENSE621	Systems Engineering Concepts and Processes: A Model-Based Approach	3
ENSE622	System Trade-off Analysis, Modeling, and Simulation	3
ENSE623	System Development, Verification, and Validation	3
ENSE624	Human Factors in Systems Engineering	3
ENSE626	System Life Cycle Analysis and Risk Management	3
Thesis or Non-Thesis Requirements		
Select one of the following options:		15
Thesis:		
Select three additional electives from one specialization area		
ENSE799	Systems Engineering Thesis	
Non-Thesis:		
Select five additional electives from no more than two specialization areas		
Complete a scholarly paper		
Specialization Options		
Select from the following specialization areas:		
Communication and Networking Systems		
Computer and Software Systems		
Control Systems		
Manufacturing Systems		
Operations Research		
Process Systems		
Robotics		
Signal Processing Systems		
Cybersecurity		
Transportation Systems		
Total Credits		**30**

General requirements for the master's thesis and non-thesis options are those of the University of Maryland Graduate School. All requirements must be completed within 5 years. The thesis option requires each student to obtain a total of 30 credit hours: 24 hours of coursework and six (6) hours for the thesis project to complete the program. The coursework includes 15 credits for the five core courses (three courses from the systems engineering core and two courses from the management core), and three (3) elective courses. The elective courses must be taken from one specialization area. The master's thesis project demonstrates the practical implications of systems engineering principles. The thesis project may be related to a practical industrial system, and must be supervised by the academic advisor.

The non-thesis option requires each student to obtain a total of 30 credit hours of coursework to complete the program (three courses from the systems engineering core, two courses from the management core, and five elective courses). The elective courses must be taken from not more than two specialization areas. In addition, students must complete a

scholarly paper. Expectations of the scholarly paper: While less detailed and complex than the thesis, the scholarly paper also contributes to systems engineering research. For example, a student might chose to write a literature review, identify and propose a solution to a systems problem encountered on the job, or prepare a systems case study. The scholarly paper is prepared under the supervision of the student's academic advisor. It also must be read by at least one additional ISR faculty member, and approved by the ENSE graduate director. No specific format is required by the Graduate School.

Systems Engineering (PMSE)

Graduate Degree Program
College: Engineering

Abstract

The Professional Master of Engineering program is designed to assist engineers and technical professionals in the development of their careers and to provide the expertise needed in the rapidly changing business, government, and industrial environments.

Our Systems Engineering program prepares professional engineers to coordinate the planning, development, and creation of systems in fields like aerospace, telecommunications, neuroscience, robotics, and more. Students pursuing this option may choose to use their electives to obtain a certificate in one of the many other programs offered by the Office of Advanced Engineering Education.

For domestic students the program can be completed on a part-time basis, however international students must be enrolled full time.

Financial Assistance

Students in this program pay a special tuition rate, which does not differ between residents and non-residents of Maryland. This rate is not fully covered by graduate assistantships, fellowships or the tuition remission. Additional graduate student fees are charged. **Tuition and fees are subject to change.**

This program does not provide departmental assistantships or fellowships. Loans, work-study and need-based grants for citizens and permanent residents with demonstrated financial need may submit a Free Application for Federal Student Aid (FAFSA) by appropriate FAFSA deadlines. For more information on this process, visit: https://fafsa.ed.gov/deadlines.htm.

Teaching and Learning, Policy and Leadership (TLPL)

Graduate Degree Program
College: Education

Abstract

The TLPL **Ph.D.** program gives students a choice of six related specializations:

1. Education Policy and Leadership,
2. Language, Literacy and Social Inquiry,
3. Mathematics and Science Education,
4. Minority and Urban Education,
5. Teacher Education and Professional Development, and
6. Technology, Learning and Leadership.

These specializations prepare doctoral students to assume a variety of roles, including scholars, researchers, policy analysts, teacher educators, instructional specialists, curriculum developers, teachers, education leaders and advocates. They also provide students with new opportunities for interdisciplinary study that emphasize scholarship in critical areas of education research, including teacher preparation, STEM fields of education, literacy and language acquisition, education policy and leadership. For more details please visit http://www.education.umd.edu/TLPL/academics/programs.html.

This section includes information about the Ph.D. program sponsored by the Department of Teaching and Learning, Policy and Leadership (TLPL). For information about our master's programs please see Teaching and Learning, Policy and Leadership (EDTL), and also Education: Curriculum and Instruction (EDCI).

Financial Assistance

The Department offers graduate assistantships to all newly admitted, full-time Ph.D. students. In addition, TLPL is able to award a limited number of Graduate School fellowships each year. These fellowships are awarded only to full-time graduate students. All Ph.D. applicants seeking to become full-time suddens will be considered for a fellowship—no additional application is needed.

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample

Applications for the Ph.D. program are accepted for the Fall only.

To be recommended for full admission to the TLPL Ph.D. program, a minimum undergraduate grade point average of 3.0 is required. A minimum graduate grade point average of 3.5 is required for applicants who have completed a graduate program. Students who do not meet one of these requirements, but show other evidence of outstanding potential, will be considered for provisional admission. Admission offers are limited to match available financial and faculty resources. Note that the GRE is not required. See the description of the TLPL programs and admissions overview on the TLPL website for more detailed information: http://www.education.umd.edu/TLPL/.

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	December 1, 2022
International Applicants	
F (student) or J (exchange visitor) visas A,E,G,H,I and L visas and immigrants	December 1, 2022

Program Website: https://education.umd.edu/academics/departments/tlpl (https://education.umd.edu/academics/departments/tlpl/)
Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Teaching and Learning, Policy and Leadership, Doctor of Philosophy (Ph.D.) (p. 397)

Facilities and Special Resources

Faculty and students in the department work closely with area schools, colleges, universities, associations and other education-related organizations. Extensive resources in the Washington, D.C., area, including embassies and other international organizations, provide exceptional opportunities for internships and field experiences, research, and materials to enhance formal course experiences. Facilities that support graduate study include the Center for Mathematics Education, the Center for Science and Technology in Education, the Multilingual Research Center, and the Maryland Equity Project. Additional facilities in the College of Education include the Educational Technology Services Center.

Teaching and Learning, Policy and Leadership, Doctor of Philosophy (Ph.D.)

The Ph.D. degree requires a planned sequence of 60 credits beyond a master's degree OR 90 credits beyond a bachelor's degree. In addition to major and elective courses, this includes 6 credits of integrative departmental core, a minimum of 12 credits in intermediate and advanced research methods, 30 credits within the student's specialization and 12 credits of dissertation research. After students have completed most of their course work, the equivalent of 12 hours of comprehensive examination is required prior to advancing to candidacy and approval of the doctoral dissertation committee. The comprehensive exam may take a variety of forms, such as take-home conceptual essays, literature reviews, or research papers. The Doctoral program integrates theory, research, and practice, and students are expected to demonstrate high standards of scholarship and the ability to engage in independent research. Your faculty advisor will help you develop a program of study that will help you fulfill your degree requirements, both coursework and examinations, that is consistent with Departmental and University guidelines. An oral examination in defense of the dissertation is required. It is strongly recommended that prospective doctoral applicants speak with program coordinators and faculty, and visit the Department and classes, to help determine if the Department's programs are appropriate to their academic interests and professional goals.

Students must complete a minimum of 60 credits beyond the master's degree. Coursework is outlined as follows:

Course	Title	Credits
Core Requirements		
TLPL794	Foundations of Educational Research I	3
TLPL795	Foundations of Educational Research II	3
Complete 12 credits in Intermediate & Advanced Methods [1]		12
Specialization Requirements

[1] Must include one qualitative methods course and one quantitative methods course

Technology Entrepreneurship and Corporate Innovation (M.P.S.)

Graduate Degree Program
College: A. James Clark School of Engineering

Abstract

The Master of Professional Studies in Technology Entrepreneurship and Corporate Innovation unites academic insights with startup incubator skills and resources to empower students to launch and grow technology ventures. Developed by the A. James Clark School of Engineering's Maryland Technology Enterprise Institute (Mtech), University of Maryland, the MPS in Technology Entrepreneurship is a fully online program designed to equip students with a conceptual understanding of the principles and action steps of effective new venture creation and launch.

The MPS in Technology Entrepreneurship and Corporate Innovation prepares students to apply newly gained insights and acquired competencies to real-world innovation management challenges across five major stages of the innovation value chain from strategy development and idea generation to commercial concept and product development and successful market establishment, as well as sustainable growth in various contexts.

The MPS in Technology Entrepreneurship and Corporate Innovation is committed to teaching the disciplines of entrepreneurial thinking that produce not just entrepreneurial inspirations but an entrepreneurial frame of mind. Courses are offered during 12-week terms. The 30-credit, 9-course graduate program may be completed in as little as 15 months by enrolling in two 3-credit courses in the first four 12-week terms and a 6 credit capstone course in the final term.

Offered through the convenience and flexibility of the online learning environment, the program enables student to:

- Think beyond current paradigms in order to discover innovation needs and to envision impact through strategic idea and concept development .
- Leverage ideas to create sustainable business models aligned with customer needs and wants in competitive marketplaces.
- Manage commercialization challenges and market launch efficiently and effectively.
- Navigate the legal aspects of product development and company launch and build sound financial and accounting strategies and practices.
- Know how to accelerate growth and create sustainable value through appropriate business development, risk management, financing, and value extraction strategies.

Telecommunications (ENTS)

Graduate Degree Program
College: Engineering

Abstract

The Master's in Telecommunications Program offers students a unique opportunity to engage in cross-disciplinary coursework from both the Electrical and Computer Engineering Department of the A. James Clark School of Engineering and the Robert H. Smith School of Business at the University of Maryland. This extraordinary combination culminates in a degree that prepares students for the broad range of rigors and issues that encompass the dynamic telecommunications industry.

The program covers several different areas including Information System Security, Wireless Communications, Networking, and Business and Management for the telecommunications industry. The program may be pursued either full-time or part-time. All courses are scheduled in the evening to suit working professionals, while some courses additionally offer daytime sections.

The program is designed around a core curriculum that provides a solid technical foundation and management background. The Master's in Telecommunications degree requires successful completion of 30 credits and a scholarly paper. Please visit our Degree Requirements (http://www.telecom.umd.edu/degree-requirements/) page for detailed information.

Students may choose from a wide range of electives to develop their interests and complement their career goals. Please visit our Course Descriptions (http://telecom.umd.edu/courses/) page for a detailed listing of our courses. In addition to the courses listed there, special topics electives are regularly offered. As our program keeps up with industrial trends, these courses focus on emerging, cutting-edge topics.

Please see our website, www.telecom.umd.edu (http://www.telecom.umd.edu), for the most current information.

Financial Assistance

Since the Master's in Telecommunications Program does not normally offer financial support in the form of graduate assistantships, many of our students find assistantships in other units, especially non-academic units, which do not have graduate students.

Requirements

- Telecommunications, Master of Science (M.S.) (p. 399)

Facilities and Special Resources

The ENTS program has a number of state-of-the art laboratory facilities where students enhance their hands-on skills and gain practical experience using, configuring and operating telecom lab equipment. (link: https://telecom.umd.edu/lab-facilities (https://telecom.umd.edu/lab-facilities/)). These labs include the Communications Laboratory, the Networking Laboratory, and the Telecommunications PC Lab,

Telecommunications, Master of Science (M.S.)

Non-thesis only (scholarly paper required): 30 credits

Requirements to earn the Master's in Telecommunications degree include completing 30 credit hours of course work, achieving a cumulative grade point average (GPA) of at least 3.0, and submitting a satisfactory scholarly paper. The 30 credits include eight required courses and two elective courses. All graduate students at the University of Maryland are required to maintain a 3.0 GPA each semester to remain in good standing.

Additional courses beyond the required courses must be approved by the Program Office and should not impede the student's progress towards degree completion. ALL courses taken at the University of Maryland count towards the student's cumulative GPA.

Course	Title	Credits
Required courses:		
ENTS622	Introduction to Digital Communication Systems	3
ENTS640	Networks and Protocols I	3
ENTS641	Networks and Protocols II	3
ENTS625	Management and Organizational Behavior in the Telecommunications Industry	3
ENTS630	The Economics of International Telecommunications	3
ENTS632	Telecommunications Marketing Management	3
ENTS635	Decision Support Methods for Telecommunication Managers	3
Select one additional approved core course		3
Electives		6
Students must also complete a scholarly paper by the time of graduation		
Total Credits		**30**

Terrorism Analysis (Z039)

Graduate Degree Program
College: Behavioral and Social Sciences

Abstract

The National Consortium for the Study of Terrorism and Responses to Terrorism (START) is dedicated to training and mentoring a new generation of scholars and analysts capable of examining questions related to the behavior of terrorists and terrorist groups and to the issue of how societies can best prepare for dealing with a terrorist threat or responding to a terrorist attack. START's Graduate Certificate in

Terrorism Analysis provides participants with advanced education on the causes, dynamics and impacts of international and domestic terrorism. Participants also develop the methodological skills necessary to pursue advanced research on and analysis of terrorism. The program consists of four required courses. Each course is offered once per calendar year, in an online, synchronous learning environment. The program can be completed in as little as 12 months to 24 months.

The program is appropriate for individuals interested in (and/or currently) working in fields related to intelligence analysis, homeland security analysis, or analysis of other relevant topic areas; and individuals interested in (and/or currently) conducting scholarly research on terrorism and responses to terrorism. To request a virtual information packet, set up a virtual information appointment, or receive information about an upcoming information session: please contact the Education team at education-start@umd.edu.

Financial Assistance

START does not currently provide financial assistance to Graduate Certificate students.

Requirements

- Terrorism Analysis, Post-Baccalaureate Certificate (P.B.C.) (p. 400)

Facilities and Special Resources

The START Consortium at the University of Maryland has pulled from its extensive experience in the field of terrorism research and analysis in order to formulate the Graduate Certificate curriculum. Students are drawn from the academic and professional worlds, which brings a range of perspectives to the virtual classroom. Its goal is to provide a well rounded and sophisticated approach to the subject matter and to cultivate a stimulating learning environment.

Terrorism Analysis, Post-Baccalaureate Certificate (P.B.C.)

12 credits required

Theatre Design (MFAT)

Graduate Degree Program

College: Arts and Humanities

Abstract

The School of Theatre, Dance, and Performance Studies offers a three-year Master of Fine Arts degree in Theatre Design, with concentrations in costume, scenic, lighting and multimedia. The degree offers superior students advanced training in design with on-campus and off-campus opportunities for creative activity. The program prepares the student to enter the professional theatre or to teach in the creative areas at colleges or universities. The School also offers MA and PhD degrees in theatre history and performance studies, and MFA degree in Dance, For more information visit the School website at http://tdps.umd.edu.

Financial Assistance

The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

Application Process: gradschool.umd.edu/admissions (https://gradschool.umd.edu/admissions/)

Requirements

- Theatre Design, Master of Fine Arts (M.F.A.) (p. 401)

Facilities and Special Resources

The School of Theatre, Dance, and Performance Studies is housed in the Clarice Smith Performing Arts Center at Maryland. This state-of-the-art facility includes the 650-seat Ina and Jack Kay Theatre, the 200-seat Robert and Arlene Kogod Theatre and the 100-seat Cafritz Theatre.

The campus is within a few miles of the John F. Kennedy Center for the Performing Arts, Arena Stage, the National Theatre, Ford's Theatre, The Shakespeare Theatre at the Lansburgh, and the Olney Theatre Center, which are among more than 80 professional area theatres. Two of the greatest libraries in the world, the Library of Congress and the Folger Shakespeare Library, are in close proximity to campus. Students also make regular use of the Smithsonian Institution, the Federal Theatre Project Archives, the National Archives, and more than 50 specialized libraries and institutions in the Washington metropolitan area.

Theatre Design, Master of Fine Arts (M.F.A.)

Total Credits: Minimum of 60 credits required

Student designers must present and pass three formal design portfolio reviews, at the conclusion of their second, fourth, and sixth semesters in the program. In addition, portfolio interviews take place at the end of the first, third, and fifth semesters. Design portfolios include studio projects as well as fully realized academic and professional scenic, costume, or lighting designs. The fourth semester portfolio review will include an evaluation of a pre-thesis design project (usually a fully realized design, but may include independent study design projects). The pre-thesis design project, in preparation for the thesis, will include a written component. Successful completion of the portfolio reviews will result in the assignment of the thesis project.

Portfolio requirements

Successful completion of the portfolio review will result in the assignment of pre-thesis (after the first year) and thesis (after the second year) projects. Upon completion of each portfolio review, the candidate

will receive a formal letter indicating a grade of pass, conditional pass, or fail. In the event of a conditional pass or fail, the faculty may require the candidate to complete additional projects or coursework.

First year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Craft projects from foundation component courses
- Production photographs illustrating realized craft or design work for projects produced by the School or by professional theatres
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)

Second year portfolio should include:

- A current resume
- Projects from primary and secondary design emphasis courses
- Production photographs illustrating realized craft or design work for projects produced by the School or professional theaters
- Supporting materials, drawings, and photographs that demonstrate effective and productive work as a design assistant (academic or professional projects)
- A written design analysis and supporting research material for the pre-thesis project that should follow the form of the first chapter of the written component of the thesis project

For their thesis, M.F.A. design students create and realize a scenery, costume, or lighting design for a major production. Each student must meet all deadlines for that production and the design and execution must be acceptable to all members of her/his thesis committee. The written component of the thesis includes all relevant visual material, including research images, drawings, renderings, and production photographs.

M.F.A students typically design three or four productions in our main season during their three years in residence. The first year of study includes several assistant design assignments. We plan our productions at least one semester in advance; therefore, there is a good possibility that students will be designing their first main season production in the spring semester of the first year. We produce five main season shows and approximately five student produced productions per academic year. M.F.A. students also have the opportunity to work with our award-winning faculty on professional projects within the Washington metropolitan theatre community, as well as work in regional theatres, off-Broadway and Broadway.

An exciting feature of the MFA in Design program in the School of Theatre, Dance, and Performance Studies is the annual public portfolio exhibit and review. Each year the Cafritz Theatre is transformed into a gallery where all MFA Design students display their set, costume, and lighting designs.

A multi-day affair, the first day is open to the general public when professional designers and directors from the Washington, DC theatre community have an opportunity to respond to student work and where students often make important professional contacts. The second day involves longer one-on-one critique sessions with the nation's leading designers and directors.

In the past few years our respondents have included designers and directors such as **Paloma Young, Donyale Werle, Jeff Croiter, Ming Cho Lee, John Lee Beatty, David Korins, Ken Posner, Linda Roethke, Serge Seiden, Joy Zinnoman, John Iacovelli, Aaron Posner, James Kronzer, Mary Zimmerman, Jim Ingalls, and Anna Kuzmanic.**

Curriculum Requirements

Students choose from one of the following specializations: Costume Design, Scene Design, Lighting Design, or Projected Design. Teaching Assistants should complete one credit of THET606. Course requirements are as follows:

Course	Title	Credits
Core Requirements		**30-36**
THET465	History of Fashion for the Theatre

Lighting Design		
Projected Design		

Theatre and Performance Studies (THPF)

Graduate Degree Program
College: Arts and Humanities

Abstract

The School of Theatre, Dance, and Performance Studies offers a Master of Arts in Theatre and Performance Studies and Doctor of Philosophy in Theatre and Performance Studies (THPF). For more information visit the School website at http://tdps.umd.edu/programs/phd-theatre-and-performance-studies (http://tdps.umd.edu/programs/phd-theatre-and-performance-studies/). The School also offers graduate degrees in MFA in Theatre Design and MFA in Dance.

The M.A. program is designed to enhance and develop students' practical, historical, and critical knowledge of theatre so that they may go on to graduate work in Ph.D. or M.F.A programs, or upgrade their skills for high-school teaching. The School's application deadline for best consideration for the MA program and the PhD program is January 15. Applications fully submitted by February 1 may also receive consideration on a space available basis.

The doctoral program in Theatre and Performance Studies is an interdisciplinary course of study that prepares students for careers as educators, professors in higher education, publishing scholars, and cultural critics. The program offers a rigorous exploration of both Theatre

History and Performance Studies through the critical and theoretical analyses of historical archives, dramatic and performance texts, and cultural behavior as performance. Applicants who do not hold an undergraduate or graduate degree in theatre (or an equivalent field), may be required to take preparatory coursework prior to admission into the Ph.D. program.

Financial Assistance

The School nominates outstanding applicants for competitive University fellowships. Teaching assistantships are available to a limited number of students. The Graduate program head will discuss these with accepted students at the time of acceptance.

Theatre and Performance Studies, Master of Arts (M.A.)

Thesis option: minimum of 36 credits
Non-thesis option: minimum of 36 credits

The Department offers both the thesis and non- thesis options. All students undertaking the M.A. degree must pass a six-hour comprehensive examination on theatre history and criticism, performance and directing, and design and technical theatre. Please contact the Head of History/Theory to get more details.

Course	Title	Credits
Required courses:		
THET600	Introduction to Graduate Research Methods	3
THET606	Teaching Theatre [1]	1
Thesis or Non-Thesis Requirements		
Select one of the following options:		32
Thesis:		
THET799	Master's Thesis Research	
Non-Thesis:		
Students are required to submit two article-length essays to the Non-thesis Examining Committee		
Total Credits		**36**

[1] All Teaching Assistants must take THET606.

Students should consult with their advisor to determine the remainder of their coursework.

Theatre and Performance Studies, Doctor of Philosophy (Ph.D.)

Students are required to complete a set of core courses, electives, and dissertation research. In addition, students must fulfill the production/performance requirement.

Members of the student's comprehensive examination committee write the questions. Area questions are designed to interrogate both literary and performance issues. Selected by the student and her/his advisor, the examination committee consists of the advisor and at least two members of the core and/or affiliate faculty. Exams may be taken one of two ways: in-house or take home with an oral defense. The examinations are based on course work and reading lists. All students are responsible for a core reading list of approximately 15-20 books and articles. In addition to the core reading lists, each student will be responsible for developing a reading list of no less than 50 books and articles reflective of the student's dissertation topic and tailored to his/her interests as they relate to the examination areas. Students devise these lists in consultation with the members of her/his committee. Students have two opportunities to pass the comprehensive examinations. Please note that the examinations are only offered at specific times each semester and that students must plan to take the comprehensive exams during these times.

All doctoral students will engage in original research (in some cases, complemented by appropriate non-print documentation), the result of which is a book-length manuscript. In consultation with her/his advisor, the student selects a five-member dissertation committee. At least three committee members must be permanent members of the University of Maryland Graduate Faculty and each committee must have a chairperson who is a permanent member of the graduate faculty. Please note that the Dean's Representative on the committee may not be a member of the History/Theory Area, but must be from another department at the University of Maryland. In rare cases, students will need an expert in an area not represented by the History/Theory Faculty. Students are reminded that these members must be present at the defense and that the Department cannot guarantee to fund the travel of committee members from other universities.

Each doctoral student must defend her/his dissertation orally as a requirement in partial fulfillment of the doctoral degree. Dissertations must follow the guidelines established by the University. Please see the Graduate Student Handbook (available online through the Graduate School) for guidelines on committee selection and defense procedures.

Course	Title	Credits
Required courses:		
THET606	Teaching Theatre [1]	1
THET700	Introduction to Graduate Research Methods	3
THET711	Critical Theory	3
THET712	Historical Research Methods and Historiography in Theatre	3

Dissertation Research Requirements		
THET899	Doctoral Dissertation Research	12
Total Credits		**43**

[1] All teaching assistants should complete one credit of THET606.

Toxicology, Master of Science (M.S.)

The M.S. program in Toxicology does not directly admit students.

Toxicology, Doctor of Philosophy (Ph.D.)

The PhD in Toxicology requires a minimum of 46 credits, in addition to 12 credits of TOXI899. Students are also required to complete a minimum of 12 credits in two areas of specialization (six credits in each), included in the 46 credit total.

The PhD program consists of a minimum of 46 credit hours of graduate courses, in addition to 12 credits of Doctoral Dissertation Research. The two areas of specialized focus could be in areas like Advanced Epidemiology/Biostatistics, Analytical Chemistry, Pharmacology, Pathology/Immunology/Microbiology, or Environmental Science/Ecology/Climate. Program requirements for a PhD degree in toxicology also include successful completion of a written and oral comprehensive exam in the format of an NIH research proposal, oral defense of a written dissertation research proposal, and a minimum of 12 credits of PhD dissertation research, written dissertation, and a final dissertation defense. The program can be completed on either a full- or part time basis. It is anticipated that students will complete more than the minimum number of credits.

Translation (MPTR)

Graduate Degree Program
College: Arts and Humanities

This certificate is not currently accepting applications. Please visit the department website for information on other certificates.

Abstract

The Master of Professional Studies in Translation (MPS in Translation) is designed to equip students with the required competencies to compete successfully for work as specialized translators, project managers, or administrators of language services.Example skills include the translation of specialized texts in health, legal and political settings, including the translation of documents and websites for major corporations, international organizations, and government ministries.

The MPS in Translation is a two-year, 41 credit program. In the first year, you begin to develop high-level skills in translation in specific domains (specialized written texts). In the program's second year, you build on these fundamental skills, specializing in written communication for governmental and international organizations.

Requirements

- Translation, Post-Baccalaureate Certificate (P.B.C.) (p. 406)

Translation, Post-Baccalaureate Certificate (P.B.C.)

The Graduate Certificate of Professional Studies in Translation (GCPS in Translation) is designed to equip you with the knowledge and skills required for entry-level work in the translation profession. Examples include serving as translators of general texts for information purposes and specialized texts in subject areas wherein you hold advanced qualifications (e.g., Master of Arts degree, and/or significant professional expertise). You will be grounded in the tenets of the profession, including professional conduct and ethics and guided through the steps needed to advance your professional skill set.

The GCPS in Translation is a 21-credit one year program, offering instruction in the fundamental skills of translation and includes the theoretical fields of translation studies, the translation professions, intercultural communication, and background knowledge in at least one of the following communication contexts: political communication, legal communication, or health communication.

Urban Agriculture (Z091)

Graduate Certificate Program
College: Computer, Mathematical, and Natural Sciences

ABSTRACT

The Graduate Certificate in Urban Agriculture (GC-UA) is a 12-credit graduate program that can be completed in twelve months of continuous study. The GC-OSA focuses on the growing of plants and the raising of animals within and around cities. Students acquire the necessary skills to maintain plants and beneficial insects in and around these settings. The program also focuses on the urban ecosystem and urban policies and plans.

Urban and Regional Planning and Design (URPD)

Graduate Degree Program
School of Architecture, Planning and Preservation

Abstract

The School of Architecture, Planning and Preservation offers a Doctoral Program, the Ph.D. in Urban and Regional Planning and Design. Participating programs include Urban Studies and Planning, Architecture, Historic Preservation, Landscape Architecture, and The National Center for Smart Growth Research and Education. The program prepares students to teach at the university level in departments of Urban Planning, Architecture, Historic Preservation, Real Estate Development, or Landscape Architecture, as well as qualifies graduates to conduct

research and participate in high-level decision-making in the public, private, and nonprofit sectors. Intimate and highly competitive, the Ph.D. program offers students a tailored Ph.D. experience and the flexibility to bridge a number of disciplines related to the built environment, including urban planning, design, historic preservation, and real-estate development. Our nationally renowned faculty, the affiliated National Center for Smart Growth Research and Education, and proximity to the architecturally rich, historically significant, and diverse urban fabric of the Mid-Atlantic region make the University of Maryland an exciting place to study urban planning, design, and historic preservation.

Financial Assistance

The School of Architecture, Planning, and Preservation, and The National Center for Smart Growth Research and Education together anticipate three research assistantships available to Doctoral students. Compensation for assistantships includes tuition remission for up to 10 credit hours per semester, plus a stipend. For more information contact the Doctoral Program. Students may also find financial support on faculty research projects and teaching possibilities in the undergraduate and master's programs.

Admissions

GENERAL REQUIREMENTS

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

PROGRAM-SPECIFIC REQUIREMENTS

- Letters of Recommendation (3)
- CV/Resume
- Portfolio PDF Upload (optional)
- Writing Samples (two required, up to one more optional)
- Description of Research/Work Experience (optional)
- Graduate Record Examination (GRE) (optional)
- Master's degree in a related field.

The program is highly selective and individualized. Approximately five students will be admitted each year. Students admitted to the Ph.D. program will be expected to have completed a Master's degree in a related field, including but not exclusively urban planning, architecture, historic preservation, or landscape architecture. Students are expected to enter the Ph.D. program with two semesters of graduate-level quantitative research methods. These courses can be taken after the entrance to the program and prior to their advanced methods course.

Requirements

- Urban and Regional Planning and Design, Doctor of Philosophy (Ph.D.) (p. 409)

Urban and Regional Planning and Design, Doctor of Philosophy (Ph.D.)

Doctoral students are required to complete 39 credits, including 12 credits of URSP899.

The Ph.D. in Urban and Regional Planning and Design is a 39-credit program. The program is highly selective and individualized. Approximately five students will be admitted each year. Adequately prepared students will generally need four semesters of formal course work leading to comprehensive exams and all students are required to spend a minimum of two years in residence. The program is designed as a full-time program to be completed in four years.

Students admitted to the doctoral program will be expected to have completed a master's degree in a related field including, but not exclusively, urban planning, architecture, historic preservation, real estate development, or landscape architecture. Students are expected to enter the Ph.D. program with two semesters of graduate level quantitative research methods. These courses can be taken after entrance to the program and prior to their advanced methods course.

Comparative Biomedical Sciences (VMSC)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Department of Veterinary Medicine is under the **College of Agriculture and Natural Resources (AGNR)** at the **University of Maryland** and is home to the Comparative Biomedical Sciences (CBSC) Graduate Program (code: VMSC). The Department of Veterinary Medicine is the Maryland Campus of the **Virginia-Maryland College of Veterinary Medicine**.

The program offers both **Master of Science (M.S.)** and **Doctor of Philosophy (Ph.D.)** degrees. Members of the Comparative Biomedical Sciences Graduate Program faculty specialize in a wide range of research interests in infectious diseases and zoonoses, including cell and molecular biology, microbiology, immunology, virology, and poultry health management and disease prevention.

Financial Assistance

A number of graduate assistantships are available and awarded to candidates with strong academic records.
Teaching Assistantships, Research Assistantships, Scholarships, and Fellowships are available on a competitive basis. Research Assistantships (RAs) are 12-month appointments and Teaching Assistantships (TAs) are 10-month appointments. Benefits for each assistantship include stipends, ten credits of tuition remission per semester, and health benefits. Generally, student assistantships are offered for two years for an M.S. degree and four years for a Ph.D. degree.

Sources of funding include the department; Maryland Agricultural Experiment Station; Maryland Cooperative Extension; College of Agriculture and Natural Resources; Graduate School open-nomination and block grant fellowships (for recruitment of new students only); University diversity fellowships; endowed fellowships; and funds from faculty research contracts and grants. Inquiry about the stipends can be made to the VMSC Graduate Program.

Facilities and Special Resources

The Avrum Gudelsky Veterinary Center, the University of Maryland home of the VMRCVM, lies in the heart of Maryland's thriving biotechnology community and is near Maryland's major university research campuses and government laboratories, including the USDA Beltsville Agriculture Research Center, the National Institutes of Health, and Walter Reed

National Military Medical Center. The Center contains 32,000 square feet of research and support laboratories, including animal care facilities. Over 10,000 square-foot research laboratories are fully equipped with state-of-the-art facilities for research on cell biology, molecular biology, microbiology, virology and immunology, including cell culture facilities, ZEISS LSM 800 confocal microscope, fluorescence activated cell sorter, flow cytometer, the Illumina MiSeq System for next-generation sequencing, fluorescence microscopes, Elispot/Fluorospot Reader, and a sophisticated electron microscope suite. Approximately 18,000 square feet of space comprises Biological Safety Level (BSL) 2 and BSL-3+ facilities and ABSL2 and ABSL3 suites for laboratory animals. The poultry unit has 15 rooms, each equipped with 20 poultry isolators to contain any infectious pathogens. The animal facility has a fully equipped necropsy room designed for postmortem analysis.

The Laboratory for Biological Ultrastructure in the Department of Biology is equipped with a transmission and scanning electron microscope, a confocal microscope, ultramicrotomes, and equipment for freeze-fracture studies. The Department of Cell Biology and Molecular Genetics maintains imaging core, genomics core, flow cytometry, and proteomics core. The Fischell Department of Bioengineering maintains the BioWorkshop in A. James Clark Hall at the University of Maryland, which offers access to an array of cutting-edge scientific instruments spanning from biological imaging, cellular and biochemical analysis to biomaterial characterization, and histology. The University of Maryland has the Department of Laboratory Animal Resources (DLAR), a support unit for animal-based research and teaching. Extensive library facilities are available on campus. In addition, the College Park campus is close to the National Agricultural Library (NAL) and the National Library of Medicine (NLM). The Library of Congress and the National Archives, along with several other libraries of biomedical research and academic institutes, are located within a short driving distance.

Computer facilities at the University of Maryland are outstanding. The department provides computer access to all faculty and graduate students. Students are provided with e-mail accounts and free Internet access. The campus maintains both Unix and mainframe systems, and access to supercomputers for specific research projects. Software for graphics, modeling, statistics, and the analysis of molecular data is readily available.

The College Park campus is also ideally situated near a number of federal agencies involved in veterinary medical sciences. Collaborative initiatives are underway with the U.S. Food and Drug Administration's Centers for Veterinary Medicine (CVM) and Food Safety and Applied Nutrition (CFSAN); U.S. Department of Agriculture's Animal and Plant Health Inspection Services (APHIS), Food Safety and Inspection Service (FSIS), Agricultural Research Service (ARS), and Beltsville Agriculture Research Service (BARC); National Institutes of Health (NIH); Walter Reed National Military Medical Center; World Bank; and Pan American Health Organization (PAHO). Scientists from some of these agencies have adjunct appointments with the College of Veterinary Medicine and participate on students' graduate committees.

Comparative Biomedical Sciences, Master of Science (M.S.)

Applicants with a minimum of B.S. or equivalent degree in biological sciences may be admitted to the Master of Science (M.S.) program. The CBSC M.S. program requires a minimum of 30 credits of coursework beyond the B.S. degree, including 6 credits of Master's Thesis Research (VMSC799; credits greater than 6 of this course will not be counted for degree requirement). A minimum of 12 credits must be earned in coursework at the 600 level or higher. Students must maintain an overall GPA of 3.0 or better in courses taken for graduate credit.

Master program requirements

The plan of study must be approved by the Advisor and the Graduate Admissions and Examination Review Committee before the end of the first semester of enrollment. By the end of the second semester, the student should have an Advisory Committee formed. A thesis based on independent and original research must be submitted to the CBSC Program and the Graduate School. The student must present the thesis in a public seminar and pass a final oral examination given by the Advisory Committee.

The non-thesis Master of Science degree option is available only for doctoral students who wish to leave the graduate program without completing the Ph.D., but have finished all course work required. External applications for the non-thesis master's option are not accepted. One scholarly paper must be written and approved by the student's Advisor.

Course	Title	Credits
BISI712	Responsible Conduct of Research for Biologists	1
VMSC698	One Health Seminar	4
VMSC758	Journal Club in Comparative Biomedical Sciences (Journal Club in Comparative Biomedical Sciences)	4
VMSC799	Thesis Research	6

VMSC660	Emerging and Re-emerging Infectious Diseases	
VMSC670	Molecular Epidemiology of Infectious Diseases (Molecular Epidemiology of Infectious Diseases)	
VMSC689	Use of Genomics and Proteomics in Infectious Disease	
VMSC720	Viral Pathogenesis	
VMSC760	Immunology of Infectious Diseases	
Additional Credits (from restricted electives or other courses with advisor's approval)		5
Total Credits		**30**

Comparative Biomedical Sciences, Doctor of Philosophy (Ph.D.)

Applicants with a minimum of B.S. or equivalent or a higher degree in biological or medical sciences may be admitted to the Doctor of Philosophy (Ph.D.) program. Students must complete the course requirements of 24 credits (for candidates with B.S. or equivalent degrees) or 12 credits (for candidates with MPH, M.S. or a D.V.M., M.D. or equivalent degrees) in addition to a minimum of 12 dissertation research credits (VMSC899). Students must maintain an overall GPA of 3.0 or better in courses taken for graduate credit per Graduate School policy.

Doctoral program requirements

The plan of study must be approved by the Advisor and Chair of the Graduate Admissions and Examination Review Committee by the end of the first semester of enrollment. By the end of the fourth semester, a student should have completed their core course requirement and present a dissertation research proposal to the Advisory Committee. For

entering Ph.D. candidacy, a student must pass a qualifying examination (written and oral) satisfactorily by the end of the sixth semester. A dissertation based on independent and original research must be submitted to the CBSC Program and the Graduate School. The student must present the dissertation in a public seminar and pass a final oral examination given by the Advisory Committee.

For Students with B.S. or Equivalent:

Course	Title	Credits

Veterinary Medicine (VMED)

Graduate Degree Program
College: Agriculture and Natural Resources

Abstract

The Virginia-Maryland Regional College of Veterinary Medicine offers a four-year full-time program (curriculum) leading to the Doctor of Veterinary Medicine (D.V.M.) degree. The first three years are taught at Virginia Tech University in Blacksburg, VA in a case-based and traditional lecture/laboratory format. At the end of the first year, students choose a track - small animal, food animal, equine, mixed species and public/corporate veterinary medicine. Considerable flexibility exists for a student to tailor their curriculum to meet individual needs and interests. The senior year (clinical) is 12 months in length. For detailed information on the Doctor of Veterinary Medicine (DVM) program, please visit the Virginia-Maryland Regional College of Veterinary Medicine at: http://www.vetmed.vt.edu/

Requirements

- Veterinary Medicine, Doctor of Veterinary Medicine (D.V.M.) (p. 412)

Veterinary Medicine, Doctor of Veterinary Medicine (D.V.M.)

VA-MD Vet Med's DVM professional curriculum will provide a balanced educational foundation for the varied career opportunities available to veterinary graduates. Our program is designed to develop competent and confident graduates capable of entering the profession with day-one knowledge, skills, and abilities.

- The first two years focus on developing core knowledge, skills, and attributes across the species through integration of the basic and clinical sciences.

- Professional development is fostered through weekly problem-solving sessions focused on clinical reasoning skills.
- At the end of the second year, students enter clinics for the first time and complete five clinical rotations over the summer. This immersion in a workplace-based environment allows students to apply their gained knowledge and skills with real-world experiences.
- In the third year, students return to the classroom to reinforce and build on their acquired knowledge and skills and to focus on an area of interest by way of five tracking options: Small Animal, Equine, Food Animal, Mixed Animal, and Public/Corporate.
- Students finish the last nine months of the DVM program with 12 clinical rotations.

The DVM curriculum is constantly monitored and reviewed by the college's Curriculum Committee and updated as trends in veterinary education emerge.

For more information, please visit: https://dvm.vetmed.vt.edu/about-dvm-program/dvm-curriculum.html (https://dvm.vetmed.vt.edu/about-dvm-program/dvm-curriculum.html)

Wireless Communications (Z120)

Graduate Certificate Program
College: Engineering

ABSTRACT

The aim of the Graduate Certificate in Wireless Communications is to encourage the students to acquire specialized knowledge and skills in the technical area of wireless communications. We have positioned this Certificate to allow the students to further deepen their understanding of wireless communication technologies, and become specialists in this sub-field of telecommunications. While going through the certificate program, students will also acquire/develop additional practical problem-solving and analytical skills and become proficient in using one or more industry-standard RF and wireless network design and testing tools. Typical industry positons our students take after graduation that would benefit from this Certificate include: RF engineer, wireless test engineer, RF analyst, and specialist RAN engineer. (RF stands for radio frequency, and RAN stands for Radio Access Network.)

Women, Gender, and Sexuality Studies (WMST)

Graduate Degree Program
College: Arts and Humanities

Abstract

Women, Gender, and Sexuality Studies offers an interdisciplinary and integrative program of study leading to the Master of Arts and Doctor of Philosophy degrees. Students will be expected to: develop a thorough grounding in women, gender, and sexuality studies scholarship; acquire an understanding of gender, race, and sexuality as categories of analysis; analyze and assess theories about the role of gender in systems of hierarchy and its intersection with other categories of difference, such as race, ethnicity, religion, class, sexuality, disability, location, and age; develop competence in feminist, queer, and critical race theories, research methods, and pedagogy, including transnational and global issues; and achieve competence in a selected area of specialization.

Financial Assistance

An initial funding offer is provided at the time of admission. Students who enter without a Master's degree are typically guaranteed funding for five years, while students who enter with a Master's degree are typically guaranteed four years. Funding offers typically combine one year of Departmental Fellowship with Graduate Teaching Assistantships for the remaining time. Funding is contingent on satisfactory progress towards the degree and completion of benchmarks.

Admissions

General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (3)
- CV/Resume
- Writing Sample: 10 pages maximum
- Writing Sample Two (optional)
- Description of Research/Work Experience (optional)

For more admissions information or to apply to the program, please visit our Graduate School website (https://gradschool.umd.edu/admissions/application-process/step-step-guide-applying/).

Application Deadlines

Type of Applicant	Fall Deadline
Domestic Applicants	
US Citizens and Permanent Residents	November 15, 2022
International Applicants	
F (student) or J (exchange visitor) visas; A,E,G,H,I and L visas and immigrants	November 15, 2022

Requirements

- Women, Gender, and Sexuality Studies, Doctor of Philosophy (Ph.D.) (p. 415)
- Women, Gender, and Sexuality Studies, Master of Arts (M.A.) (p. 414)

Facilities and Special Resources

Resources for research in the College Park and Washington D.C. area are unsurpassed. The University's libraries hold around 2,500,000 volumes. In addition to the outstanding holdings of the Library of Congress, the area also offers the specialized resources of the National Archives and Archives II (located on the grounds of the University of Maryland); the Smithsonian Institution; the National Museum of Women in the Arts; and a broad array of public policy organizations and "think-tanks" plus the many research and policy institutes that include gender, race, and sexuality issues as part of their agenda. We are also member institution of the Consortium of Universities of the Washington Metropolitan Area, a unique collaboration of D.C. area colleges and universities that promotes cross-institutional learning.

One of the leading scholarly journals in our field, *Feminist Studies*, is located on our campus. Some graduate students may be able to broaden their experience and enhance the applicability and marketability of their coursework by undertaking internships with the journal.

The University of Maryland Consortium on Race, Gender and Ethnicity offers grant-getting potential and otherwise supports the research endeavors of faculty and graduate students in these fields. Grants funded through the Consortium will provide additional funding for Women's Studies graduate students and invaluable research experience. High enrollment demand in Women's Studies introductory core courses provides yet another opportunity for funding graduate students' programs of study with teaching assistantships.

Women, Gender, and Sexuality Studies, Master of Arts (M.A.)

Thesis option: 31 credits
Non-thesis option: 31 credits

Women, Gender and Sexuality Studies does not have a stand-alone M.A. program. However, on the way to a Ph.D., students who have completed the appropriate coursework may request conferral of a master's degree. Students will begin the graduate program with a sequence of courses that include the required core interdisciplinary courses for a total of 31 credits and finish with either the completion of a thesis or the 'general' examination. This portion of the program stresses interdisciplinary Master's courses offered in the Harriet Tubman Department of Women, Gender and Sexuality Studies.

Course	Title	Credits
Required courses:		
WMST601	Approaches to Women's Studies I	3
WMST602	Approaches to Women's Studies II	3
WMST618	Feminist Pedagogy	3
WMST621	Feminist Theories and Women's Movements: Genealogies	3
WMST628	Women's Studies Colloquium	3
Select 16 additional credits		16
Thesis or Non-Thesis Requirements		
Select one of the following:		
Thesis Option:		
	Students must pass the General Exam and pass the 2-year paper with an oral defense	
Non-Thesis Option:		
	Students must pass the General Exam	
Total Credits		**31**

Women, Gender, and Sexuality Studies, Doctor of Philosophy (Ph.D.)

Students entering with a bachelor's degree are required to complete 27 credits of required courses and 27 credits of electives for a total of 54 credits. Students entering with a master's degree are required to complete 27 credits of required courses and 7 credits of electives.

Students in the program explore feminist and queer theories, methodologies, and genealogies through coursework within the department, then draw upon resources across UMD and the DC area to build an individualized course of study as they ready themselves for dissertation research. With the guidance of faculty, students work through our series of benchmarks in order to gain a strong grounding in our field and then develop their specific trajectory, pursuing the classes, networks, and training necessary for the projects they are building.

Advance to Candidacy: In addition to the course requirements below, students must pass all of the following: the General Examination, Interdisciplinary Paper, Portfolio Review, Major Field Exam, and Dissertation Prospectus. Students must also demonstrate reading competency in a language other than English, relevant to their course of study.

Post-Candidacy: Complete at least 12 credits of WMST899 Doctoral Dissertation Research and successfully defend and submit an original dissertation.

Course	Title	Credits
Required courses:		
WMST601	Approaches to Women's Studies I	3
WMST602	Approaches to Women's Studies II	3
WMST618	Feminist Pedagogy	3
WMST621	Feminist Theories and Women's Movements: Genealogies	3
WMST628	Women's Studies Colloquium (1 credit per semester until candidacy)	3
Electives		27

Youth Experience (Z113)

Graduate Certificate Program
College: Information Studies

Abstract

The Post-Baccalaureate Certificate of Professional Studies in Youth Experience will build the capacity to better adapt to the changing landscape of youth learning and technology. The Post-Baccalaureate Certificate of Professional Studies in Youth Experience prepares librarians to promote 21st century skills among youth ages 0-18 through incorporating participatory design principles, design thinking approaches, and dynamic community partnerships in their offerings of programs and services. At the completion of the online certificate, librarians will be able to:

- Facilitate learning with technology in any physical, virtual or hybrid learning environment using tested skills and practices for different types of youth.
- Methods for engaging youth as co-designers using the design thinking process.
- Demonstrate an understanding of the issues, concepts, and policies related to youth-led learning and programming through libraries.
- Implement best practices to be inclusive of all youth's needs, in particular youth from disadvantaged populations;
- Apply core theories and models from information science and learning sciences to address needs of youth; and
- Partner with other cultural institutions and community organizations to help with youth programming, education, and other projects related to youth development.

Admissions
General Requirements

- Statement of Purpose
- Transcript(s)
- TOEFL/IELTS/PTE (international graduate students (https://gradschool.umd.edu/admissions/english-language-proficiency-requirements/))

Program-Specific Requirements

- Letters of Recommendation (1): Letter of recommendation needs to come from a supervisor or someone who can speak to the applicant's capacity for successfully completing the certificate program.
- CV/Resume
- Master's degree in library/information science.
- Current librarian: Must be currently a school or public librarian working with children and teens; or A recent MLIS graduate or librarian who would like additional experience working with children and teens.

All applicants must have:

- Received a four-year baccalaureate degree;
- Received a master's degree in library or information science;
- Earned a minimum GPA of 3.0 (on a 4.0 scale) in all prior undergraduate and graduate course work;
- Must be currently a school or public librarian working with children and teens; or
- A recent MLIS graduate or librarian who would like additional experience working with children and teens
- GRE Scores are NOT required.

Summer Admissions Only

February 16 application deadline (domestic/international students)
Please email yxischool@umd.edu for admissions information.

FACULTY LISTING

Last Name	First/Middle Name	Graduate Faculty Status	Academic Credentials	Positions
Abadi	Daniel J.	Full Member	B.S., Brandeis University, 2002; M.Ph., University of Cambridge, 2003; Ph.D., Massachusetts Institute of Technology, 2008	Professor, Computer Science
Abbasi	Hossein	Graduate Teaching	Ph.D., University of Illinois at Urbana-Champaign, 2009	Senior Lecturer, Applied Economics
Abed	Eyad	Full Member	B.S., Massachusetts Institute of Technology, 1979; M.S., University of California-Berkeley, 1981; Ph.D., 1982. GCEN Academic Advisor for Systems Engineering	Professor, Electrical and Computer Engineering Professor, Systems Engineering
Abera	Nicole Taylor	Graduate Teaching	B.S., Bowling Green State University, 2002; M.A., American University, 2007; Ph.D., University of Maryland-College Park, 2014	Lecturer, Special Education
Abraham	Katharine	Full Member	B.S., Iowa State, 1976; Ph.D., Harvard University, 1982.	Professor, Survey and Data Science (online) Professor, Survey Methodology Professor, Survey Statistics
Abshire	Pamela	Full Member	B.S., California Institute of Technology, 1992; M.S., The Johns Hopkins University, 1997; Ph.D., The Johns Hopkins University, 2001.	Professor, Electrical and Computer Engineering Associate Professor, Neurosciences and Cognitive Science Associate Professor, Systems Engineering
Ad-Marbach	Gili	Adjunct Member	Ph.D., Tel-Aviv University, Israel, 1997M.Sc., Tel-Aviv University, Israel, 1988B.Sc., Tel-Aviv University, Israel, 1986	Research Professor
Adams	Jeffrey D.	Full Member	B.A., Johns Hopkins University, 1977; Ph.D., Yale University, 1981.	Associate Chair, Mathematics Professor, Mathematics
Adams	Lowell W.	Associate	B.S., Virginia Polytechnic Institute & State University, 1968; M.S., Ohio State University, 1973; Ph.D., Ohio State University, 1976	University Affiliate, Environmental Science and Technology
Adams	Christopher P	Graduate Teaching	Ph.D., University of Wisconsin-Madison, 2001	Lecturer, Applied Economics
Ades	Ibrahim Z.	Full Member	B.A.,University of California-Los Angeles, 1971; Ph.D., 1976.	Associate Professor, Biological Sciences
Adler	Eric	Full Member	B.A., Connecticut College, 1995; M.A.,SUNY Buffalo,1998; Ph.D., Duke University, 2005.	Associate Professor, Classics

Adomaitis	Raymond A.	Full Member	B.S., Illinois Institute of Technology, 1984;Ph.D., 1988.	Professor, Systems Engineering Professor, Chemical Engineering
Afflerbach	Peter P.	Full Member	B.A., State University of New York-Albany, 1978; M.S., 1979; Ph.D., 1985.	Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Agarwal	Ritu	Full Member	B.A., University of Delhi, 1982; M.B.A., Indian Institute of Management, Calcutta,1984; M.S., Syracuse University, 1988; Ph.D., Syracuse University, 1988.	Acting Dean
Agashe	Kaustubh	Full Member	B.Tech., Indian Institute of Technology, 1993; Ph.D., University of California, Berkeley, 1998.	Associate Professor, Physics
Aggour	Mohamed S.	Full Member	B.S., Cairo University, 1964;M.S., 1966; Ph.D., University of Washington, 1972.	Professor, Civil and Environmental Engineering
Agrawala	Ashok K.	Full Member	B.S., Agra University, 1960; B.E., Indian Institute of Science-Bangalore, 1963; M.Eng., 1965; Ph.D.,Harvard University, 1970.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science
Agrawala	Ashok	Full Member	B.S., Agra University, 1960; B.E., Indian Institute of Science-Bangalore, 1963; M.E., Indian Institute of Science-Bangalore, 1965; Ph.D., Harvard University, 1970	Affiliate Professor, Electrical and Computer Engineering
Aguilar Mora	Jorge	Full Member	B.A., Universidad Nacionel de Mexico, 1966; Ph.D., El Colegio de Mexico, 1976	Professor Emeritus, Spanish Language and Literature
Akin	David L.	Full Member	S.B., Massachusetts Institute of Technology, 1974; S.M., 1975; Sc.D., 1981.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Aerospace Engineering
Al-Sheikhly	Mohamad I.	Full Member	B.Sc., University of Baghdad, 1974; Ph.D., University of Newcastle, 1981.	Professor, Materials Science and Engineering Affiliate Professor, Chemical Engineering
Aladangady	Aditya	Graduate Teaching	Ph.D., University of Michigan, 2014	Lecturer, Applied Economics
Alberini	Anna	Full Member	B.A., Italy, 1987; M.A., 1989; Ph.D., University of California-San Diego, 1992.	Professor, Agricultural and Resource Economics
Alcaniz	Isabella	Full Member	Licenciada in IR, Universidad de Belgrano, 1994; MA, Northwestern University, 1999; Ph.D. Northwestern University, 2004	Assistant Professor, Government and Politics

Aldoory	Linda	Full Member	B.A., George Washington University, 1988; M.A., University of Texas-Austin, 1991; Ph.D., Syracuse University, 1998.	Professor, Communication
Alexander	Millard H.	Full Member	B.A., Harvard University, 1964; Ph.D.,University of Paris, 1967.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Chemical Physics Distinguished University Professor, Chemistry
Alexander	Patricia A.	Full Member	B.A., Bethel College-McKenzie, 1970; M.Ed., James Madison University, 1979; Ph.D., University of Maryland-College Park, 1981.	Professor, Human Development
Alford	Charles F.	Full Member	B.A., Austin College, 1969; M.A., University of Texas-Austin, 1971; Ph.D., 1979.	Professor, Government and Politics
Allee	Todd	Full Member	B.A., University of Missouri, 1994; M.S., London School of Economics and Political Science, 1996; Ph.D., University of Michigan, 2003.	Assistant Professor, Government and Politics
Allen	Dale	Adjunct Member	B. S., Iowa State University, 1984; M. S., Florida State University, 1987; Ph. D., University of Maryland, 1996.	Associate Research Scientist, Atmospheric and Oceanic Science
Allewell	Norma M.	Full Member	B.Sc., Biochemistry, McMaster Univ., Hamilton, Ontario, 1965 Ph.D., Molecular Biophysics, Yale University, 1969	Professor, Biological Sciences
Aloimonos	John	Full Member	B.S., University of Athens-Greece,1981; M.S., University of Rochester, 1984; Ph.D., 1987.	Professor, Neurosciences and Cognitive Science Professor, Computer Science
Aloimonos	Yiannis	Full Member	B.S., University of Athens, 1981; M.S., University of Rochester, 1984; Ph.D., University of Rochester, 1987	Affiliate Professor, Electrical and Computer Engineering
Alt	Francis B.	Full Member	B.S.E., Johns Hopkins University, 1967; M.S., Georgia Institute of Technology, 1973; Ph.D., 1977.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Alva	Maria	Graduate Teaching	D.Phil., University of Oxford, 2014	Lecturer, Applied Economics
Alvizu	Josh	Full Member	B.A. University of Colorado, Boulder, 2005; M.A. Johns Hopkins University, 2008; Ph.D., Yale University, 2017	Assistant Professor, German Literature and Language
Ambs	Stefan	Special	Ph.D., University of London, 1997	n/a, Biological Sciences

Amde	Amde M.	Full Member	B.E.S.,Johns Hopkins University, 1970; M.S., University of California-Berkeley, 1971; Ph.D., State University of New York-Buffalo, 1976.	Professor, Civil and Environmental Engineering
Amilivia	Jennifer Marie	Graduate Teaching	B.A., University of Michigan-Ann Arbor, 2009; B.G.S., University of Michigan-Ann Arbor, 2012; M.A., University of Michigan-Ann Arbor, 2014; Ph.D., University of Kansas, 2020	Assistant Clinical Professor, Special Education
Anand	Davinder K.	Full Member	B.S., George Washington University, 1959; M.S., 1961; Ph.D., 1965. GCEN Academic Advisor for Energetic Concepts Development	Professor Emeritus, Mechanical Engineering
Anandalingam	Gnanalingam	Full Member	B.A., University of Cambridge, 1975; M.S., Harvard University, 1977; Ph.D., Harvard Univerity, 1991.	Professor
Anderson	John D.	Full Member	B.S. University of Florida, 1959; Ph.D., Ohio State University-Columbus, 1966.	Professor Emeritus, Aerospace Engineering
Anderson	Samira	Full Member	B.A., Indiana University, 1979; M.A., Indiana University, 1981; Au.D, University of Florida, 2000; Ph.D. Northwestern University, 2012	Associate Professor, Clinical Audiology Assistant Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science
Anderson	Lindsey	Full Member	B.A., Purdue University, 2004; M.A., Indiana University, 2010; Ph.D., Purdue University, 2014	Associate Chair, Communication Associate Professor, Communication
Andrews	David L.	Full Member	B.Ed. Exeter University, 1985; M.S. University of Illinois at Urbana-Champaign, 1991; Ph.D., University of Illinois at Urbana-Champagne, 1993.	Professor, Kinesiology Professor, Physical Activity Affiliate Associate Professor, Sociology
Andrews	Norma	Full Member	Ph.D. University of Sao Paulo, Brazil 1983.	Professor, Biological Sciences
Andrusik	Katryna Natalya	Graduate Teaching	B.A., John Hopkins University, 2000; M.S., John Hopkins University, 2003; Ph.D., University of Maryland-College Park, 2011	Lecturer, Special Education
Angel	C. Roselina	Full Member	B.S., Iowa State University, 1984;M.S., 1987; Ph.D., 1990.	Professor, Animal Sciences
Anischenkova	Valerie	Full Member	B.A./M.A. St. Petersburg State University, 1997; M.A. University of Michigan, 2001; Ph.D. University of Michigan, 2007	Affiliate Associate Professor, Comparative Literature
Anisimov	Mikhail A.	Full Member	Ph.D., Moscow State University, 1968.	Professor, Chemical Engineering Professor, Chemical Physics

Ankem	Sreeramamurthy	Full Member	B.Eng.,K.R. Engineering College-University of Mysore, 1972; M.Eng., Indian Institute of Science-Bangalore, 1974; Ph.D.,Polytechnic Institute of New York, 1980.	Professor, Materials Science and Engineering
Anlage	Steven	Full Member	B.S., Rensselaer Polytechnic Institute, 1982; M.S., California Institute of Technology, 1984; Ph.D., California Institute of Technology, 1988	Professor, Materials Science and Engineering Professor, Physics Affiliate Professor, Electrical and Computer Engineering
Antman	Stuart S.	Full Member	B.S., Rensselaer Polytechnic Institute, 1961; M.S.,University of Minnesota-Twin Cities, 1963; Ph.D., 1965.	Distinguished University Professor Emeritus, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor Emeritus, Mathematics
Antonisse	Margaret	Non-Member	B.A., Lafayette College, PA, 1973; M.O., University of Michigan-Ann Arbor, 1976; PhD, University of Maryland-College Park, 2000	Senior Lecturer, Linguistics
Antonsen	Thomas M., Jr.	Full Member	B.S., Cornell University, 1973; M.S., 1976; Ph.D., 1977.	Professor, Electrical and Computer Engineering Professor, Physics
Aparicio	Elizabeth	Full Member	M.S.W., Catholic University of America, 2005; Ph.D., University of Maryland Baltimore, 2014	Assistant Professor, Behavioral and Community Health
Appelbaum	Ian	Full Member	B.S., Rensselaer Polytechnic Institute, 1997; Ph.D., Massachusetts Institute of Technology, 2003	Affiliate Professor, Electrical and Computer Engineering
Applebaum	Ian	Full Member	B.S., Rensselaer Polytechnic Institute, 1997, Ph.D., Massachusetts Institute of Technology, 2003	Associate Professor, Physics
Aranda-Espinoza	Jose Helim	Full Member	B.S., University of Zacatecas, Mexico 1990; M.S., University of San Luis Potosi, Mexico 1993; Ph.D., University of San Luis Potosi, Mexico 1998.	Associate Chair, Bioengineering Professor, Civil and Environmental Engineering Associate Professor, Bioengineering Associate Professor, Biophysics Affiliate Associate Professor, Materials Science and Engineering
Araneda	Ricardo	Full Member	B.S., University of Concepcion, 1986; M.S., Albert Einstein College of Medicine, 1992; Ph.D., Albert Einstein College of Medicine, 1997.	Associate Professor, Biological Sciences Assistant Professor, Neurosciences and Cognitive Science
Archsmith	James	Full Member	B.S., University of Michigan, 1992; M.A., University of Michigan, 2011; Ph.D., University of California, 2018	Assistant Professor, Agricultural and Resource Economics

Arevalo JR	Ricardo David	Full Member	B.S., University of Florida, 2005; Ph.D., University of Maryland, College Park, 2010	Associate Professor, Geology
Armbruster	Peter	Special Member	B.A. Univ. of California at San Diego 1989; Ph.D. Univ. of Oregon, 1997.	University Affiliate, Environmental Science and Technology
Armstrong	Ronald W.	Full Member	B.E.S., Johns Hopkins University, 1955; M.Sc., Carnegie-Mellon University, 1957; Ph.D., 1958.	Professor Emeritus, Mechanical Engineering
Armstrong	Earlene	Non-Member	BS, North Carolina Central University, 1969; MS, North Carolina Central University, 1970; PhD, Cornell University, 1975	Professor Emerita, Entomology
Arnold	Conrad N.	Full Member	B.S., West Virginia University, 1971; M.S., 1986.	Specialist
Arnold	Elizabeth	Full Member	B.A. Oberlin College, 1981; M.A. University of Chicago, 1984; Ph.D. 1991; M.F.A. Warren Wilson MFA Program for Writers.	Professor, English Language and Literature Professor, Creative Writing
Arria	Amelia	Full Member	B.S., Cornell University, 1986; Ph.D., University of Pittsburgh, 1993.	Associate Professor, Behavioral and Community Health
Aruoba	Sadik	Full Member	Ph.D., University of Pennsylvania, 2004A.M. (Master of Arts), University of Pennsylvania, 2002B.A., Bogazici University, 1999	Professor, Economics
Asa-Awuku	Akua	Adjunct Member	B.S., M.I.T., 2003; M.S., Georgia Institute of Technology, 2006; Ph.D., Georgia Institute of Technology, 2008	Associate Professor, Chemical Engineering
Ash	Richard	Associate	B.S., Queen Mary College, University of London, 1986; Ph.D., Open University, United Kingdom, 1990.	Assistant Research Scientist, Geology
Ater	Renee	Full Member	B.A., Oberlin College, 1987; M.A., University of Maryland, College Park, 1993; Ph.D.,University of Maryland, College Park, 2000.	Associate Professor Emerita, Art History and Archaeology
Auchard	John	Full Member	B.A. New York University, 1970; M.A. University of Michigan-Ann Arbor, 1971; Ph.D. University of North Carolina-Chapel Hill, 1980.	Professor Emeritus, English Language and Literature
Auerbach	Jonathan D.	Full Member	B.A. University of California-Santa Cruz, 1976 M.A. Johns Hopkins University, 1978; Ph.D. 1984.	President Emeritus, English Language and Literature
Auslander	Joseph	Full Member	B.S., Massachusetts Institute of Technology, 1952; M.S., University of Pennsylvania, 1953; Ph.D., 1957.	Professor Emeritus, Mathematics

Austin	Mark A.	Full Member	B.E., University of Canterbury, 1980; M.S. University of California-Berkeley, 1982; Ph.D., 1985.	Director, Systems Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Systems Engineering Associate Professor, Civil and Environmental Engineering
Ausubel	Lawrence M.	Full Member	A.B., Princeton University, 1980; M.S.,Stanford University, 1982; M.L.S., 1984; Ph.D., 1984.	Professor, Economics
Aute	Vikrant C.	Associate	B.S., 1997, University of Pune; M.S., 2001, University of Maryland; Ph.D., 2010, University of Maryland	Research Scientist, Mechanical Engineering

Aydilek	Ahmet H.	Full Member	B.S., Istanbul Technical University, 1993; M.S. University of Wisconsin-Madison, 1996; Ph.D., University of Wisconsin-Madison, 2000.	Professor, Civil and Environmental Engineering
Ayyub	Bilal M.	Full Member	B.S., Kuwait University, 1980; M.S., Georgia Institute of Technology, 1981; Ph.D., 1983.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Reliability Engineering Professor, Civil and Environmental Engineering
Azar	Masoud	Full Member	B.S., Azad University Iran 2002; M.S. University of Tehran Iran 2007; Ph.D. Colorado State University, 2012.	Assistant Professor, Environmental Science and Technology
Azarian	Michael	Adjunct Member	B.S., Princeton University, 1982; M.S. Carnegie Mellon University 1988; Ph.D. Carnegie Mellon University, 1994	Associate Research Scientist, Mechanical Engineering
Azarian	Michael	Adjunct Member	B.S., Princeton University, 1982; M.S. Carnegie Mellon University 1988; Ph.D. Carnegie Mellon University, 1994	Associate Research Scientist, Reliability Engineering
Azarm	Shapour	Full Member	B.S., University of Tehran, 1977; M.S., George Washington University, 1979; Ph.D., University of Michigan-Ann Arbor, 1984.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering

Babadi	Behtash	Full Member	B.Sc. Sharif University of Technology, 2006;M.Sc. Harvard, 2008; Ph.D. Harvard, 2011	Associate Professor, Electrical and Computer Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Neurosciences and Cognitive Science
Baccus	Ayanna	Associate	B.S., Wake Forest University, 1997; M.Ed., University of Maryland, 1998; Ph.D., University of Maryland, 2004	Associate Clinical Professor, Teaching and Learning, Policy and Leadership Associate Clinical Professor, Curriculum and Instruction
Bachrach	Christine	Full Member	B.A., Harvard University M.A., Georgetown University Ph.D., Johns Hopkins University	Research Professor, Sociology
Baden	Andrew R.	Full Member	B.A.,University of Wisconsin-Madison, 1975; B.A., San Francisco State University, 1981; Ph.D., University of California-Berkeley, 1986.	Chair, Physics Professor, Physics
Baecher	Gregory B.	Full Member	B.S.,University of California-Berkeley, 1968; M.S., Massachusetts Institute of Technology, 1970; Ph.D., 1972.	Professor, Civil and Environmental Engineering
Baeder	James D.	Full Member	B.S., Rice University, 1983; M.S., Stanford University, 1984; Ph.D., 1989.	Professor, Aerospace Engineering Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Baer	Hester	Full Member	B.A. Bard College, 1992; M.A. University of Minnesota-Twin Cities, 1994; Ph.D. Washington University, 2000	Associate Professor, German Literature and Language Associate Professor, Comparative Literature Affiliate Associate Professor, Women's Studies
Bailey	Joseph P.	Full Member	B.S., Carnegie-Mellon University, 1992; M.S., Stanford University, 1993; Ph.D., Massachusetts Institute of Technology, 1998.	Associate Research Professor
Bailey	Amanda	Full Member	B.A., Oberlin College, 1988; M.A. Univ. of Michigan, 1992; Ph.D. 1998.	Chair, English Language and Literature Professor, English Language and Literature
Baillargeon	Mercedes	Full Member	PhD, University of North Carolina-Chapel Hill, 2014	Assistant Professor, French Modern Studies Assistant Professor, French Studies Affiliate Associate Professor, Women's Studies
Baiocchi	Giovanni	Full Member	Lurea, University of Trieste, Italy, 1991; M.A., Virginia Polytechnic Institute, 1993; Ph.D. University of York, York, UK, 2008.	Associate Professor, Geographical Sciences

Bakshi	Gurdip S.	Full Member	B.Elect.E., Punjab University, 1985; M.S., University of Wisconsin-Madison, 1989; Ph.D., 1992.	Visiting Professor
Balachandran	Arun	Special	B.A., University of Kerala, 2011; MSc., Madras School of Economics, 2013; Ph.D., University of Groningen, 2020	Affiliate Professor, American Studies Postdoctoral Fellow, Sociology
Balachandran	Balakumar	Full Member	B.Tech.,Indian Institute of Technology-Madras, 1985; M.S., Virginia Polytechnic Institute & State University, 1986; Ph.D., 1990.	Chair, Mechanical Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Balachandran Orihuela	Sharada	Full Member	B.A. Mills College; Ph.D. Univ. of California, Davis.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature
Balan	Radu	Full Member	B.S., Polytechnic Institute of Bucharest, Romania 1992; B.S., University of Bucharest, Romania 1994; Ph.D., Princeton University, 1998	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Baldwin	Andrew H.	Full Member	B.S., Tufts University, 1983; Ph.D., Louisiana State University-Baton Rouge, 1996.	Professor, Environmental Science and Technology
Baldwin	Tom	Adjunct Member	B.M. Ithaca College	Lecturer, Music Lecturer, Music Education
Baldwin	Melinda	Full Member	B.A., Davidson College, 2004; M.A., Princeton University, 2007; Ph.D., Princeton University, 2010	Associate Professor, History
Ball	Gregory	Full Member	B.A., Columbia University, 1977; Ph.D., Rutgers University, 1983	Professor, Neurosciences and Cognitive Science Professor, Psychology
Ball	Michael O.	Full Member	B.E.S., Johns Hopkins University, 1972; M.S.E., 1972; Ph.D., Cornell University, 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering
Balthrop	Carmen A.	Full Member	B.Mus., University of Maryland-College Park, 1971; M.Mus., Catholic University of America, 1972.	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Banavar	Jayanth	Full Member	B.Sc,Bangalore University,1972 M.Sc., Physics, Bangalore University; 1974; Ph.D., University of Pittsburgh, 1978	Dean, Physics Professor, Physics
Banisky	Sandra A	Full Member	B.A., Boston University; J.D., University of Baltimore	Visiting Professor, Journalism
Banks	Antoine J.	Full Member	B.A., Hunter College, 2001; Ph.D., University of Michigan, 2009.	Associate Professor, Government and Politics

Baras	John S.	Full Member	B.S.,National Technical University of Athens, 1970; S.M., Harvard University, 1971; Ph.D., Harvard University, 1973.	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Mechanical Engineering Affiliate Professor, Bioengineering
Barbarin	Oscar	Full Member	B.A., St. Joseph Seminary College, 1968; M.A., New York University, 1971; M.S., Rutgers University, 1973; Ph.D., Rutgers University. 1975	Professor, Psychology
Barber	Richard	Adjunct Member	B.M., Peabody Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Barbosa	Pedro	Non-Member	BS, City University of New York - City College, 1966; MS, University of Massachusetts - Amherst, 1969; PhD, University of Massachusetts - Amherst, 1971	Professor Emeritus, Entomology
Barg	Alexander	Full Member	Ph.D.,Moscow Russia,1983-1987;M.Sc, Moscow Russia,1976-1981	Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Computer Science
Barker	Shelia	Special Member	B.A. Amherst College, 1993, Spanish Literature and Art History; M.A. Columbia University, 1996, Art History, M.Phil. Columbia University 1997, Art History, Ph.D. Columbia University, 2002, Art History	n/a, Art History and Archaeology
Barkley Brown	Elsa	Full Member	B.A.,DePauw University, 1972; Ph.D., Kent State University, 1994.	Associate Professor, History Associate Professor, Women's Studies Affiliate Associate Professor, American Studies
Barlow	Jewel B.	Full Member	B.Sc., Auburn University, 1963;M.S., 1964; Ph.D., University of Toronto, 1970.	Associate Professor, Aerospace Engineering
Baron	Sabrina	Adjunct Member	B.A., Hanover College, 1981; M.A., University of Chicago, 1982; Ph.D., University of Chicago, 1995	Assistant Research Professor, History
Baron	Jason	Associate	B.A., Wesleyan University; J.D., Boston University School of Law	Professor of Practice, History and Library & Information Science

Barrenechea	Francisco	Full Member	B.A., Universidad Nacional Autonoma de Mexico, 1996; M.A., Columbia University, 1999; Ph.D., Columbia University, 2005	Associate Professor, Classics Affiliate Associate Professor, Comparative Literature
Barros	Patricia B.	Full Member	B.S. Universidade Catolica de Pernambuco, Psychology, 2005; M.S. Kansas State University, Psychology, 2010; M.S. Kansas State University, Marriage and Family Therapy, 2012; Ph.D. Kansas State Uniersity, Marriage and Family Therapy, 2015	Assistant Clinical Professor, Maternal and Child Health
Bartol	Kathryn M.	Full Member	B.A., Marygrove College, 1963; M.A.,University of Michigan-Ann Arbor, 1966; Ph.D., Michigan State University, 1972	Area Chair Professor
Barua	Rajeev K.	Full Member	B.S., Indian Institute of Technology-Delhi,1992; M.S., Massachusetts Institute of Technology, 1994; Ph.D., 2000.	Professor, Electrical and Computer Engineering Associate Professor, Systems Engineering Affiliate Associate Professor, Computer Science
Bastin	Fabian	Special Member	B.S., University of Namur, 1997; M.S., University of Namur, 1999; Ph.D., University of Namur, 2004	n/a, Civil and Environmental Engineering
Basu	Progyan	Graduate Teaching	M.B.A., University of Missouri, 1986; Ph.D., University of Nebraska, 1992	Clinical Professor, Accounting
Battistin	Erich	Full Member	B.S., Italy, 1997; Ph.D., University of Padua, Italy	Professor, Agricultural and Resource Economics
Battle	Ann Arlene	Adjunct Member	B.S.N., University of Maryland at Baltimore, 1975; M.S., University of Maryland-College Park, 1992; Ph.D., 1998.	Director, Human Development
Battle	Leilani	Full Member	B.S., University of Washington, 2011; M.S., Massachusetts Institute of Technology, 2013; Ph.D., Massachusetts Institute of Technology, 2017	Assistant Professor, Computer Science
Bauchau	Olivier A	Adjunct Member	Ing´enieur Civil Physicien degree, Universit´e de l´´Etat `a Li`ege, 1977; M.S., Massachusetts Institute of Technology, 1978; Ph.D., Massachusetts Institute of Technology,1981.	Professor, Aerospace Engineering
Bauer	Ralph R.	Full Member	B.A., University of Erlangen-Nurnberg, 1991; M.A., Michigan State University, 1993; Ph.D., 1997.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature

Baum	Howell S.	Full Member	B.A., University of California-Berkeley, 1967; M.A., University of Pennsylvania, 1968; M.C.P., University of California-Berkeley, 1971; Ph.D., 1974.	Professor Emeritus, Urban and Regional Planning and Design
Baur	Cynthia	Full Member	M.A., University of California - San Diego, 1992; Ph.D., University of California - San Diego, 1995	Professor, Behavioral and Community Health
Baz	Amr M.	Full Member	B.S., University of Cairo, 1966; M.S.,University of Wisconsin-Madison, 1970; Ph.D., 1973.	Professor, Mechanical Engineering
Beasley	Maurine	Full Member	B.A.,University of Missouri-Columbia, 1958; B.J., 1958; M.S., Columbia University,1963; Ph.D., George Washington University, 1974.	Professor Emerita, Journalism
Beckett	Dorothy	Full Member	B.A., Barnard College, 1980;Ph.D., University of Illinois-Urbana/Champaign, 1986. Ph.,D, something	Professor, Biochemistry Professor, Chemistry
Beckman	Paula J.	Full Member	B.A., Hastings College, 1974; M.A.,University of Nebraska at Omaha, 1977; Ph.D.,University of North Carolina-Chapel Hill, 1980.	Professor Emerita, Special Education
Bedaque	Paulo	Full Member	B.S., Universidade de Sao Paulo, 1985; M.S., Universidade de Sao Paulo, 1989; Ph.D., University of Rochester, 1994;	Professor, Physics
Bederson	Benjamin B.	Full Member	B.S., Rensselaer Polytechnic Institute, 1986; M.S., New York University, 1989; Ph.D., 1992.	Professor, Computer Science Affiliate Professor, Human-Computer Interaction
Bedrossian	Jacob	Full Member	B.S., Case Western Reserve University, 2007; M.S., Case Western Reserve University, 2007; Ph.D., University of California, Los Angeles, 2011.	Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Mathematics
Behn	Mark	Special Member	B.S, Bates College, 1996; Ph.D., Massachusetts Institute of Technology, 2002	University Affiliate, Geology
Beicken	Peter U.	Full Member	M.A., University of Munich, 1968; Ph.D.,Stanford University, 1971.	Professor Emeritus, German Literature and Language
Beier	Jonathan	Full Member	B.S., Stanford University, 2001; Ph.D.,Harvard University, 2008.	Assistant Professor, Neurosciences and Cognitive Science
Beise	Elizabeth J.	Full Member	B.A., Carleton College, 1981; Ph.D., Massachusetts Institute of Technology, 1988.	Associate Provost, Physics Distinguished Scholar-Teacher, Physics Professor, Physics
Belenkiy	Maksim	Graduate Teaching	Ph.D., University of California-Santa Cruz, 2010	Lecturer, Applied Economics

Bell	Matthew J.	Full Member	B.Arch., University of Notre Dame, 1983; M.Arch., Cornell University, 1987.	Professor, Architecture Professor, Urban and Regional Planning and Design
Bell	Richard J.	Full Member	Ph.D., Harvard University, 2006	Professor, History
Belloni	Alberto	Full Member	B.S., University of Pisa and Scuola Normale Superiore, 2002; Ph.D., Massachusetts Institute of Technology, 2007	Assistant Professor, Physics
Belov	Georgiy	Full Member	Ph.D., Moscow State University, 2001	Associate Professor, Veterinary Medical Sciences Associate Professor, Biological Sciences
Belt	Kenneth T.	Special	B.S., Towson University, 1973; M.S. Towson University, 1983; Ph.D. University of Maryland, Baltimore County, 2012.	University Affiliate, Geology
Bely	Alexandra E.	Full Member	Ph.D., SUNY Stony Brook, 1999	Associate Professor, Biological Sciences
Benedetto	John J.	Full Member	B.A., Boston College, 1960; M.A., Harvard University, 1962; Ph.D., University of Toronto, 1964.	Distinguished Scholar-Teacher, Applied Mathematics & Statistics, and Scientific Computation Distinguished Scholar-Teacher, Mathematics Professor, Mathematics Director of NWC, Mathematics
Benharrech	Sarah	Full Member	Ph.D., Princeton University, 2002	Associate Professor, French Modern Studies Associate Professor, French Studies
Benito-Vessels	Carmen	Full Member	B.A., University of Salamanca-Spain, 1977; M.A., 1977; Ph.D.,University of California-Santa Barbara, 1988.	Professor, Spanish Language and Literature
Bennett	Ralph D., Jr.	Full Member	B.A., Princeton University, 1961; M.F.A., 1966.	Professor Emeritus, Architecture
Benson	Spencer A.	Full Member	B.A.,University of Vermont, 1973; Ph.D., University of Chicago, 1978.	Affiliate Associate Professor, Teaching and Learning, Policy and Leadership
Bentley	William E.	Full Member	B.S., Cornell University, 1982; M.Eng., 1983; Ph.D.,University of Colorado-Boulder, 1989.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Bioengineering Affiliate Professor, Biological Sciences Affiliate Professor, Chemical Engineering
Berbery	Ernesto H	Adjunct Member	M.S., University of Buenos Aires, 1976; S.C.D., 1987.	Research Professor, Atmospheric and Oceanic Science

Berg	Kenneth R.	Full Member	B.S., University of Minnesota-Twin Cities, 1960; Ph.D., 1967.	Associate Professor Emeritus, Mathematics
Bergbreiter	Sarah E.	Full Member	B.E., Princeton University, 1999; M.S., University of California-Berkeley, 2004; Ph.D., University of California, 2007	Assistant Professor, Systems Engineering
Berger Jacobson	Jill	Adjunct Member	B.A., Psychology, University of Virginia, 2005; M.A., School Psychology, University of Maryland-College Park, 2010; A.G.S., School Psychology, University of Maryland-College Park, 2012; Ph.D., School Psychology, University of Maryland-College Park, 2013.	Assistant Clinical Professor, School Psychology
Berkowitz	Jacob	Special Member	B.S., University of North Carolina, 2003; M.S., University of California, 2005; Ph.D., Louisiana State University, 2013	University Affiliate, Environmental Science and Technology
Berlin	Adele	Full Member	B.A. University of Pennsylvania, 1964; Ph.D. 1976.	Professor Emerita, English Language and Literature Professor Emerita, Jewish Studies
Bernard	Peter S.	Full Member	B.E., City University of New York-City College, 1972; M.S.,University of California-Berkeley, 1973; Ph.D., 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Bernat	Edward	Full Member	B.A., University of Arizona, 1989; M.A., University of Michigan, 1993; Ph.D., University of Michigan, 1997.	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Bersani	Bianca E.	Full Member	B.A., University of Nebraska-Lincoln, 2002; M.A., University of Nebraska-Lincoln, 2004; Ph.D., University of Maryland-College Park, 2010.	Associate Professor, Criminology and Criminal Justice
Bertot	John	Full Member	Ph.D., Syracuse University.	Professor, History and Library & Information Science Professor, Human-Computer Interaction Professor, Information Management Professor, Information Studies Professor, Library and Information Science
Besharov	Douglas	Full Member	B.A., City University of New York-Queens College, 1965; J.D., New York University, 1968; L.L.M., 1971.	Professor, Policy Studies
Bettag	Thomas	Non-Member		Lecturer, Journalism

Bhatele	Abhinav	Full Member	Ph. D., University of Illinois at Urbana-Champaign, 2010; M. S., University of Illinois at Urbana-Champaign, 2007; B. Tech., Indian Institute of Technology, Kanpur, 2005	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Bhattacharjee	Samrat	Full Member	B.S., Georgia College, 1994; Ph.D.,Georgia Institute of Technology, 1999.	Professor, Computer Science
Bhattacharyya	Shuvra S.	Full Member	B.S., University of Wisconsin-Madison, 1987; Ph.D.,University of California-Berkeley, 1994.	Professor, Electrical and Computer Engineering
Bhogal	Harjit	Full Member	B.A. (Hons), Merton College, University of Oxford, 2008; B.Phil, Somerville College, University of Oxford, 2010; Ph.D, New York University, 2017	Assistant Professor, Philosophy
Bi	Hongsheng	Full Member	Ph.D., Louisiana State University, 2005	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Bianchini	Janna	Full Member	B.A., Wellesley College, 1999; M.A. Harvard University, 2003; Ph.D. Harvard University, 2007	Associate Professor, History Affiliate Associate Professor, Women's Studies
Bierbaum	Ariel	Full Member	BA, University of Pennsylvania, 2000; MCP, 2005; Massachusetts Institute of Technology, PhD, University of California-Berkeley 2016	Assistant Professor, Urban and Regional Planning and Design Assistant Professor, Community Planning
Bigio	David I.	Full Member	B.S., Case Western Reserve University, 1971; M.S., Massachusetts Institute of Technology, 1976; Eng.D., 1978; Ph.D., 1986. Director of Undergraduate Studies	Professor, Mechanical Engineering
Birnir	Johanna	Full Member	Ph.D., UCLA, 2001	Associate Professor, Government and Politics
Biswas	Debabrata	Adjunct Member	B.S., University of Dhaka, 1994: M.S., University of Tokyo, 1998; Ph.D., University of Tokyo, 2001	Associate Professor, Animal Sciences Affiliate Assistant Professor, Biological Sciences
Blackistone	Kevin	Full Member	B.S., Northwestern University; M.A. Boston University	Visiting Professor, Journalism
Blanchard	Jack J.	Full Member	B.S., Arizona State University, 1984; Ph.D.,SUNY-Stony Brook, 1991.	Assistant Provost, Psychology Co-Director, Clinical Psychological Science Professor, Psychology
Blankenship	Gilmer L.	Full Member	B.S., Massachusetts Institute of Technology, 1967; M.S., 1969; Ph.D., 1971.	Associate Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation

Blazar	David	Full Member	Ed.D. Harvard University	Assistant Professor, Teaching and Learning, Policy and Leadership
Bleacher	Jacob E.	Special Member	B.A., Franklin & Marshall College, 2000; Ph.D., Arizona State University, 2006	University Affiliate, Geology
Bleam	Tonia	Full Member	B.A., Central College, Iowa, 1991; M.A., University of Delaware, 1994; Ph.D., University of Delaware, 1999.	Senior Lecturer, Linguistics
Blejer	Perla	Associate	Ph.D. George Washington University	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Blough	Neil V.	Full Member	B.S., University of Pittsburgh, 1977; Ph.D., Northwestern University, 1983.	Professor, Chemistry
Boekeloo	Bradley O.	Full Member	B.A., Kalamazoo College, 1981; S.C.M.,Johns Hopkins University, 1985; Ph.D., 1989.	Professor, Behavioral and Community Health
Boicourt	William C.	Full Member	B.A., Amherst College, 1966 M.A., The Johns Hopkins University, 1969; Ph.D., The Johns Hopkins University, 1973	Professor, Marine, Estuarine, and Environmental Sciences
Bolatto	Alberto D.	Full Member	M.A., Boston University, 1996: Ph.D., Boston University, 2000.	Professor
Bolger	Donald J.	Full Member	B.A., University of Massachusetts, 1998; M.S., University of Pittsburgh, 2002; Ph.D., 2006.	Associate Professor, Human Development Assistant Professor, Neurosciences and Cognitive Science
Bolles	Augusta Lynn	Full Member	A.B., Syracuse University, 1971; M.A., Rutgers University-New Brunswick, 1978; Ph.D., 1981.	Professor Emerita, Women's Studies Affiliate Professor, American Studies
Bond	Kanisha	Full Member	Bucknell University, B.A. 2002; Georgetown University, MPP, 2004; Pennsylvania State University, Ph.D. 2010	Assistant Professor, Government and Politics
Bonner	Christopher	Full Member	B.A. Howard University, 2008; M.A., Yale University, 2011; Ph.D., 2014.	Associate Professor, History
Bonsignore	Elizabeth	Full Member	PhD Information Studies, 2011; MS Computer Science, Naval Postgraduate School, 1991; EdM Education/Human Resources, 1989; BS English Language and Literature/ Letters, United States Naval Academy, 1985.	Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Boroumand	Jahangir	Non-Member	M.S., Ph.D., Syracuse University, 1981.	Lecturer, Telecommunications Liaison, Telecommunications
Borrut	Antoine	Full Member	PhD, La Sorbonne, 2007	Associate Professor, History Affiliate Associate Professor, Jewish Studies

Borzekowski	Dina	Full Member	B.S., 1998, Cornell University; M.S., 1989, Columbia University; Ed.M., 1990, Harvard University; Ed.D., 1994, Harvard University	Research Professor, Behavioral and Community Health
Boté	Lisa A	Associate	Ph.D. Arizona State University, 2000	Assistant Clinical Professor, Teaching and Learning, Policy and Leadership
Boudreaux	Michel	Full Member	B.A., Augsburg College, 2003; M.S., University of Minnesota-Twin Cities, 2009; Ph.D., University of Minnesota-Twin Cities, 2014	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Bovill	Carl H.	Full Member	B.S., University of California-Santa Barbara, 1969; M.S.,University of California-Berkeley, 1970; M.Arch.,University of Hawaii at Manoa, 1976.	Professor, Architecture Associate Professor, Urban and Regional Planning and Design
Bowden	Mary L.	Adjunct Member	B.A., Cornell University, 1978; M.S., Massachusetts Institute of Technology, 1981; Sc.D., 1988.	Visiting Assistant Professor, Aerospace Engineering
Bowerman	William W.	Full Member	B.A. Western Michigan University, 1985 M.A. Northern Michigan University, 1991 Ph.D. Michigan State University, 1993	Chair, Environmental Science and Technology
Boyd	Derek A.	Full Member	B.Sc., University of Capetown, 1964; B.Sc., 1965; M.Sc., 1967; Ph.D., Stevens Institute of Technology, 1973.	Professor Emeritus, Physics
Boyd	Vivian S.	Full Member	B.A., Antioch College, 1961; M.A.,University of Colorado-Boulder, 1968; M.Ed., University of Maryland, 1971; Ph.D., University of Maryland-College Park, 1975.	Professor Emeritus
Boyd	Marcus	Full Member		Graduate Director, Terrorism Analysis
Boyd-Graber Ying	Jordan Lee	Full Member	B.S., California Institute of Technology, 2004; M.A., Princeton University, 2006; Ph.D., Princeton University, 2010	Associate Professor, Computer Science
Boyson	Sandor L.	Associate	B.A., Antioch College, 1981; M.Phil., University of Sussex-Falmer, 1985; Ph.D.,1990.	Research Professor, Business and Management
Bradley	Joseph	Special	B.E., The Cooper Union, 1979; M.S./M.E, Naval Postgraduate School, 1994; Ph.D., Old Dominion University, 2014	n/a, Civil and Environmental Engineering

Brame	Robert	Full Member	B.A., University of North Carolina at Charlotte, 1988; M.S., University of North Carolina at Charlotte, 1991; Ph.D., University of Maryland, 1997.	Professor, Criminology and Criminal Justice
Brami	Joseph	Full Member	B.A., University of Sorbonne-Nouvelle, Paris, 1974; M.A., 1976; Ph.D., New York University, 1984.	Professor, French Modern Studies Professor, French Studies
Branigan	Amelia	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology
Brantlinger	Andrew	Full Member	B.A., Macalester College, 1991; M.Ed., University of Illinois-Chicago, 1997; Ph.D., Northwestern University, 2007.	Associate Professor, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Braun	Michael	Associate	B.A., Cornell University, 1977; Ph.D., Louisiana State University - Baton Rouge, 1983	Adjunct Professor, Biological Sciences
Bravo III	Jorge J.	Full Member	A.B., Princeton University, 1990; M.A., University of California, Berkeley, 1996; Ph.D., University of California, Berkeley, 2006	Associate Professor, Classics
Brewer	Carmen	Associate	B.A., Rutgers University-New Brunswick, 1972; M.A.,University of Maryland-College Park, 1974; Ph.D., 1981.	Lecturer
Brewer	Holly	Full Member	B.A., Harvard University, 1986; M.A., University of California, Los Angeles, 1989; Ph.D., 1994	Associate Professor, History
Brewer	Carmen	Adjunct Member	B.A., Douglass College, M.A., University of Maryland, Ph.D., University of Maryland, 1981	Lecturer, Clinical Audiology
Briber	Robert M.	Full Member	B.S.,Cornell University, 1979; M.S., University of Massachusetts-Amherst, 1981; Ph.D., 1984.	Professor, Materials Science and Engineering Professor, Biophysics Professor, Chemical Physics
Brick	Michael	Full Member	B.S. Mathematics, University of Dayton 1973); M.A. Statistics, American University 1976); Ph.D. Statistics, American University 1984)	Research Professor, Survey Methodology
Brid	Ryan	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Brighton	Stephen	Full Member	Ph.D., Boston University, 2005; B.A., Montclair State, 1992	Associate Chair, Anthropology Associate Professor, Anthropology
Briken	Volker	Full Member	Ph.D., University of Paris France 1998	Assistant Professor, Biological Sciences

Brill	Dieter	Full Member		Professor, Applied Mathematics & Statistics, and Scientific Computation
Brin	Michael I.	Full Member	B.A., Moscow State University, 1970; Ph.D., Kharkov State University, 1975.	Professor Emeritus, Mathematics
Brooks	Laure Weber	Full Member	B.A., University of Maryland-College Park, 1980; M.A., 1982; Ph.D., 1986.	Instructor, Criminology and Criminal Justice
Brosnan	Patrick	Full Member	Ph.D. University of Chicago, 1998	Professor, Mathematics
Brower	Sidney	Full Member	B.Arch., University of Capetown, 1953;M.C.P., Massachusetts Institute of Technology, 1964.	Affiliate Professor, American Studies
brower	william S.	Special Member	B.S., University College, 2004; M.S., University of Cambridge, 2008	University Affiliate, Environmental Science and Technology
Brown	Amy	Non-Member	BS, University of Florida, 1975; MS, Michigan State University, 1980; PhD, University of Maryland, 1993	Professor Emerita, Entomology
Brown	Manami J.	Full Member	B.S., Morgan State University, 1975; M.S., Johns Hopkins University, 1993.	Director Senior Agent
Brown	Michael	Full Member	B.A., University of Keele, 1969; Ph.D., 1975.	Professor, Geology
Brown	Elizabeth Y.	Adjunct Member	B.S., Kent State University, 1965; M.Ed., 1967; Ed.D., University of Houston, 1973.	Instructor, Kinesiology
Brown	Tara	Full Member	Ed.D, Harvard University	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, Curriculum and Instruction
Brown	Madeline	Full Member	Ph.D., Stanford University, 2017; M.A., Stanford University, 2013	Assistant Professor, Anthropology
Brubaker	Kaye L.	Full Member	B.A.,Eastern Mennonite College, 1979; B.S., University of Maryland-College Park,1989; M.S., Massachusetts Institute of Technology, 1991; Ph.D., 1995.	Associate Professor, Civil and Environmental Engineering
Bruce	La Marr Jurelle	Full Member	B.A., Columbia University; Ph.D., Yale University	Assistant Professor, American Studies
Bruck	Hugh Alan	Full Member	B.S., University of South Carolina-Columbia, 1988; M.S., 1989; Ph.D.,California Institute of Technology, 1995. GCEN Academic Advisor for Mechanical Engineering Director of Graduate Studies	Associate Chair, Mechanical Engineering Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering

Brunson	Rod K.	Full Member	B.S., Criminology and Criminal Justice, University of Missouri at St. Louis, 1996; M.A., Criminology and Criminal Justice, University of Missouri at St. Louis,1998; Ph.D., Criminal Justice, University of Illinois at Chicago, 2003.	Professor, Criminology and Criminal Justice
Brush	Stephen G.	Full Member	A.B., Harvard University, 1955 D.Phil., Oxford University, 1958.	Distinguished University Professor Emeritus, History
Brust	Gerald E.	Full Member	B.S., Ohio State University, 1980; M.S., Ohio State University, 1985; Ph.D., North Carolina State University, 1989.	Senior Agent
Bryan	Philip	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Bryant	Ray B.	Special Member	B.S. Texas Tech Univ. 1973;, M.S. 1977; Ph.D. Purdue Univ. 1981.	University Affiliate, Environmental Science and Technology
Bryer	Jackson R.	Full Member	B.A. Amherst College, 1959; M.A. Columbia University,1960; Ph.D. University of Wisconsin-Madison, 1965.	Professor Emeritus, English Language and Literature
Bub	Jeffrey	Full Member	B.Sc., University of Capetown, 1961; B.Sc., 1962; Ph.D., University of London, 1966.	Distinguished University Professor Emeritus, Philosophy
Buchanan	Robert L.	Full Member	B.S., Rutgers University, 1969; M.S., Rutgers University, 1971; Ph.D., Rutgers University, 1974	Professor, Nutrition and Food Science
Buchtel	John	Adjunct Member	PhD, University of Virginia	Lecturer, Library and Information Science
Buonanno	Alessandra	Full Member	B.S., University of Pisa, Italy, 1993; Ph.D., University of Pisa, Italy, 1996;	Professor, Physics
Burghardt	Karin	Full Member	BS, University of Delaware, 2007; MS, Yale University, 2012; PhD, Yale University, 2016	Assistant Professor, Entomology
Burk	Amy O.	Full Member	B.S., James Madison University, 1995; M.S., Virginia Polytechnic Institute and State University, 1998; Ph.D., Virginia Polytechnic Institute and State University, 2001.	Associate Professor, Animal Sciences
Burk	David	Graduate Teaching	Ph.D., University of Chicago, 2014	Lecturer, Applied Economics
Burke	Philip J.	Full Member	B.S., University of Scranton, 1963;M.S., 1965; Ph.D., Syracuse University, 1970.	Professor, Special Education

Burke	Juan	Full Member	MA, McGill University; PhD, McGill University	Assistant Professor, Architecture Assistant Professor, Urban and Regional Planning and Design
Butch	Nicholas	Full Member	B.S., Rutgers University-New Brunswick, 2001; M.S., University of California-San Diego, 2003; Ph.D., 2008.	Adjunct Assistant Professor, Physics
Butler	Lucas	Full Member	A.B., Harvard University, 2005; M.A., Stanford University, 2009; Ph.D., Stanford University, 2012	Assistant Professor, Human Development Assistant Professor, Neurosciences and Cognitive Science
Butler	Brian	Full Member	M.S., Carnegie-Mellon University, 1995; Ph.D., Carnegie-Mellon University, 1999	Associate Dean, Library and Information Science Professor, Library and Information Science
Butler	Mary Odell	Adjunct Member	Ph.D., Temple University, 1978; M.A., Temple University, 1974; B.S., Ohio. University, 1964	Adjunct Assistant Professor, Anthropology
Butler	James	Full	M.Ed., Temple University, 1994; D.P.H., University of Pittsburgh, 1999	n/a, Behavioral and Community Health
Butler Wingfield	Kim	Special Member	B.A. Harvard University, 1992, M.A. Johns Hopkins University, 1995, Ph.D. Johns Hopkins University, 2003	n/a, Art History and Archaeology
Butts	Daniel	Full Member	B.A., Oberlin College, 1994; Ph.D., University of California Berkeley, 2000.	Professor, Biophysics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Neurosciences and Cognitive Science Associate Professor, Biological Sciences
Cable	John Hart	Adjunct Member	B.Arch.,Clemson University, 1967; M.Arch., Catholic University of America, 1970.	Senior Research Engineer, Civil and Environmental Engineering
Cabrera	Natasha J.	Full Member	B.Sc. University of Toronto, 1985; M.A., 1989; Ph.D, University of Denver, 1995.	Professor, Human Development
Cabrera	Alberto	Full Member	B.S., National University of Mexico, 1979; M.S., University of Wisconsin-Madison, 1982; Ph.D., University of Wisconsin-Madison, 1987.	Professor Professor Emeritus, Higher Education
Caddick	Mark	Special Member	B.S., University of Bristol, 2000; Ph.D., University of Cambridge, 2004	University Affiliate, Geology
Cadou	Christopher	Full Member	B.S., Cornell University, 1989; M.S., University of California - Los Angeles, 1991; Ph.D., California State University - Los Angeles, 1996	Associate Professor, Aerospace Engineering

Cai	Jing	Full Member	Ph.D., University of California, Berkeley, Agricultural and Resource Economics, 2012M.A. University of California, Berkeley, Statistics, 2009M.S., Peking University, Finance, 2006B.S., Beijing Normal University, Computer Science, 2004	Associate Professor, Agricultural and Resource Economics
Caines	Colin	Graduate Teaching	Ph.D., University of British Columbia, 2016	Lecturer, Applied Economics
Calabrese	Richard V.	Full Member	B.S., University of Rochester, 1969; M.S.,University of Massachusetts-Amherst, 1971; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Chemical Engineering
Calvo	Ernesto	Full	Licenciado en Ciencia Politica, University of Buenos Aires, 1990; Ph.D. Political Science, Northwestern University, 2001	Professor, Government and Politics
Cameron	Maria	Full Member	Ph.D., University of California, Berkeley, 2007.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Mathematics
Cameron	Sarah	Full Member	B.A., Stanford University, 1999; M.A., 2002; M.A., Yale University, 2006; Ph.D., 2010.	Associate Professor, History
Campangne	Herve Thomas	Full Member	B.A., Universite Francois Rabelais, Tours, France, 1984; M.A.,Rutgers University-New Brunswick, 1989; Ph.D., 1992.	Associate Professor, French Modern Studies Associate Professor, French Studies
Campbell	Patricia F.	Full Member	B.S., College of Saint Francis, 1970; M.S., Michigan State University, 1972; Ph.D.,Florida State University, 1976.	Professor Emerita, Teaching and Learning, Policy and Leadership Associate Professor, Curriculum and Instruction
Campbell	Gretchen	Full Member	B.A., Wellesley College, 2001; Ph.D., Massachusetts Institute of Technology, 2006.	Adjunct Assistant Professor, Physics
Candela	Philip A.	Full Member	B.S., City University of New York-Brooklyn College, 1977; Ph.D., Harvard University, 1982.	Professor Emeritus, Geology
Canty	Timothy	Full Member	BA, Physics, Hartwick College, 1994 MS, Physics, New Mexico Institute of Mining and Technology, 2000 PhD, Physics, New Mexico Institute of Mining and Technology, 2002	Director, Atmospheric and Oceanic Science Associate Professor, Atmospheric and Oceanic Science
Cao	Kan	Adjunct Member	B.S., Nanjing University/ Nanking University, 1997; Ph.D., Johns Hopkins University, 2005	Associate Professor, Biological Sciences

Caramello	Charles A.	Full Member	B.A. Wesleyan University, 1970; M.A. University of Wisconsin-Milwaukee, 1973; Ph.D. 1978.	Professor, English Language and Literature Affiliate Professor, American Studies
Caras	Melissa	Full Member	B.S., Brandeis University, 2007; Ph.D., University of Washington, 2013	n/a, Neurosciences and Cognitive Science
Carcelli	Shannon	Full Member	B.A., Carleton College, 2008; Ph.D., University of California, San Diego, 2018	Assistant Professor, Government and Politics
Carignan	Craig	Adjunct Member	B.S., Massachusetts Institute of Technology, 1981; M.S., 1982; Sc.D., 1987.	Research Associate, Aerospace Engineering
Carleton	Karen	Full Member	B.S., Yale University, 1980; Ph.D., University of Colorado, 1987	Professor, Neurosciences and Cognitive Science Professor, Biological Sciences
Carlson	Richard Walter	Special Member	B.A., University of California-San Diego, 1976; Ph.D., University of California-San Diego, Scripps Institution of Oceanology, 1980	University Affiliate, Geology
Carpenter	Faedra	Full Member	B.A., Spelman College, 1992; M.A. Washington University, 1994; Ph.D., Stanford University, 2005.	Affiliate Associate Professor, Comparative Literature
Carpuat	Marine	Full Member		Associate Professor, Computer Science
Carr	Catherine E.	Full Member	B.Sc, University of Capetown, 1976; M.A.,State University of New York-Buffalo, 1977; Ph.D., University of California-San Diego, 1984.	Professor, Neurosciences and Cognitive Science Professor, Biological Sciences
Carr	Meredith	Special Member	B.E., The Cooper Union, 2000; M.S., University of Illinois, 2002; Ph.D., University of Illinois, 2007	n/a, Civil and Environmental Engineering
Carretta	Vincent	Full Member	B.A. State University of New York-Binghamton, 1968; M.A. 1971; Ph.D. University of Iowa, 1977.	Professor Emeritus, English Language and Literature
Carroll	Mark J.	Full Member	B.S., California Polytechnic State University, 1979; M.S., Michigan State University, 1982; Ph.D., Cornell University, 1989.	Associate Professor, Plant Science
Carroll	James	Non-Member		Lecturer, Journalism
Carruthers	Peter	Full Member	B.A., University of Leeds, 1975; M.Phil., University of Leeds, 1977; D.Phil., University of Oxford, 1979	Professor, Neurosciences and Cognitive Science Professor, Philosophy Affiliate Professor, Second Language Acquisition
Carter-Pokras	Olivia	Full	B.S., Tulane University; M.H.S., Johns Hopkins University Bloomberg School of Public Health; Ph.D., Johns Hopkins University Bloomberg School of Public Health	Professor Emeritus, Epidemiology Professor Emeritus, Biostatistics

Carton	James A.	Full Member	B.S.E., Princeton University, 1976; M.S.,University of Washington, 1979; M.A., Princeton University, 1980; Ph.D., 1983.	Chair, Atmospheric and Oceanic Science Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Chemical Physics
Cartwright	Kent	Full Member	B.A., University of Michigan-Ann Arbor, 1965; M.A., Case Western Reserve 1968; PhD., 1979.	Professor Emeritus, English Language and Literature
Casey	Maud	Full Member	B.A., Wesleyan University, 1991; M.F.A., University of Arizona, 1995.	Professor, Creative Writing
Cassidy	Jude Anne	Full Member	B.A., Duke University, 1973; M.A.,University of Virginia, 1983; Ph.D., 1986.	Professor, Neurosciences and Cognitive Science Professor, Psychology
Castonguay	Thomas W.	Full Member	B.A., Framingham State College, 1973; M.A., Mount Holyoke College, 1975; Ph.D., Rutgers State University, 1978.	Professor, Nutrition and Food Science
Castro	Mark S.	Full Member	B.A., Lawrence University, 1979; M.S., Florida Inst of Technology-Melbourne, 1984; Ph.D., University of Virginia, 1991.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Caughey	John L.	Full Member	B.A.,Harvard University, 1963; M.A., University of Pennsylvania, 1967; Ph.D., 1970.	President Emeritus, American Studies
Cavigelli	Michel	Special Member	B.A., Oberlin College, 1984; M.S., Kansas State University, 1990; Ph.D., Michigan State University, 1998	University Affiliate, Environmental Science and Technology
Cañeque	Alejandro	Full Member	PhD, New York University, 1999	Professor, History
Celi	Roberto	Full Member	Laurea,Politecnico Di Torino-Italy, 1980; M.S., University of California-Los Angeles, 1982; Ph.D., 1987.	Professor, Aerospace Engineering
Cerrai	Sandra	Full Member	M.Sc. University of Pisa, 1992 Ph.D.; Scuola Normale Superiore of Pisa, 1998.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematical Statistics Professor, Mathematics
Chacko	Zackaria	Full Member	B.S., Indian Institute of Technology-Kharagpur, 1992; M.S., 1994; Ph.D., University of Maryland-College Park, 1999.	Associate Professor, Physics
Chadha	Kalyani	Full Member	B.A., Delhi University, 1988; M.A., Jawaharal Nehru University, 1990; Ph.D., University of Maryland, 1999.	Assistant Professor, Journalism
Chakraborty	Mita	Graduate Teaching	Ph.D., Cornell University, 1996	Lecturer, Applied Economics

Chambers	Robert G.	Full Member	B.S.F.S.,Georgetown University, 1972; M.S., University of Maryland-College Park, 1975;Ph.D., University of California-Berkeley, 1979.	Professor, Agricultural and Resource Economics
Chambers	Erve	Full Member	B.A., Western Washington University, 1969; M.A.,University of Oregon, 1972; Ph.D., 1973.	Affiliate Professor, American Studies
Chambliss	Marilyn J.	Full Member	B.A., University of California-Berkeley, 1964; B.A., San Jose State University, 1982 Ph.D., Stanford University, 1990.	Associate Professor Emerita, Teaching and Learning, Policy and Leadership
Chang	Peter C.	Full Member	B.S.,Texas A&M University-College Station, 1975; M.S.,University of Illinois-Urbana/Champaign, 1979; Ph.D., 1982.	Associate Professor, Civil and Environmental Engineering
Chang	Gang-Len	Full Member	B.E.,National Cheng Kung University-Taiwan, 1975; M.S., National Chiao Tung University-Hsinchu, 1979; Ph.D., University of Texas-Austin, 1985.	Professor, Civil and Environmental Engineering
Chang	Caren	Full Member	B.A.,University of California-Berkeley, 1982; Ph.D.,California Institute of Technology, 1988.	Professor, Biological Sciences Affiliate Professor, Plant Science
Chang	Wonjun	Graduate Teaching	Ph.D., University of Wisconsin-Madison, 2017	Lecturer, Applied Economics
Chao	John C.	Full Member	B.S., University of Pennsylvania, 1987; Ph.D., Yale University, 1994.	Professor, Economics
Chao	Shenn-Yu	Full Member	B.S., Tsinghua University Taiwan 1971; M.S., University of Utah, 1975;Ph.D., North Carolina State University, 1979.	Professor, Marine, Estuarine, and Environmental Sciences
Chaverri	Priscila	Full Member	B.S., Instituto Tecnologica de Costa Rica, 1993; Ph.D. Pennsylvania State University, 2005.	Affiliate Professor, Biological Sciences
Chazan	Daniel	Full Member	A.B., M.A., Brandeis University, 1981; M.A., Harvard Graduate School, 1982; M.A., Worcester Polytechnic, 1984; M.A., Ed.D., Harvard Graduate School of Education, 1989;	Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Chellappa	Ramalingam	Full Member	B.E., University of Madras,1975; M.S., Indian Institute of Science-Bangalore, 1977; M.S.E.E., Purdue University, 1978; Ph.D., 1981.	Professor, Electrical and Computer Engineering Professor Emeritus, Electrical and Computer Engineering Affiliate Professor, Computer Science

Chembo	Yanne	Full Member	B.S., University of Yaounde, 1997; B.S., National Advanced School of Posts and Telecommunications, 2001; M.S., University of Yaounde, 2001; Ph.D., University of Yaounde, 2005	Associate Professor, Electrical and Computer Engineering
Chen	Alexander	Full Member	B.A., New York University,1973; M.U.P., 1976; Ph.D., University of Michigan-Ann Arbor, 1981.	Associate Professor, Urban and Regional Planning and Design
Chen	Gilad	Full Member	BA, Pennsylvania State University; Doctoral degree from George Mason University in 2001	Professor
Chen	Feng	Full Member	B.S., The Ocean University of Qingdao, 1985; M.S., The First Institute of Oceanography, 1988; Ph.D., The University of Texas at Austin, 1995	Associate Professor, Marine, Estuarine, and Environmental Sciences
Chen	Zhi-Long	Full Member	B.S., Fudan University, 1988; M.S., Fudan University, 1991; M.A., Princeton University, 1995; Ph.D., Princeton University, 1997.	Professor
Chen	Yu	Full Member	B.S., Peking University, 1997; M.S., University of Pennsylvania, 2001; Ph.D., 2003	Associate Professor, Bioengineering
Chen	Feinian	Full Member	B.A., Georgia College, 1994; M.A., Mississippi State University, 1996; Ph.D., University of North Carolina at Chapel Hill, 2001.	Professor, Sociology
Chen	Jie	Full Member	B.S., Shanghai University, 2001; M.A., SUNY-Stony Brook, 2006; Ph.D., SUNY-Stony Brook, 2008	Associate Professor, Health Administration Associate Professor, Health Equity Associate Professor, Health Policy Analysis and Evaluation Associate Professor, Health Services
Chen	Shuo	Special Member	Ph.D, Biostatistics Emory University, 2012; M.S., Public Health, Emory University; M.S., Mathematics and Statistics, East Tennessee State University; B.S., Electrical Engineering, Harbin Institute of Technology, Harbin, China	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Chen	Briella Baer	Graduate Teaching	B.S., Denison University, 2015; M.H.S., John Hopkins University, 2016	n/a, Special Education

Chengri	Ding	Full Member	B.S., Beijing Normal University, 1986; M.S., Sinica Academy of Sciences, 1989; Ph.D., University of Illinois at Urbana-Champaign, 1996.	Professor, Community Planning
Chernela	Janet	Full Member	B.A., University of Wisconsin-Madison, 1965; M.A. Columbia University, 1978; Ph.D. Columbia University, 1983	Professor, Anthropology Affiliate Professor, Women's Studies
Chico	Tita	Full Member	A.B., Vassar College, 1991; M.A., New York University, 1994; Ph.D., 1998.	Professor, English Language and Literature Affiliate Professor, Women's Studies
Childs	Andrew	Full Member	B.S., California Institute of Technology, 2000; Ph.D., Massachusetts Institute of Technology, 2004	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Physics
Ching	Edith	Adjunct Member		Adjunct Professor, School Librarianship
Chinoy	Ira	Full Member	A.B., Harvard College; Ph.D., University of Maryland, 2010	Associate Professor, Journalism
Chisolm	Andrea	Full Member	B.A. Wake Forest University, 2007; Ph.D. West Virginia University, 2012	Co-Director, Clinical Psychological Science
Choe	Eun Kyoung	Adjunct Member	Ph.D., University of Washington, 2014	Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science
Choi	Kyu Yong	Full Member	B.S., Seoul National University, 1976; M.S.,1978; Ph.D., University of Wisconsin-Madison, 1984.	Professor, Chemical Engineering
Choi	Young Tai	Full Member		Assistant Research Scientist, Aerospace Engineering
Choi	Joonkyu	Graduate Teaching	Ph.D., University of Maryland at College Park, 2018	Lecturer, Applied Economics
Chopra	Inderjit	Full Member	B.Sc.,Punjab Engineering College-Chandigarh, India, 1965; M.Eng.,Indian Institute of Science-Bangalore, 1968; Sc.D., Massachusetts Institute of Technology, 1977.	Distinguished University Professor, Aerospace Engineering
Chopra	Nikhil	Full Member	Bachelor of Technology Honors Mechanical Engineering, Indian Institute of Technology, Kharagpur, India, 2001; Ph.D., Systems and Entrepreneurial Engineering, University of Illinois at Urbana-Champaign, 2006.	Associate Professor, Mechanical Engineering Assistant Professor, Systems Engineering

Christou	Aristos	Full Member	B.A., Columbia University, 1967; Ph.D., University of Pennsylvania, 1971.	Professor, Materials Science and Engineering Professor, Mechanical Engineering Professor, Reliability Engineering
Chronis-Tuscano	Andrea M.	Full Member	B.A., Loyola University Chicago, 1993; M.A., State University of New York at Buffalo, 1998; Ph.D., State University of New York at Buffalo, 2002.	Professor, Psychology
Chuang	Julia	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology
Chung	Wilbur C.	Full Member	B.S., Carnegie Mellon University, 1996; M.B.A., Carnegie Mellon University, 1990; Ph.D., University of Michigan, 1999.	Associate Professor
Chung	Peter	Full Member	B.S., 1994, University of Virginia; M.S., 1996, University of Minnesota; Ph.D., 1999, University of Minnesota	Associate Professor, Mechanical Engineering
Chung	Patrick	Full Member	B.A., Pennsylvania State University, 2009; M.A., Brown University, 2011; Ph.D., Brown University, 2017	Assistant Professor, History
Cirillo	Cinzia	Full Member	M.S., University of Naples-Italy, 1994. Ph.D., University of Torino, 1998.	Assistant Professor, Civil and Environmental Engineering
Clark	Jane E.	Full Member	B.S., State University of New York-College at Brockport, 1968; M.Ed.,University of Washington, 1970; Ph.D., University of Wisconsin-Madison, 1976.	Professor, Physical Activity Professor Emerita, Kinesiology
Clark	Charles	Adjunct Member	B.A., Western Washington University, 1974; Ph.D., University of Chicago, 1979.	Adjunct Professor, Physics Adjunct Professor, Chemical Physics
Clark	Lawrence	Full Member	B.A., Emory University, 1989; M.Ed., Emory University, 1998; Ph.D., Emory University, 2004.	Associate Professor, Curriculum and Instruction
Clayton	Cassandra	Non-Member	B.A., Spelman College	Lecturer, Journalism
Cleaveland	Walter Rance	Full Member	B.S., Duke University, 1982; M.S., Cornell University, 1985; Ph.D., Cornell University, 1987.	Professor, Systems Engineering Professor, Computer Science

Clegg	Tamara	Full Member	B.S., North Carolina State University, 2002; Ph.D. Georgie Institute of Technology, 2009	Associate Professor, Teaching and Learning, Policy and Leadership Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies Assistant Professor, Library and Information Science Assistant Professor, School Librarianship Assistant Professor, Youth Experience Assistant Professor, Curriculum and Instruction
Clement	David L.	Full Member	B.A., Wittenberg University, 1978; M.S., Rutgers University-New Brunswick, 1980; Ph.D., Purdue University, 1984.	Principal Agent
Clough	Lauretta	Adjunct Member	B.A., Williams College; M.A., Ph.D., University of Maryland.	University Affiliate, French Modern Studies
Clyne	Alisa M.	Full Member	B.S., Stanford University, 1996; Ph.D., Massachusetts Institute of Technology, 2006.	Professor, Bioengineering
Coale	Frank J.	Full Member	B.S., University of Maryland-College Park, 1981; M.S., University of Kentucky-Lexington, 1983; Ph.D., 1986.	Professor, Environmental Science and Technology
Cochran	Diana	Associate		Assistant Clinical Professor, Plant Science
Codispoti	Louis A.	Full Member	B.S. Fordham University, 1962; M.S. University of Washington, 1966; Ph.D., University of Washington, 1973	Research Professor, Marine, Estuarine, and Environmental Sciences
Cohen	Joel M.	Full Member	Sc.B., Brown University, 1963; Ph.D.,Massachusetts Institute of Technology, 1966.	Professor, Mathematics
Cohen	Philip	Full Member	B.A., University of Michigan,Ann Arbor,1992; M.A., University of Massachusetts, Amherst, 1995; Ph.D., University of Maryland, College Park, 1999	Professor, Sociology Graduate Director, Sociology
Cohen	Thomas D.	Full Member	A.B., Harvard University, 1980; Ph.D., University of Pennsylvania, 1985.	Associate Chair, Physics Distinguished Scholar-Teacher, Physics Professor, Physics
Cohen	Avis H.	Full Member	B.S., University of Michigan-Ann Arbor, 1964; Ph.D., Cornell University, 1977.	Professor Emerita, Biological Sciences

Cohen	William A.	Full Member	B.A., Swarthmore College, 1985; Ph.D., University of California-Berkeley, 1993.	Professor, English Language and Literature Affiliate Professor, Comparative Literature
Cohen	Helene Kalson	Adjunct Member	B.A. University of Michigan,1975; M.Ed. Lesley University,1978; Ed.D., Harvard University, 1990	University Affiliate
Cohen	Jeffrey	Special Member	B.A., University of Pennsylvania, 1976; M.D., Johns Hopkins University, 1981	n/a, Biological Sciences
Colantuono	Anthony	Full Member	B.A.,Rutgers University-New Brunswick, 1980; M.A., Johns Hopkins University, 1982; Ph.D., Johns Hopkins University, 1987.	Professor, Art History and Archaeology
Coleman	Linda K.	Full Member	A.B., University of Michigan-Ann Arbor, 1973; M.A., 1973; Ph.D., University of California-Berkeley, 1982.	Associate Professor, English Language and Literature Associate Professor, Neurosciences and Cognitive Science
Coleman	Gary D.	Full Member	B.S., Colorado State University, 1978; M.S., 1986; Ph.D., University of Nebraska-Lincoln, 1989.	Associate Professor, Plant Science
Coles	Victoria J.	Special Member	B.S., University of California at San Diego, 1991; Ph.D., University of Miami, 1998	Research Assistant Professor, Marine, Estuarine, and Environmental Sciences
Coles	Kimberly	Full Member	B.A., Columbia, University, 1994; M.A.,1996; M.Phil., Oxford University, 1998; D.Phil., 2003.	Associate Professor, English Language and Literature
Coles	Kim	Full Member	B.A. Columbia University, 1994; M.A. Columbia University, 1996; M.Phil, University of Oxford, 1998; D.Phil, St. Catherine's College, Oxford, 2003	Affiliate Associate Professor, Women's Studies
Coletti	Theresa M.	Full Member	B.A.,University of Pittsburgh, 1971; M.A., University of Rochester, 1973; Ph.D.,University of Rochester, 1975.	Professor, English Language and Literature Affiliate Professor, Women's Studies
Collier	Michael R.	Full Member	B.A., Connecticut College, 1976; M.F.A.,University of Arizona, 1979.	Director, Creative Writing Professor, English Language and Literature Professor, Creative Writing
Collins	Merle	Full Member	B.A., University of the West Indies-Mona, Jamaica, 1972;M.A., Georgetown University, 1980; Ph.D.,London School of Economics & Political Science, 1990.	Professor, English Language and Literature Professor, Comparative Literature Affiliate Professor, Women's Studies
Collins	Patricia Hill	Full Member	B.A., Brandeis University, 1969; M.A.T. Harvard University, 1970; Ph.D. Brandeis University, 1984.	Distinguished University Professor Emeritus, Sociology

Collins	Allen	Adjunct Member	B.A., Amherst College, 1987; Ph.D. University of California Berkeley, 1999.	Adjunct Professor, Biological Sciences
Collis	Shannon	Full Member	Bachelor of Visual Communication Design from University of Alberta, Edmonton 2001; M.F.A. in Printmaking, University of Alberta, 2005; Certificate in Digital Technologies, Concordia University, 2009	Assistant Professor, Art Studio Graduate Director, Art Studio
Colombini	Marco	Full Member	B.S., McGill University-Montreal, 1970; Ph.D., 1974.	Professor, Biological Sciences
Colwell	Rita R.	Full Member	B.S., Purdue University, 1956; M.S., 1958; Ph.D., University of Washington, 1961.	Distinguished University Professor, Biological Sciences
Connor	Erin E.	Adjunct Member	B.S., University of Maryland College Park, 1989; M.S., Virginia Polytechnic Institute and State University, 1993; Ph.D., University of Maryland College Park, 1999.	Adjunct Professor, Animal Sciences
Conrad	Frederick G.	Full Member	B.A., Hampshire College, 1978; Ph.D., University of Chicago, 1986	Research Professor, Survey and Data Science (online) Research Professor, Survey Methodology
Conway	Daniel	Full Member	B.S., State University of New York-Brockport, 1978; M.F.A., George Washington University, 1982.	Professor
Cook	Steven	Special Member	BS, University of Utah, 2000; PhD, University of Utah, 2007	Research Scientist, Entomology
Cooke	Todd J.	Full Member	B.S.,Antioch College, 1974; Ph.D., Cornell University, 1979.	Professor, Biological Sciences Affiliate Professor, Plant Science
Cooper	Lee	Full Member	B.A., University of California Santa Cruz, 1978; M.S., University of Washington, 1980; Ph.D., University of Alaska, 1987.	Research Professor, Marine, Estuarine, and Environmental Sciences
Cooper	Thomas	Special Member	B.S., Bloomsburg University of Pennsylvania, 1993; M.S., South Dakota State University, 1996; Ph.D., South Dakota State University, 2005	University Affiliate, Environmental Science and Technology
Cooperman	Bernard Dov	Full Member	B.A., University of Toronto, 1968; M.A., Brandeis University, 1969; M.A., Harvard University, 1972; Ph.D., 1976.	Associate Professor, History Associate Professor, Jewish Studies
Coplan	Michael A.	Full Member	B.A., Williams College, 1960; Ph.D., Yale University, 1963.	Professor, Chemical Physics
Corbin	Christy T.	Adjunct Member	B.A., Connecticut College, 1980; M.S., East Carolina University-Greenville, 1984; Ph.D., University of Maryland-College Park, 1996.	Assistant Clinical Professor, Human Development

Cornwell	Jeffrey C.	Full Member	B.S., Hobart and William Smith Colleges, 1976; Ph.D.,University of Alaska-Fairbanks, 1983. MEES	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Corrada Bravo	Hector	Full Member	B.M. Peabody Institute, 1997;Ph.D. University of Wisconsin, 2008	Associate Professor, Computer Science Affiliate Associate Professor, Biological Sciences
Corridon	Cassandra S.	Full Member	B.S., University of Maryland-College Park, 1972 M.S., Hood College, 1982.	Specialist
Corrigan	Catherine M.	Special Member	B.S., Michigan State University, 1995; M.S., Michigan State University, 1998; Ph.D., Case Western Reserve University, 2004.	University Affiliate, Geology
Corsi	Thomas M.	Full Member	B.A., Case Western Reserve University, 1971; M.A., Kent State University, 1974;Ph.D., University of Wisconsin, 1976.	Professor
Coughlin	Peter J.	Full Member	B.A., State University of New York-Albany, 1973; M.A., 1974; Ph.D., 1976.	Associate Professor, Economics Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Couper	Mick P.	Full Member	B.Soc.Sc., Univerity of Cape Town, 1978; M.A., University of Michigan, 1989; Ph.D., Rhodes University, 1990.	Research Professor, Survey and Data Science (online) Research Professor, Survey Methodology
Craig	Patrick M.	Full Member	B.F.A., Western Michigan University, 1974; M.F.A., University of Cincinnati, 1976.	Associate Professor, Art Studio
Croco	Sarah E.	Full Member	B.A., University of Illinois; Ph.D., University of Michigan, 2008	Assistant Professor, Government and Politics
Croninger	Robert G.	Full Member	B.A., Valparaiso University, 1973; M.A., College of William & Mary, 1976;Ph.D., University of Michigan-Ann Arbor, 1997.	Associate Chair, Curriculum and Instruction Associate Professor, Policy Studies Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
Cronrath	David	Full Member	B.Arch., Pennsylvania State University, 1971; M.Arch., University of California-Berkeley, 1976.	Professor, Architecture
Cropper	Maureen L.	Full Member	B.A., Bryn Mawr College, 1969; M.A., Cornell University, 1972; Ph.D., 1973.	Distinguished University Professor, Economics Affiliate Professor, Agricultural and Resource Economics
Cruz-Cano	Raul	Associate	B.S., Autonomous University of Chihuahua, 1999; M.S., University of Texas at El Paso, 2002; Ph.D., University of Texas at El Paso, 2005	Associate Research Professor, Epidemiology Associate Research Professor, Biostatistics

Cui	Qingbin	Full Member	BE in Construction Engineering Management, Tianjin University, 1993; MS in Technology Economics, Tianjin University, 2000; PhD in Civil Engineering, Purdue University, 2005	Associate Professor, Civil and Environmental Engineering
Cukier	Michel	Full Member	Ph.D., National Polytechnic Institute of Toulouse, France, 1996	n/a, Electrical and Computer Engineering Associate Professor, Mechanical Engineering Associate Professor, Reliability Engineering Associate Professor, Systems Engineering Affiliate Associate Professor, Computer Science
Culver	James N.	Full Member	B.S.,Oklahoma State University-Stillwater, 1985; M.S., Oklahoma State University, 1987; Ph.D., University of California-Riverside, 1991.	Professor, Plant Science Affiliate Professor, Biological Sciences
Culver	James	Full Member	B.S., Oklahoma State University, 1985; M.S., Oklahoma State University, 1987; Ph.D., University of California-Riverside, 1991	Affiliate Professor, Bioengineering
Cumings	John	Full Member	Ph.D. University of California, Berkeley 2002	Associate Professor, Materials Science and Engineering Assistant Professor, Chemical Physics
Cummings	Michael P.	Full Member	Ph.D., Harvard, 1992.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Biological Sciences Professor, Computer Science
Cummings	Kelli Dawn	Full Member	B.A., Oregon State University, 1999; M.S., University of Oregon, 2003; Ph.D., University of Oregon, 2004.	Assistant Professor, Special Education
Cunniff	Patrick F.	Full Member	B.C.E., Manhattan College, 1955; M.S., Virginia Polytechnic Institute & State University, 1956; Ph.D., 1962.	Professor Emeritus, Mechanical Engineering
Cunningham	Kathleen	Full Member	B.A., University of California, San Diego, 1999; M.A., University of California, San Diego, 2002; Ph.D., University of California, San Diego, 2007.	Associate Professor, Government and Politics
Cunningham	David	Full Member	B.A., Wake Forest University, 1998; M.S., George Mason University, 2001; Ph.D., University of California, San Diego, 2006.	Associate Professor, Government and Politics

Currie	Douglas	Full Member	B.E.P., Cornell University, 1958; Ph.D.,University of Rochester, 1962.	Professor Emeritus, Physics Senior Research Scientist, Physics
Curry	Larissa Morgan	Non-Member	B.A., 2003; Rutgers University, B.A., 2011; Towson University, Au.D. 2015, James Madison University	Assistant Clinical Professor, Clinical Audiology
Cypess	Sandra M.	Full Member	B.A., Brooklyn College, 1963; M.A., Cornell University, 1965; Ph.D., University of Illinois-Urbana/Champaign, 1968.	Professor Emerita, Spanish Language and Literature
Czaja	Wojciech	Full Member	M.Sc., University of Wroclaw, 1995; M.A., Washington University, 1997; Ph.D., Washington University, 2000.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Dachman-Soled	Dana	Full Member	B.A., Yeshiva University, 2006; M.S., Columbia University, 2008; Ph.D., 2011	Associate Professor, Electrical and Computer Engineering
Dagenais	Mario	Full Member	B.Sc., Universite de Montreal,1974; M.S., University of Rochester, 1976; Ph.D., 1978.	Professor, Electrical and Computer Engineering Professor, Chemical Physics
Dalglish	Lucy A.	Full Member	B.A., University of North Dakota, 1980; J.D., Vanderbilt University, 2005	Dean, Journalism
Dallal	Cher	Full	B.A., University of California at Berkeley, 1998; M.P.H., Yale University School of Public Health, 2002; M.S., University of Southern California, 2005; Ph.D., University of Pittsburgh Graduate School of Public Health, 2009	Associate Professor, Epidemiology Associate Professor, Biostatistics
Dally	James W.	Full Member	B.S.,Carnegie Institute of Technology, 1951; M.S., 1953; Ph.D., Illinois Institute of Technology, 1958.	Professor Emeritus, Mechanical Engineering
Danesh	Erfan	Graduate Teaching	Ph.D., University of Toronto, 2016	Lecturer, Applied Economics
Daniels	Kevin M.	Full Member	B.S., University of South Carolina-Columbia, 2009; M.Eng., University of South Carolina-Columbia, 2012; Ph.D., University of South Carolina-Columbia, 2014	Assistant Professor, Electrical and Computer Engineering
Danko	Christina	Associate	M.A., University of Colorado, 2008; Ph.D., DePaul University, 2014	Assistant Clinical Professor, Clinical Psychological Science
Darden	Lindley	Full Member	B.A., Rhodes College, 1968; A.M., University of Chicago, 1969; S.M., 1972; Ph.D., 1974.	Distinguished Scholar-Teacher, Philosophy Professor Emerita, Philosophy Research Professor, Philosophy Affiliate Professor, Biological Sciences

Das	Siddhartha	Full Member	B.S., Indian Institute of Technology-Kharagpur, 2005; Ph.D. Indian Institute of Technology-Kharagpur, 2010	Associate Professor, Mechanical Engineering
Das	Diganta	Adjunct Member	B.S., Indian Institute of Technology-Kharagpur, 1987; M.S. Missouri University of Science and Technology, 1992; Ph.D. University of Maryland College Park, 1999	Associate Research Scientist, Mechanical Engineering Associate Research Scientist, Reliability Engineering
Das Gupta	Monica	Full Member	B.Sc., 1973, London School of Economics; M.Sc., 1974, London School of Economics; Ph.D., 1982, University of Sussex	Research Professor, Sociology
Das Sarma	Sankar	Full Member	B.S., Presidency College-Calcutta, 1973 Sc.M., Brown University, 1976; Ph.D., 1979.	Distinguished University Professor, Physics
Dasgupta	Abhijit	Full Member	B.S., Indian Institute of Technology-Madras, 1976; M.S., Villanova University, 1981; Ph.D., University of Illinois-Urbana/Champaign, 1988.	Professor, Mechanical Engineering Professor, Reliability Engineering
Datta	Anubhav	Full Member	B.Tech (Aerospace Engineering), Indian Institute of Technology, Kharagpur, 1998; Ph.D (Aerospace Engineering), University of Maryland, 2004.	Associate Professor, Aerospace Engineering
Daume	Hal	Full Member	B.S., Carnegie Mellon University, 2001; M.S., University of Southern California, 2003; PhD, University of Southern California, 2006.	Professor, Computer Science
Davidsburg	Joshua	Non-Member	B.A., University of Maryland	Lecturer, Journalism
Davidson	Neil A.	Full Member	B.S., Case Western Reserve University, 1961; M.S., University of Wisconsin-Madison, 1963; Ph.D., 1970; M.Ed., University of Maryland-College Park, 1982.	Professor Emeritus, Teaching and Learning, Policy and Leadership
Davidson	Eric	Non-Member	BA, Oberlin College, 1978; PhD, North Carolina State University, 1986	Affiliate Professor, Entomology
Davis	Jeffery T.	Full Member	B.A., Colby College, 1981;Ph.D., Massachusetts Institute of Technology, 1987.	Professor, Chemistry
Davis	Christopher C.	Associate	B.A., Cambridge University, 1965; M.A., 1970; Ph.D., Manchester University, 1970.	Professor, Chemical Physics Research Professor, Electrical and Computer Engineering
Davis	Larry S.	Full Member	B.A., Colgate University, 1970; M.S., University of Maryland-College Park, 1972; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science

Davis	Allen P.	Full Member	B.S.,University of Delaware, 1984; M.S., 1986; Ph.D., 1989.	Professor, Civil and Environmental Engineering
Davoudi	Zohreh	Full Member	B.Sc., Sharif University of Technology, 2007; M.Sc., Sharif University of Technology, 2009; Ph.D., University of Washington, 2014	Assistant Professor, Physics
Dawkins	Casey	Full Member	BS, Georgia Institute of Technology, 1995; MCP, Georgia Institute of Technology, 1999; PhD, Georgia Institute of Technology, 2003	Director, Urban and Regional Planning and Design Professor, Urban and Regional Planning and Design Professor, Community Planning
Dayie	Kwaku	Full Member	B.A. Physics,1990, Hamilton College; PhD., Biophysics, 1996, Harvard University	Associate Professor, Biochemistry Associate Professor, Biophysics Associate Professor, Chemistry
De Floriani	Leila	Full Member	Ph.D., Universita Delgi Studie de Peruguia, 1977	Professor, Geographical Sciences Adjunct Professor, Computer Science
De La Paz	Susan C.	Full Member	B.S., Northwestern University, 1984; M.S., University of Michigan, 1986; Ph.D., University of Maryland, 1995.	Professor, Special Education
De Leo	Pierre	Full Member	B.A., University of Milan-Bicocca, 2011; M.A., University of Milan-Bicocca, 2013; M.A., Boston College, 2014; Ph.D., Boston College, 2019.	Assistant Professor, Economics
De León	Jason	Special Member	PhD, Pennsylvania State University, 2008; MA, Pennsylvania State University, 2004, BA, University of California, Los Angeles, 2001.	Research Professor, Anthropology
De Lorenzo	William E.	Full Member	B.A.,Montclair State University, 1959; M.A., 1964; Ph.D., Ohio State University-Columbus, 1971.	Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
De Los Reyes	Andres	Full Member	B.S. Criminal Justice B.A. Political Science B.A. Psychology) Florida International University, 2001; Ph.D., University of Illinois, Chicago, 2008	Professor, Psychology
Deane	Anil E.	Full Member	B. Tech., Indian Inst. of Tech, 1979, M.S.; Virginia Polytech Inst and State University, 1981, Ph.D.;University of Colorado, 1987	Associate Research Professor, Applied Mathematics & Statistics, and Scientific Computation

Dearstyne	Bruce W.	Adjunct Member	B.A., Hartwick College, 1966; Ph.D., Syracuse University, 1974.	Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Information Studies Lecturer, Library and Information Science
Debonis	Rocco	Adjunct Member	MLS, University of Maryland; MFA, University of Virginia.	Lecturer, Library and Information Science
Dedova	Larissa	Full Member	M.Mus., Moscow State Conservatory, 1974; Ph.D., 1977.	Professor, Ethnomusicology Professor, Music Professor, Music Education
DeLio	Thomas J.	Full Member	B.Mus., New England Conservatory of Music, 1972; Ph.D., Brown University, 1979.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Dellomo	Michael	Full Member	B.S., Rensselaer Polytechnic Institute, 1979; M.A., Johns Hopkins University, 1980; Ph.D., Johns Hopkins University, 1984.	Associate Director, Telecommunications Advisor, Telecommunications
Delwiche	Charles Francis	Full Member	B.A.,University of California-Berkeley, 1984; Ph.D.,University of Wisconsin-Madison, 1990.	Professor, Biological Sciences
Demaria	Laura	Full Member	B.A. Universidad Nacional de Cordoba, Argentina, 1988; M.A. Washington University, St. Louis, Missouri, 1990; Ph.D. Washington University, St. Louis, Missouri, 1997.	Professor, Spanish Language and Literature Graduate Director, Spanish Language and Literature
Dempwolf	C. Scott	Full Member	SB, Massachusetts Institute of Technology, 1987; MCRP, Temple University, 2007; PhD, University of Maryland, 2012	Assistant Research Professor, Urban and Regional Planning and Design Adjunct Associate Professor, Community Planning
Dennis	Rachel	Full Member	B.S., George Mason University, 2002; M.S., University of Maryland-College Park, 2004; Ph.D., Purdue University-West Lafayette, 2009	Assistant Professor, Animal Sciences
Denny	Karen	Non-Member		Lecturer, Journalism
Desai	Sonalde B.	Full Member	B.A., University of Bombay, 1978; M.A., Case Western Reserve University, 1980; Ph.D., Stanford University, 1987.	Distinguished University Professor, Sociology Affiliate Professor, Women's Studies
DeShong	Philip R.	Full Member	B.S., University of Texas-Austin, 1971; Ph.D., Massachusetts Institute of Technology, 1976.	Professor, Chemistry
Deshpande	Amol	Full Member	Ph.D., University of California at Berkeley, 2004	Professor, Computer Science

Desmond	Sharon M.	Full Member	B.A., University of Toledo, 1982; M.S., 1984; Ph.D., 1988.	Associate Professor, Behavioral and Community Health
DeStefano	Jeffrey J.	Full Member	B.S.,University of Connecticut-Storrs, 1983; Ph.D., 1990.	Professor, Biological Sciences
Destler	I. M. Mac	Full Member	B.A., Harvard University, 1961; M.Public Affairs, Princeton University, 1965; Ph.D., 1971.	Professor Emeritus
DeVoe	Donald Lad	Full Member	B.S., University of Maryland-College Park, 1991; M.S., 1993; Ph.D., University of California-Berkeley, 1997.	Associate Chair, Mechanical Engineering Professor, Mechanical Engineering Affiliate Professor, Bioengineering Affiliate Professor, Chemical Engineering
Diakopoulos	Nicolas	Full Member	Sc.B., Brown University; M.S., Georgia Institute of Technology; Ph.D., Georgia Institute of Technology	Assistant Professor, Journalism
Dickerson	Russell R.	Full Member	B.A., University of Chicago, 1975; M.S.,University of Michigan-Ann Arbor, 1978; Ph.D., 1980.	Professor, Chemistry
Dickerson	John	Full Member	BSc Mathematics, UMD 2008; BSc Computer Science, UMD 2008; MSc Computer Science, Carnegie Mellon 2014; PhD Computer Science, Carnegie Mellon 2016	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation
Dickey	Seth Wayne	Full Member	B.S., Michigan State University. Ph.D., Johns Hopkins University School of Medicine	n/a, Veterinary Medical Sciences
Diemer	Benedikt	Full Member	M.S., University of Manchester, 2008; Ph.D., University of Chicago, 2015.	Assistant Professor, Astronomy
Diker	Vedat	Adjunct Member	PhD, SUNY - Albany	Director, Library and Information Science Senior Lecturer, Information Management Senior Lecturer, Information Studies
Dill	Bonnie T.	Full Member	B.A.,University of Rochester, 1965; M.A., New York University, 1970; Ph.D., New York University, 1979.	Professor, Women's Studies Affiliate Professor, American Studies Affiliate Professor, Sociology
DiLutis	Robert	Full Member	Julliard School	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education

diMarzo	Marino	Full Member	Dr.Ing., University of Naples-Italy, 1976; Ph.D., Catholic University of America, 1982. GCEN Academic Advisor for Fire Protection Engineering	Professor, Mechanical Engineering
Dimitrakopoulos	Panagiotis	Full Member	Diploma, National Technical University of Athens, 1991; M.S., University of Illinois, Urbana-Champaign, 1996; Ph.D., University of Illinois, Urbana-Champaign, 1998.	Associate Professor, Chemical Engineering Associate Professor, Chemical Physics
Ding	Chengri	Full Member	B.S., Beijing Normal University, 1986; M.S., Sinica Academy of Sciences, 1989; Ph.D., University of Illinois at Urbana-Champaign, 1996.	Professor, Urban and Regional Planning and Design
Dinman	Jonathan D.	Full Member	A.B., Oberlin College, 1980; Ph.D., Johns Hopkins University, M.D.-Ph.D., 1989	Professor, Biological Sciences
Dively	Galen	Full Member	BS, Juniata College, 1966; MS, Rutgers University, 1968; PhD, Rutgers University, 1974	Professor Emeritus, Entomology
Doan	Long	Full Member	Ph.D., Ohio State University	Associate Professor, Sociology Affiliate Assistant Professor, Women's Studies
Dockins	Paul Christen	Graduate Teaching	Ph.D., Duke University, 1996	Lecturer, Applied Economics
Doermann	David Scott	Associate	B.S., Bloomsburg University of Pennsylvania, 1986; M.S., University of Maryland-College Park, 1989; Ph.D., 1993.	Research Scientist
Doherty	Lillian E.	Full Member	B.A., St. Mary's College, 1974; M.A., University of Chicago, 1977; Ph.D., University of Chicago 1982.	Chair, Classics Professor, Classics Affiliate Professor, Women's Studies Affiliate Professor, Comparative Literature
Dolbilov	Mikhail	Full Member	M.A., Voronezh University Russia 1993; Ph.D., 1996	Associate Professor, History
Dolgopyat	Dmitry	Full Member	Diploma, Moscow State University, 1994; Ph.D., Moscow State University, 1997.	Professor, Mathematical Statistics Professor, Mathematics
Donawerth	Jane L.	Full Member	B.A., Miami University-Oxford, 1969; M.A.,University of Wisconsin-Madison, 1970; Ph.D., 1975.	Professor, Comparative Literature Professor Emerita, English Language and Literature Affiliate Professor, American Studies
Doniger	Cynthia	Graduate Teaching	Ph.D., University of Michigan-Ann Arbor, 2014	Lecturer, Applied Economics
Dooling	Robert J.	Full Member	B.S.,Creighton University, 1967; M.S., St. Louis University, 1969; Ph.D., 1975.	Affiliate Professor, Biological Sciences
Dorfman	Jay Robert	Full Member	B.A., Johns Hopkins University, 1957; Ph.D.,1961.	Professor Emeritus, Physics

Dorland	William D.	Full Member	B.S.,University of Texas, 1988 M.A., Princeton University, 1990 Ph.D., Princeton University, 1993	Distinguished Scholar-Teacher, Physics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Dorr	Bonnie J.	Full Member	B.A., Boston University, 1984; M.S.,Massachusetts Institute of Technology, 1987; Ph.D., 1990.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor Emerita, Computer Science
Dotson	Charles O.	Full Member	B.A., Morehead State University, 1963; M.S., Purdue University, 1964; Ph.D., 1968.	Professor Emeritus, Kinesiology
Douek	Daniel	Special	B.A., University of Oxford, 1987; M.B.B.S., University of London, 1990; M.R.C.P., Royal College of Physicians, 1993; M.A., University of Oxford, 1996., Ph.D., University of London, 1997	n/a, Biological Sciences
Dougherty	Michael	Full Member	B.S., Kansas State University, 1993; M.S., University of Oklahoma, 1996; Ph.D., 1999	Chair, Psychology Professor, Psychology Associate Professor, Neurosciences and Cognitive Science
Dougherty	Lea	Full Member	B.A., University of Delaware, 2001; Ph.D., Stony Brook University, 2008	Associate Professor, Psychology Assistant Professor, Neurosciences and Cognitive Science
Doughty	Catherine J.	Associate	B.A., Ursinus College, 1978; M.S., University of Pennsylvania, 1982; Ph.D., University of Pennsylvania, 1988.	Professor, Second Language Acquisition Research Scientist, Second Language Acquisition
Dow-Burger	Kathryn	Non-Member	B.A. University of MD – College Park, 1986;M.A., University of MD – College Park, 1992	Associate Clinical Professor, Speech Language Pathology
Downey	Sean	Special Member	Ph.D., University of Arizona, 2009; M.A., Northern Arizona University, 2003; B.A., Boston University, 1994	Associate Research Professor, Anthropology
Doyle	Michael	Special Member	B.S., College of St. Thomas, 1964; Ph.D., Iowa State University, 1968.	Adjunct Professor
Dragovic	Besim	Special	B.A., Boston University, 1999; M.S., University of Connecticut, 2003; Ph.D., Boston University, 2013.	University Affiliate, Geology
Drake	James F.	Full Member	B.S.,University of California-Los Angeles, 1969; M.S., 1972; Ph.D., 1975.	Distinguished University Professor, Physics
Drazen	Allan	Full Member	S.B., Massachusetts Institute of Technology, 1972; Ph.D., 1976.	Professor, Economics

Drechsel	Thomas	Full Member	BSc, Goethe University-Frankfurt, 2010; MSc, University College London, 2011; MRes, London School of Economics, 2014.	Assistant Professor, Economics
Dreher	Mariam Jean	Full Member	B.A., University of California-Riverside, 1970; M.A., 1976; Ph.D., 1980.	Professor, Curriculum and Instruction Professor Emerita, Teaching and Learning, Policy and Leadership
Dresner	Martin E.	Full Member	B.Comm., University of Toronto, 1979; M.B.A., York University, 1980; Ph.D., University of British Columbia, 1989.	Associate Chair Professor
Drew	H. Dennis	Full Member	B.S., University of Pittsburgh, 1962; Ph.D., Cornell University, 1968.	Professor Emeritus, Physics Research Professor, Physics
Driscoll	Cindy	Adjunct Member	B.S., Salisbury University, 1973; D.V.M., Virginia Polytechnic Institute & State University, 1987	Adjunct Associate Professor, Animal Sciences
Druin	Allison J.	Full Member	B.F.A., Rhode Island School of Design, 1985; M.S., Massachusetts Institute of Technology, 1987; Ph.D.,University of New Mexico-Albuquerque, 1997.	Associate Dean, Information Studies Professor, Human-Computer Interaction Professor, Library and Information Science Assistant Professor, Civil and Environmental Engineering
Du	Shao Jun	Full Member	B.S., Shangdong University/ Shantung University, 1983; M.S.,Academia Sinica-Beijing, 1986; Ph.D., University of Toronto, 1993.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Du Puy	Karl F.G.	Full Member	A.B., Dartmouth College, 1964; M.Arch., University of Pennsylvania, 1967; M.Arch.,Delft University of Technology-Netherlands, 1969.	Professor Emeritus, Architecture
Duan	Shuiwang	Associate	B.S., Chengdu University of Science & Technology, 1994; M.S., The Chinese Academy of Sciences, 1997; Ph.D., Tulane University, 2005.	Assistant Research Scientist, Geology
Duan	Jian	Non-Member	PhD, University of Massachusetts - Amherst, 1994	Research Scientist, Entomology
Dubayah	Ralph O.	Full Member	A.B., University of California-Berkeley, 1982; M.A., University of California-Santa Barbara, 1985; Ph.D., 1991.	Associate Chair, Geographical Sciences Professor, Geographical Sciences Professor, Applied Mathematics & Statistics, and Scientific Computation

Ducca	Frederick	Special Member	B.S., St. Peter's College, 1967; M.S., University of Pennsylvania, 1972; Ph.D., University of Pennsylvania, 1978	n/a, Civil and Environmental Engineering
DuGoff	Eva Hisako	Full Member	B.A., Georgetown University, 2002; M.P.P., George Washington University, 2008; Ph.D., Johns Hopkins University, 2014	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Dumitras	Tudor	Full Member	B.S., Politehnica University, 2001; M.S., Carnegie Mellon University, 2003; Ph.D., 2010	Associate Professor, Electrical and Computer Engineering
Dunbar	Kevin	Full Member	B.A., University College Dublin, Ireland, 1977; M.A., University College Dublin, Ireland, 1979; Ph.D., University of Toronto, 1985	Professor, Human Development Professor, Neurosciences and Cognitive Science
Duncan	James H.	Full Member	B.S., Brown University, 1971; M.A., Johns Hopkins University, 1973; Ph.D., 1979.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Duncan	Gregg	Full Member		Assistant Professor, Bioengineering Assistant Professor, Biophysics
Duncanson	Laura	Full Member	M.S., Master of Science, University of Maryland - College Park, 2009; Ph.D., University of Maryland - College Park, 2015	Assistant Professor, Geographical Sciences
Dunn	Timothy	Special Member	Ph.D., University of Texas at Austin, 1999; M.A., University of Texas at Austin, 1990; B.A., Hamline University, 1984	Research Professor, Anthropology
Duraiswami	Ramani	Full Member	B.S., Indian Institute of Technology-Mumbai, 1985; Ph.D., Johns Hopkins University, 1991	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Electrical and Computer Engineering
Duthinh	Dat	Special Member	B.S., Princeton University; M.S., University of Delaware; Ph.D., Cornell University	n/a, Civil and Environmental Engineering
Dwyer	Susan	Full Member	B.A., University of Adelaide, 1985; B.A. Hons) University of Adelaide, 1986; Ph.D Massachusetts Institute of Technology, 1991.	Associate Professor, Philosophy
Dwyer	Daniel	Full Member	B.S., Boston College, 1999; Ph.D., Boston College, 2007	Assistant Professor, Biological Sciences

Dyer	Typhanye	Full	B.A., University of California, Los Angeles, 1995; M.P.H., California State University, Long Beach, 2002; Ph.D., University of California, Los Angeles, 2009	Associate Professor, Epidemiology Associate Professor, Biostatistics
Dynia	Jaclyn M	Graduate Teaching	B.S., University of Maryland-College Park, 2004; M.Ed., University of Maryland-College Park, 2007	Lecturer, Special Education
Eades	Caroline M.	Full Member	Agregation Lettres classiques, 1979; Doctorate, University of Paris III, 1987.	Associate Professor, French Modern Studies Associate Professor, French Studies Associate Professor, Comparative Literature Affiliate Associate Professor, Women's Studies
Eaker	Lisa	Full Member	Ph.D. Virginia Tech	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Easley	Glenn R.	Adjunct Member	PhD, Computational Science and Infomatics, George Mason University 2000 Research Scientist, System Planning Corporation	University Affiliate, Mathematics of Advanced Industrial Technology
Eckstein	Arthur M.	Full Member	B.A., University of California-Los Angeles, 1968; M.A.,1970; Ph.D., University of California-Berkeley, 1978.	Distinguished University Professor Emeritus, History
Edwards	Jan	Full Member	B.A., Barnard College, 1980;M.A., Massachusetts Institute of Technology, 1981;Ph.D., CUNY-Graduate Center, 1985	Professor, Hearing and Speech Sciences Professor, Neurosciences and Cognitive Science Professor, Speech Language Pathology
Egan	Emily	Full Member	B.A., Brown University, 2002; M.Phil., University of Cambridge, 2005; M.A., University of Cincinnati, 2008; Ph.D., University of Cincinnati, 2015	Assistant Professor, Art History and Archaeology
Egel	Andrew L.	Full Member	B.A., University of California-Santa Barbara,1976; M.A., 1977; Ph.D., 1979.	Associate Professor Emeritus, Special Education
Ehrman	Sheryl H.	Full Member	B.S., University of California-Santa Barbara, 1991; Ph.D., University of California-Los Angeles, 1997.	Professor, Chemical Engineering Professor, Chemical Physics
Eichhorn	Bryan W.	Full Member	B.A., Rollins College, 1983;Ph.D., Indiana University-Bloomington, 1987.	Professor, Chemical Physics Professor, Chemistry Affiliate Professor, Materials Science and Engineering
Einstein	Theodore L.	Full Member	B.A., Harvard University, 1969; M.A., 1969; Ph.D., University of Pennsylvania, 1973.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics

Eisenbach	Ronit	Full Member	B.F.A., B. Arch., Rhode Island School of Design 1985, 1986; M. Arch., Cranbrook Academy of Art, 1993.	Professor, Architecture Associate Professor, Urban and Regional Planning and Design
Eisenstein	Edward	Full Member	B.S., St. Joseph's University, 1979; Ph.D., Georgetown University, 1985.	Associate Professor, Bioengineering
El-Sayed	Najib	Full Member	M.S., Tulane University, 1987; Ph.D., Yale University, 1993	Professor, Biological Sciences
Elby	Andy	Full Member	B.A., Harvard University, 1988; M.Phil., Cambridge University, 1989; Ph.D, University of California, Berkeley, 1995.	Associate Chair, Teaching and Learning, Policy and Leadership Associate Chair, Curriculum and Instruction Professor, Teaching and Learning, Policy and Leadership Professor, Curriculum and Instruction
Eley	George, Jr.	Full Member	B.S.,Ohio State University-Columbus, 1952; M.Ed., Ohio State University, 1957;Ph.D., 1966.	Associate Professor Emeritus, Teaching and Learning, Policy and Leadership
Elkin	Stephen L.	Full Member	B.A., Alfred University, 1961; M.A., Harvard University, 1963; Ph.D., 1969.	Professor Emeritus
Elliott	Michael	Full Member	B.S., Mathematics, University of Chicago 1985); M.S., Biostatistics, University of Michigan 1997); Ph.D., Biostatistics, University of Michigan 1999	Associate Research Professor, Survey and Data Science (online) Associate Research Professor, Survey Methodology Associate Research Professor, Survey Statistics
Ellis	Christopher D	Full Member	B.S., University of Massachusetts, 1988; M.L.A., Cornell University, 1993; Ph.D., University of Illinois Urbana/Champaign, 1998	Professor, Landscape Architecture Professor, Plant Science
Ellis	Rachel	Full Member	B.A., Georgetown University, 2010; M.A., Sociology, University of Pennsylvania, 2012; Ph.D., University of Pennsylvania, 2017.	Assistant Professor, Criminology and Criminal Justice
Elmaghraby	Wedad	Full Member	B.A., B.S., Cornell University, 1992; M.S., University of California-Berkeley, 1995; Ph.D., 1998.	Professor
Elman	Howard C.	Full Member	B.A., Columbia University, 1975;M.A., 1977; M.S., Yale University, 1979; Ph.D., 1982.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Mathematics
Elmore	Andrew	Full Member	B.S., Purdue University, 1997; M.S.; Brown University, 1999; Ph.D., Brown University, 2003.	Assistant Professor, Marine, Estuarine, and Environmental Sciences

Elmqvist	Niklas	Full Member	PhD., Chalmers University of Technology, Gothenburg, Sweden, 2006	Director, Human-Computer Interaction Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science
Elpus	Kenneth	Full Member	B.M., The College of New Jersey; M.M., Northwestern University; Ph.D., Northwestern University	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Elsing	Evelyn L.	Full Member	B.Mus., University of Michigan-Ann Arbor, 1970;M.Mus., 1971.	Professor Emerita, Music Professor Emerita, Music Education
Engelhardt	Katharina	Full Member	B.S. Oregon State University, 1993; M.S. Utah State University, 1997; Ph.D., Utah State University, 2000	Research Associate Professor, Marine, Estuarine, and Environmental Sciences
Eno	Sarah C.	Full Member	B.A., Gettysburg College, 1984; M.A.,University of Rochester, 1986; Ph.D., 1990.	Distinguished Scholar-Teacher, Physics Professor, Physics
Enoch	Jessica	Full Member	B.A., University of Iowa, 1996; M.A., Pennsylvania State university, 1999; Ph.D., 2003.	Professor, English Language and Literature
Epanchin-Niell	Rebecca Suzanne	Full Member	B.S., Stanford University, 1997;M.S., University of Nevada, Reno, 2003;Ph.D., University of California, Davis, 2009	Assistant Professor, Agricultural and Resource Economics
Ephremides	Anthony	Full Member	B.S., National Technical University of Athens, 1967; M.A., 1969; Ph.D.,Princeton University, 1971.	Distinguished University Professor, Electrical and Computer Engineering Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Professor Emeritus, Electrical and Computer Engineering
Erdogan	Sevgi	Full Member	BS, Istanbul Technical University, Turkey, 1994; MS, Istanbul Technical University, Turkey, 1998; MS, University of Delaware, 2001; PhD, University of Maryland, 2011	Assistant Research Professor, Urban and Regional Planning and Design
Erwin	John E.	Full Member	B.S., Delaware Valley College of Science & Agriculture, 1983; M.S., Michigan State University, 1986; Ph.D., 1989.	Chair, Plant Science Professor, Plant Science

Eshleman	Keith Neal	Full Member	B.A., University of Virginia, 1978; M.S.,Massachusetts Institute of Technology, 1982; Ph.D., 1985. MEES	Professor, Marine, Estuarine, and Environmental Sciences
Espindola	Anahi	Full Member	BS, University Neuchatel, Switzerland, 2006; MS, University Neuchatel, Switzerland, 2006; PhD, University of Neuchatel, Switzerland, 2010	Assistant Professor, Entomology
Espino	Michelle	Full Member	BA., St. Mary's University, 1996; MA., Bowling Green State University, 1998; Ph.D., University of Arizona, 2008	Associate Professor, Student Affairs Assistant Professor
Espy-Wilson	Carol Y.	Full Member	B.S., Stanford University, 1979; M.S., Massachusetts Institute of Technology, 1981; M. Elect. Eng., 1984; Ph.D., 1987	Professor, Electrical and Computer Engineering Professor, Systems Engineering
Eubanks	Segun	Associate	B.A., University of Massachusetts, 1989; M.S., Springfield College, 1990; Ed.D., University of Maryland, 2012	Professor of Practice, School System Leadership
Evans	William C.	Adjunct Member	B.S., Clarion University; M.M. Peabody Conservatory of Music	University Affiliate, Ethnomusicology University Affiliate, Music University Affiliate, Music Education
Evans	Jay	Adjunct Member	B.A., Princeton University, 1988; Ph.D., University of Utah, 1995.	Adjunct Professor, Biological Sciences
Evans	Michael N.	Full Member	B.A., Harvard University, 1992; Ph.D., Columbia University, 1999.	Associate Professor, Geology Associate Professor, Applied Mathematics & Statistics, and Scientific Computation
Evans	Jay	Special Member	AB, Princeton University, 1988; PhD, University of Utah, 1995	Research Scientist, Entomology
Evans	T. Matthew	Special	B.S., University of New Mexico, 1997; M.S., Georgia Institute of Technology, 2002; Ph.D., Georgia Institute of Technology, 2005	n/a, Civil and Environmental Engineering
Evers	Philip T.	Full Member	B.S., Tri-State University, 1987; M.B.A., University of Notre Dame, 1988; Ph.D., University of Minnesota-Twin Cities, 1993.	Associate Professor
Everts	Kathryne L.	Full Member	B.S., Colorado State University, 1981; M.S., 1984; Ph.D., Michigan State University, 1989.	Director, Plant Science Professor, Plant Science
Fabian	Ellen S.	Full Member	B.A.,University of Wisconsin-Madison, 1973; M.A., 1980; Ph.D.,University of Maryland-College Park, 1988.	Professor Professor Emerita, School Counseling

Fagan	Drew	Associate	Ed.D. Teachers College, Columbia University	Associate Clinical Professor, Teaching and Learning, Policy and Leadership
Fagan	William F.	Full Member	Ph.D., Zoology, University of Washington, Seattle, Washington, 1996; Honors B.A., Biology, University of Delaware, Newark, Delaware, 1992	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation
Fahnestock	Jeanne D.	Full Member	B.A., University of Illinois-Urbana/Champaign, 1966; M.A., Indiana University-Bloomington, 1967; Ph.D., University of London, 1970.	Professor Emerita, English Language and Literature
Falconier	Mariana K	Full Member	Licenciate in Psychology (equivalent to MA in Psychology), School of Psychology, University of Buenos Aires, Argentina, 1992; M.S., Marriage and Family Therapy, Department of Family Studies, University of Maryland, College Park, 2002; Ph.D., Family Studies, Department of Family Studies, University of Maryland, College Park , 2005	Associate Professor, Family Science
Falconier	Mariana	Full Member	M.S., University of Maryland-College Park, 2002; Ph.D., University of Maryland-College Park, 2005	Director, Couple and Family Therapy Associate Professor, Couple and Family Therapy
Falk	William W.	Full Member	B.A., North Texas State University, 1969; M.A.,1970; Ph.D., Texas A&M University-College Station, 1975.	Professor Emeritus, Sociology Affiliate Professor, American Studies
Falk	David	Full Member	B.A., Harvard University, 1958; L.L.B., 1961.	Lecturer
Falvey	Daniel E.	Full Member	B.S., North Dakota State University-Fargo, 1983; Ph.D.,University of Illinois-Urbana/Champaign, 1988.	Professor, Chemical Physics Professor, Chemistry
Falvo	Joseph D.	Full Member	B.A., Loyola University, New Orleans, 1974; M.A., Catholic University of America, 1977; M.A., 1979; M.A.,Johns Hopkins University, 1984; Ph.D., 1986.	Associate Professor, French Modern Studies Associate Professor, French Studies
Fang	Adriane	Full Member	M.F.A. Dance, George Mason University, 2009; B.A. Dance/Psychology, University of Wisconsin Stevens Point, 1996.NYC: Wally Cardona, Gwen Welliver, Ronald K. Brown, Christian Canciani, Kevin Wynn, Jackie Villamil, Jan Miller, Cherylyn Lavagnino	Assistant Professor, Dance

Fang	Weiguo	Special Member	BSc, Southwest Agricultural University, Chongqing, China, 1997; PhD, Southwest Agricultural University, Chongqing, China, 2003	Affiliate Professor, Entomology
Farcuh	Macarena	Full Member	B.S., Universidad de Chile, 2005; M.S., 2007; Ph.D, University of California-Davis, 2017.	Assistant Professor, Plant Science
Farman	Jason	Full Member	B.A., Westmont College, 2000; M.A., Claremont Graduate University, 2002; Ph.D., University of California-Los Angeles, 2006.	Assistant Professor, American Studies Affiliate Professor, Women's Studies
Farquhar	James	Full Member	B.S., Washington and Lee University, 1987; M.S., University of Chicago, 1990; Ph.D., University of Alberta, 1995.	Professor, Geology
Farrell	Sinead	Adjunct Member		Assistant Research Scientist, Atmospheric and Oceanic Science
Fay	Robert E.	Full Member	Ph.D. Statistics 1974 University of Chicago	Research Professor, Survey Methodology
Fedderly	David	Adjunct Member	M.E., Northwestern University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Feijo	Jose	Full Member	Ph.D., University of Lisbon	Professor, Biological Sciences Professor, Biophysics
Feizi	Soheil	Full Member	M.S., Massachusetts Institute of Technology, 2010; Ph.D., Massachusetts Institute of Technology, 2016	Affiliate Assistant Professor, Electrical and Computer Engineering
Felbain	Leslie	Full Member	B.S., University of Wisconsin-Madison, 1975.	Affiliate Associate Professor, Jewish Studies Affiliate Associate Professor, Women's Studies
Feldman	Naomi	Full Member	B.A., University of Chicago, 2003; Ph.D., Brown University, 2011	Associate Professor, Linguistics Associate Professor, Neurosciences and Cognitive Science Affiliate Associate Professor, Computer Science
Feldstein	Mark	Full Member	B.A., Harvard, 1979; Ph.D., University of North Carolina at Chapel Hill, 2002	Professor, Journalism
Feller	Ilka	Special Member	BA, University of North Carolina - Greensboro, 1969; BA, Ohio University, 1971; PhD, Georgetown University, 1993	Research Scientist, Entomology
Felton	Gary Kent	Full Member	B.S., University of Maryland-College Park, 1976; M.S., 1981; Ph.D.,Texas A&M University-College Station, 1987.	Associate Professor, Environmental Science and Technology

Fenelon	Andrew	Full Member	B.A., University of California-Santa Barbara, 2007; M.A., University of Pennsylvania, 2008; Ph.D., University of Pennsylvania, 2012	Assistant Professor, Health Administration Assistant Professor, Health Equity Assistant Professor, Health Policy Analysis and Evaluation Assistant Professor, Health Services
Feng	Kuishuang	Associate	B.S., Heilongjiang University, 2003; Ph.D., University of Leeds, 2011	Research Professor, Geographical Sciences
Fenselau	Catherine C.	Full Member	A.B., Bryn Mawr College, 1961; Ph.D., Stanford University, 1965.	Professor, Biochemistry Professor, Chemistry
Fernandez	Eduardo	Adjunct Member	Ph.D., Catholic University, Lima, Peru, 2016; B.S., J.F. Kennedy University, Buenos Aires, Argentina, 1987	Postdoctoral Research Associate, Anthropology
Ferraro	Rosellina	Full Member	B.A., Cornell University, 1994; M.S., Cornell University, 1998.	Associate Chair Associate Professor
Ferreira	Thiago	Graduate Teaching	Ph.D., Northwestern University, 2014	Lecturer, Applied Economics
Fey	James T.	Full Member	B.S., University of Wisconsin-Madison, 1962; M.S., 1963; Ph.D., Columbia University, 1968.	Professor Emeritus, Mathematics Professor Emeritus, Teaching and Learning, Policy and Leadership Professor Emeritus, Curriculum and Instruction
Filiz-Ozbay	Emel	Full Member	B.S., Bogazici University, 1998; M.A., Bogazici Univerity, 2000; M.Phil., Columbia University, 2004; Ph.D., Columbia University, 2007.	Associate Professor, Economics
Finch	Michael L.	Full Member	B.A., Lehigh University, 1973; M.B.A., Baylor University, 1988; Ph.D., University of Tennessee-Knoxville, 1994.	Lecturer
Findlater	Leah	Full Member	B.Sc., Computer Science, 2001; M.Sc., Computer Science, 2004; Ph.D., Computer Science, 2009.	Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Library and Information Science
Fink	Edward L.	Full Member	B.A., Columbia University, 1966; M.S., University of Wisconsin-Madison, 1969; Ph.D., 1975.	Professor Emeritus, Communication

Finkelstein	Barbara J.	Full Member	B.A., Barnard College, 1959;M.A., Columbia University-Teachers College, 1960; Ed.D., 1970.	Professor Emerita, Policy Studies Professor Emerita, Teaching and Learning, Policy and Leadership Affiliate Professor, American Studies Affiliate Professor, Teaching and Learning, Policy and Leadership
Finkle	Aaron	Graduate Teaching	Ph.D., University of Washington, 2004	Lecturer, Applied Economics
Finlayson	Valerie A.	Special Member	B.A., Michigan State University, 2009; M.S., University of Illinois at Urbana-Champaign, 2011; Ph.D., University of Hawai#i at Mānoa, 2017.	Postdoctoral Research Associate, Geology
Finsterbusch	Kurt	Full Member	B.A., Princeton University, 1957; B.D.,Grace Theological Seminary, 1960; Ph.D., Columbia University, 1969.	Professor Emeritus, Sociology
Fiorellino	Nicole	Full Member	B.S., Rutgers University, 2008; M.S., University of MD College Park, 2010; Ph.D., 2015.	Assistant Professor, Plant Science
Firebaugh	Millard S.	Non-Member	SB, MIT, 1961; SM, MIT, 1966; ScD, MIT 1972.	Professor of Practice, Mechanical Engineering
Fischbach	Gerald F.	Full Member	B.F.A., University of Wisconsin-Milwaukee, 1964; M.Mus., University of Illinois-Urbana/Champaign, 1965; D.M.A., University of Iowa, 1972.	Professor Emeritus, Music Professor Emeritus, Music Education
Fischell	Robert E.	Non-Member	BS, Duke University, 1951; MS, University of Maryland, 1953	Professor of Practice, Mechanical Engineering
Fish	Jessica N.	Full	B.S. Central Michigan University, 2008; M.S. Purdue University Calumet, 2010; Ph.D. Florida State University, 2014	Assistant Professor, Family Science Assistant Professor, Maternal and Child Health
Fisher	Michael E.	Full Member	B.S., King's College-London, 1951; Ph.D., 1957; S.C.D., Yale University, 1987; Ph.D. Honoris Causa, Tel Aviv University, 1992.	Distinguished University Professor Emeritus, Physics
Fisher	John P.	Full Member	B.S., The Johns Hopkins University, 1995; M.S., University of Cincinnati, 1998; Ph.D., Rice University, 2002	Chair, Bioengineering Professor, Bioengineering Affiliate Professor, Chemical Engineering
Fisher	Dana	Full Member	Ph.D., University of Wisconsin-Madison 2001; M.A., University of Wisconsin-Madison, 1999; A.B., Princeton University, 1993	Professor, Sociology

Fisher	Heidi	Full Member	M.S., University of California - San Diego, 2001; Ph.D., Boston University, 2006	Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Biological Sciences
Fisher	Thomas	Full, Intercampus	B.A., University of Pennsylvania, 1968; Ph.D., Duke University, 1975	Professor, Marine, Estuarine, and Environmental Sciences
Fisher	Steven	Special Member	B.S., University of Texas at El Paso, 2007; Ph.D., University of Maryland, Baltimore, 2013	Director, Biological Sciences
Fiske	Shirley	Adjunct Member	Ph.D., Stanford University, 1975; B.A. University of California, Davis, 1967	Research Professor, Anthropology
Fitzpatrick	Patrick M.	Full Member	B.A., Rutgers University-New Brunswick, 1966;Ph.D., 1971.	Associate Chair, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Fitzpatrick	Matthew	Full Member	Ph.D. University of Tennessee, 2008	Assistant Professor, Marine, Estuarine, and Environmental Sciences
Fitzpatrick	Matthew	Non-Member	BS, Penn State University, 1997; MS, University of Montana, 2003; PhD, University of Tennessee, 2008	Affiliate Professor, Entomology
Flatau	Alison	Full Member	B.S., University of Connecticut, 1978; M.S., University of Utah, 1985, Ph.D., 1990	Professor, Aerospace Engineering Affiliate Professor, Materials Science and Engineering Graduate Director, Aerospace Engineering
Fleischer	Robert	Non-Member	Ph.D., University of Kansas, 1983.	Adjunct Professor, Biological Sciences
Fleming	Julius	Full Member	B.A. Tougaloo College, 2009; A.M. Univ. of Pennsylvania, 2011; PhD. 2014.	Assistant Professor, English Language and Literature
Flynn	Adrianne	Adjunct Member	B.A., Arizona State University,	Lecturer, Journalism
Foecke	Timothy	Adjunct Member	B.S., University of Minnesota-Twin Cities, 1986; Ph.D., University of Minnesota-Twin Cities, 1991.	University Affiliate, Materials Science and Engineering
Foreman	Christopher H.	Full Member	B.A., Harvard College,1974; M.A., Harvard University, 1977;Ph.D., Harvard University, 1980	Professor
Forman	Barton	Full Member	B.S., University of Virginia, 1998; M.S., University of California at Berkeley, 1999; Ph.D., University of California at Los Angeles, 2010	Assistant Professor, Civil and Environmental Engineering
Forni	Giovanni	Full Member	B.A. Universita di Bologna, Italy, 1988; Ph.D. Princeton University, 1993.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics

Foster	Daniel	Adjunct Member	B.M., Oberlin Conservatory; Artist Diploma, The Curtis Institute of Music	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Foster	Jeffrey S.	Full Member	Ph.D., University of California at Berkeley, 2002	Professor, Computer Science
Fourkas	John T.	Full Member	Ph.D. Stanford University 1991)	Professor, Chemical Physics Professor, Chemistry
Fourney	William L.	Full Member	B.S.A.E., West Virginia University, 1962; M.S., 1963; Ph.D., University of Illinois-Urbana/Champaign, 1966.	Associate Dean, Aerospace Engineering Professor Emeritus, Mechanical Engineering Advisor, Aerospace Engineering
Fox	Nathan A.	Full Member	A.B., Williams College, 1970; Ph.D., Harvard University, 1975.	Distinguished University Professor, Human Development Professor, Neurosciences and Cognitive Science Affiliate Professor, Jewish Studies
Fraistat	Neil R.	Full Member	B.A., University of Connecticut-Storrs, 1974; M.A.,University of Pennsylvania, 1976; Ph.D., 1979.	Professor, English Language and Literature
Franco Sevilla	Manuel	Full Member	B.S., Universidad Pontificia de Comillas, 2004; Ph.D., Stanford University, 2012	Assistant Professor, Physics
Frankel	Tyler Edward	Special Member	B.A., University of Maryland-Baltimore County, 2011; M.S., University of Maryland-College Park, 2013; Ph.D., University of Maryland-College Park, 2016	University Affiliate, Environmental Science and Technology
Franklin	Manoj	Full Member	B.S., University of Kerala, 1984; M.S.,University of Wisconsin-Madison, 1990; Ph.D., 1993.	Associate Professor, Electrical and Computer Engineering
Franzini	Luisa	Full Member	3310D School of Public Health (Bldg #255)4200 Valley DriveCollege Park, MD 20742-2611franzini@umd.eduPhone: 301 405 2470;	Chair Professor
Frauwirth	Kenneth	Associate	B.S., Brown University, 1992; Ph.D., University of California-Berkeley, 1997.	Senior Lecturer
Frauwirth	Ken	Adjunct Member	Sc.B., Brown University., 1992; Ph.D., University of California-Berkeley, 1997	n/a, Biological Sciences
Frederiksen	Elke P.	Full Member	B.A., University of Kiel, 1962; M.A., 1962; M.A., University of Wisconsin-Madison, 1965; Ph.D.,University of Colorado-Boulder, 1973.	Professor Emerita, German Literature and Language
Freed	Eric	Adjunct Member	Ph.D. University of Wisconsin-Madison, 1990	Adjunct Professor, Biological Sciences

Freeny	Maralita	Adjunct Member		Adjunct Professor, School Librarianship Lecturer, School Librarianship
Freidenberg	Judith N.	Full Member	Ph.D., City University of New York, 1978 ; M.A. University of Buenos Aires, 1969	Professor Emerita, Anthropology Affiliate Associate Professor, American Studies Affiliate Associate Professor, Jewish Studies
Freidlin	Mark I.	Full Member	M.S., Moscow State University, 1959; Ph.D.,Steklov Mathematical Institute, 1962; Doctor, Moscow State University, 1970.	Distinguished University Professor, Applied Mathematics & Statistics, and Scientific Computation Distinguished University Professor, Mathematical Statistics Distinguished University Professor, Mathematics Professor, Mathematics
French	Melodie	Special Member	B.A., Oberlin College, 2006; M.S., University of Wisconsin-Madison, 2009; Ph.D., Texas A&M University-College Station, 2014	University Affiliate, Geology
Freund	David	Full Member	PhD, University of Michigan, 1999	Associate Professor, History
Frias-Martinez	Vanessa	Full Member	M.S., Columbia University, 2003; Ph.D., Columbia University, 2008	Associate Professor, Library and Information Science Assistant Professor, History and Library & Information Science Assistant Professor, Human-Computer Interaction Assistant Professor, Information Management Assistant Professor, Information Studies
Fried	Daniel	Graduate Teaching	Ph.D., University of Virginia, 2013	Lecturer, Applied Economics
Friedel	Robert D.	Full Member	B.A., Brown University, 1971; M.S., University of London,1972; Ph.D., Johns Hopkins University, 1977.	Professor Emeritus, History
Friedman	Michael	Adjunct Member	B.A., Tufts University, 1992; M.A., University of Maryland, College Park, 2000; Ph.D., 2008.	Research Assistant Professor, Kinesiology
Fries-Britt	Sharon LaVonne	Full Member	B.S., University of Maryland-College Park, 1981; M.A., Ohio State University-Columbus, 1983; Ph.D., University of Maryland-College Park, 1994.	Professor, Higher Education Professor

Frisch	Andrea	Full Member	B.A. University of Wisconsin-Madison, 1988; Ph.D., University of California-Berkeley, 1996	Professor, French Modern Studies Professor, French Studies Affiliate Professor, Comparative Literature Graduate Director, French Modern Studies Graduate Director, French Studies
Frisof	Sarah	Full Member		Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Fritz	Megan	Full Member	BS, Michigan State University, 2005; PhD, Michigan State University, 2011	Assistant Professor, Entomology Assistant Professor, Biological Sciences
Froehlich	Jon	Full Member	Ph.D., University of Washington, 2011	Assistant Professor, Computer Science
Froom	David	Adjunct Member	B.M. University of California, Berkeley; M.M. University of Southern California; D.M.A. Columbia University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Fry	James H.	Full Member	B.Mus., Southern Methodist University, 1971; M.Mus., 1974; Ph.D.,University of Rochester, 1977.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Fryer	Craig S.	Full Member	B.S., Case Western University; MPH, University of Pittsburgh; DrPH, Columbia University	
Fryer	Craig	Full	M.P.H., University of Pittsburgh, 1997; D.P.H., Columbia University, 2006	n/a, Behavioral and Community Health
Fu	Chung C.	Full Member	B.S.,National Taiwan University, 1972; M.S., University of Maryland-College Park, 1975; Ph.D., 1982.	Research Professor, Civil and Environmental Engineering
Fu	Michael C.	Full Member	S.B., Massachusetts Institute of Technology, 1985; S.M., 1985; S.M., Harvard University, 1986; Ph.D., 1989.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Systems Engineering Affiliate Professor, Electrical and Computer Engineering
Fuentes	Gabrielle	Full Member	B.A., Brown University 2008, M.F.A. University of Colorado, Boulder, 2013, Ph.D. University of Georgia, 2017	Assistant Professor, English Language and Literature
Fuge	Mark	Full Member	B.S., Carnegie-Mellon University, 2009; M.S., Carnegie-Mellon University, 2009; Ph.D., University of California-Berkeley, 2014	Associate Professor, Mechanical Engineering

Fuhrer	Michael	Full Member	Currently at Monash University, Australia) Ph.D., Univ. of CA - Berkeley, 1998	Research Professor, Physics
Fuller	Sarah	Adjunct Member	B.M., Royal Conservatory of Music, M.M., Indiana University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Fushman	David	Full Member	M.S., University of Kazan, 1978; Ph.D., University of Kazan, 1985.	Associate Director, Biophysics Professor, Biochemistry Professor, Chemical Physics Professor, Chemistry
Gabriel	Steven A.	Full Member	B.A., Middlebury College, 1981; M.S., Stanford University, 1984; M.A., Johns Hopkins University, 1989; Ph.D., 1992. Adjunct Professor, Dept. of Industrial Economics and Technology Management, Norwegian University of Science and Technology.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mechanical Engineering
Gabriel	Steven A	Full Member	B.A., Middlebury College, 1981; M.S., Stanford University, 1984; M.A., Johns Hopkins University, 1989; Ph.D., 1992	Professor, Reliability Engineering
Gabrielli	Julie	Full Member	B.S., University of Virginia, 1984; M.Arch, University of Virginia, 1987	Associate Clinical Professor, Architecture
Gaines	Robert N.	Full Member	B.A., University of California-Davis, 1972; M.A., 1975; Ph.D., University of Iowa, 1982.	Professor Emeritus, Communication
Galiani	Sebastian	Full Member	Licentiate in Economics, Universidad Nacional de Buenos Aires,1990; M.A., Instituto Torcuato Di Tella, 1992; Ph.D., University of Oxford, 2000.	Professor, Economics
Galindo	Claudia	Full Member	PhD, Pennsylvania State University, 2005; BA, Pontificia Universidad Católica del Perú. Lima, Perú, 1996	Associate Professor, Teaching and Learning, Policy and Leadership
Galloway	Gerald	Adjunct Member	B.S., U.S. Military Academy; M.S., Princeton University; M.P.A., Pennsylvania State University; M.A., U.S. Army Command and General Staff College; Ph.D., University of North Carolina.	Research Professor, Civil and Environmental Engineering
Gantt	Elisabeth	Full Member	B.A., Blackburn College, 1958; M.S., Northwestern University, 1960; Ph.D., 1963.	Distinguished University Professor, Biological Sciences
Gao	James Z.	Full Member	B.A., Beijing Foreign Studies University, 1978;M.A., Beijing University/Peking University, 1983; M.A., Yale University, 1989; Ph.D., 1994.	Associate Professor, History

Gard	Arianna	Full Member	B.A., University of California-Los Angeles, 2010; Ph.D., University of Michigan- Ann Arbor, 2019.	Assistant Professor, Psychology
Gardner	Amy E.	Full Member	B.Sc., University of Virginia,1981; M.Arch., 1985.	Associate Professor, Architecture
Gasarch	William	Full Member	B.S., State University of New York-Stony Brook, 1980; M.S., Harvard University, 1982 Ph.D., 1985.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Computer Science Affiliate Professor, Mathematics
Gates	John Edward	Full Member	B.S., Old Dominion University, 1969; M.A., Bowling Green State University, 1972; Ph.D., Michigan State University, 1976.	Associate Professor, Marine, Estuarine, and Environmental Sciences
Gates	Sylvester James, Jr.	Full Member	B.S., Massachusetts Institute of Technology, 1973; Ph.D.,1977.	Distinguished Scholar-Teacher, Physics Distinguished University Professor, Physics Regents Professor, Physics Affiliate Professor, Mathematics
Gates	Michael	Special Member	BA, Hendrix College; MS, Oklahoma State University; PhD, University of California - Riverside	Research Scientist, Entomology
Gatlin	Jessica	Full Member	B.A., Florida State University, 2009; M.F.A., University of Tennessee, 2017	Assistant Professor, Art Studio
Gaudry	Quentin	Full Member	B.S., Emory University, 2002; Ph.D., University of California San Diego, 2008	Assistant Professor, Neurosciences and Cognitive Science Assistant Professor, Biological Sciences
Gaycken	Oliver	Full Member	B.A., Princeton University, 1994; M.A., University of Chicago, 1996; Ph.D., University of Chicago, 2005.	Associate Professor, English Language and Literature Associate Professor, Comparative Literature Graduate Director, Comparative Literature
Geary	Jason	Full Member	B.A., San Francisco Conservatory of Music, 1996; M.A., University of Michigan, 1998; Ph.D., Yale University, 2004	Director, Ethnomusicology Director, Music Director, Music Education
Gekker	Paul C.	Full Member	B.Mus., University of Rochester, 1976; M.Mus., University of Maryland-College Park, 1981.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Gelfand	Michele Joy	Full Member	B.A., Colgate University, 1989; M.A., University of Illinois 1992; Ph.D., 1996.	Distinguished Scholar-Teacher, Psychology Professor, Psychology
Gensheimer	Maryl	Full Member	B.A., Williams College, 2005; M.A., New York University, 2008; Ph.D., New York University, 2013	Associate Professor, Art History and Archaeology

Gentili	Rodolphe	Full Member		Assistant Professor, Neurosciences and Cognitive Science
Getoor	Lise	Full Member	Ph.D., Stanford, 2001	Adjunct Professor, Computer Science
Getrich	Christina	Full Member	B.A. College of Wooster, 1997; M.A., Northern Arizona University, 2001; Ph.D. University of New Mexico, 2008	Associate Professor, Anthropology Affiliate Associate Professor, Women's Studies
Ghanem	Mostafa	Full Member	B.S., Alexandria University, 2007; M.V.Sc., Alexandria University, 2010, Ph.D., Ohio State University, 2017	Assistant Professor, Veterinary Medical Sciences
Ghodssi	Reza	Full Member	B.S., University of Wisconsin-Madison, 1990; M.S., 1992; Ph.D., 1996.	Professor, Electrical and Computer Engineering Professor, Systems Engineering Affiliate Professor, Materials Science and Engineering Affiliate Professor, Bioengineering
Gholampour	Amin	Full Member	Ph.D., University of British Columbia, 2007	Assistant Professor, Mathematics
Gholizadeh	Mahsa	Graduate Teaching	Ph.D., American University, 2015	Lecturer, Applied Economics
Gibson	Robert L.	Full Member	B.M., University of Miami, 1972; M.M., Catholic University of America, 1975; D.M.A.,University of Maryland-College Park, 1980.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Gilbert	James B.	Full Member	B.A., Carleton College, 1961; M.A., University of Wisconsin-Madison, 1963; Ph.D., 1966.	Distinguished University Professor Emeritus, History Affiliate Professor, American Studies
Gill	Meredith J.	Full Member	B.A., University of Melbourne, 1980; M.A., Princeton University, 1985; Ph.D., Princeton University, 1992.	Professor Emerita, Art History and Archaeology
Gill	Douglas E.	Full Member	B.S., Marietta College, 1965; M.A.,University of Michigan-Ann Arbor, 1967; Ph.D., 1971.	Professor Emeritus, Biological Sciences
Gilliam	Jauvon	Adjunct Member	B.S., Butler University	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Gimpel	James G.	Full Member	B.A., Drake University, 1984;M.A., University of Toronto, 1985; Ph.D., University of Chicago, 1990.	Professor, Government and Politics
Ginsburg	Mark B	Special Member	B.A., Darmouth College, 1972; M.A., University of California, Los Angeles, 1974; Ph.D., Univesity of California, Los Angles, 1976	Visiting Senior Research Scientist, International Education Policy
Giovacchini	Saverio	Full Member	Ph.D., New York University, 1998.	Associate Professor, History

Girvan	Michelle	Full Member	B.S., Massachusetts Institute of Technology, 1999; Ph.D., Cornell University, 2003; Ph.D., 2004.	Associate Professor, Applied Mathematics & Statistics, and Scientific Computation Associate Professor, Physics Associate Professor, Biophysics
Glancy	Sarah	Full Member	B.S., Rutgers University, 2008; Ph.D., Arizona State University, 2012	Assistant Professor, Kinesiology
Glasper	Erica	Full Member	B.A. Psychology/Biology, Randolph-Macon College M.A., Psychology, Ohio State University Ph.D., Psychology and Behavioral Neuroscience, Ohio State University	Assistant Professor, Neurosciences and Cognitive Science
Glass	James M.	Full Member	B.A., University of California-Berkeley, 1961; M.A., 1964; Ph.D., 1970.	Distinguished Scholar-Teacher, Government and Politics Professor, Government and Politics Affiliate Professor, Jewish Studies
Glaz	Harland M.	Full Member	B.A., University of Pennsylvania, 1971; M.A.,University of California-Berkeley, 1975; Ph.D., 1977.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor Emeritus, Mathematics
Glibert	Patricia M.	Full Member	B.A., Skidmore College, 1974; M.S., University of New Hampshire, 1976; Ph.D.,Harvard University, 1982.	Professor, Marine, Estuarine, and Environmental Sciences
Goffney	Imani	Full Member	PhD, University of Michigan	Assistant Professor, Teaching and Learning, Policy and Leadership
Golbeck	Jennifer	Full Member	PhD., Computer Science, University of Maryland	Associate Professor, History and Library & Information Science Associate Professor, Human-Computer Interaction Associate Professor, Information Management Associate Professor, Information Studies Associate Professor, Library and Information Science
Gold	Paul	Full Member	B.A., Wesleyan University Middletown, CT, 1981; M.A., University of Texas, Austin, 1984; Ph.D., University of Missouri-Columbia, MO, 1994.	Associate Professor, School Counseling
Goldberg	Jessica	Full Member	B.A., Stanford University, 2001; M.P.A., Princeton University, 2005; M.A., University of Michigan, 2008, Ph.D., University of Michigan, 2011.	Associate Professor, Economics

Golden	Bruce L.	Full Member	B.A.,University of Pennsylvania, 1972; S.M., Massachusetts Institute of Technology, 1974; Ph.D., 1976.	Professor, Applied Mathematics & Statistics, and Scientific Computation Affiliate Professor, Civil and Environmental Engineering
Goldhar	Julius	Full Member	B.S., Massachusetts Institute of Technology,1971; Ph.D., 1976.	Professor, Electrical and Computer Engineering
Goldman	William M.	Full Member	A.B., Princeton University, 1977; Ph.D., University of California-Berkeley, 1980.	Distinguished Scholar-Teacher, Mathematics Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Goldsman	Neil	Full Member	B.A., Cornell University, 1981; M.Elect.E., 1983; Ph.D., 1988.	Professor, Electrical and Computer Engineering
Goldstein	Thomas	Full Member	B.A., Washington University in St. Louis, 2006; M.S., University of California-Los Angeles, 2007; Ph.D., University of California-Los Angeles, 2010	Assistant Professor, Computer Science Affiliate Associate Professor, Electrical and Computer Engineering
Goldstein	Rachel Elizabeth	Full Member	B.A., University of North Carolina, 2005; M.P.H., University of Maryland, 2010; Ph.D., University of Maryland, 2013	Assistant Professor, Environmental Health Sciences
Gollner	Michael J.	Associate	B.S., 2008, University of California-San Diego; M.S., 2010, University of California-San Diego; Ph.D., 2012, University of California-San Diego	Affiliate Associate Professor, Fire Protection Engineering Affiliate Assistant Professor, Mechanical Engineering
Golub	Evan	Full Member	PhD., Computer Science, University of Maryland, College Park, 2009.	Senior Lecturer, Information Studies
Gomez	Romel Del Rosario	Full Member	B.S., University of the Philippines-Quezon, 1980; M.S., Wayne State University, 1984 M.S., University of Maryland-College Park, 1987; Ph.D., 1990.	Associate Chair, Electrical and Computer Engineering Professor, Electrical and Computer Engineering
Gong	Cheng	Full Member	B.S., Huazhong University of Science and Technology, 2008; Ph.D., The University of Texas at Dallas, 2013	Assistant Professor, Electrical and Computer Engineering
Goodman	Jordan A.	Full Member	B.S., University of Maryland-College Park, 1973 M.S., 1975; Ph.D., 1978.	Distinguished Scholar-Teacher, Physics Professor, Physics
Goodman	Lucas	Graduate Teaching	Ph.D., University of Maryland at College Park, 2018	Lecturer, Applied Economics
Goodwin	Andrea J	Associate	B.S., Syracuse University, 1990; M.S., Syracuse University, 1993; Ph.D., University of Maryland-College Park, 2007	n/a, Higher Education

Gor	Kira	Full Member	M.A., Leningrad State University, 1977; Ph.D., 1983; Ph.D., Bryn Mawr College, 1993.	Associate Professor, Second Language Acquisition Associate Professor, Second Language Acquisition
Gordon-Salant	Sandra	Full Member	B.A.,State University of New York-Albany, 1974; M.S., Northwestern University, 1976; Ph.D., Northwestern University, 1981.	Professor, Hearing and Speech Sciences Professor, Neurosciences and Cognitive Science Graduate Director, Clinical Audiology
Gore	Meredith	Full	M.A., George Washington University, 2001; Ph.D., Cornell University, 2006	Associate Professor, Geographical Sciences
Gorham-Oscilowski	Ursula	Full Member	PhD., Information Studies, JD, University of Maryland School of Law; University of Maryland; MLS, University of Maryland; MPM, Master of Public Management.	Lecturer, History and Library & Information Science Lecturer, Human-Computer Interaction Lecturer, Information Management Lecturer, Library and Information Science
Gorshkov	Alexey	Full Member	A.B., Harvard University, 2004; A.M., Harvard University, 2006, Ph.D., Harvard University, 2010.	Adjunct Assistant Professor, Physics
Gould	Peter	Special Member	Ph.D., University College London, 2014; M.L.A., University of Pennsylvania, 2010; B.A., Swarthmore College, 1973	Research Professor, Anthropology
Goulias	Dimitrios	Full Member	Laurea,Universita Degli Studi, 1987; M.S., University of Michigan-Ann Arbor, 1988;Ph.D., University of Texas-Austin, 1992.	Associate Professor, Civil and Environmental Engineering
Goupell	Matthew	Full Member	B.S., Hope College, 2001; M.S., Michigan State University, 2003; Ph.D., Michigan State University, 2005.	Professor, Clinical Audiology Associate Professor, Hearing and Speech Sciences Assistant Professor, Neurosciences and Cognitive Science
Gournay	Isabelle J.	Full Member	M.A., Yale University, 1981;M.Ph., 1982; Ph.D., 1989.	Associate Professor, Urban and Regional Planning and Design Associate Professor Emeritus, Architecture Affiliate Associate Professor, American Studies
Gowen	Bradford P.	Full Member	B.Mus., Eastman School of Music, 1968; M.Mus., 1969.	Associate Professor, Ethnomusicology Associate Professor, Music Associate Professor, Music Education
Graeber	Anna O.	Full Member	B.S.,State University of New York-Buffalo, 1964; M.S.,Indiana State University-Terre Haute, 1965; Ed.D., Columbia University-Teachers College, 1974.	Associate Professor Emerita, Teaching and Learning, Policy and Leadership

Grana	Justin	Graduate Teaching	Ph.D., American University, 2016	Lecturer, Applied Economics
Granatstein	Victor L.	Full Member	B.S., Columbia University, 1960;M.S., 1961; Ph.D., 1963.	Professor Emeritus, Electrical and Computer Engineering
Grand	James	Full Member	B.A., Auburn University, 2006; M.A. 2008, Ph.D. Michigan State University, 2012	Assistant Professor, Psychology
Grebmeier	Jacqueline	Full Member	B.S., University of California Davis, 1977; M.S., Stanford University, 1979; M.S., University of Washington, 1983; Ph.D., University of Alaska, 1987.	Research Professor, Marine, Estuarine, and Environmental Sciences
Green	Kerry	Full Member	B.S., College of William and Mary; M.A., University of Maryland; Ph.D., Johns Hopkins University	Assistant Professor, Behavioral and Community Health
Green	Kim	Adjunct Member	Ph.D. Virology	Adjunct Professor, Biological Sciences
Green	Kim Y.	Special Member	B.S., David Lipscomb College, 1976; Ph.D., University of Tennessee, 1986	n/a, Biological Sciences
Greenberg	Oscar Wallace	Full Member	B.S., Rutgers University-New Brunswick, 1952; M.A.,Princeton University, 1954; Ph.D., 1957.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Greenberg	Stephen	Adjunct Member	PhD, History, Fordham University.	Lecturer, Library and Information Science
Greene	Richard L.	Full Member	B.S., Massachusetts Institute of Technology, 1960; Ph.D., Stanford University, 1967.	Professor, Physics
Greene	Julie	Full Member	PhD, Yale University, 1990	Professor, History
Greenspan	Patricia S.	Full Member	B.A., Columbia University, 1966; M.A.,Harvard University, 1968; Ph.D., 1972.	Professor, Philosophy
Greer	Sandra C.	Full Member	B.S., Furman University, 1966; M.S.,University of Chicago, 1968; Ph.D., 1969.	Professor Emeritus, Chemistry
Griffin	Kimberly	Full Member	B.A., Stanford University, 1999; M.A., University of Maryland-College Park, 2001; M.A., University of California-Los Angeles, 2005; Ph.D., University of California-Los Angeles, 2008	Professor, Student Affairs Associate Professor
Griffiths	Charles	Graduate Teaching	Ph.D., University of Maryland at College Park, 1997	Lecturer, Applied Economics
Grillakis	Manoussos	Full Member	B.A., National Technical University of Athens, 1981; M.A., Brown University, 1983; Ph.D., 1986.	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Mathematics
Grimsted	David A.	Full Member	A.B., Harvard University, 1957; M.A.,University of California-Berkeley, 1958; Ph.D., 1963.	Associate Professor Emeritus, History

Groot	Astrid	Special Member	MSc, University of Amsterdam, Netherlands, 1994; PhD, Wageningern University, Netherlands, 2000	Affiliate Associate Professor, Entomology
Grossman	Maxine	Full Member	A.B., Duke University, 1990; M.A., Ph.D., University of Pennsylvania, 2000.	Associate Professor, Jewish Studies Affiliate Associate Professor, Women's Studies
Groth	Katrina	Full Member	B.S., University of Maryland-College Park, 2004; M.S., University of Maryland-College Park, 2008; Ph.D., University of Maryland-College Park, 2009	Associate Professor, Reliability Engineering
Gruner	Daniel	Full Member	AB, Hamilton College, 1993; PhD, University of Hawai'i, 2004	Associate Professor, Entomology Assistant Professor, Biological Sciences
Gudipati	Murthy S.	Non-Member	Ph.D. Indian Institute of Science, Bagalore, India 1987	Associate Research Scientist, Chemical Physics
Guenzler-Stevens	Marsha A	Associate	B.A., Illinois Wesleyan University, 1978; M.S., Miami University, 1982; Ph.D., University of Maryland-College Park, 1993	Director, Student Affairs
Guerrero	Perla	Full Member	B.A., University of Central Arkansas, 2003; M.A., University of Southern California, 2007; Ph.D., University of Southern California, 2010.	Assistant Professor, American Studies
Guilford	Matthew	Adjunct Member	B.M., M.M., New England Conservatory	Lecturer, Ethnomusicology Lecturer, Music Lecturer, Music Education
Gulick	Denny	Full Member	B.A., Oberlin College, 1958; M.A., Yale University,1960; Ph.D., 1963.	Professor, Mathematics
Gullickson	Gay L.	Full Member	B.A.,Pomona College, 1965; B.D., Yale University, 1968; Ph.D.,University of North Carolina-Chapel Hill, 1978.	Professor Emerita, History
Gumerov	Nail A.	Adjunct Member	M.S., Moscow State University, 1981, Ph.D., Moscow State University, 1987 Sc.D., Tyumen State University, 1992	Senior Research Scientist, Applied Mathematics & Statistics, and Scientific Computation
Gupta	Ashwani K.	Full Member	B.Sc., Punjab University, 1966; M.Sc.,University of Southampton, 1970; Ph.D., University of Sheffield, 1973; D.Sc.,1986.	Distinguished University Professor, Mechanical Engineering Distinguished University Professor, Chemical Physics
Gupta	Satyandra K.	Full Member	B.E., University of Roorkee, 1988; M. Technology, Indian Institute of Technology-Delhi, 1989; Ph.D.,University of Maryland-College Park, 1994.	Professor, Mechanical Engineering Professor, Systems Engineering

Gutierrez	Osvaldo	Full Member	Ph.D., UC Davis, 2009; B.S. and M.S. UCLA, 2012	Assistant Professor, Mathematics Assistant Professor, Chemistry Affiliate Professor, Chemical Physics
Guy	Madeline	Graduate Teaching		n/a, Geospatial Intelligence
Haag	Eric S.	Full Member	B.A., Oberlin College, 1990; Ph.D., Indiana University, Bloomington, 1997	Associate Professor, Biological Sciences
Hacquard	Valentine	Full Member	B.A., University of California, Los Angeles, 2000; Ph.D. Massachusetts Institute of Technology, 2006	Professor, Linguistics
Hadden	Jennifer	Full Member	B.A., Smith College, 2005; M.A., Cornell University, 2008; Ph.D., Cornell University, 2011.	Assistant Professor, Government and Politics
Hadley	Nicholas John	Full Member	Ph.D.,University of California, 1983 M.A., University of California, 1978 B.S., Yale University, 1976	Professor, Applied Mathematics & Statistics, and Scientific Computation Professor, Physics
Hafezi	Mohammad	Full Member	B.S., Ecole Polytechnique; Ph.D., Harvard, 2009.	Associate Professor, Electrical and Computer Engineering
Hagberg	James M.	Full Member	B.A.,Carthage College, 1972; M.S., University of Wisconsin-Madison, 1974; Ph.D.,1976.	Professor, Kinesiology Professor, Physical Activity
Hage	Jerald	Full Member	B.B.A., University of Wisconsin-Madison, 1955; Ph.D., Columbia University, 1963.	Professor Emeritus, Sociology
Haggh-Huglo	Barbara H.	Full Member	B.Mus., University of Illinois-Urbana/Champaign, 1978; M.Mus., 1980; Ph.D., 1988.	Professor, Ethnomusicology Professor, Music Professor, Music Education
Haghani	Ali	Full Member	B.S.,Shiraz University, 1976; M.S., Northwestern University, 1982; Ph.D., 1986. GCEN Academic Advisor for Civil and Environmental Engineering	Professor, Civil and Environmental Engineering
Hahn	Jin-Oh	Full Member	B.S., Seoul National University, 1997; M.S., Seoul National University, 1999; Ph.D., Massachusetts Institute of Technology, 2008.	Assistant Professor, Applied Mathematics & Statistics, and Scientific Computation Assistant Professor, Mechanical Engineering
